Question No : 7 of 39

The process of changing the original form of the data to a format suitable to perform a data analysis is:

Answer (Please select your correct option)

- Data editing
- Data transformation
- Data analysis
- Data accuracy

Start Time: 4:30 PM

31:00

STA630 Research Methods
Question No : 40 of 50
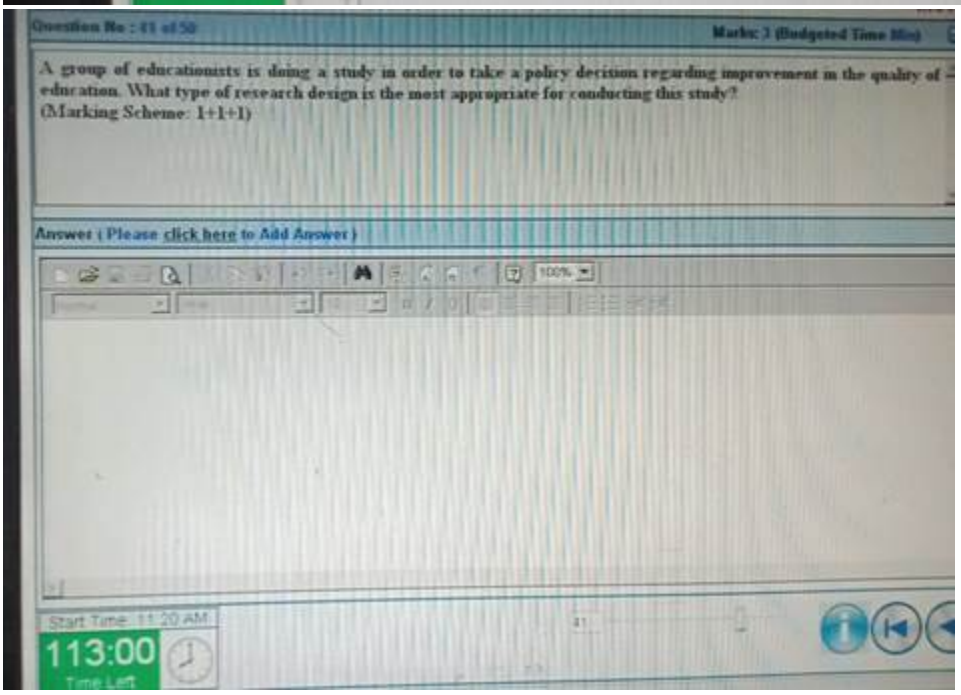
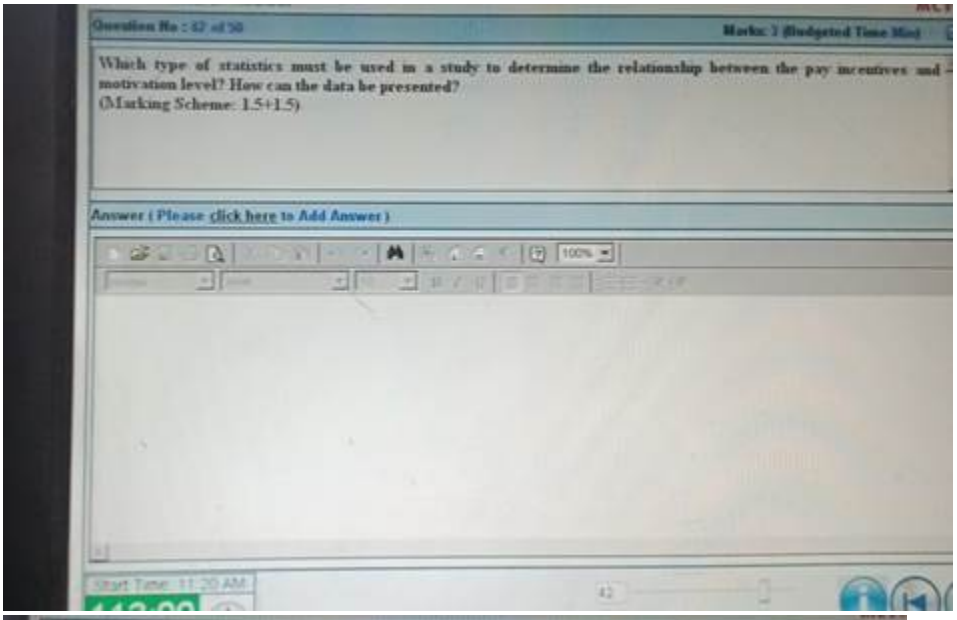
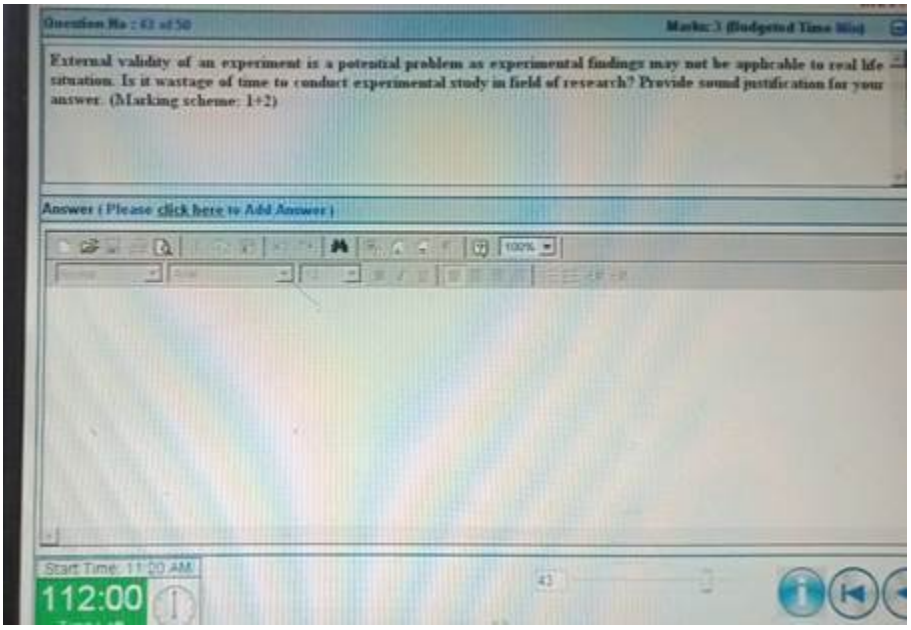
All of the following are the types of non-probability sampling technique EXCEPT
Answer (Please select your correct option)
Snowball sampling
Convenience sampling
Quota sampling
Cluster sampling
Start Time 11:20 AM
113:00
40



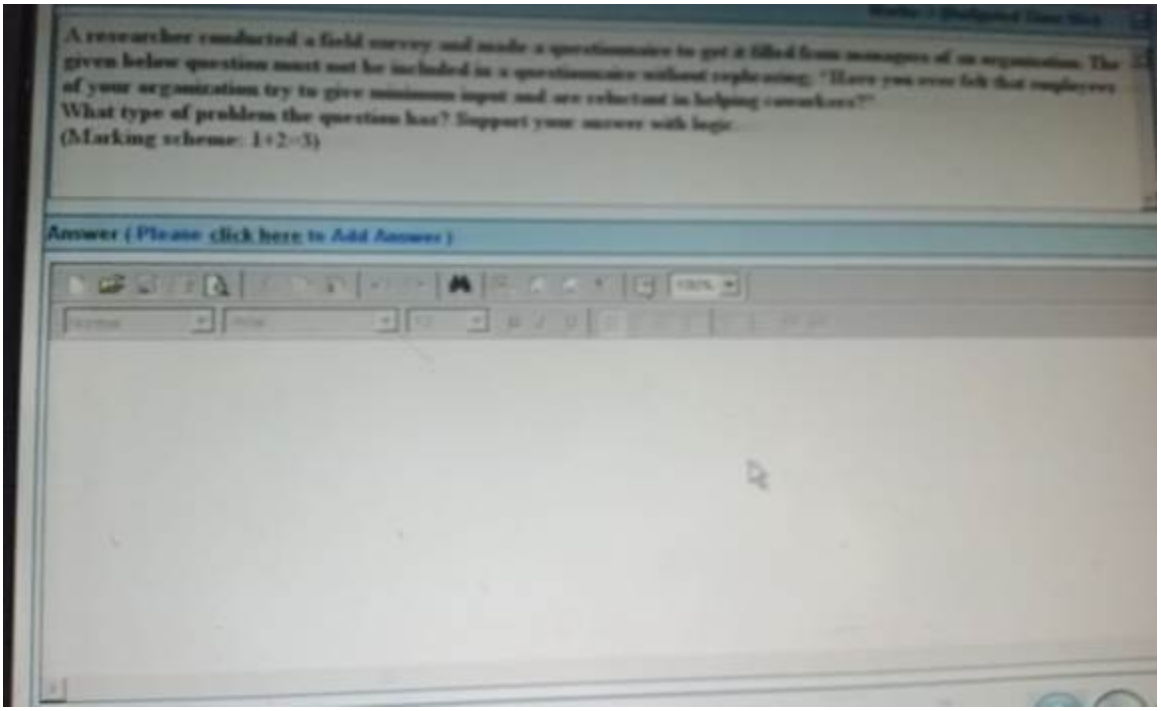
A group of educationists is doing a study in order to take a policy decision regarding improvement in the quality of education. What type of research design is the most appropriate for conducting this study?
(Marking Scheme: 1+1+1)
Answer (Please click here to Add Answer)
Start Time 11:20 AM
113:00



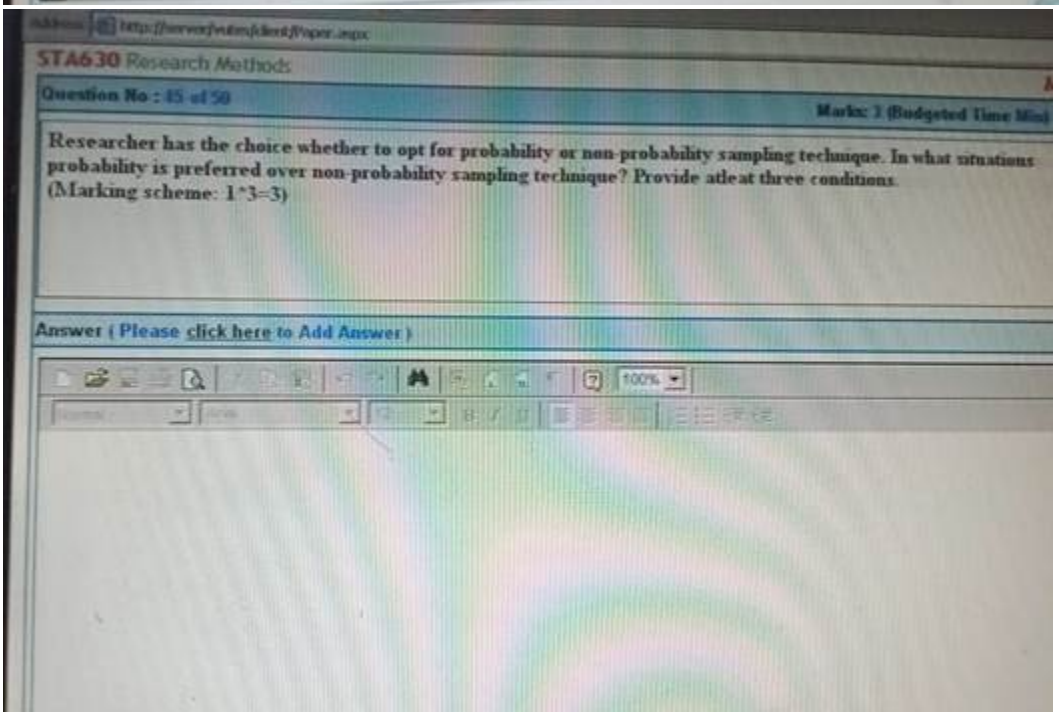
Question No : 42 of 50
Marks: 3 (Budgeted Time Min)
Which type of statistics must be used in a study to determine the relationship between the pay incentives and motivation level? How can the data be presented?
(Marking Scheme: 1.5+1.5)
Answer (Please click here to Add Answer)
100%
Start Time: 11:20 AM



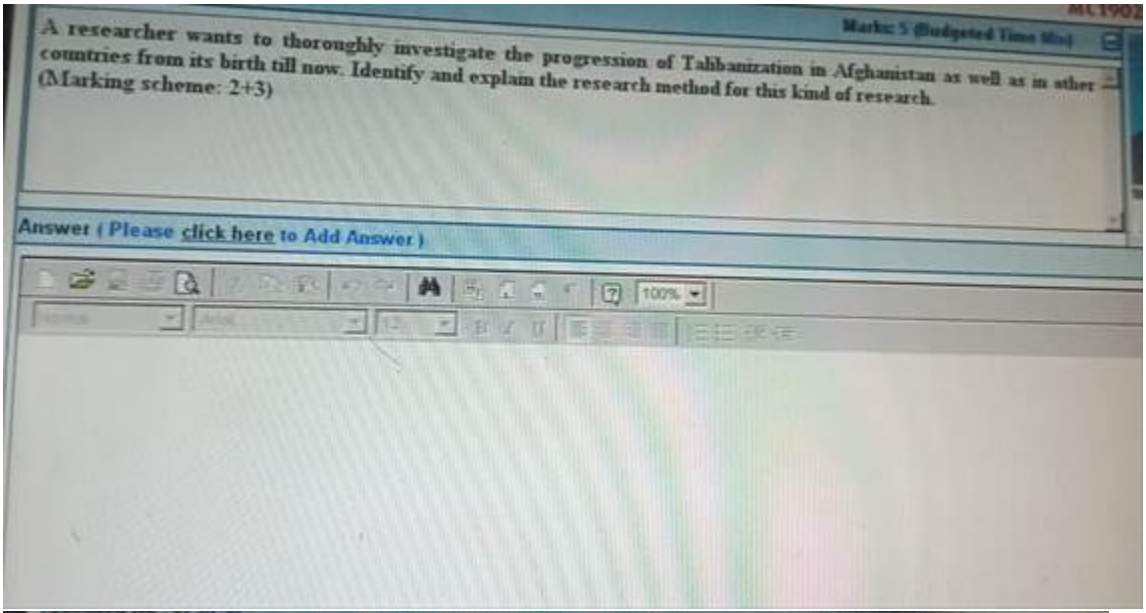
Question No : 43 of 50
Marks: 3 (Budgeted Time Min)
External validity of an experiment is a potential problem as experimental findings may not be applicable to real life situation. Is it wastage of time to conduct experimental study in field of research? Provide sound justification for your answer. (Marking scheme: 1+2)
Answer (Please click here to Add Answer)
100%
Start Time: 11:20 AM
112:00



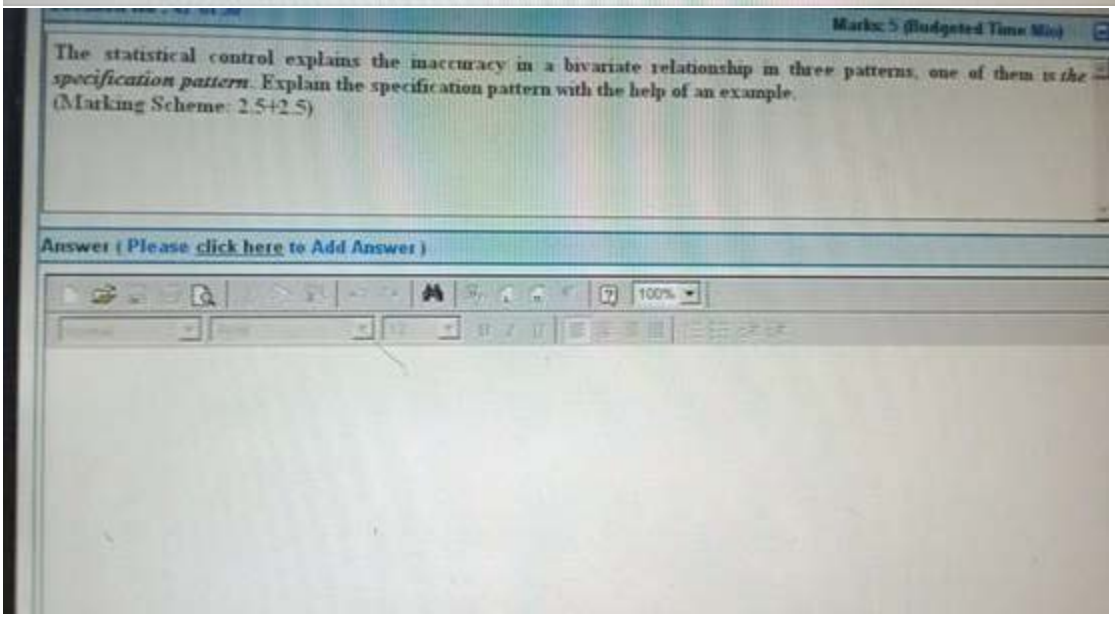
A researcher conducted a field survey and made a questionnaire to get it filled from managers of an organization. The given below question must not be included in a questionnaire without rephrasing: "Have you ever felt that employees of your organization try to give minimum input and are reluctant in helping coworkers?"
What type of problem the question has? Support your answer with logic.
(Marking scheme: 1+2=3)
Answer (Please click here to Add Answer)



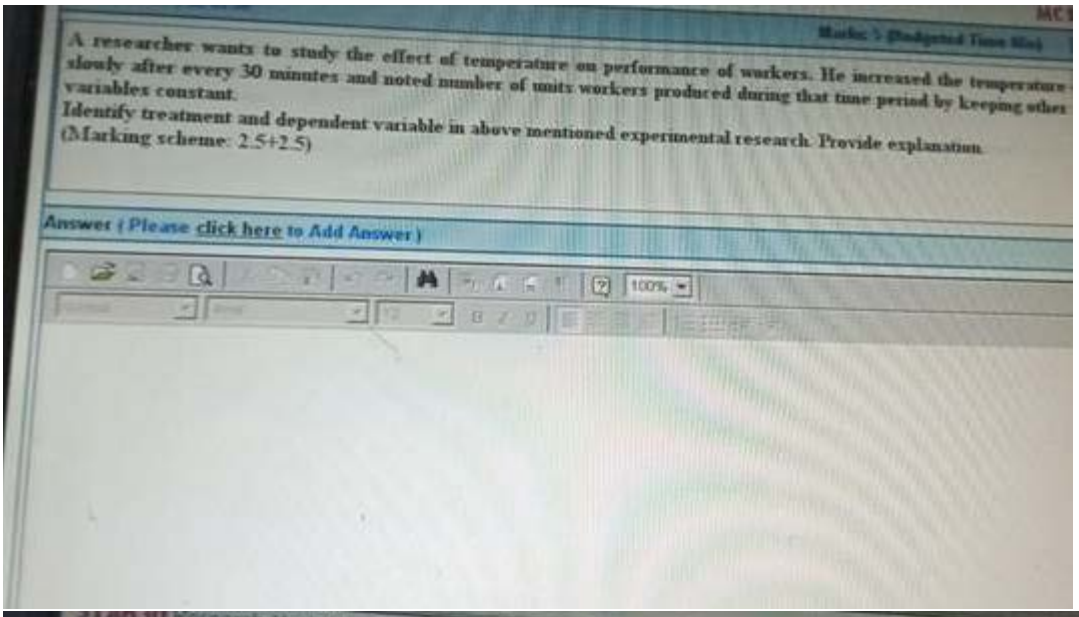
STA630 Research Methods
Question No : 85 of 50
Marks: 3 (Budgeted Time Min)
Researcher has the choice whether to opt for probability or non-probability sampling technique. In what situations probability is preferred over non-probability sampling technique? Provide atleat three conditions.
(Marking scheme: 1*3=3)
Answer (Please click here to Add Answer)



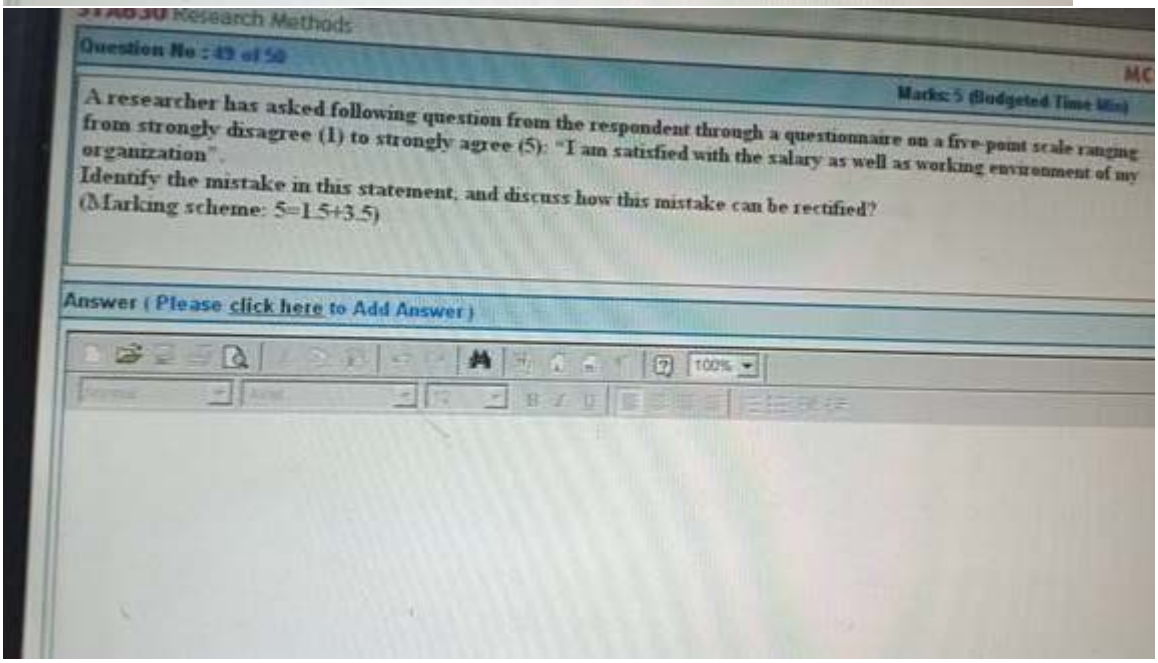
Marks: 5 (Budgeted Time Min)
A researcher wants to thoroughly investigate the progression of Tahbanization in Afghanistan as well as in other countries from its birth till now. Identify and explain the research method for this kind of research.
(Marking scheme: 2+3)
Answer (Please click here to Add Answer)
100%



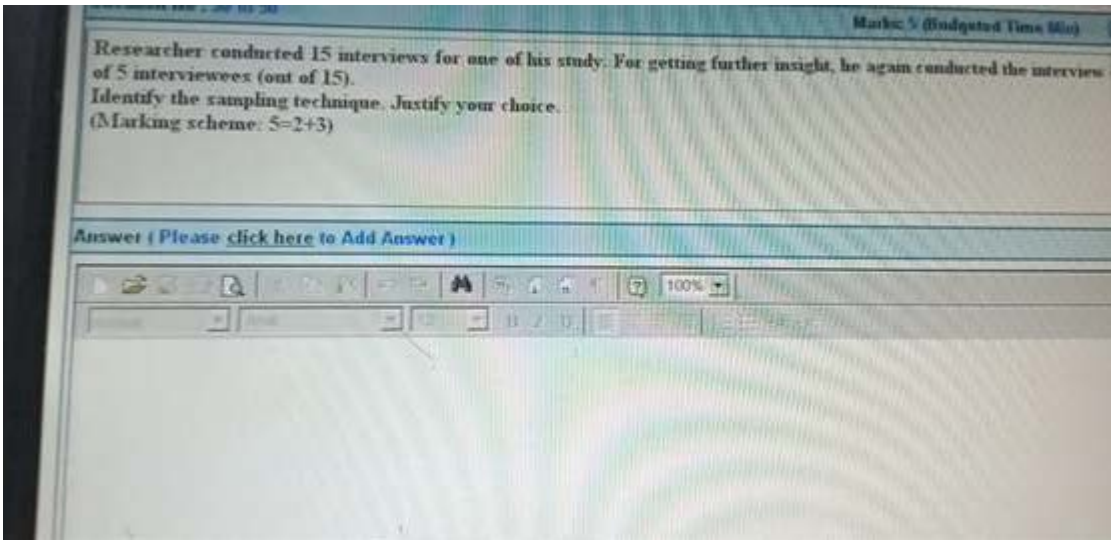
Marks: 5 (Budgeted Time Min)
The statistical control explains the inaccuracy in a bivariate relationship in three patterns, one of them is *the specification pattern*. Explain the specification pattern with the help of an example.
(Marking Scheme: 2.5+2.5)
Answer (Please click here to Add Answer)
100%



A researcher wants to study the effect of temperature on performance of workers. He increased the temperature slowly after every 30 minutes and noted number of units workers produced during that time period by keeping other variables constant.
Identify treatment and dependent variable in above mentioned experimental research. Provide explanation.
(Marking scheme: 2.5+2.5)
Answer (Please click here to Add Answer)



Research Methods
Question No : 49 of 50
A researcher has asked following question from the respondent through a questionnaire on a five-point scale ranging from strongly disagree (1) to strongly agree (5): "I am satisfied with the salary as well as working environment of my organization".
Identify the mistake in this statement, and discuss how this mistake can be rectified?
(Marking scheme: 5=1.5+3.5)
Answer (Please click here to Add Answer)



Researcher conducted 15 interviews for one of his study. For getting further insight, he again conducted the interviews of 5 interviewees (out of 15).
Identify the sampling technique. Justify your choice.
(Marking scheme: 5=2+3)
Answer (Please click here to Add Answer)

STA630 Research Methods

Question No : 1 of 50

Which of the following occurs when one partial replicates the initial bivariate relationship but other partials do not?

Page 191

Answer (Please select your correct option)

- Suppressor variable pattern
- Replication pattern
- Specification pattern
- Negative linear relationship

STA630 Research Methods

Question No : 2 of 50

Which of the following represents this reference:

"King, M. (2000). *Wrestling with the angel: A life of Janet Frame.* Auckland, New Zealand: Viking."

Answer (Please select your correct option)

- Book by more than one author
- Edited book
- Book by a single author
- Journal Article

STA630 Research Methods

Question No : 3 of 50

All of the following aspects are evaluated during pilot testing EXCEPT?

page 108

Answer (Please select your correct option)

- Sampling procedure can be checked
- Discovering errors in the instrument
- Authenticity of the literature review can be checked
- Staffing and activities of research team can be checked

STA630 Research Methods

Question No : 4 of 50

A unit about which information is collected and which provides the basis of analysis is known as:

Page 116

Answer (Please select your correct option)

- Sample
- Element
- Population
- Record

STA630 Research Methods

Question No : 5 of 50

Cluster sampling has much lower_____ than those of other probability sampling designs.

Page 125

Answer (Please select your correct option)

- Reliability
- Cost
- Accuracy
- Correctness

Start Time 11:00 AM

STA630 Research Methods

Question No : 6 of 50

The technical term used for an unanswered question on an otherwise complete questionnaire is called:

Page 128

Answer (Please select your correct option)

- Item non-response
- Item unanswered
- Blank value
- Plug value

STA630 Research Methods

Question No : 7 of 50

Which of the following is NOT included in data transformation?

Page 132

Answer (Please select your correct option)

- Changing data from their original form to a format that is more suitable
- Collapsing the number of categories
- Creating new variables
- Entering data in software

STA630 Research Methods

Question No : 8 of 50

All the items in a scale or index fitting together, or measuring a single construct are known as:

Page 133

Answer (Please select your correct option)

- Reduction
- Condensing
- Rehability
- Undimensionality

STA630 Research Methods

Question No : 9 of 50

Statistical Package for the Social Sciences (SPSS) is used for:

Page 136

Answer (Please select your correct option)

- Tabulation and statistical analysis
- Developing theoretical framework
- Writing references
- Contacting respondents

STA630 Research Methods

Question No : 10 of 50

How many variables do univariate variable describe?

Page 137

Answer (Please select your correct option)

- One
- Two
- Three
- Many

STA630 Research Methods

Question No : 1 of 50

Which of the following occurs when one partial replicates the initial bivariate relationship but other partials do not?

page 191

Answer (Please select your correct option)

- Suppressor variable pattern
- Replication pattern
- Specification pattern
- Negative linear relationship
