In random sampling, the probability of selecting an item from the population is

Select the correct option

- Undecided
- Unknown
- Zero
- Known (selected)

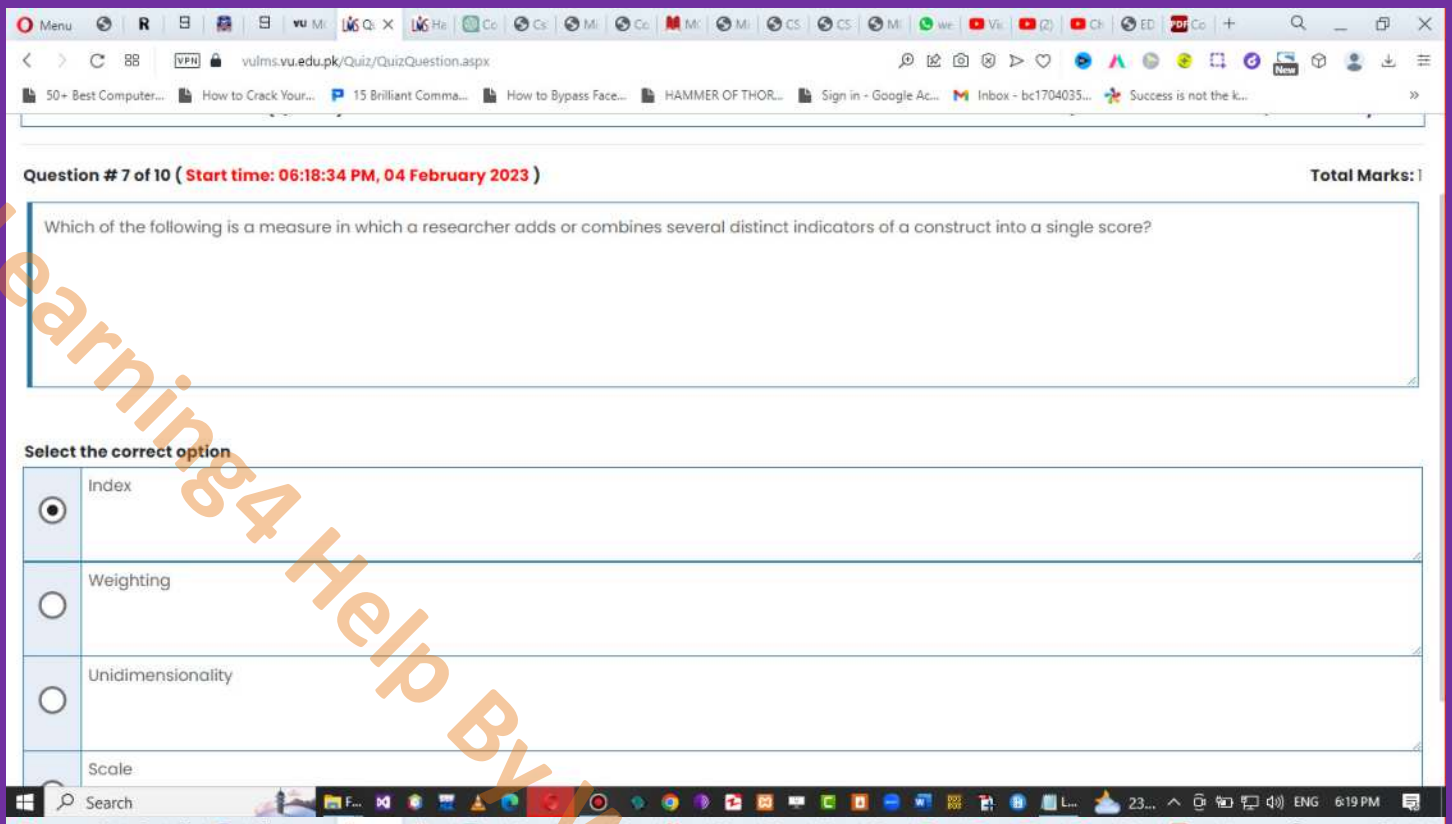

Question # 8 of 10 (Start time: 06:19:09 PM, 04 February 2023) **Total Marks:** 1

In stratified sampling, strata are:

Select the correct option

- Internally heterogeneous
- Internally homogenous (selected)
- None of the given option
- Externally homogenous

Learning4 Help By Waqas Qureshi 03421718143

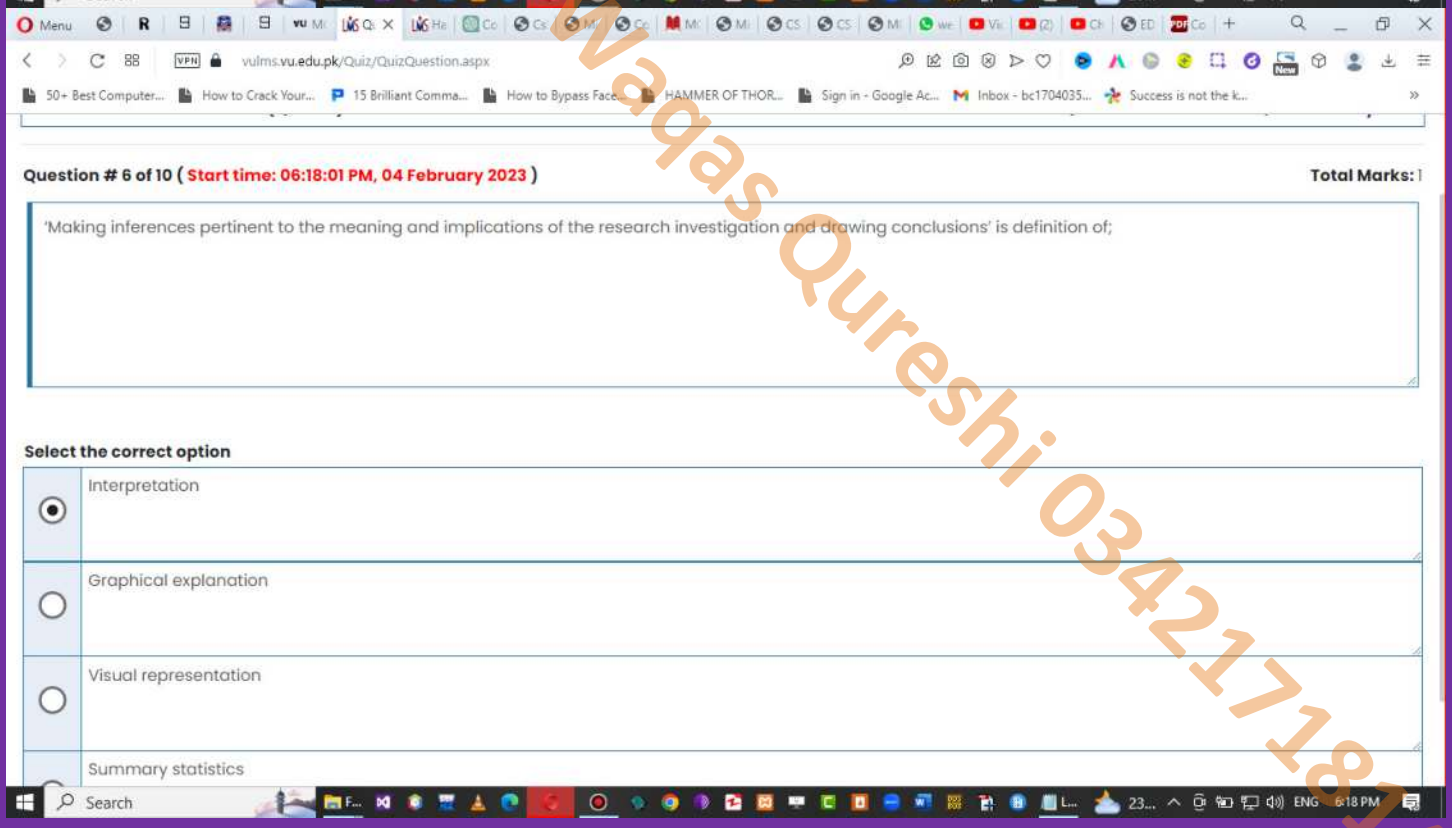

Question # 7 of 10 (Start time: 06:18:34 PM, 04 February 2023) **Total Marks: 1**

Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?

Select the correct option

- (•) Index
- ( ) Weighting
- ( ) Unidimensionality
- ( ) Scale

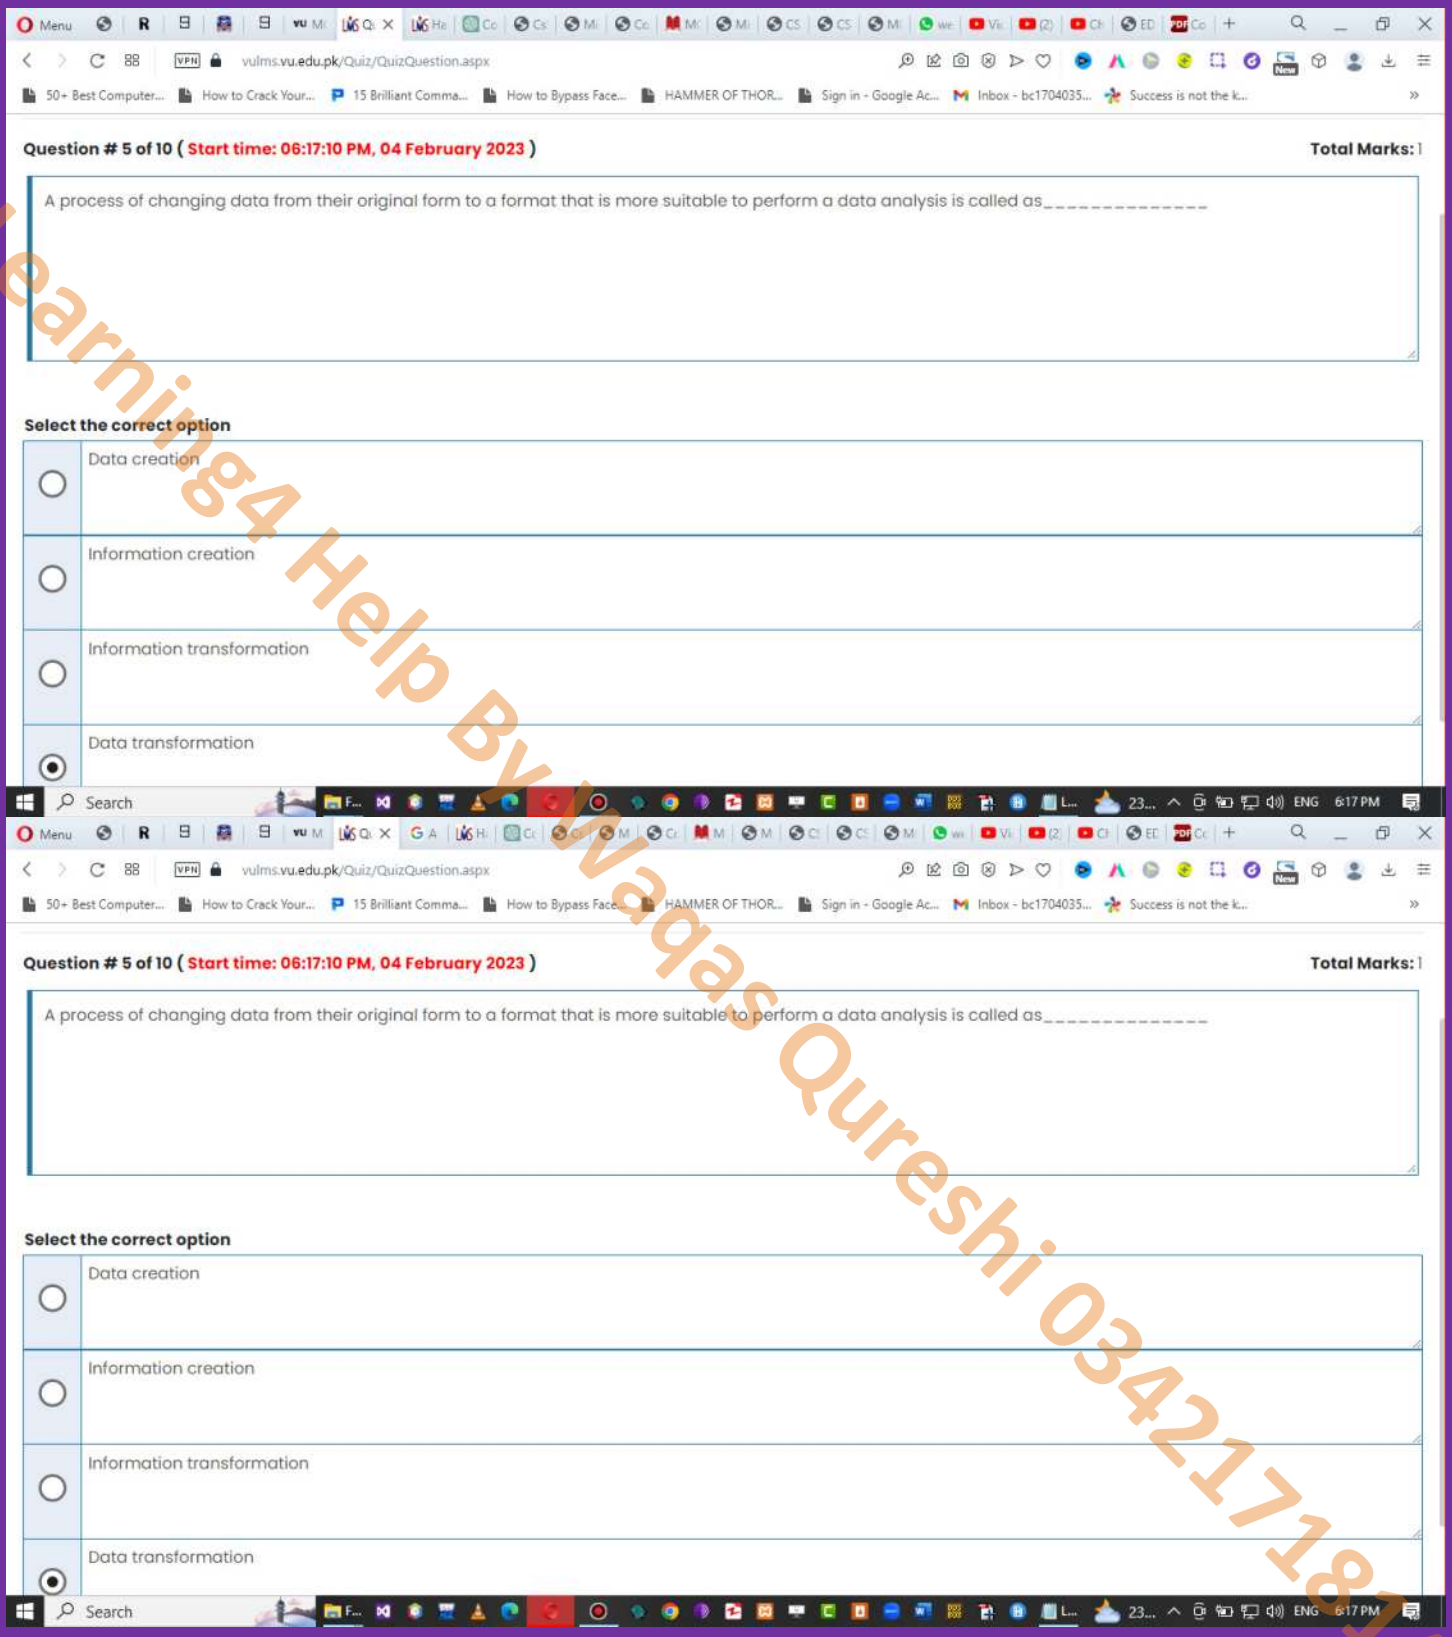

Question # 6 of 10 (Start time: 06:18:01 PM, 04 February 2023) **Total Marks: 1**

'Making inferences pertinent to the meaning and implications of the research investigation and drawing conclusions' is definition of;

Select the correct option

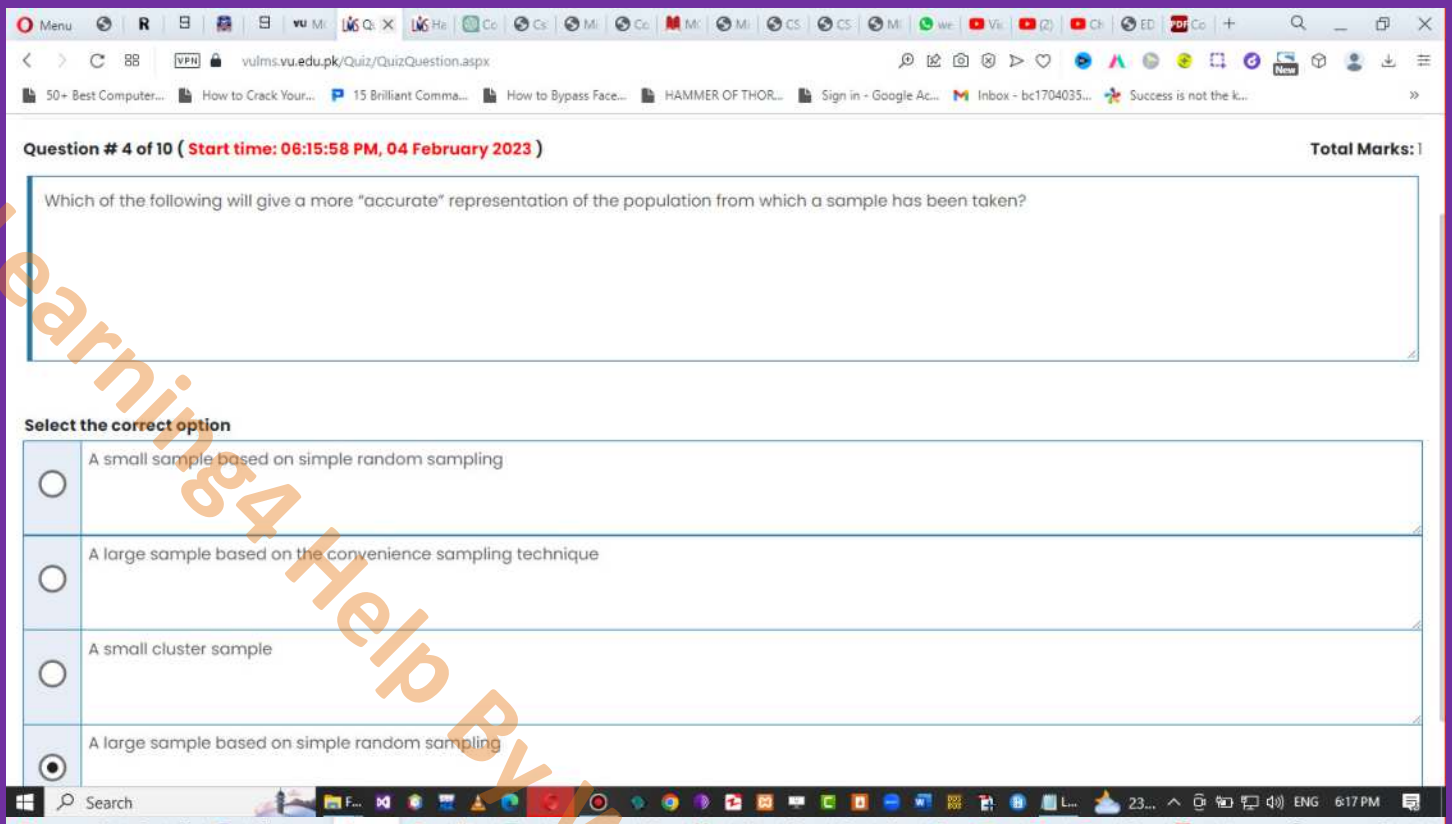

- (•) Interpretation
- ( ) Graphical explanation
- ( ) Visual representation
- ( ) Summary statistics

vulms.vu.edu.pk/Quiz/QuizQuestion.aspx
Question # 5 of 10 (Start time: 06:17:10 PM, 04 February 2023)
Total Marks: 1
A process of changing data from their original form to a format that is more suitable to perform a data analysis is called as_____
Select the correct option
Data creation
Information creation
Information transformation
Data transformation
Search
ENG 6:17 PM

Question # 4 of 10 (Start time: 06:15:58 PM, 04 February 2023) **Total Marks: 1**

Which of the following will give a more "accurate" representation of the population from which a sample has been taken?

Select the correct option

- ○ A small sample based on simple random sampling
- ○ A large sample based on the convenience sampling technique
- ○ A small cluster sample
- ◉ A large sample based on simple random sampling

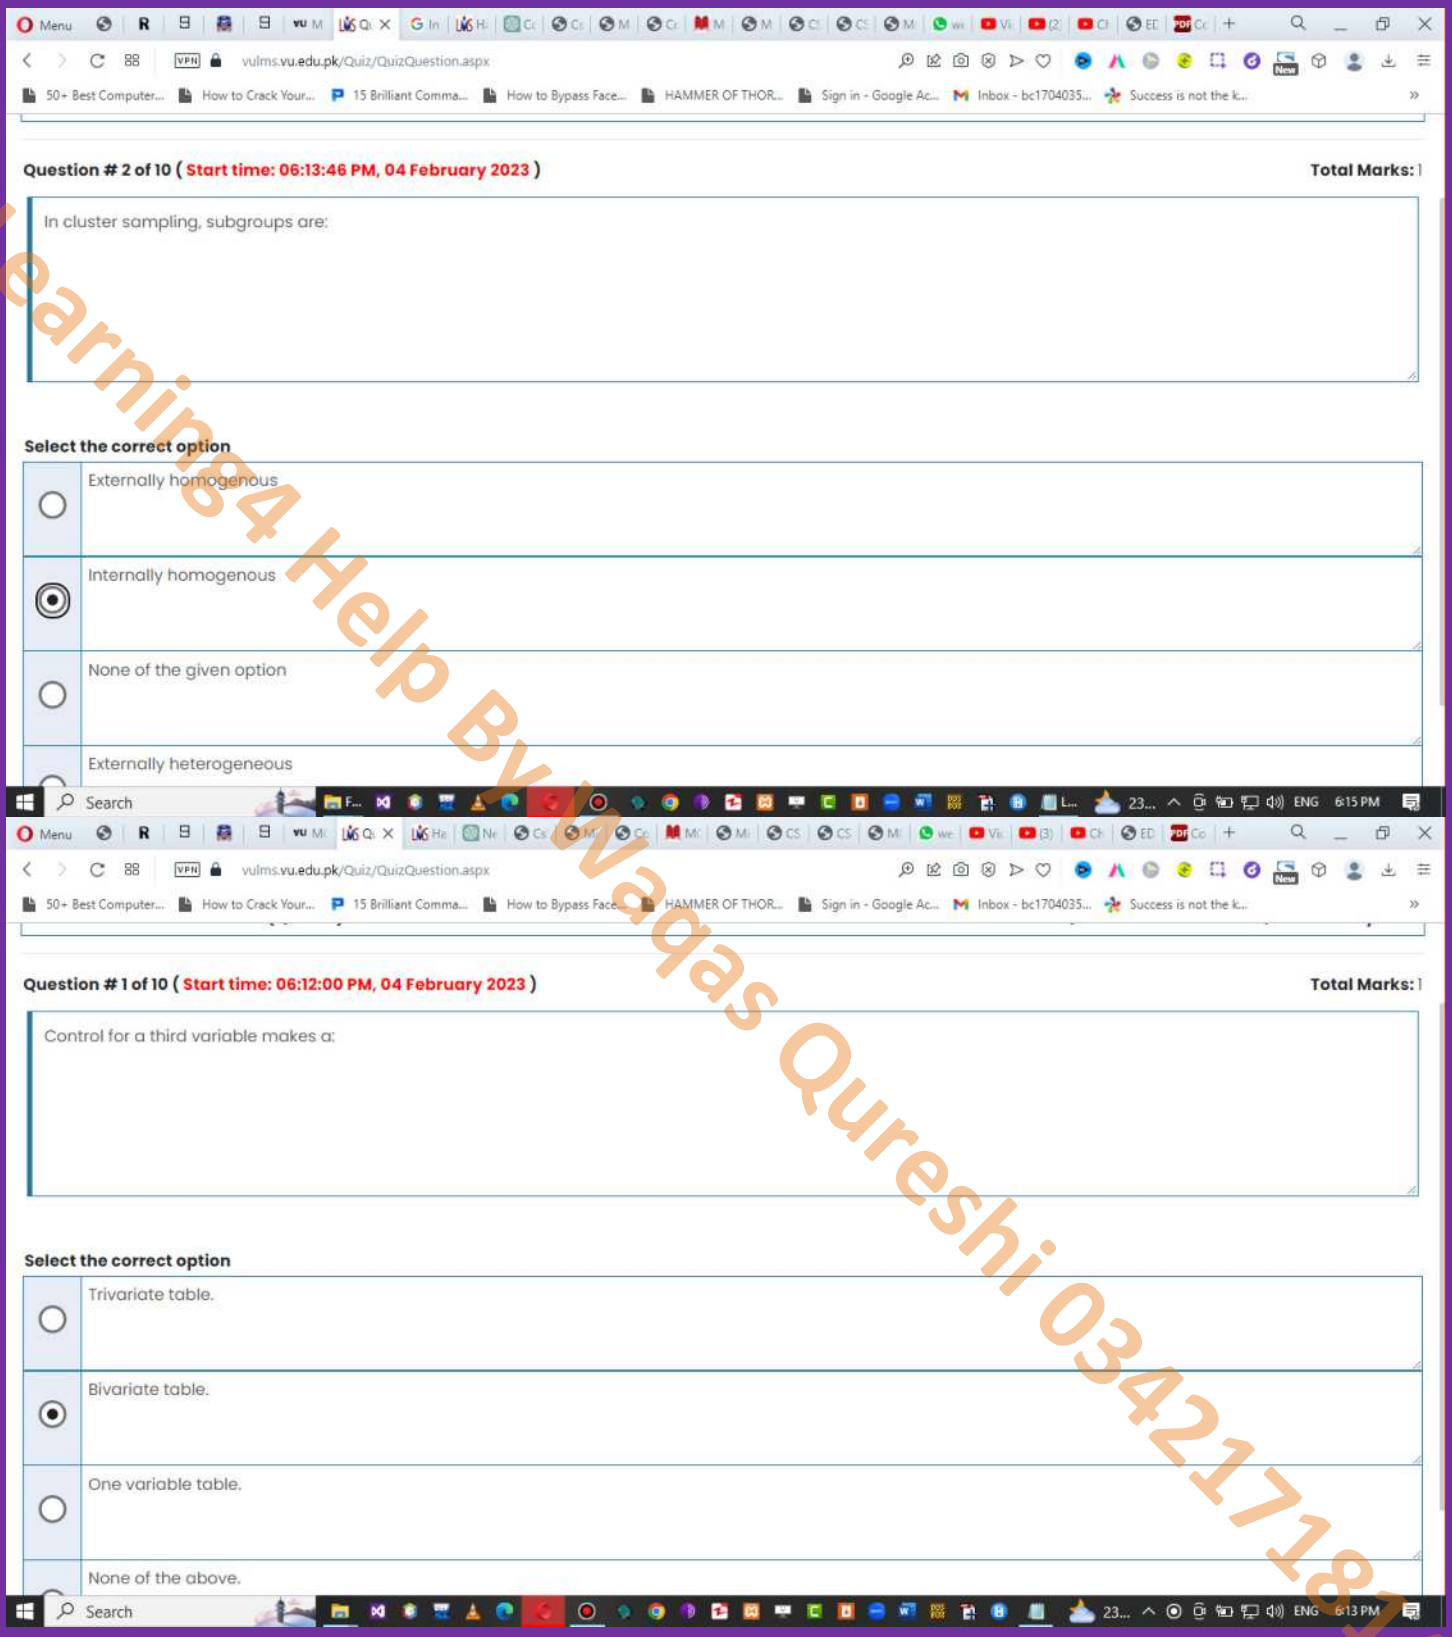

Question # 3 of 10 (Start time: 06:15:25 PM, 04 February 2023) **Total Marks: 1**

If groups of participants are selected to represent sub-groups in the population (e.g. such as selecting an entire class of management students to be compared to a group of economics students), this is known as...

Select the correct option

- ○ Haphazard sampling
- ○ Simple random sampling
- ◉ Cluster sampling
- ○ Opportunity sampling

Learning4 Help By Waqas Qureshi 03421718143

Question # 2 of 10 (Start time: 06:13:46 PM, 04 February 2023) Total Marks: 1

In cluster sampling, subgroups are:

Select the correct option

- Externally homogenous
- Internally homogenous
- None of the given option
- Externally heterogeneous

Question # 1 of 10 (Start time: 06:12:00 PM, 04 February 2023) Total Marks: 1

Control for a third variable makes a:

Select the correct option

- Trivariate table.
- Bivariate table.
- One variable table.
- None of the above.

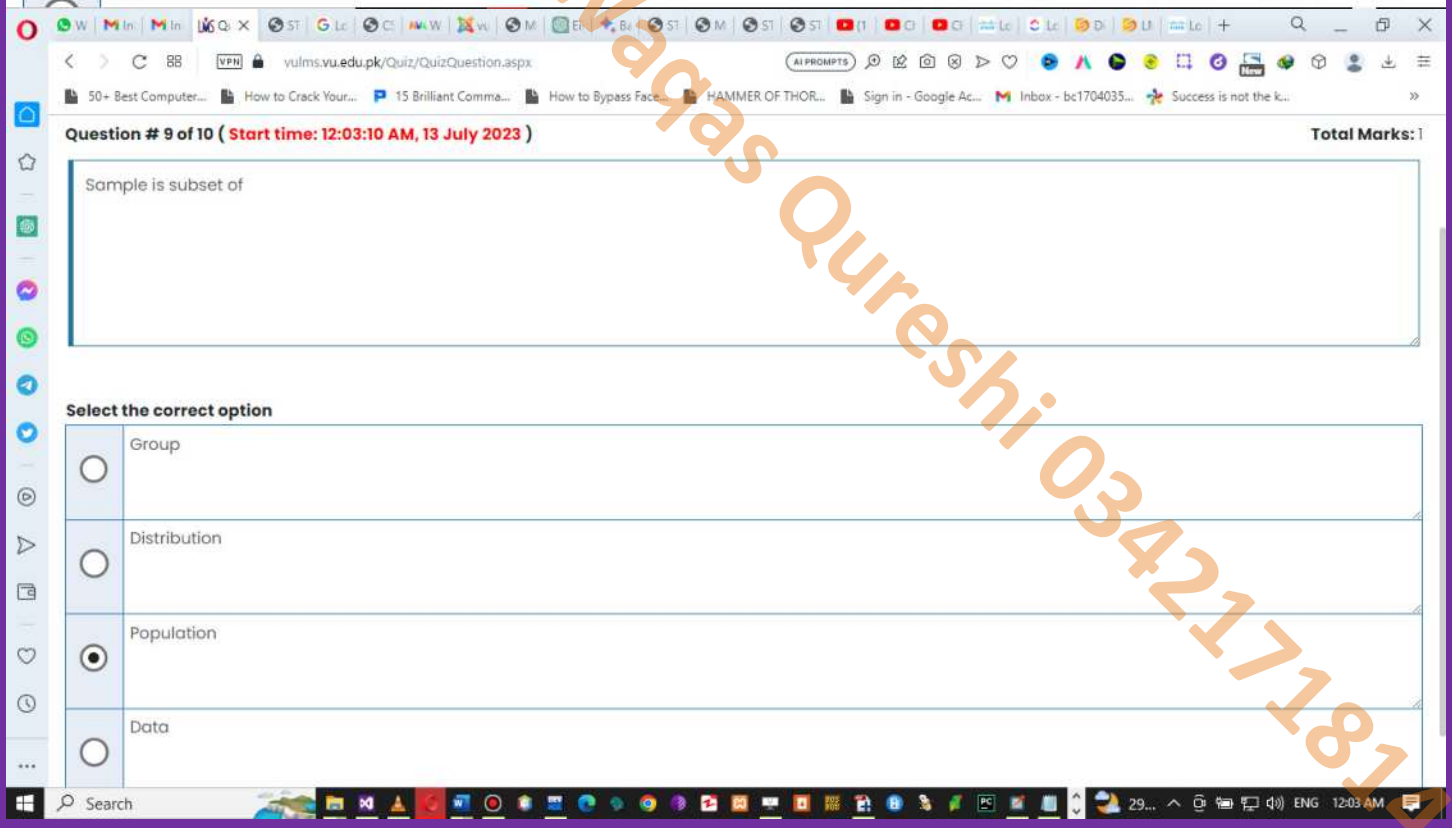

Learning4 Help By Waqas Qureshi 03421718143

Question # 1 of 10 (Start time: 11:52:36 PM, 12 July 2023)

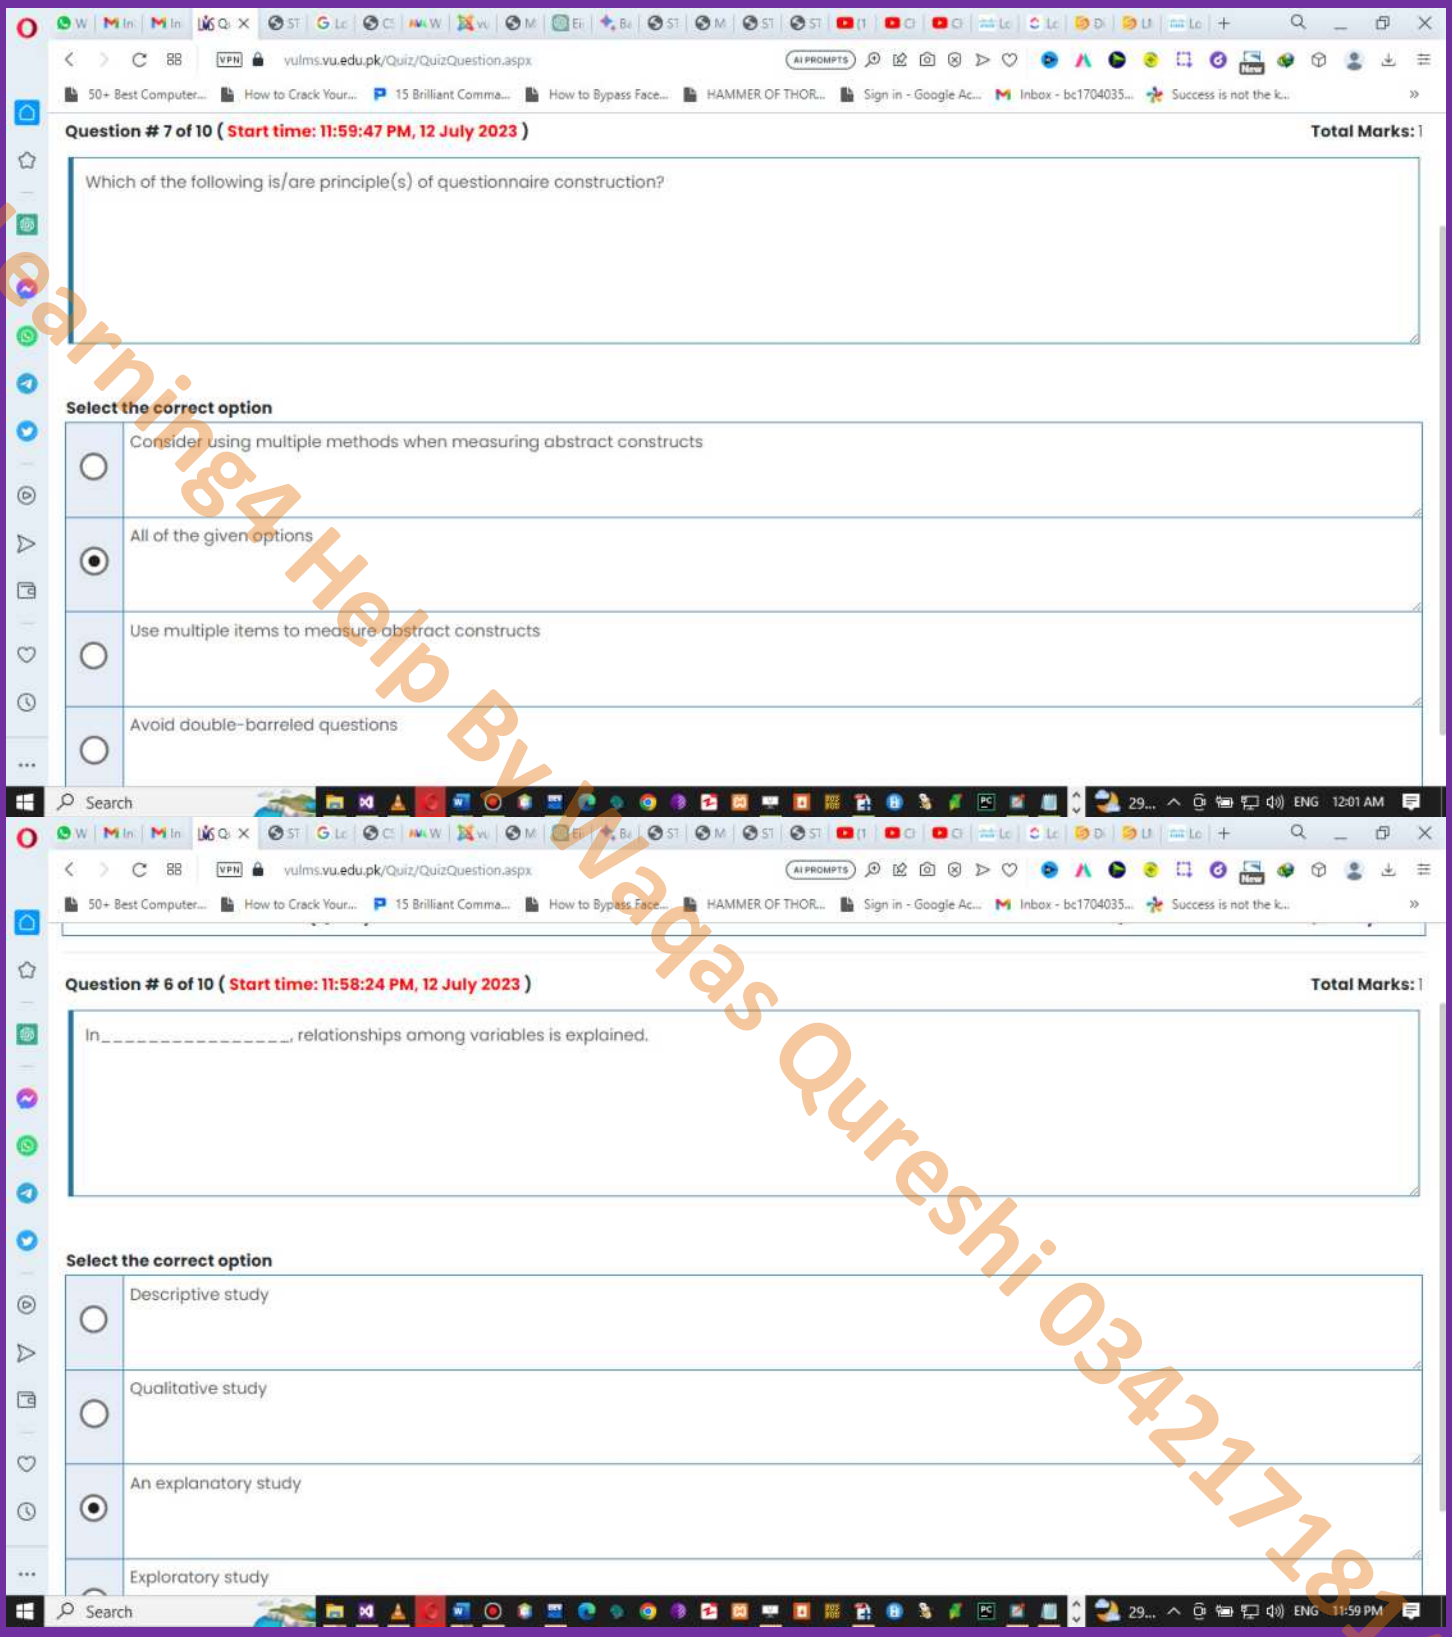

A numerical value calculated from population is called

Select the correct option

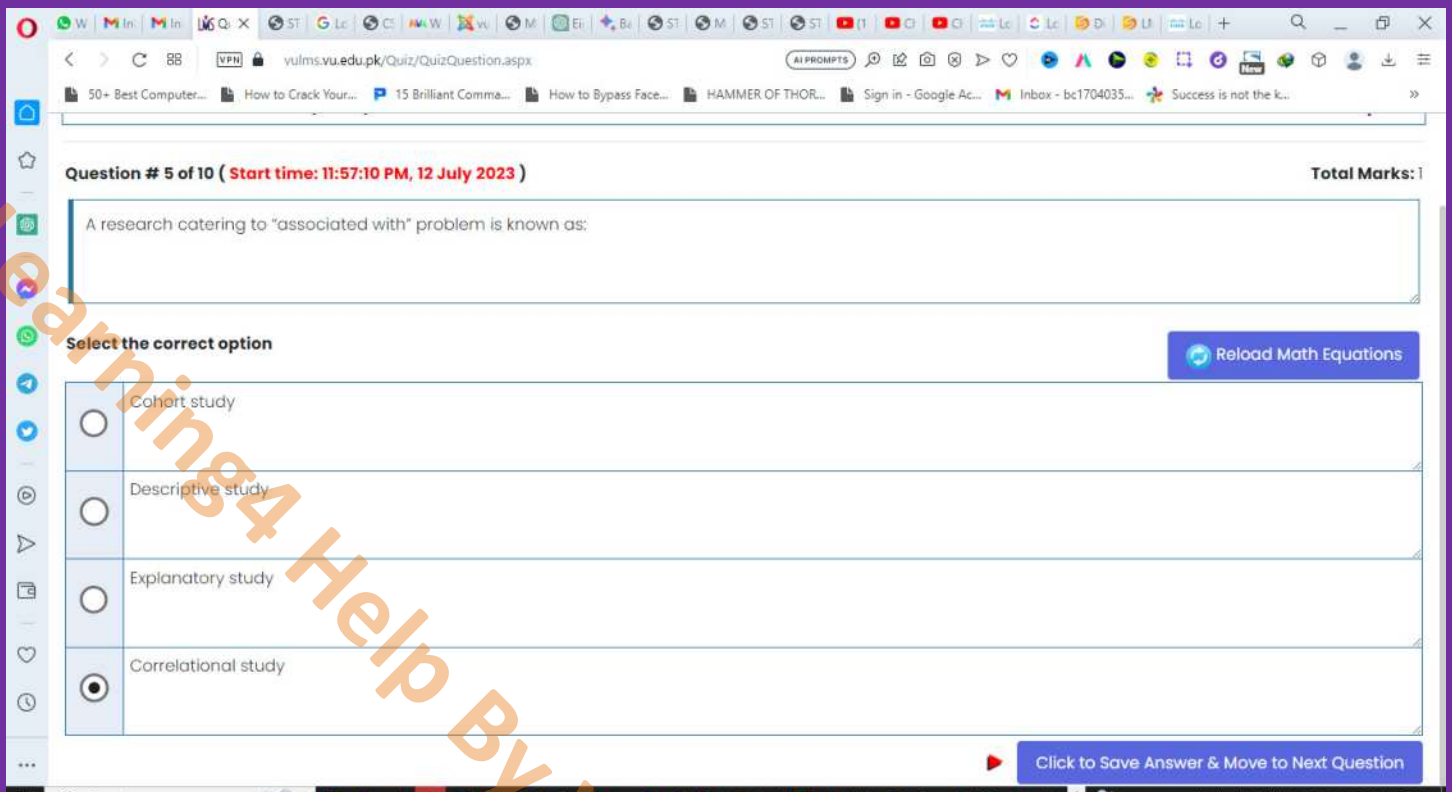

- ○ Sampling Error
- ○ Error
- ◉ Parameter
- ○ Bias

Learning4 Help By Waqas Qureshi 03421718143

Question # 5 of 10 (Start time: 11:57:10 PM, 12 July 2023) **Total Marks:** 1

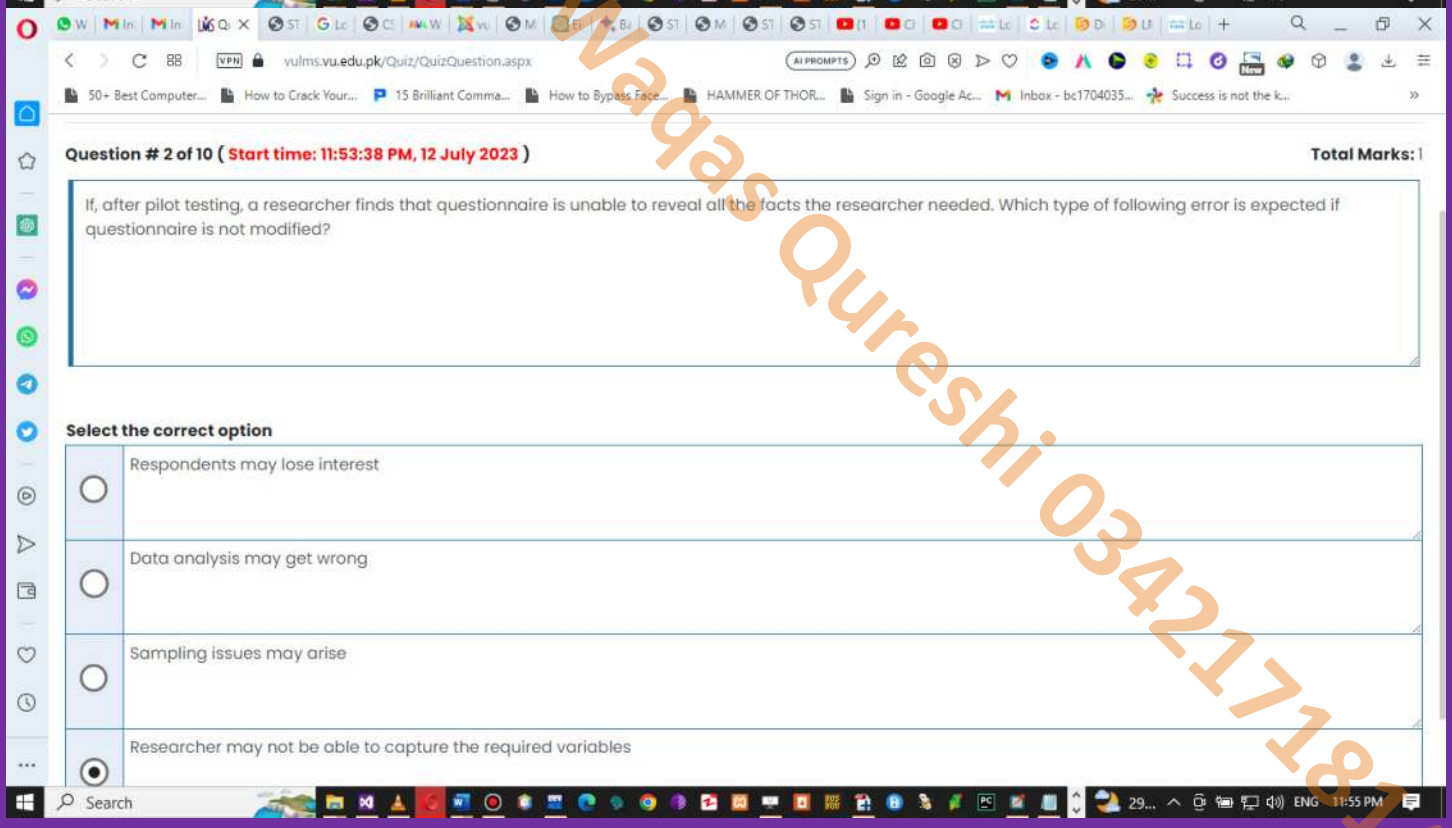

A research catering to "associated with" problem is known as:

Select the correct option

Reload Math Equations

- Cohort study
- Descriptive study
- Explanatory study
- (•) Correlational study

Click to Save Answer & Move to Next Question

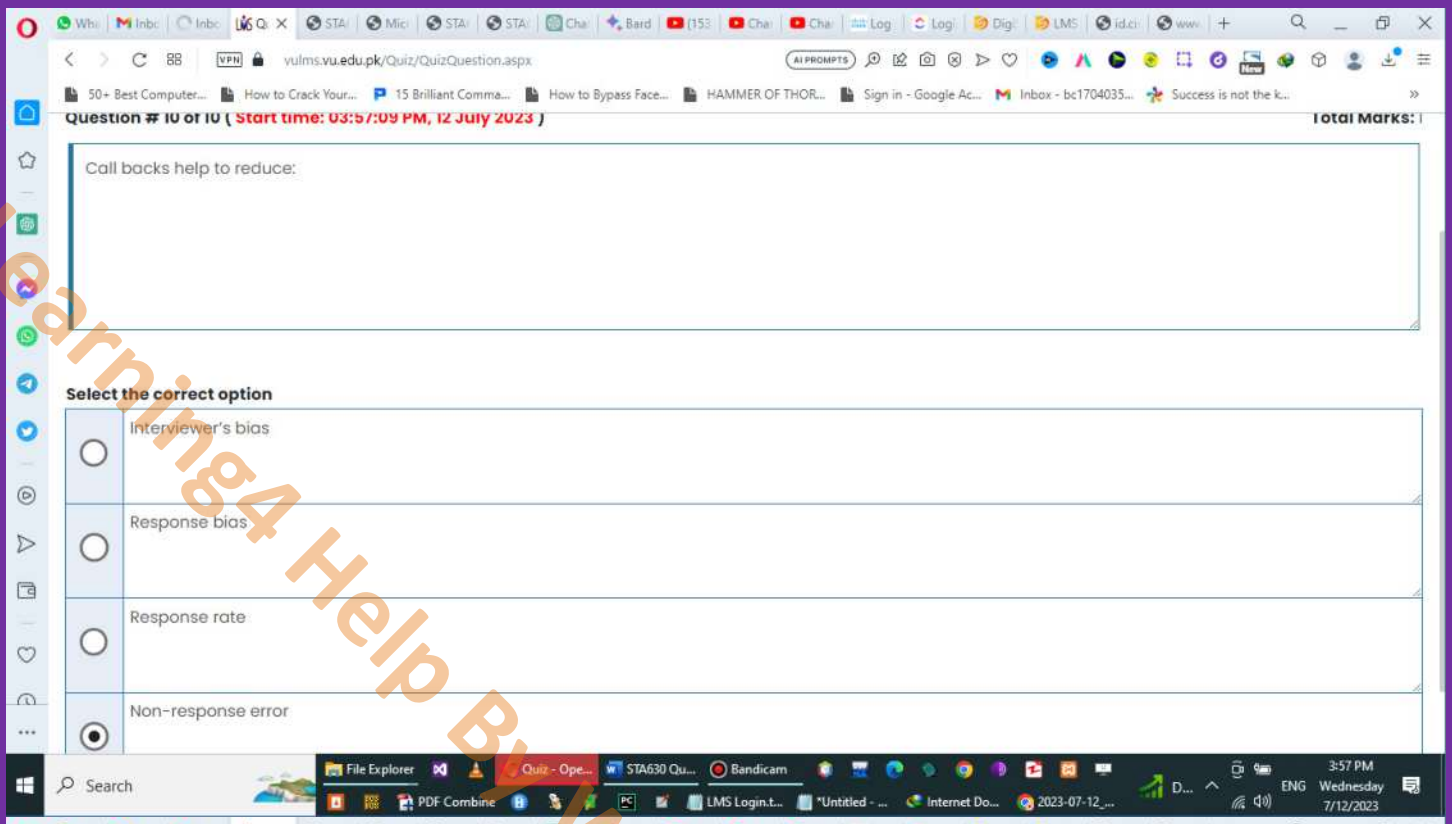

Question # 2 of 10 (Start time: 11:53:38 PM, 12 July 2023) **Total Marks:** 1

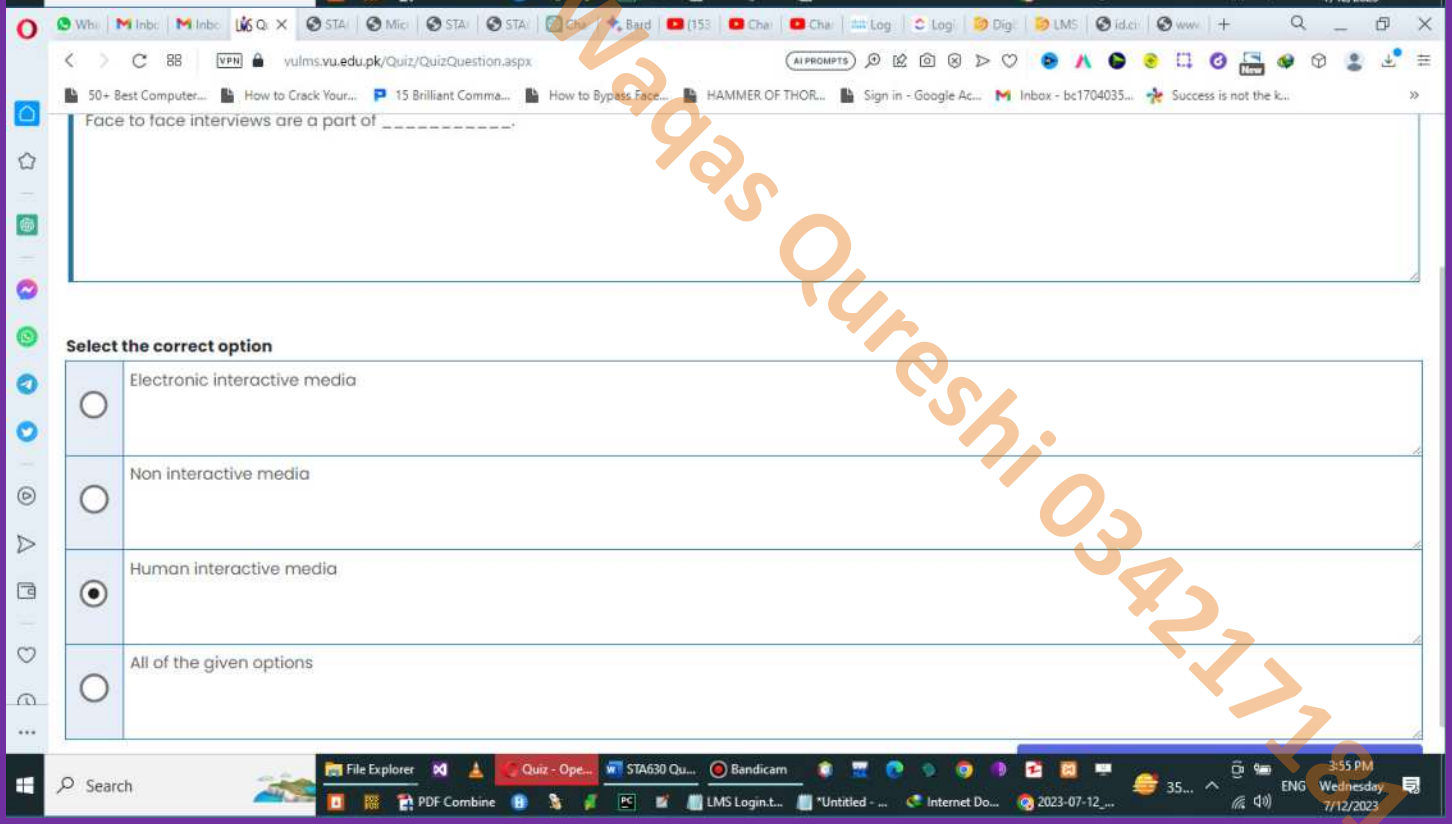

If, after pilot testing, a researcher finds that questionnaire is unable to reveal all the facts the researcher needed. Which type of following error is expected if questionnaire is not modified?

Select the correct option

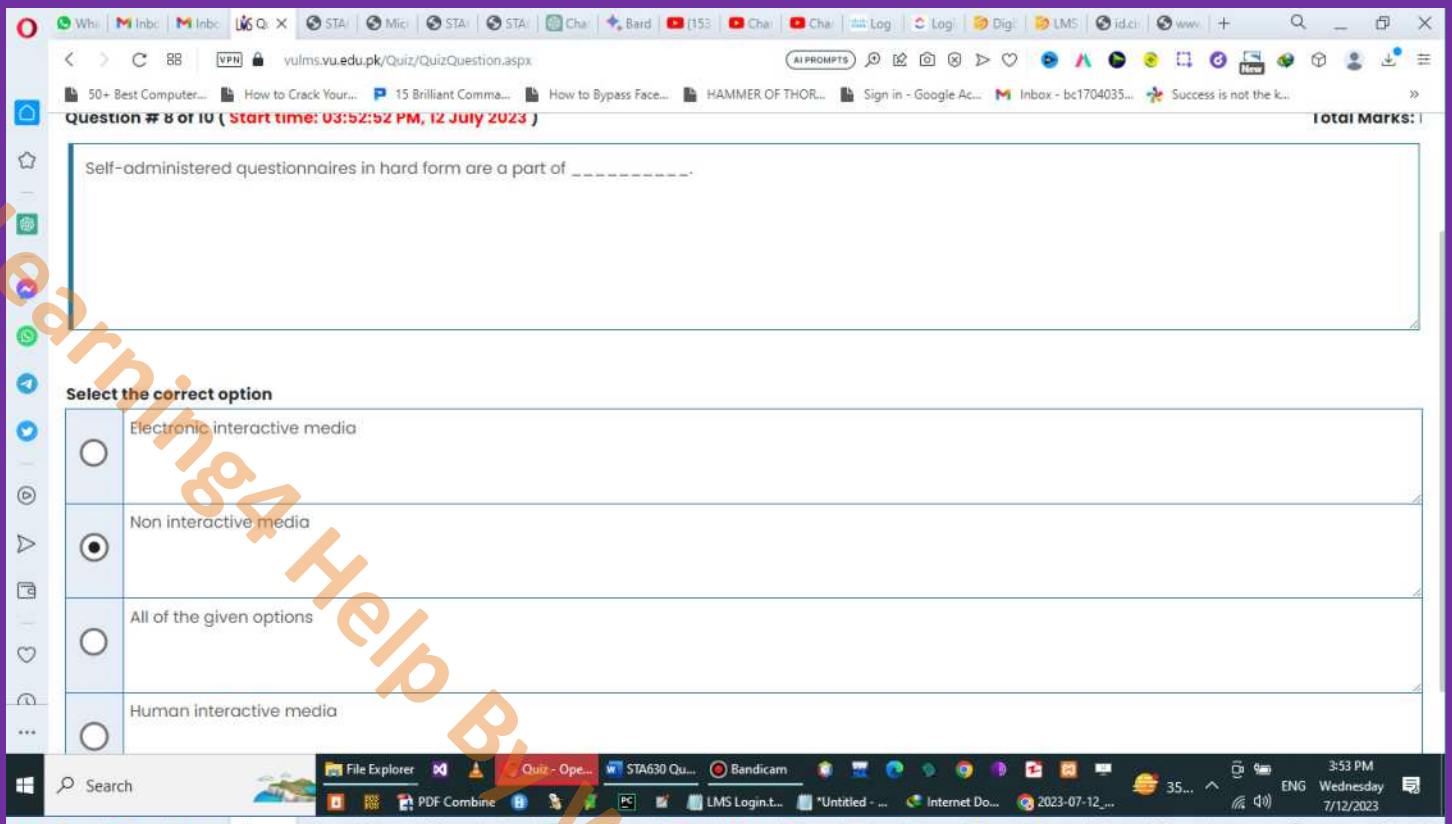

- Respondents may lose interest
- Data analysis may get wrong
- Sampling issues may arise
- (•) Researcher may not be able to capture the required variables

Question # 2 of 10 (Start time: 01:09:56 PM, 12 July 2023) Total Marks: 1

Cover letter must include the following information, except:

Select the correct option

- Importance of research topic which is going to be conducted
- Motivation for the respondent
- Data collecting tools
- How was the respondent selected?

vulms.vu.edu.pk/Quiz/QuizQuestion.aspx

Question # 3 of 10 (Start time: 01:11:39 PM, 12 July 2023) Total Marks: 1

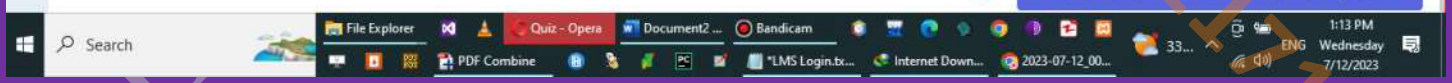

Which of the following is an advantage of attaching a cover letter with a questionnaire?

Select the correct option

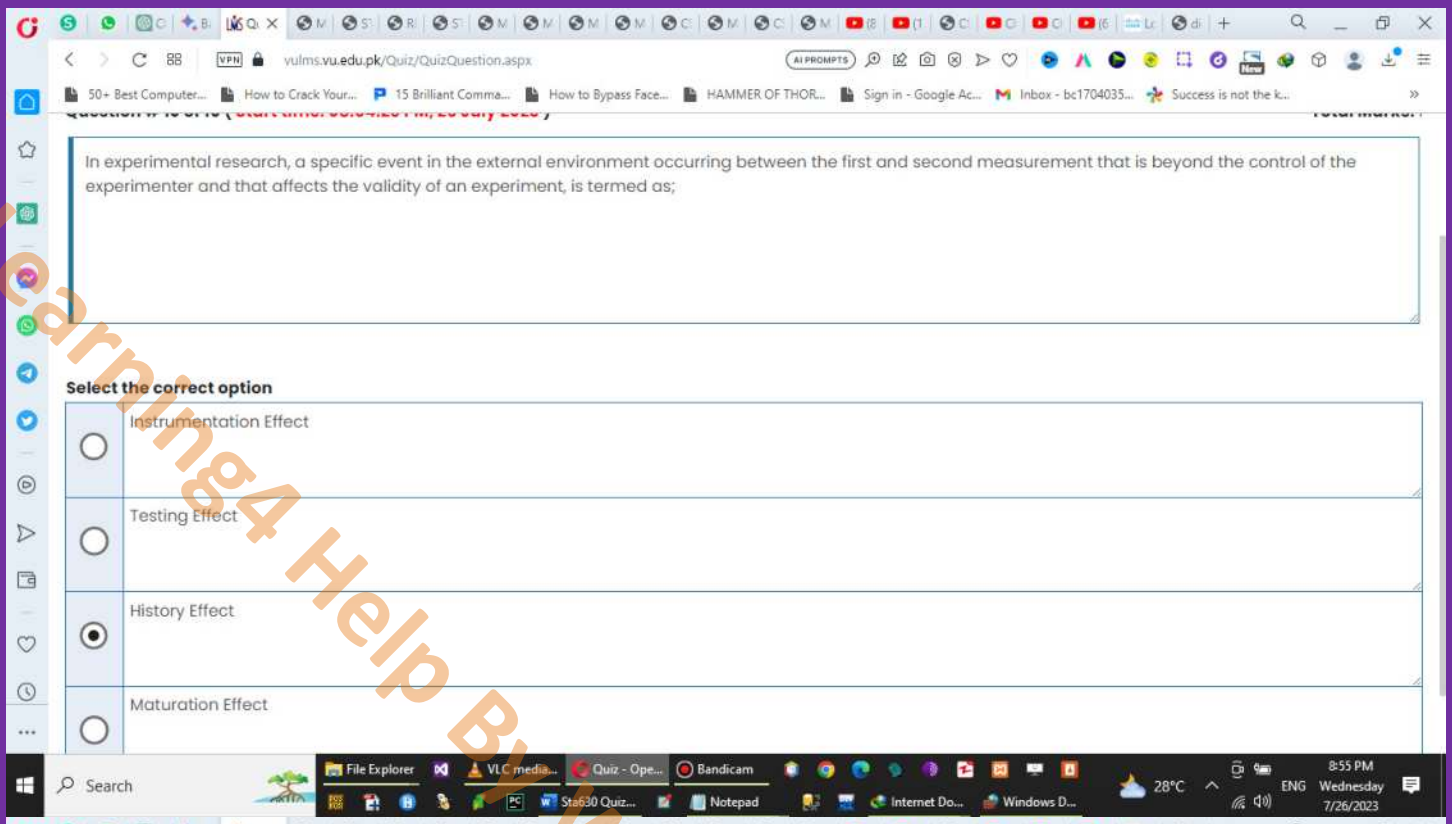

Reload Math Equations

- It makes the research findings authentic
- It motivates the respondents to respond
- It makes easier to locate respondents
- It helps researcher to do study easily

In experimental research, a specific event in the external environment occurring between the first and second measurement that is beyond the control of the experimenter and that affects the validity of an experiment, is termed as;

Select the correct option

- Instrumentation Effect
- Testing Effect
- History Effect
- Maturation Effect

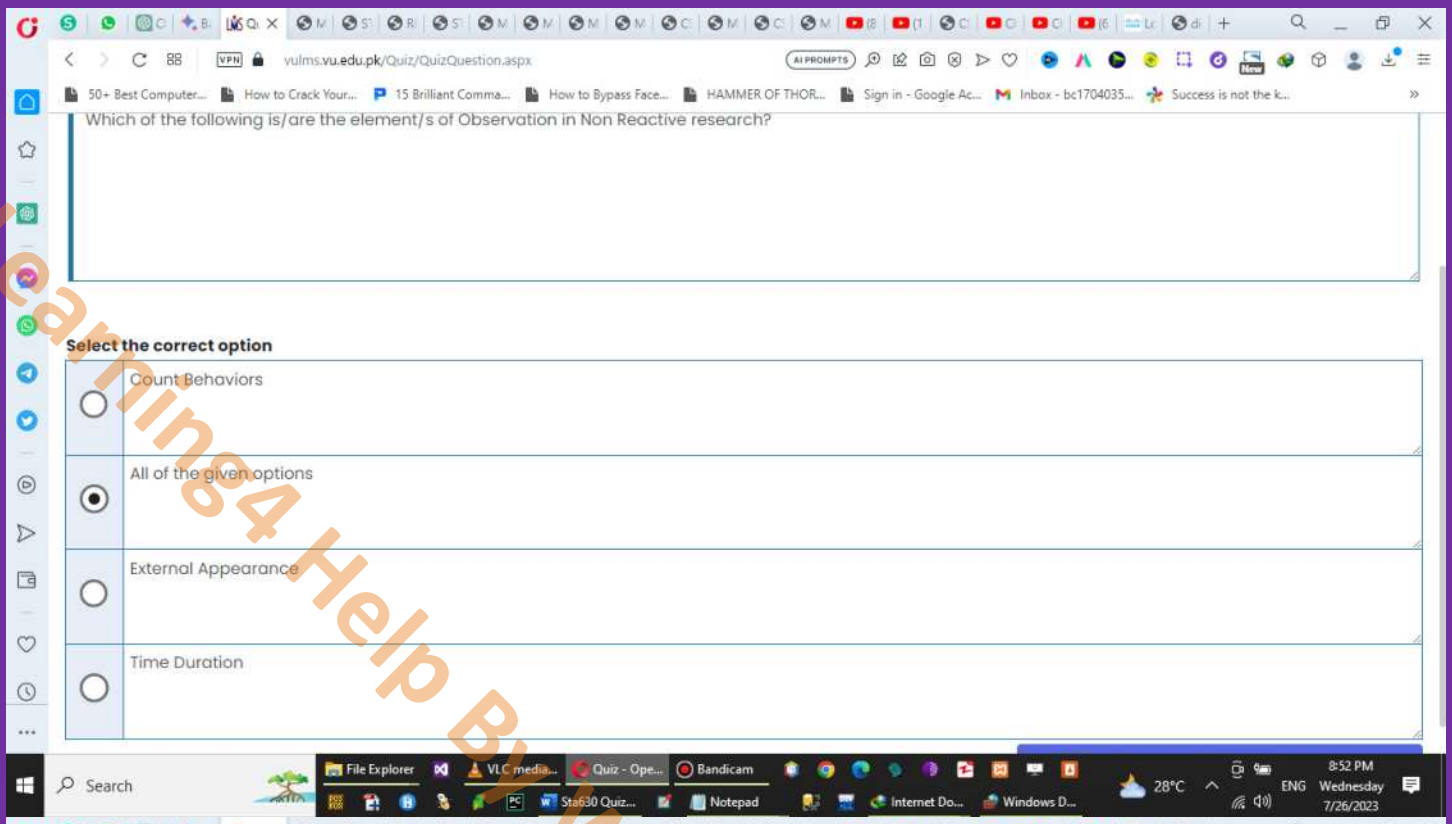

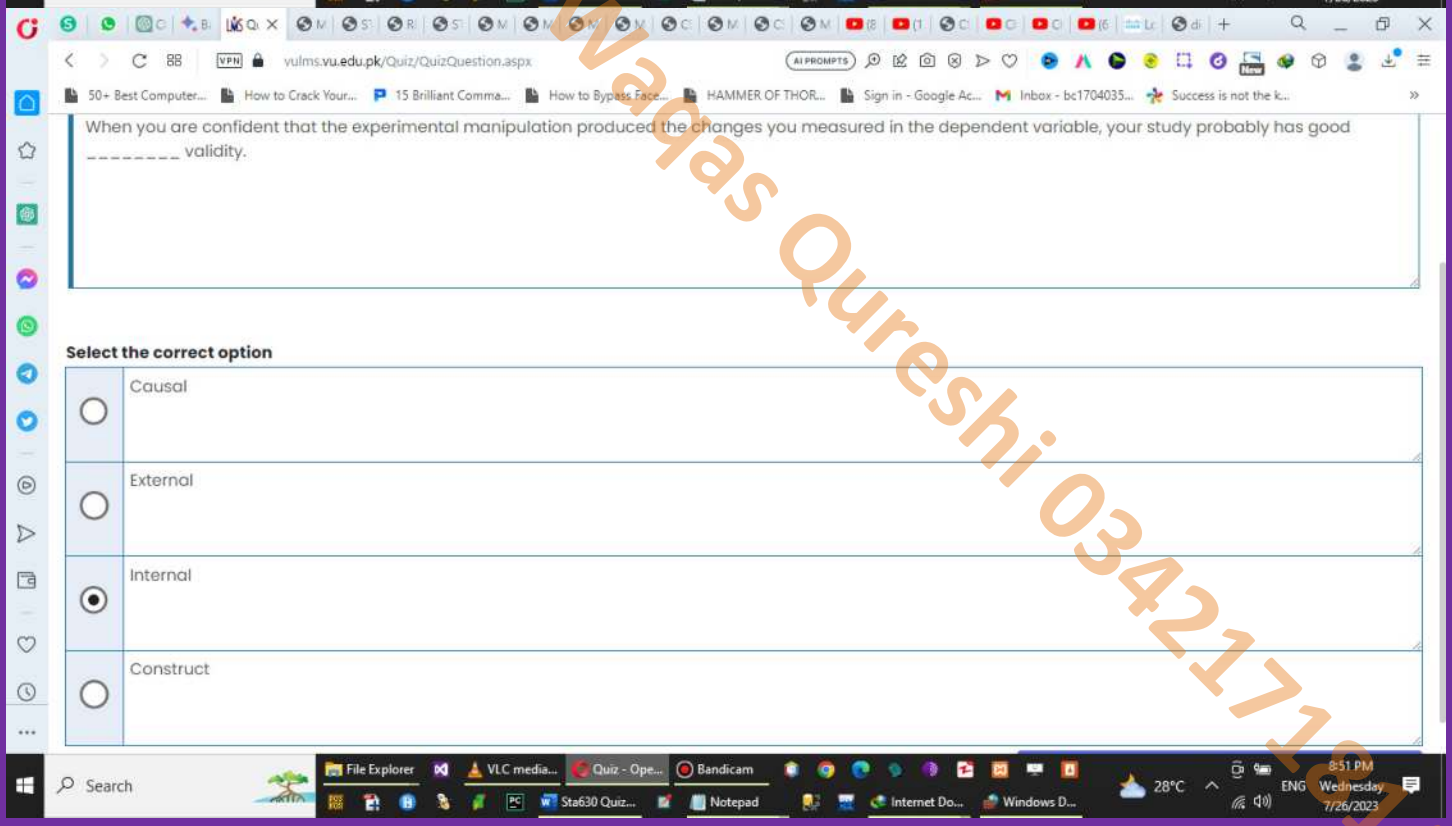

Why might qualitative researchers regard interviewing an attractive alternative to participant observation?

Select the correct option

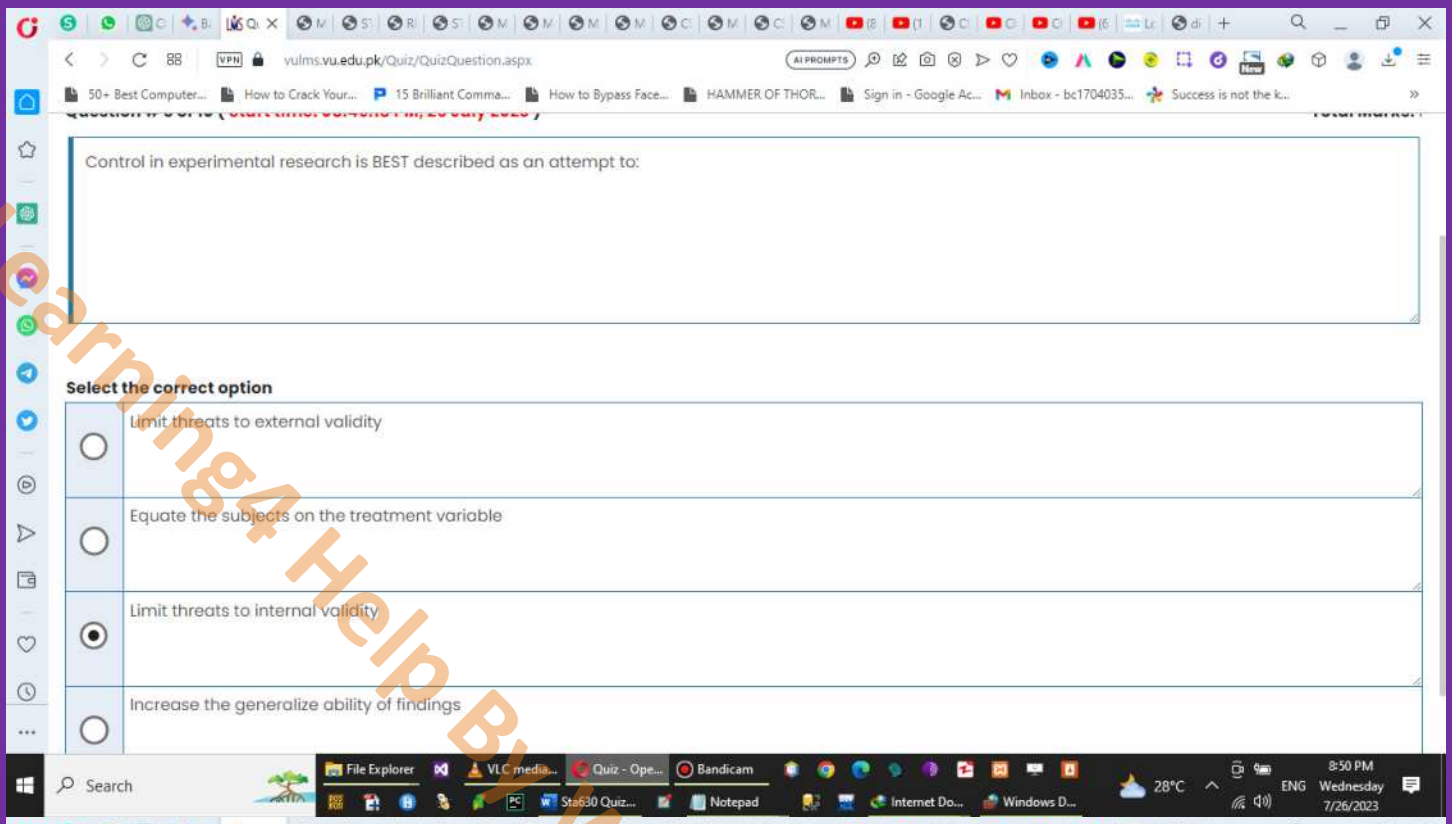

- It reduces the problem of reactivity
- It is easier to accommodate into the researchers personal life
- It gives a better insight into the day to day functioning of the research site
- It is a considerably less time-consuming process

Which of the following terms best describes data that were originally collected at an earlier time by a different person for a different purpose?

Select the correct option

- Field notes
- Primary data
- Experimental data
- Secondary data

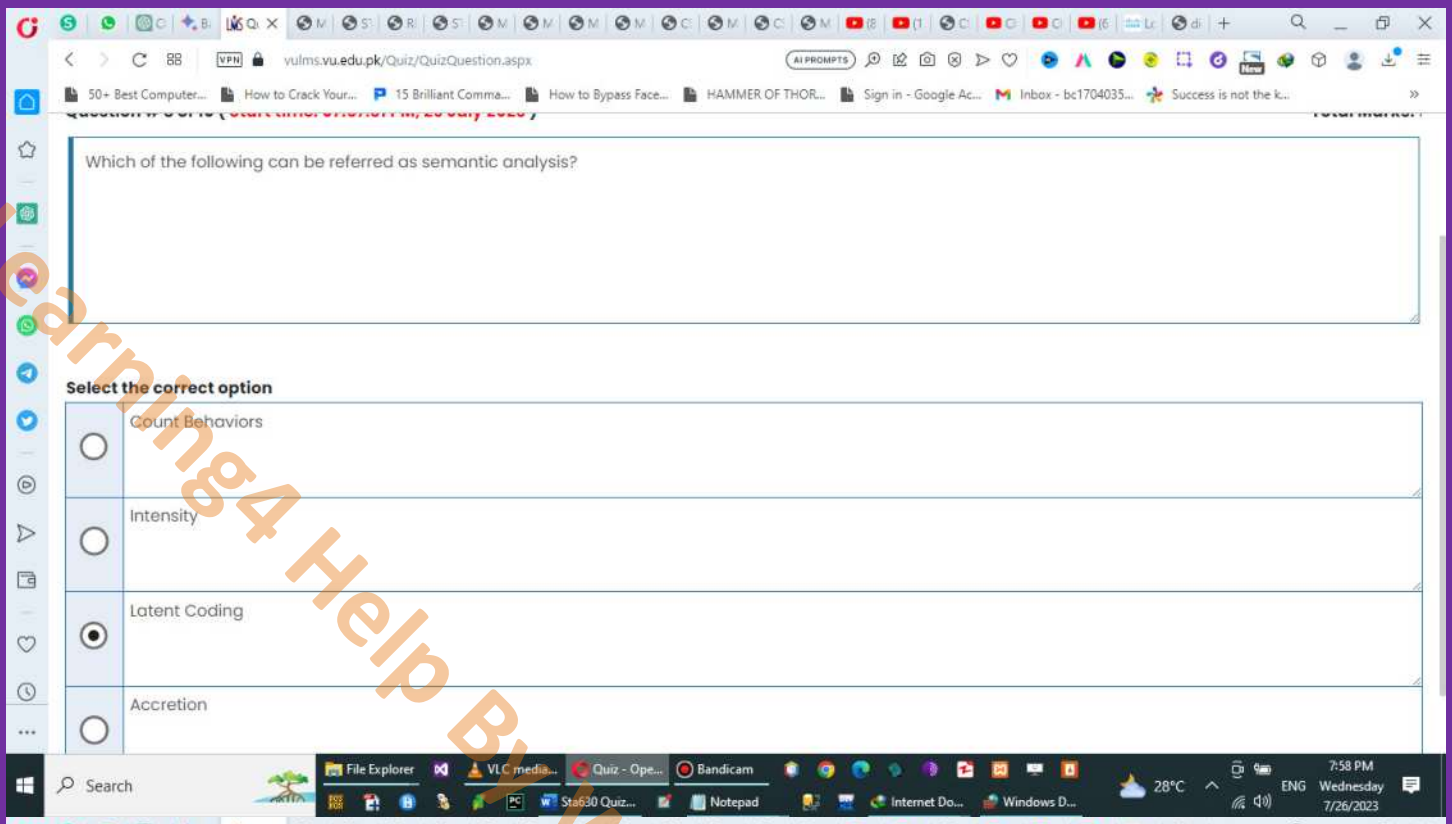

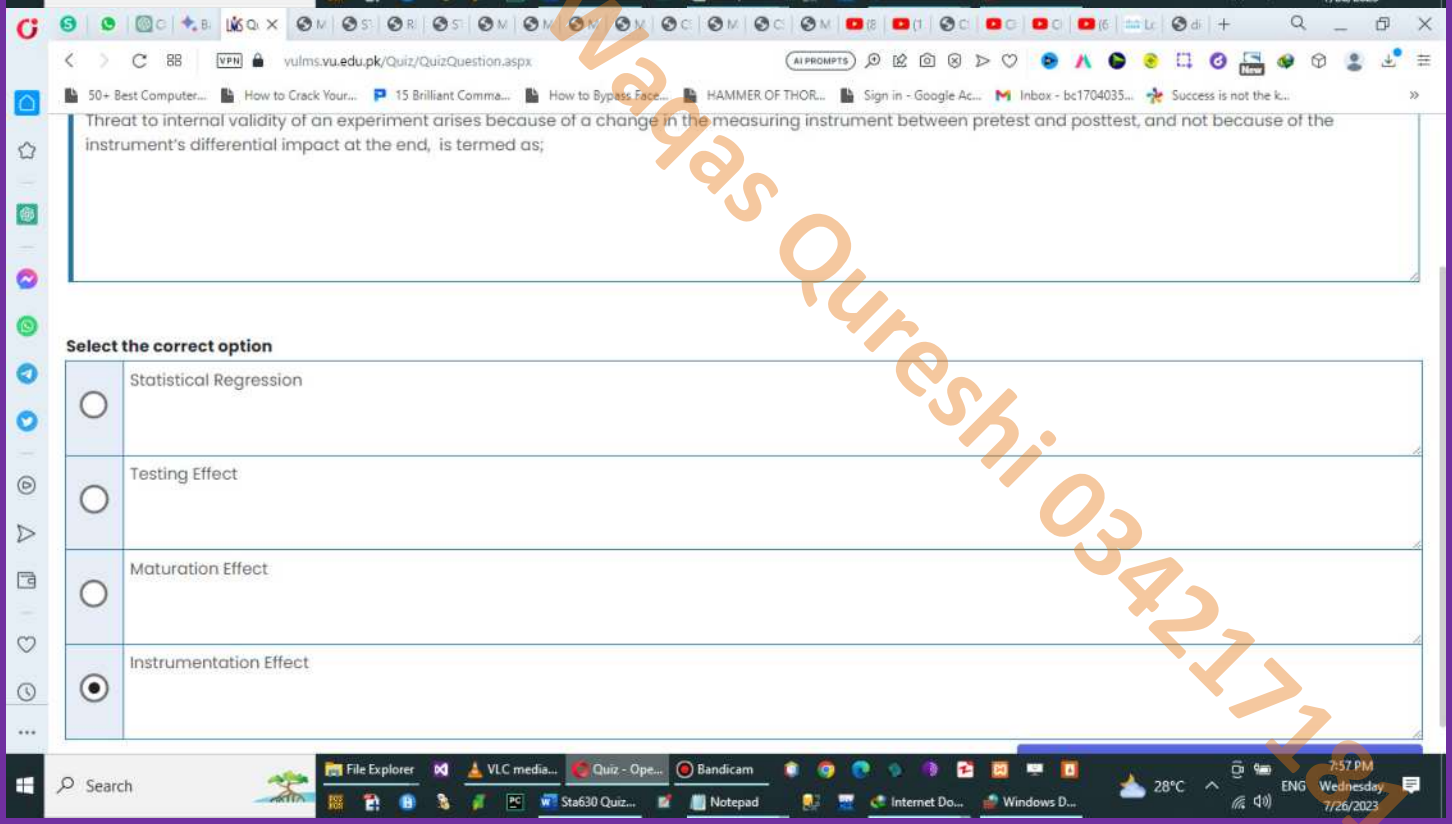

Which type of observer is likely to get a reasonable insight into the participant's views and develop a good rapport with him?

Select the correct option

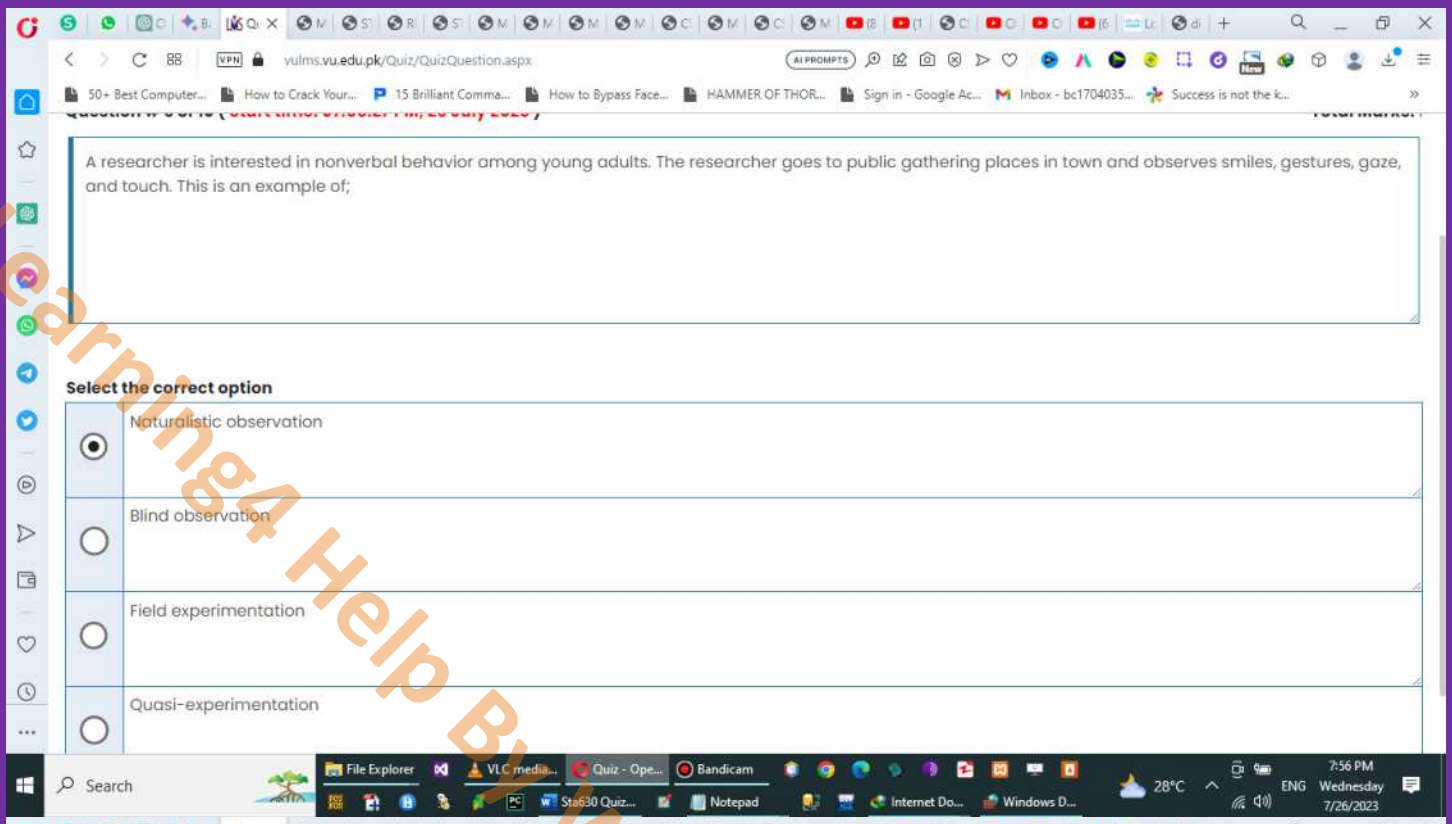

- Unstructured participant observer
- Participant observer
- Structured participant observer
- Non participant observer

Learning4 Help By Waqas Qureshi 03421710143

A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles, gestures, gaze, and touch. This is an example of;

Select the correct option

- (●) Naturalistic observation
- ( ) Blind observation
- ( ) Field experimentation
- ( ) Quasi-experimentation

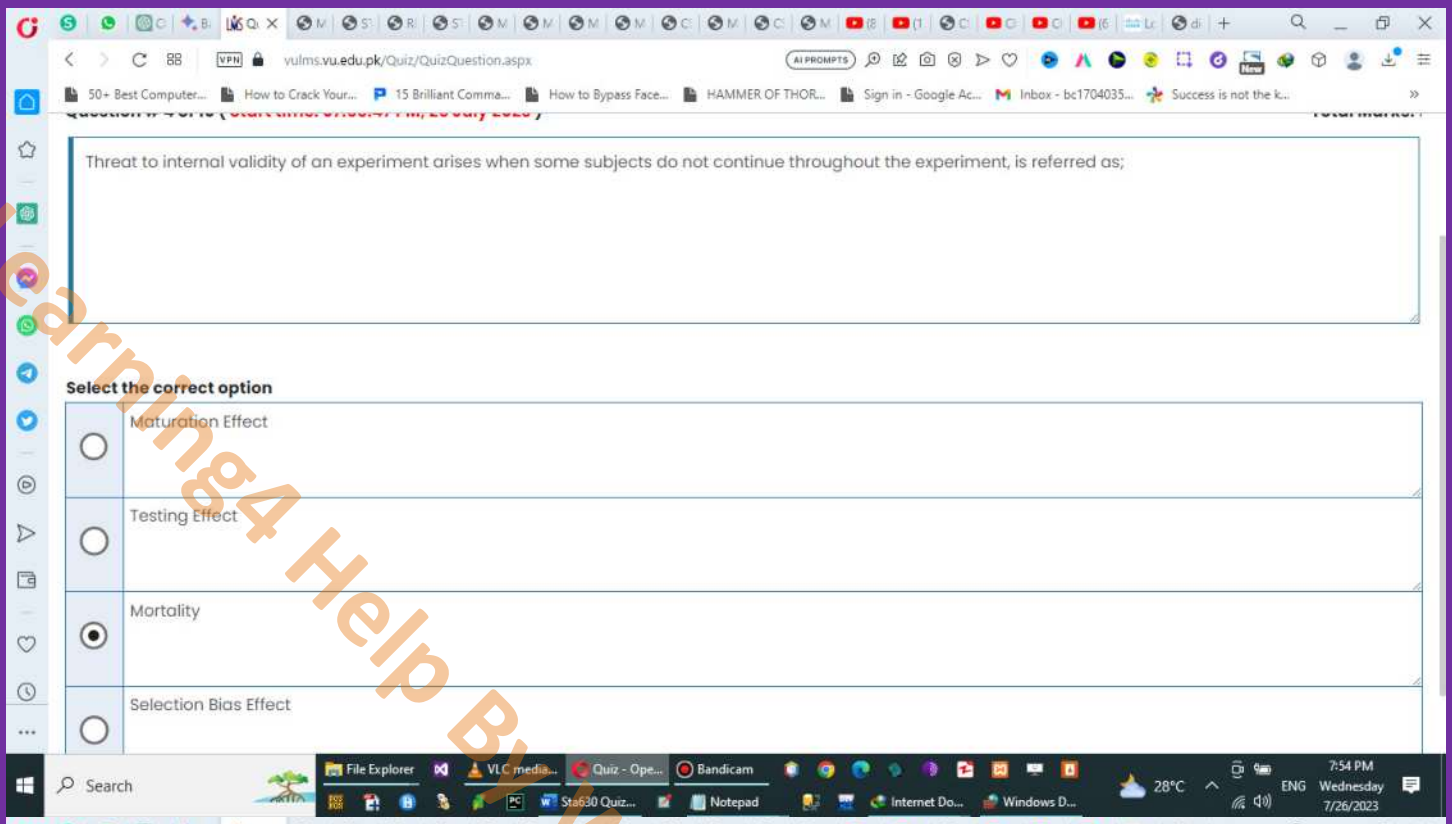

Question # 5 of 10 (Start time: 07:54:39 PM, 26 July 2023) **Total Marks: 1**

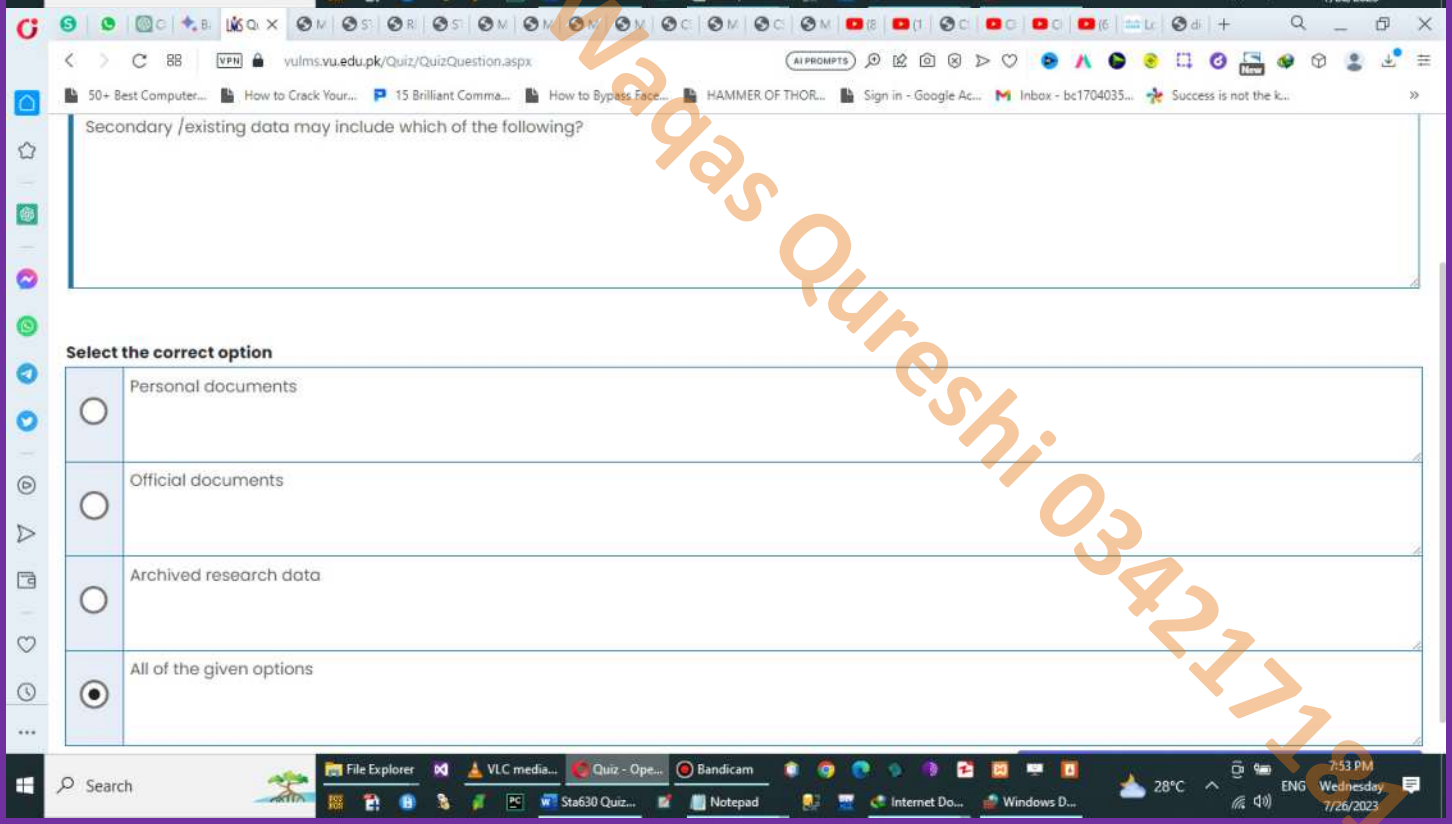

A census taker often collects data through which of the following?

Select the correct option

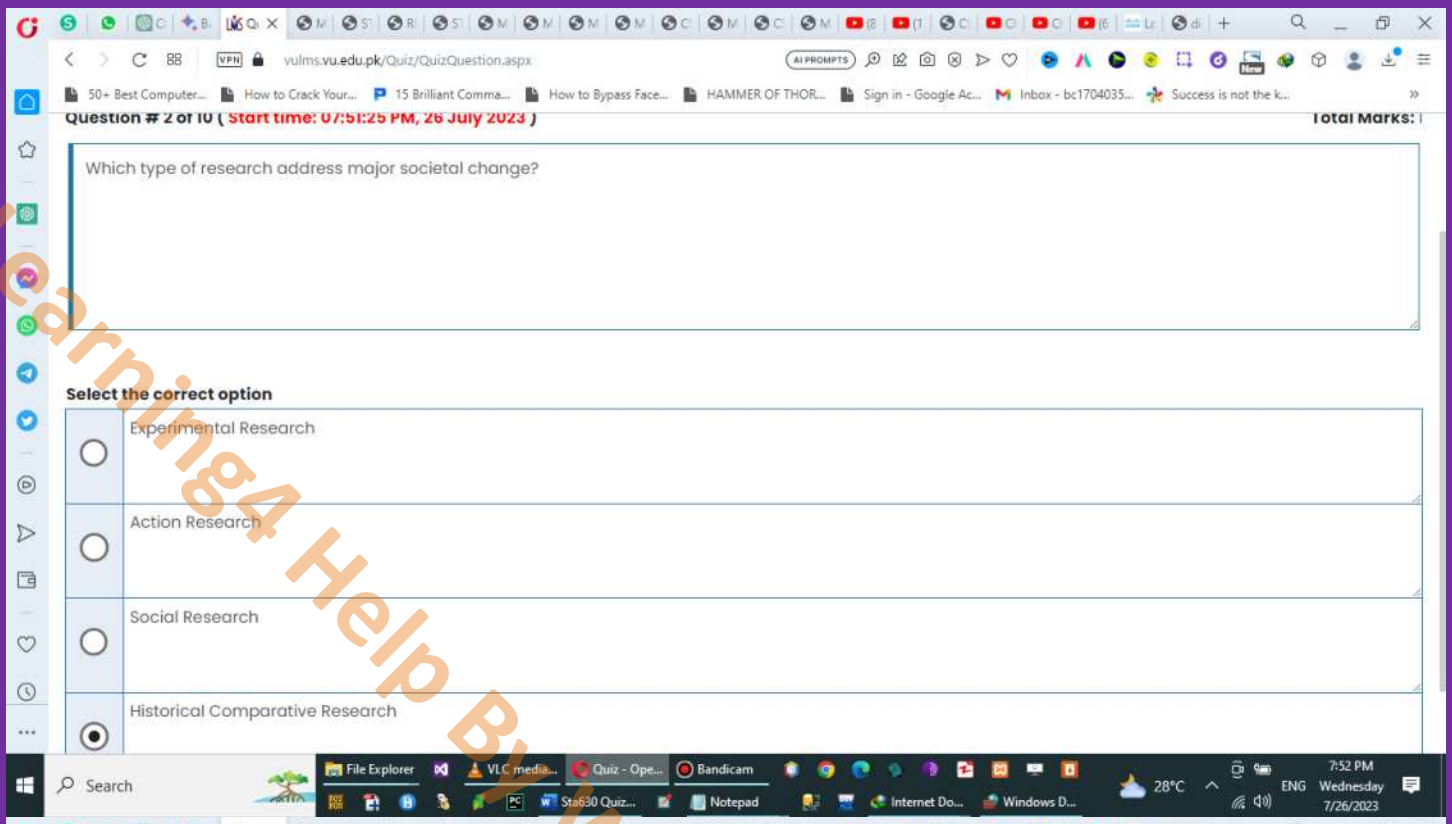

- (●) Interviews
- ( ) Secondary data
- ( ) Standardized tests
- ( ) Observations

Question # 9 of 10 (Start time: 10:22:50 PM, 19 July 2023) Total Marks: 1

Statistics is used by researchers to:

Select the correct option

- Make their findings sound better
- Operationally define their variables
- Ensure the study comes out the way it was intended
- Analyze the empirical data collected in a study

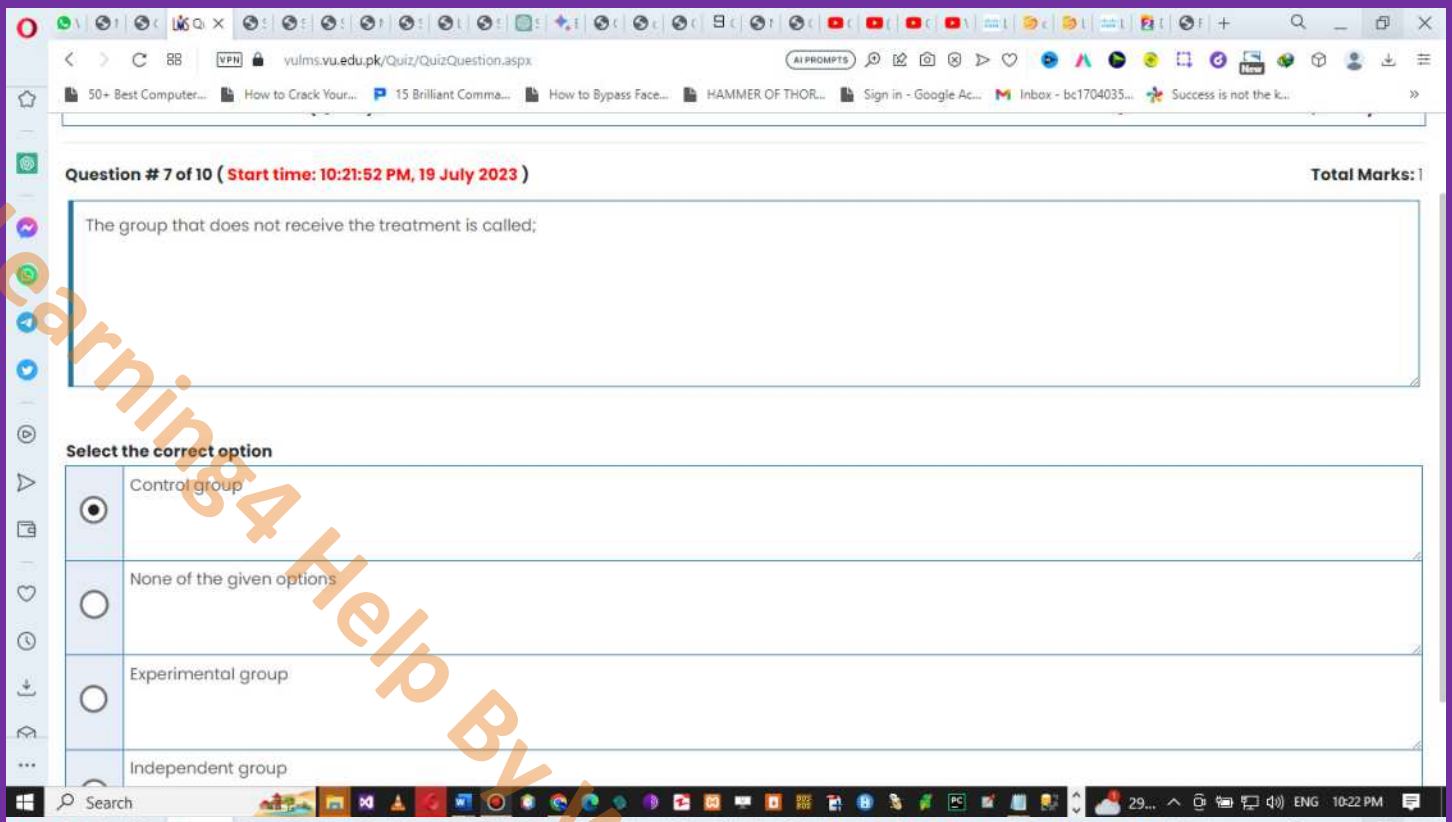

In quasi-experimental research designs, causal interpretations can be made _____.

Select the correct option

- Only when the participants have been randomly selected
- Only when there is a single participant in the experiment
- Only when rival explanations have been shown to be implausible
- Only when rival explanations have been shown to be plausible

Learning4 Help By Waqas Qureshi 03421718143

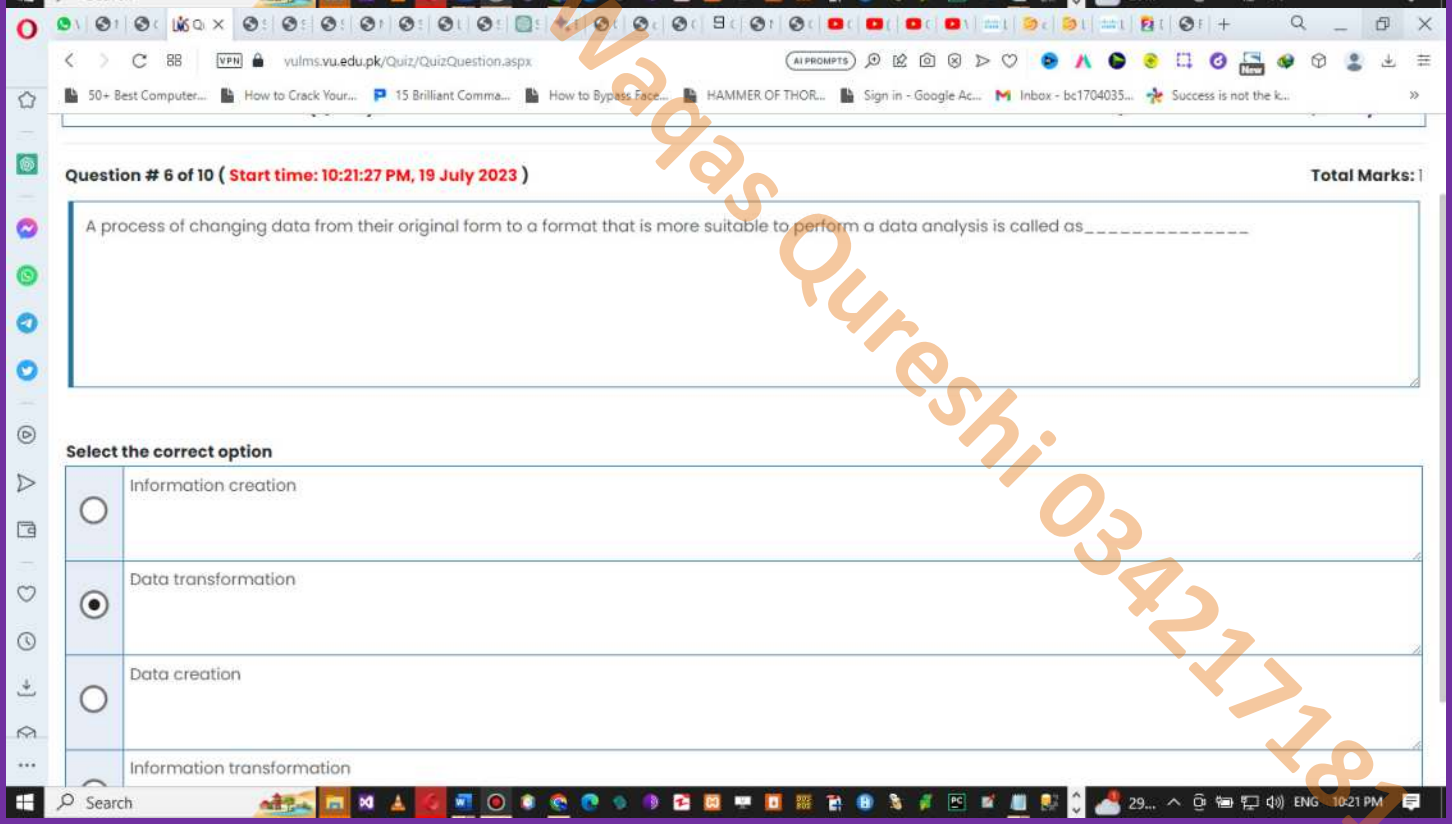

Question # 7 of 10 (Start time: 10:21:52 PM, 19 July 2023) **Total Marks:** 1

The group that does not receive the treatment is called;

Select the correct option

- (●) Control group
- ( ) None of the given options
- ( ) Experimental group
- ( ) Independent group

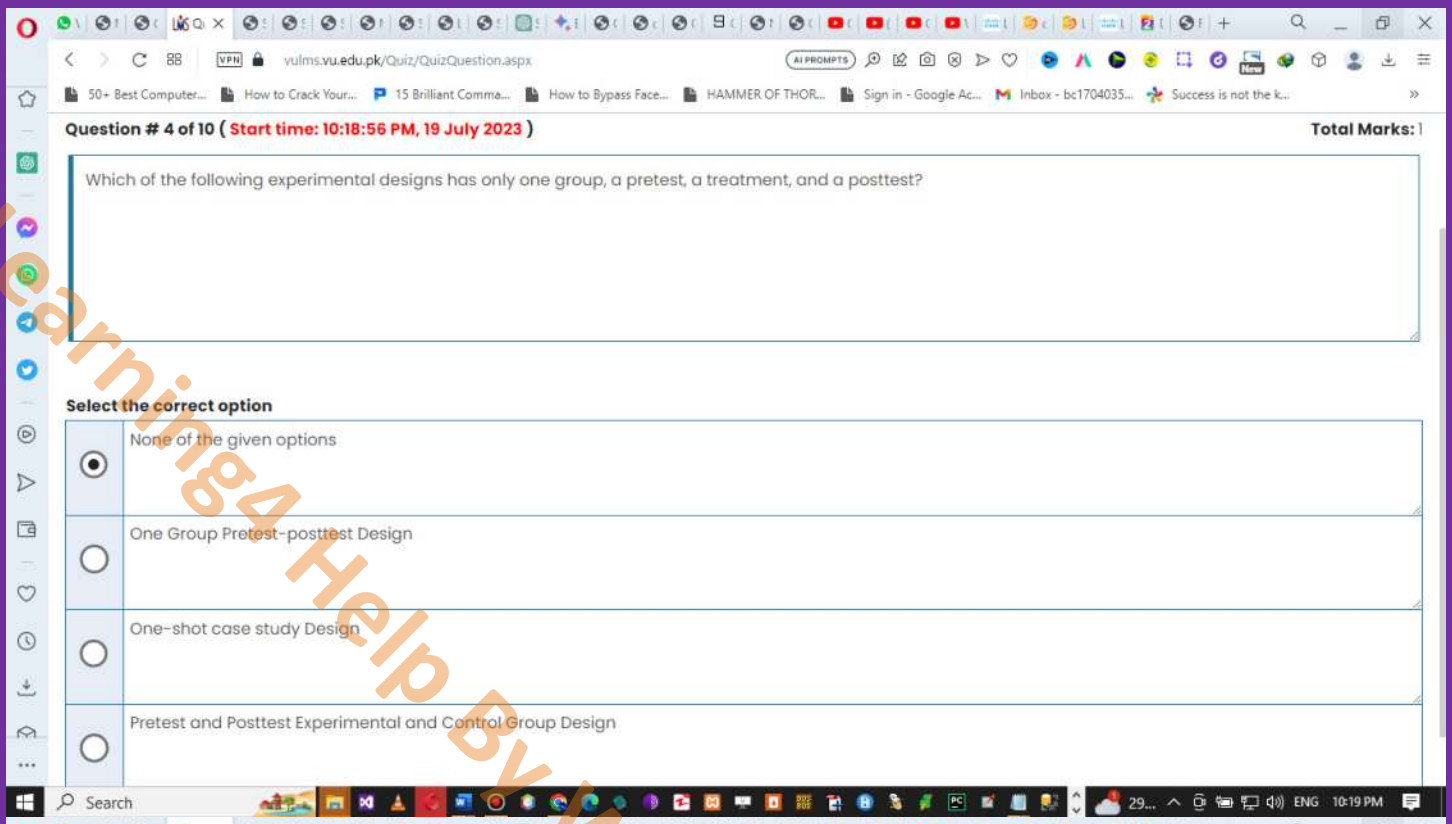

Question # 6 of 10 (Start time: 10:21:27 PM, 19 July 2023) **Total Marks:** 1

A process of changing data from their original form to a format that is more suitable to perform a data analysis is called as_____

Select the correct option

- ( ) Information creation
- (●) Data transformation
- ( ) Data creation
- ( ) Information transformation

Learning4 Help By Waqas Qureshi 03421718143

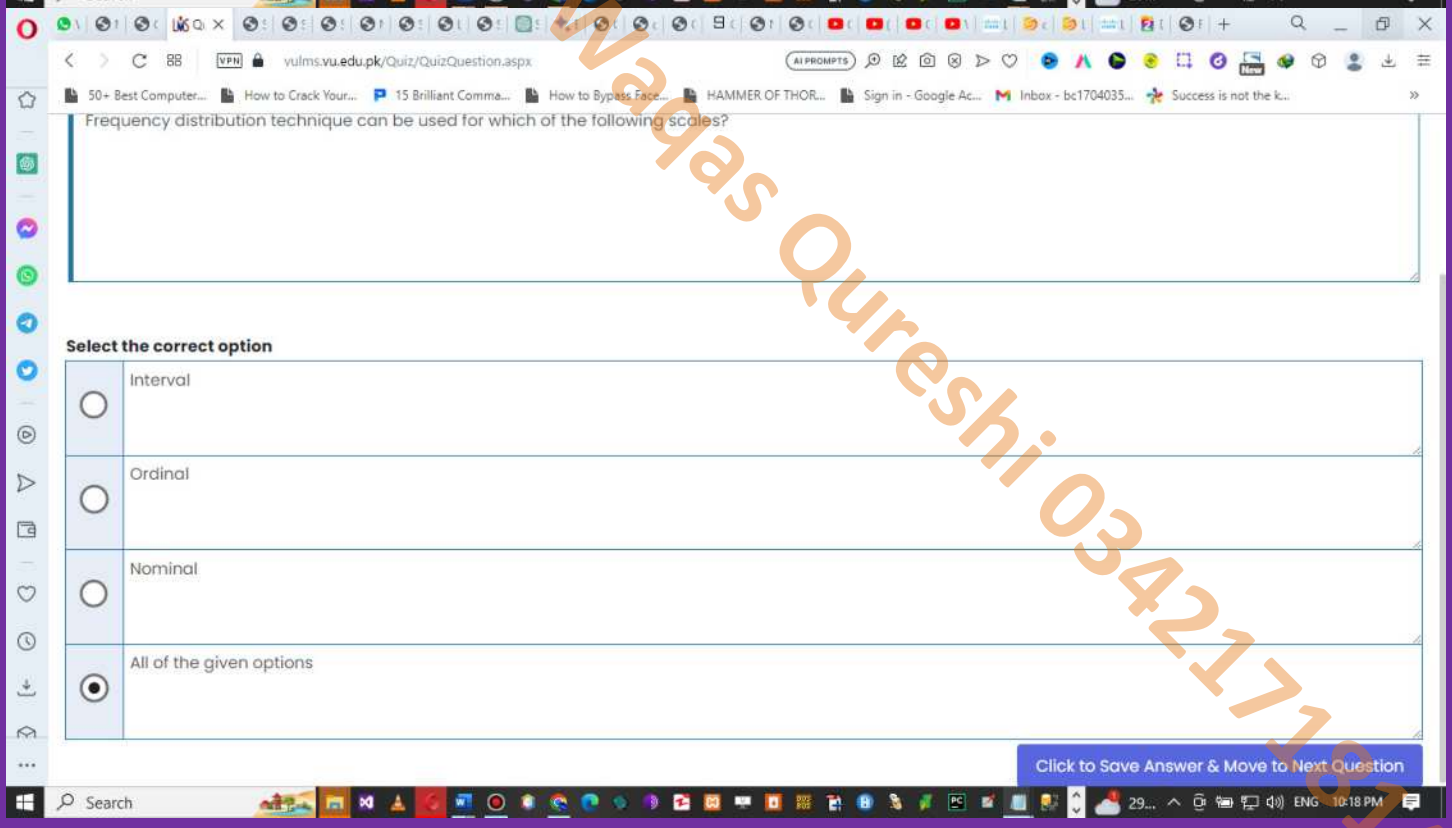

Question # 4 of 10 (Start time: 10:18:56 PM, 19 July 2023) Total Marks: 1

Which of the following experimental designs has only one group, a pretest, a treatment, and a posttest?

Select the correct option

- None of the given options
- One Group Pretest-posttest Design
- One-shot case study Design
- Pretest and Posttest Experimental and Control Group Design

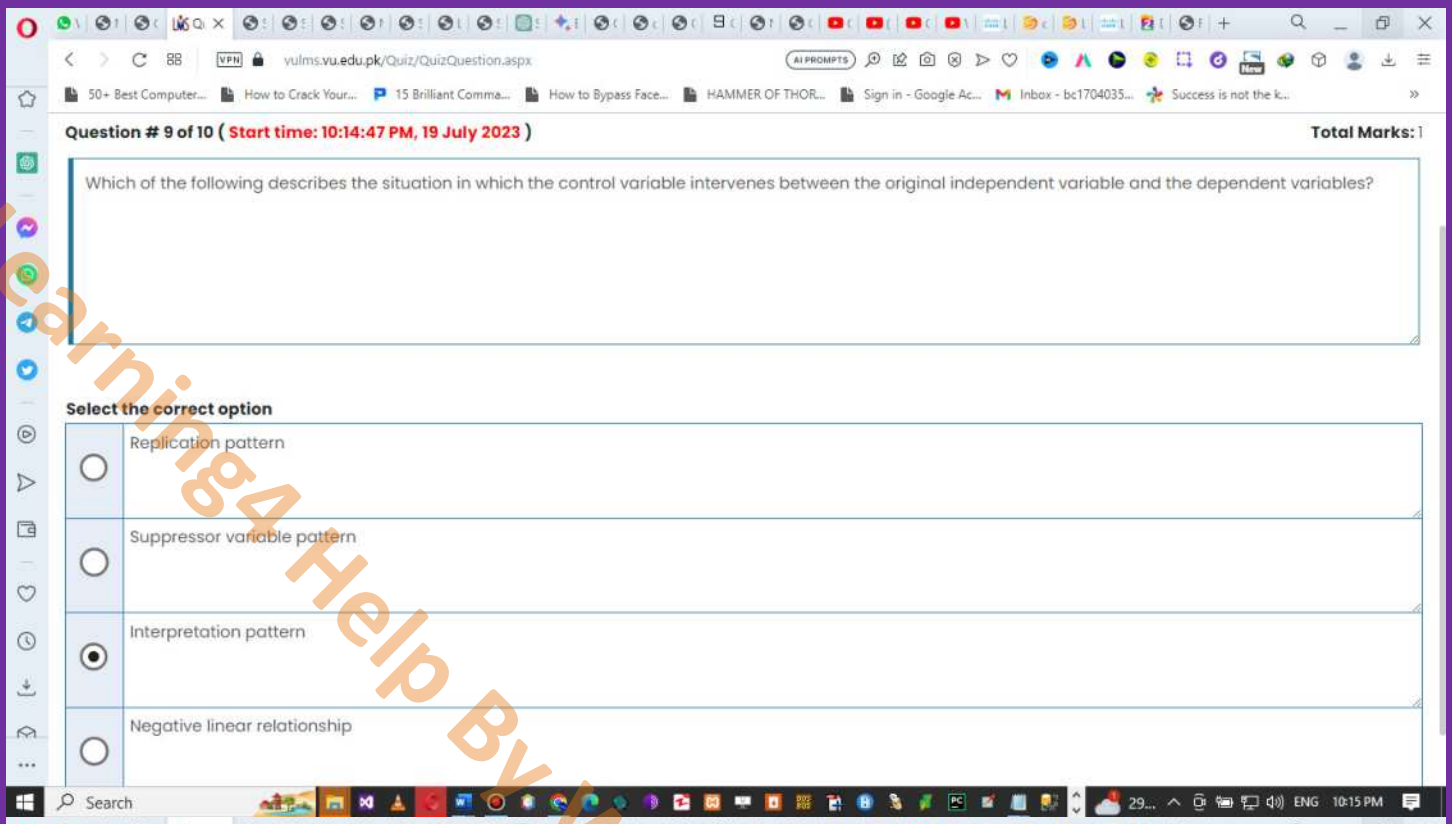

Frequency distribution technique can be used for which of the following scales?

Select the correct option

- Interval
- Ordinal
- Nominal
- All of the given options

Click to Save Answer & Move to Next Question

Learning4 Help By Waqas Qureshi 03421719143

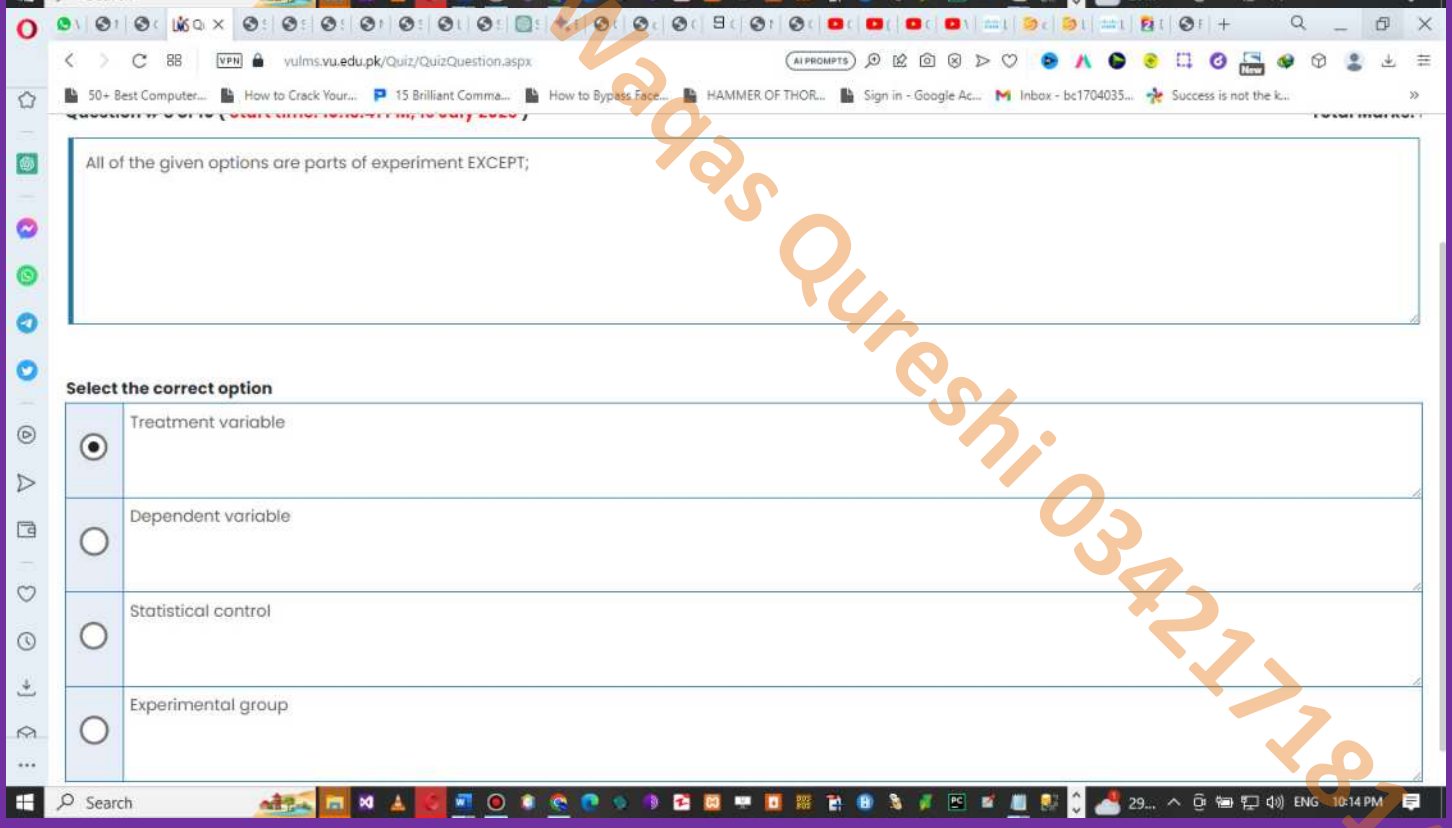

Question # 9 of 10 (Start time: 10:14:47 PM, 19 July 2023) **Total Marks:** 1

Which of the following describes the situation in which the control variable intervenes between the original independent variable and the dependent variables?

Select the correct option

- ○ Replication pattern
- ○ Suppressor variable pattern
- ◉ Interpretation pattern
- ○ Negative linear relationship

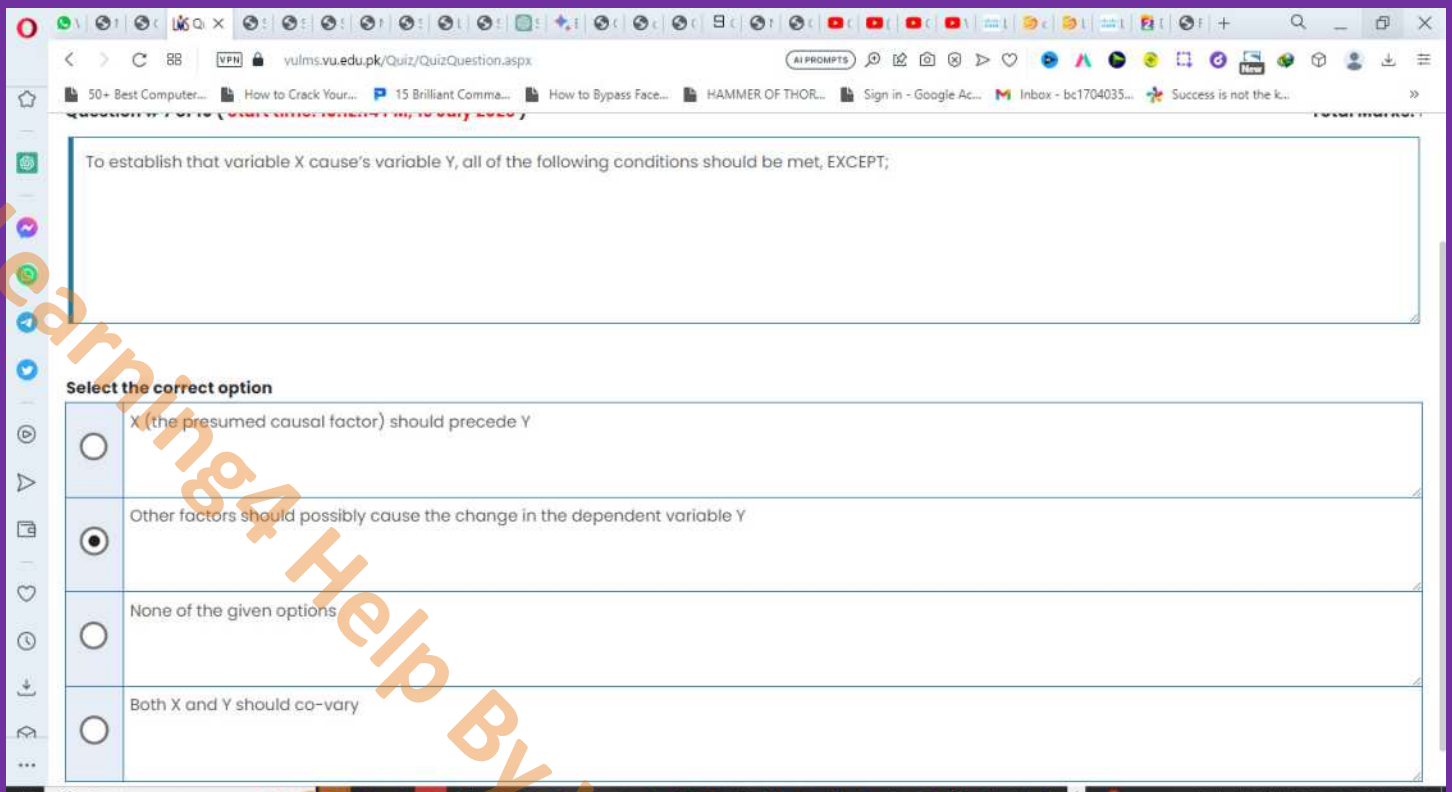

All of the given options are parts of experiment EXCEPT;

Select the correct option

- ◉ Treatment variable
- ○ Dependent variable
- ○ Statistical control
- ○ Experimental group

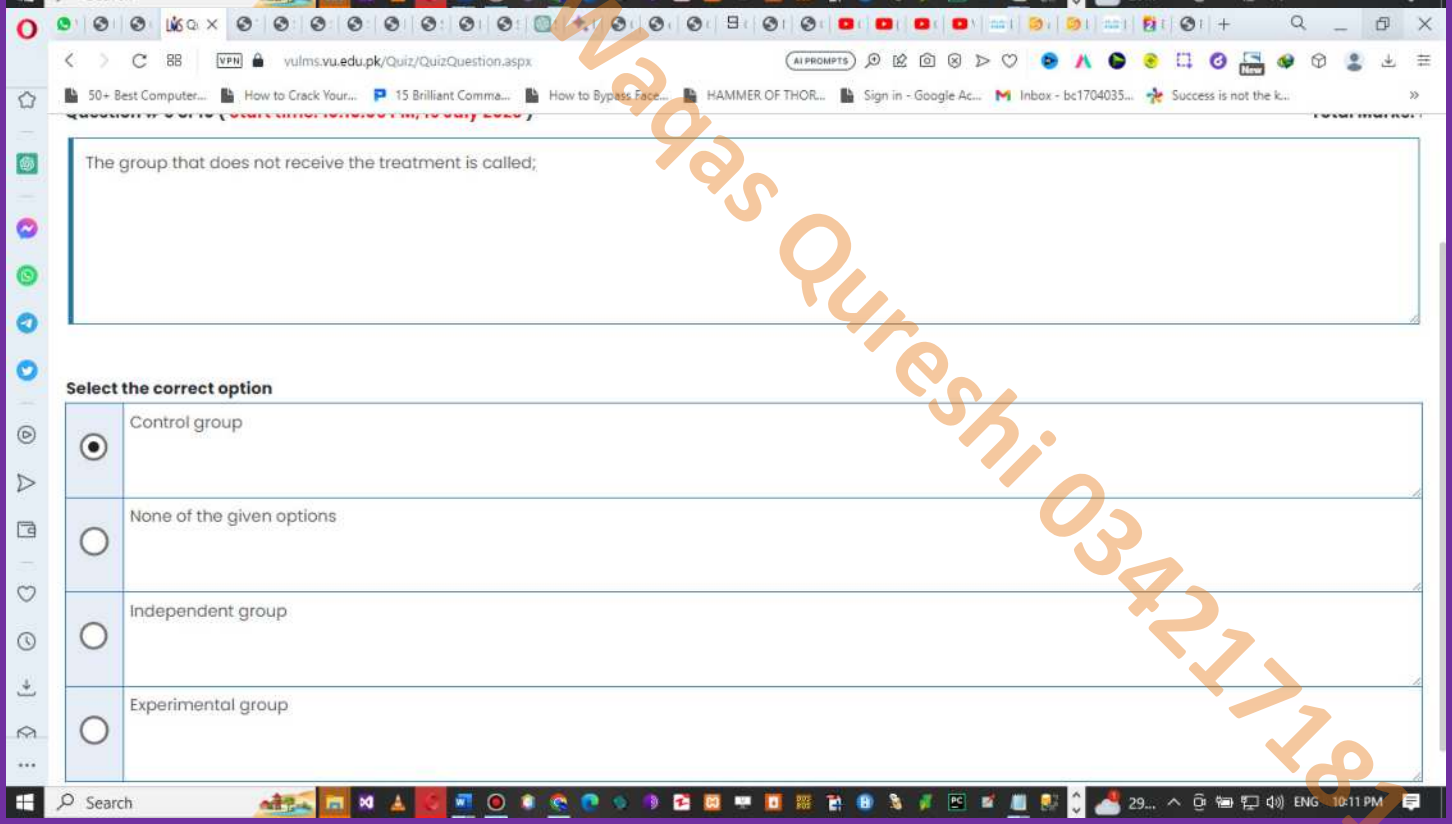

Learning4 Help By Waqas Qureshi 03421718143

To establish that variable X cause's variable Y, all of the following conditions should be met, EXCEPT;

Select the correct option

- X (the presumed causal factor) should precede Y
- Other factors should possibly cause the change in the dependent variable Y
- None of the given options
- Both X and Y should co-vary

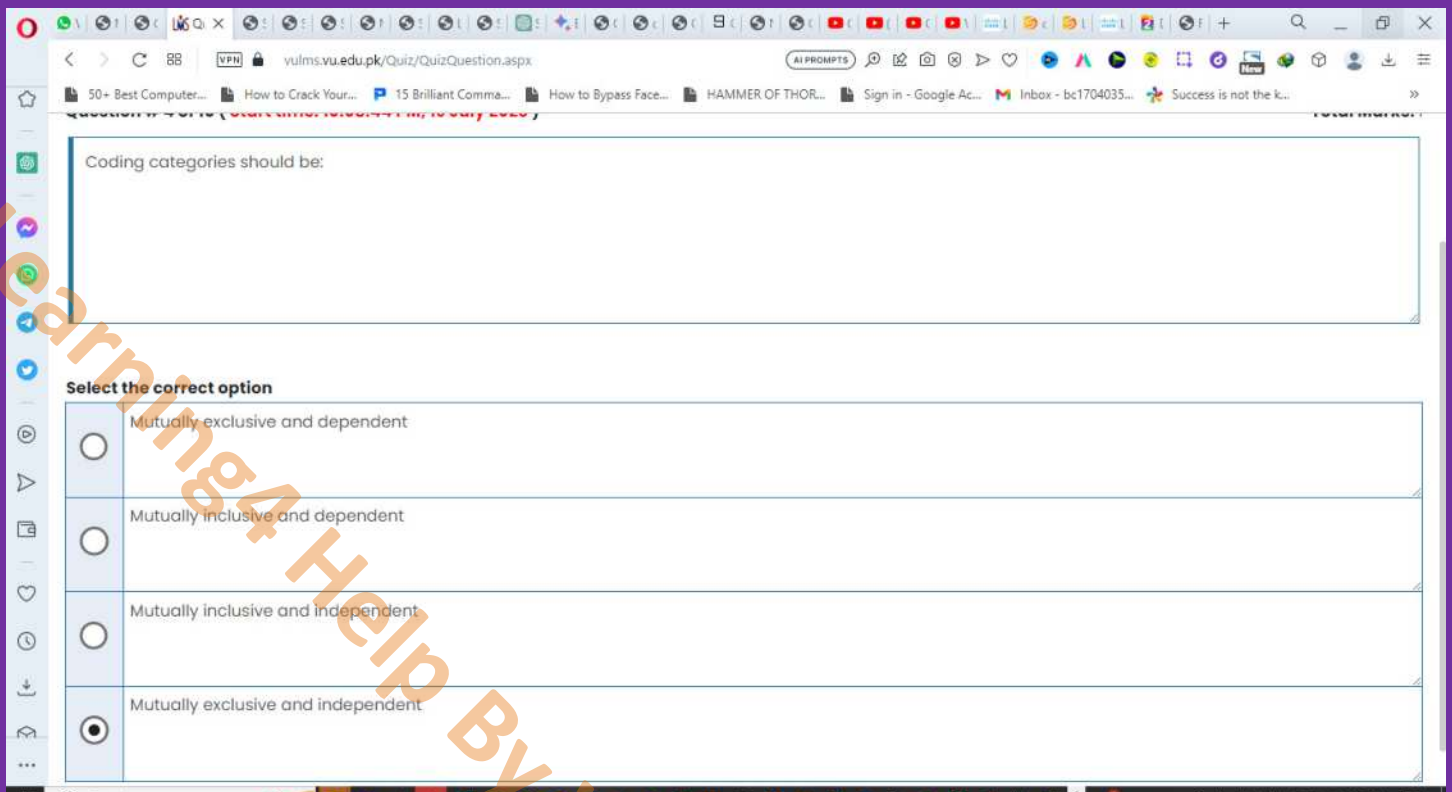

The group that does not receive the treatment is called;

Select the correct option

- Control group
- None of the given options
- Independent group
- Experimental group

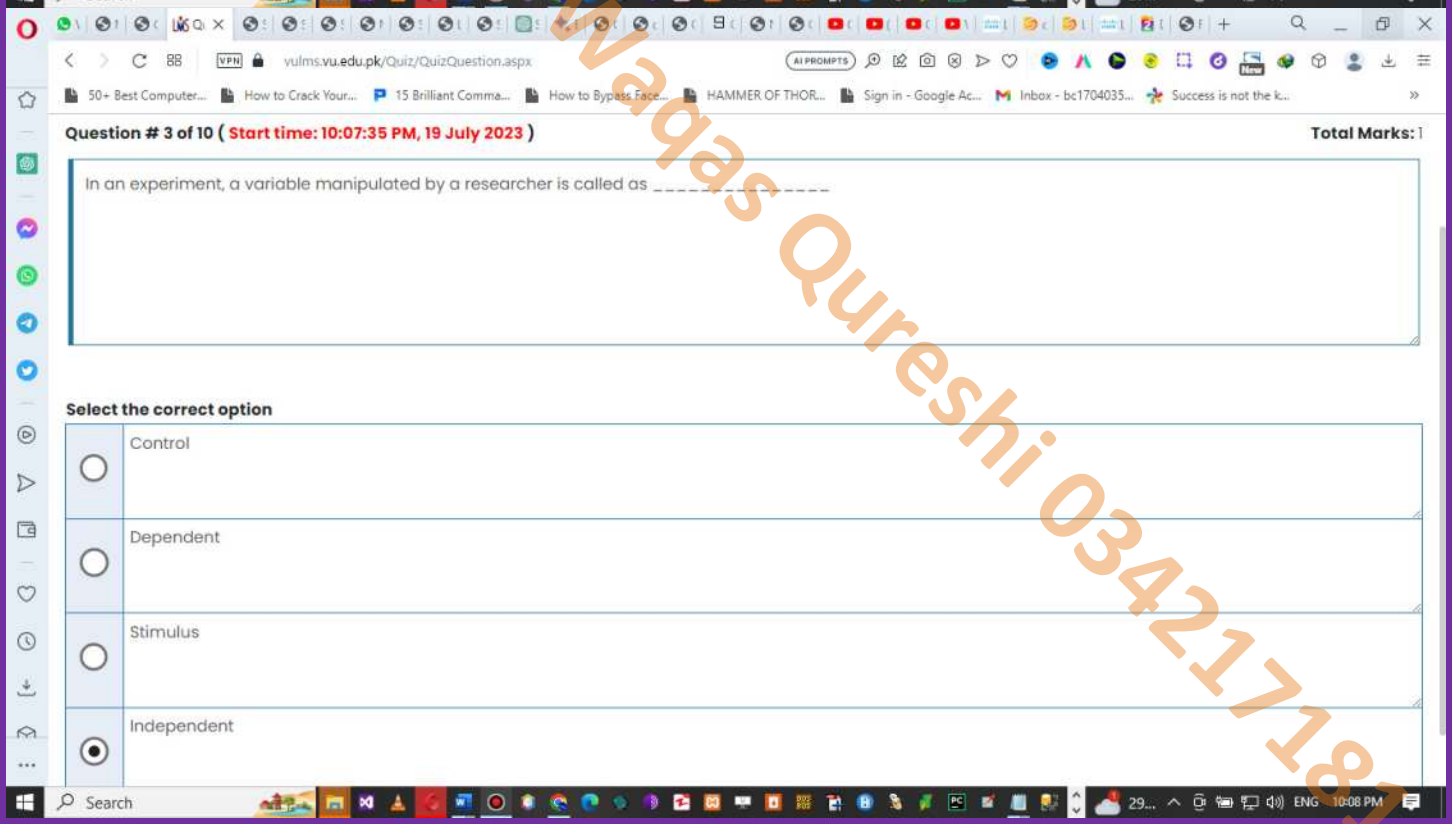

Learning4 Help By Waqas Qureshi 03421718143

Coding categories should be:

Select the correct option

- Mutually exclusive and dependent
- Mutually inclusive and dependent
- Mutually inclusive and independent
- Mutually exclusive and independent

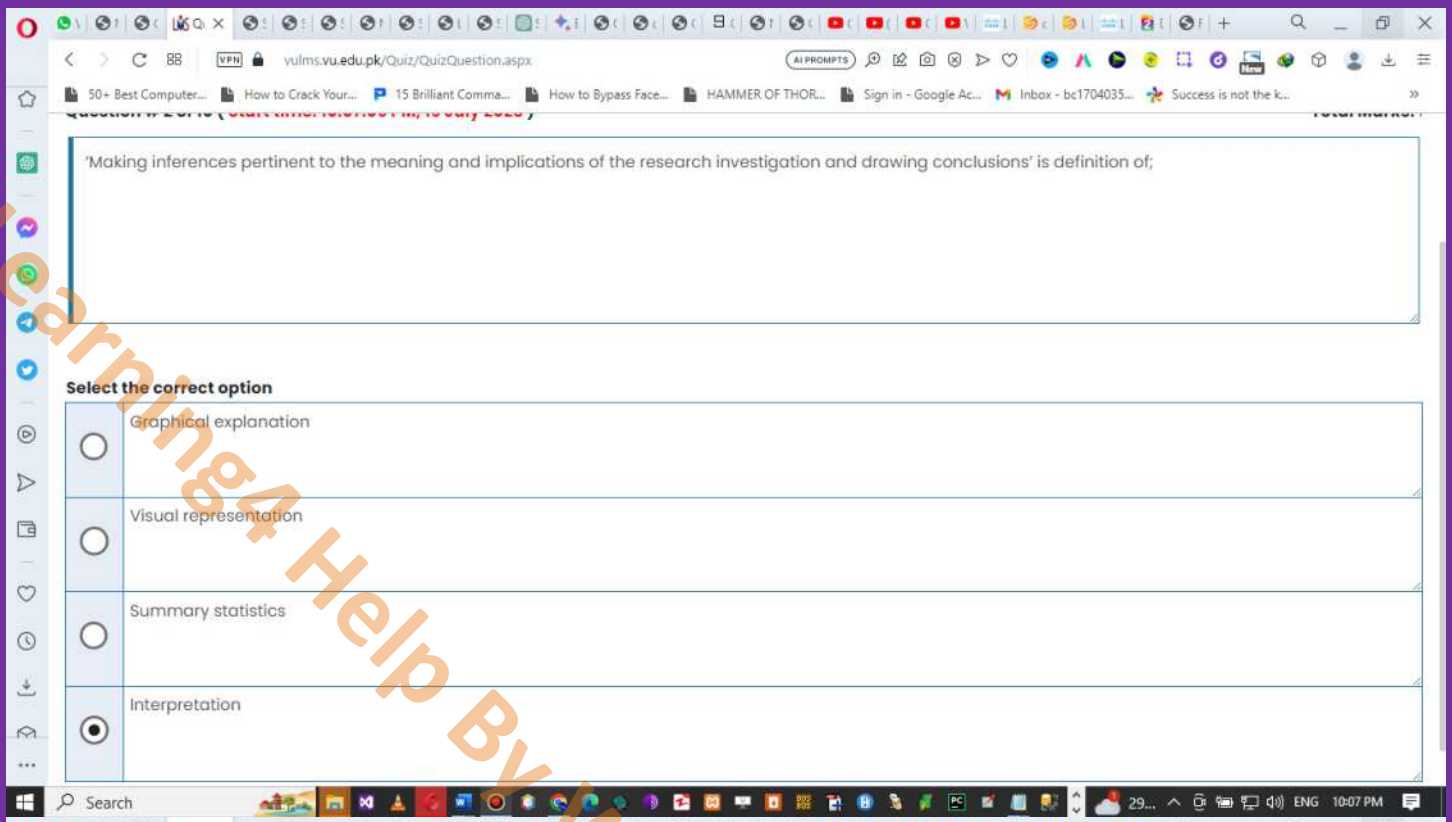

Question # 3 of 10 (Start time: 10:07:35 PM, 19 July 2023) **Total Marks: 1**

In an experiment, a variable manipulated by a researcher is called as _____

Select the correct option

- Control
- Dependent
- Stimulus
- Independent

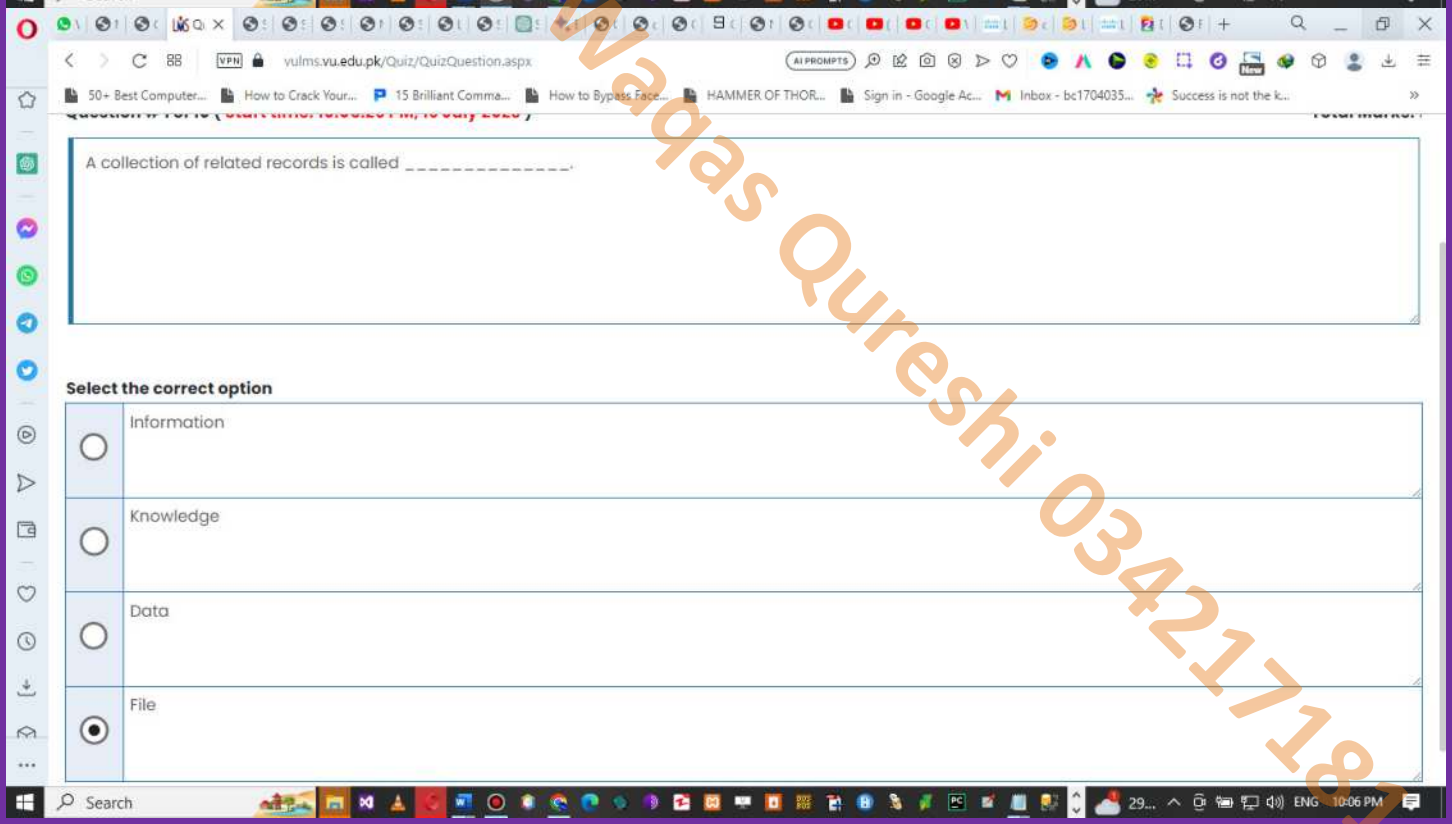

Learning4 Help By Waqas Qureshi 03421718143

'Making inferences pertinent to the meaning and implications of the research investigation and drawing conclusions' is definition of;

Select the correct option

- Graphical explanation
- Visual representation
- Summary statistics
- Interpretation

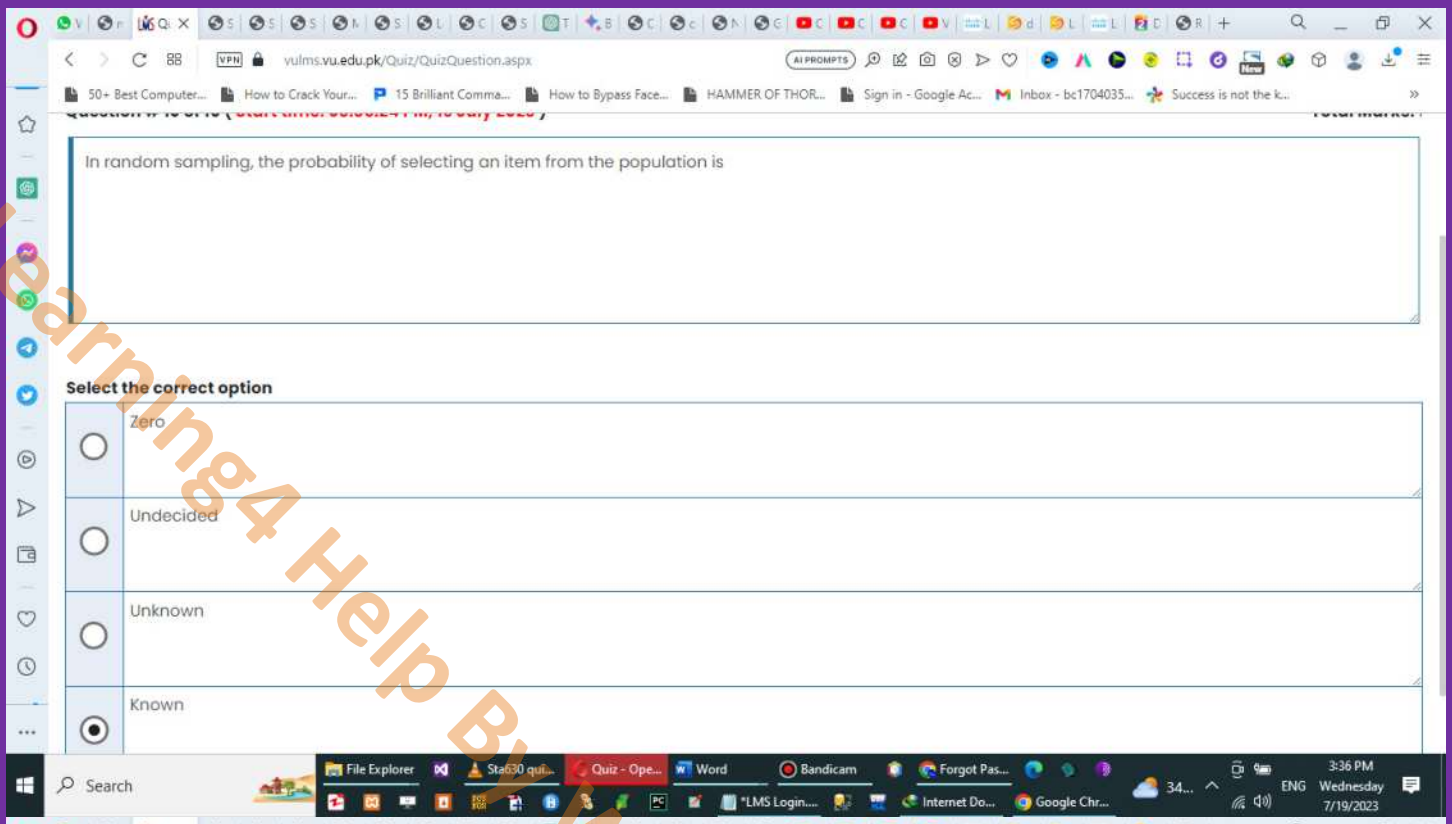

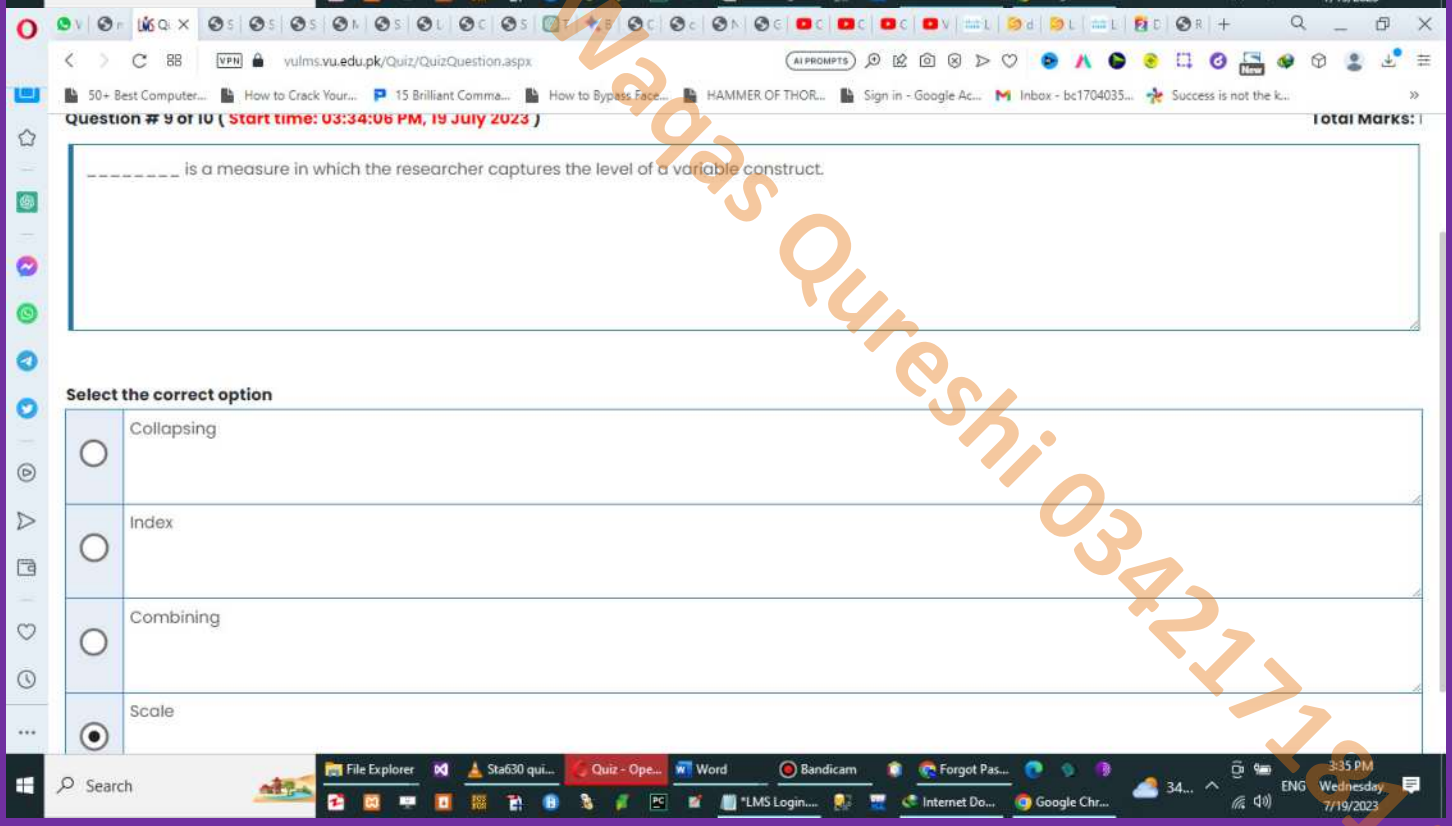

A collection of related records is called _____'

Select the correct option

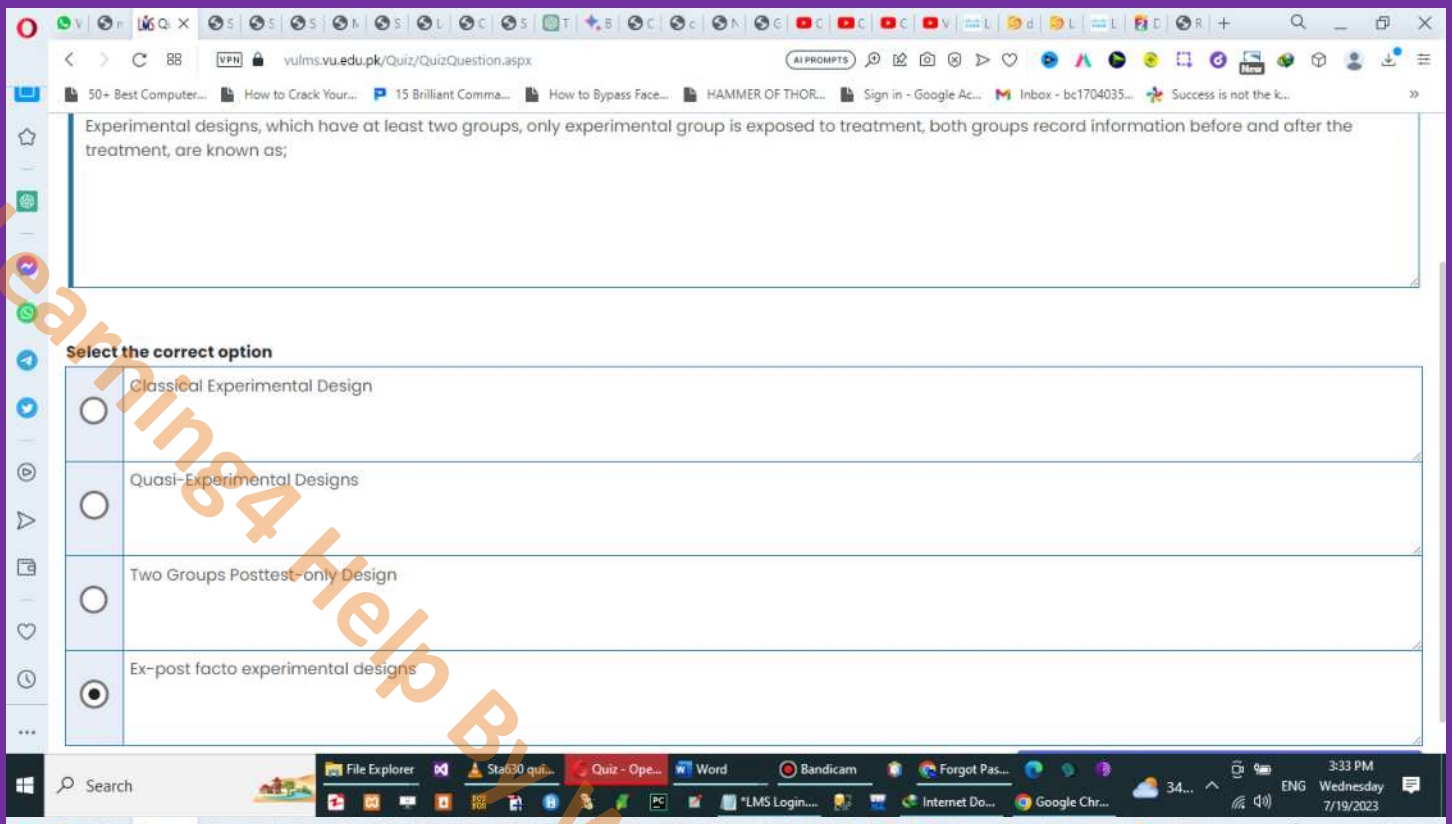

- Information
- Knowledge
- Data
- File

_____ variable(s) should be changed at a time when conducting a single-case design.

Select the correct option

- 4
- 3
- 2
- 1 (selected)

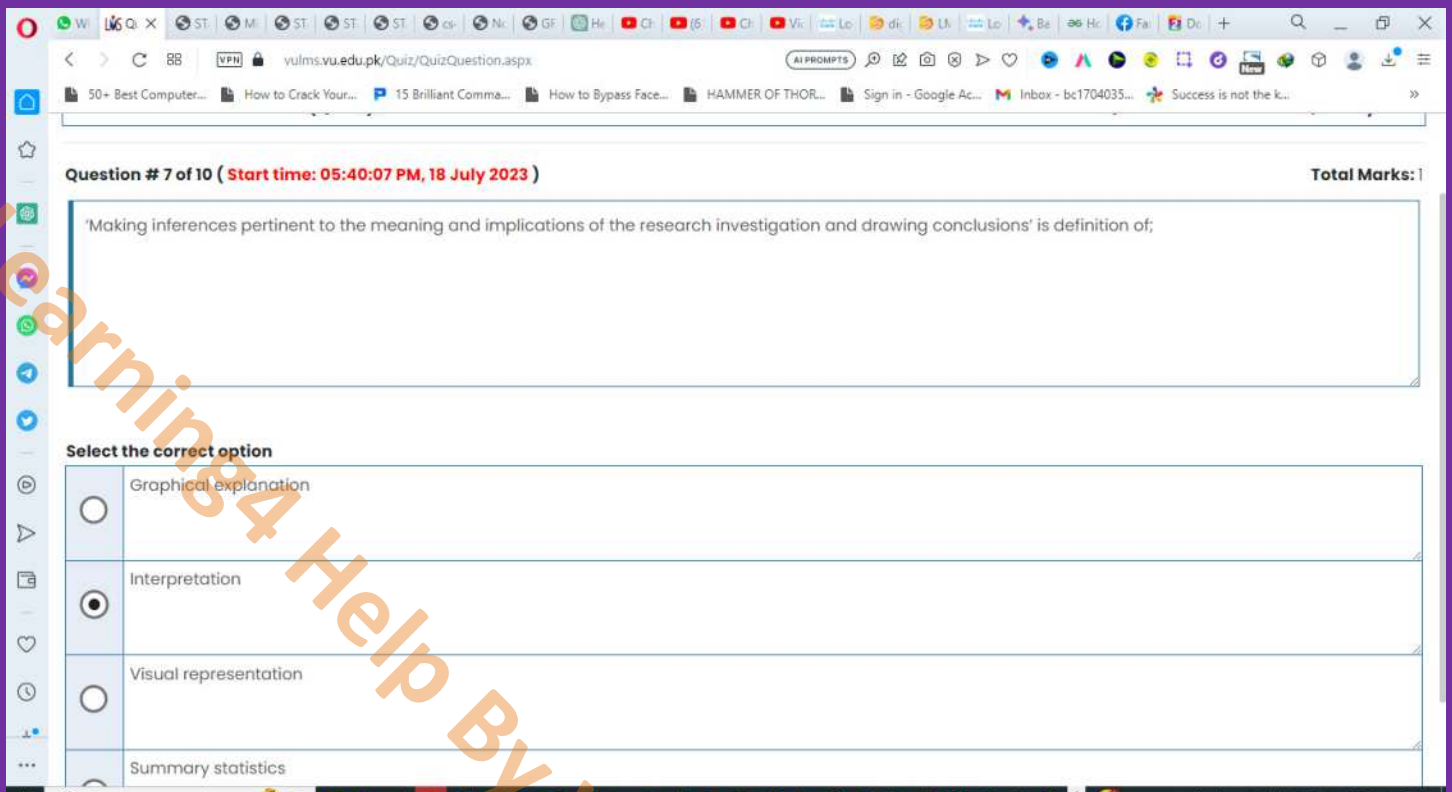

The posttest-only design with nonequivalent groups is likely to control for which of the following threats to internal validity:

Select the correct option

- Differential attrition
- Additive and interactive effects
- History (selected)
- Differential selection

Learning4 Help By Waqas Qureshi 03421719143

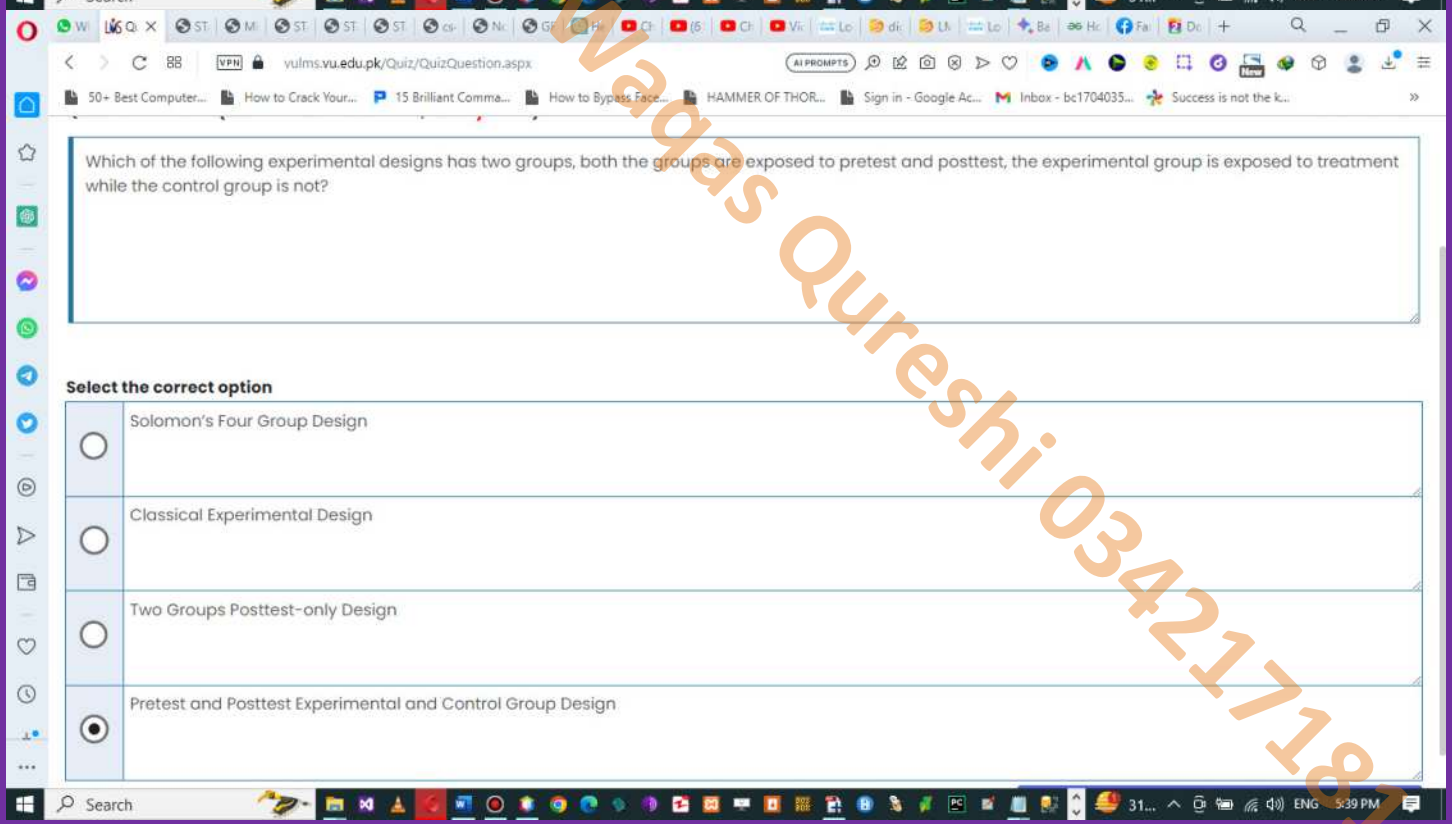

Question # 7 of 10 (Start time: 05:40:07 PM, 18 July 2023) **Total Marks:** 1

'Making inferences pertinent to the meaning and implications of the research investigation and drawing conclusions' is definition of;

Select the correct option

- ○ Graphical explanation
- ◉ Interpretation
- ○ Visual representation
- ○ Summary statistics

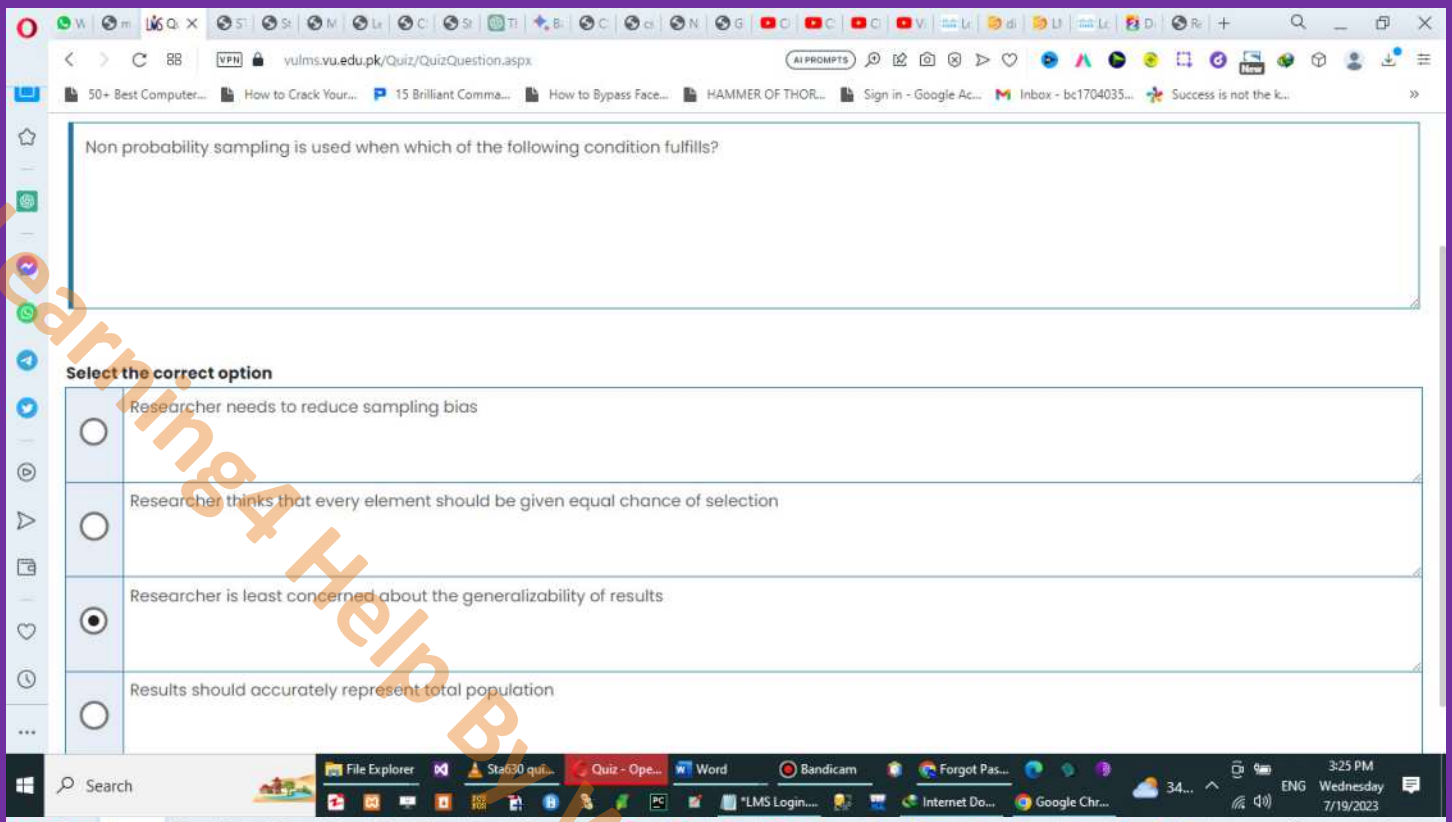

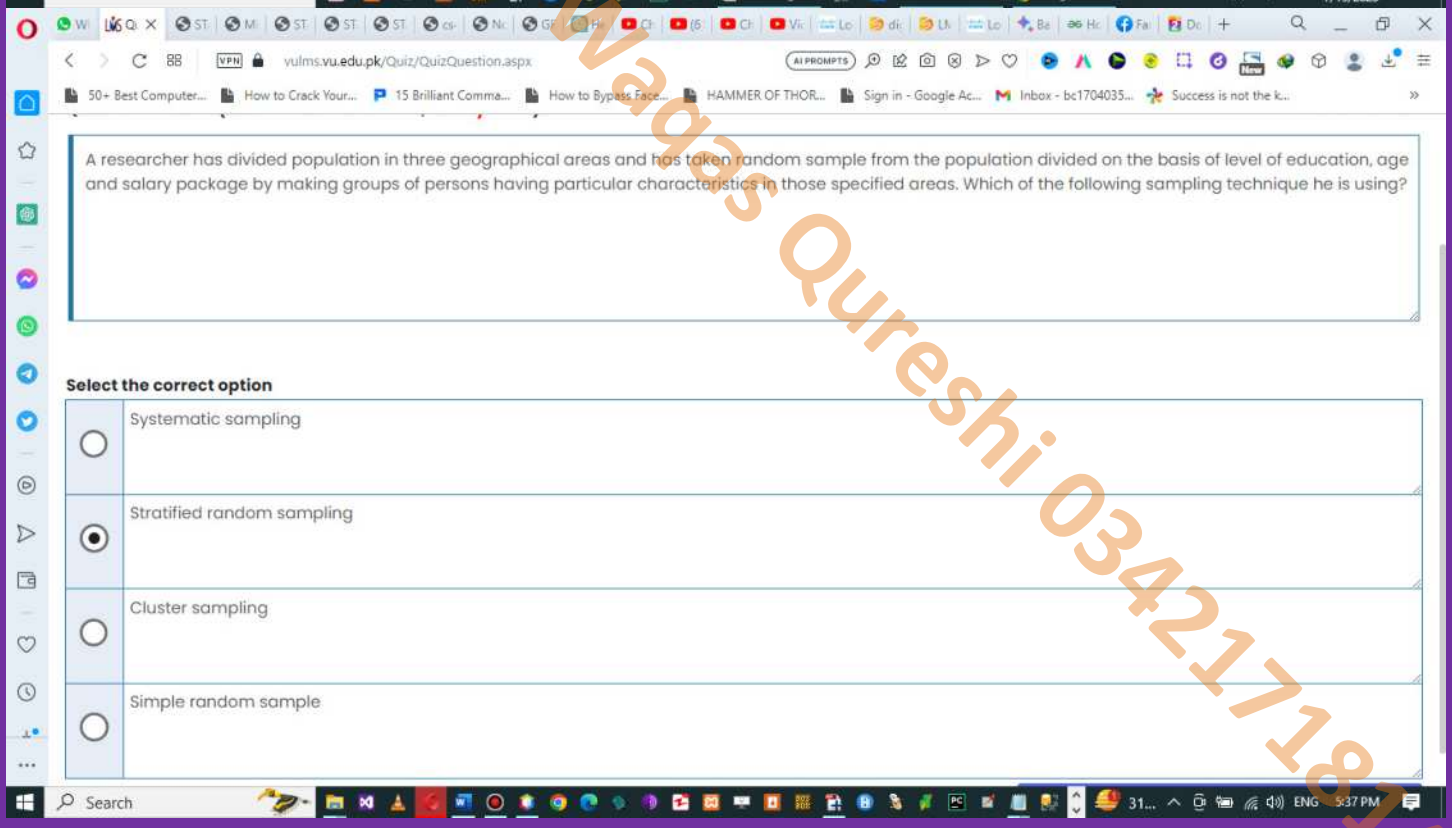

Which of the following experimental designs has two groups, both the groups are exposed to pretest and posttest, the experimental group is exposed to treatment while the control group is not?

Select the correct option

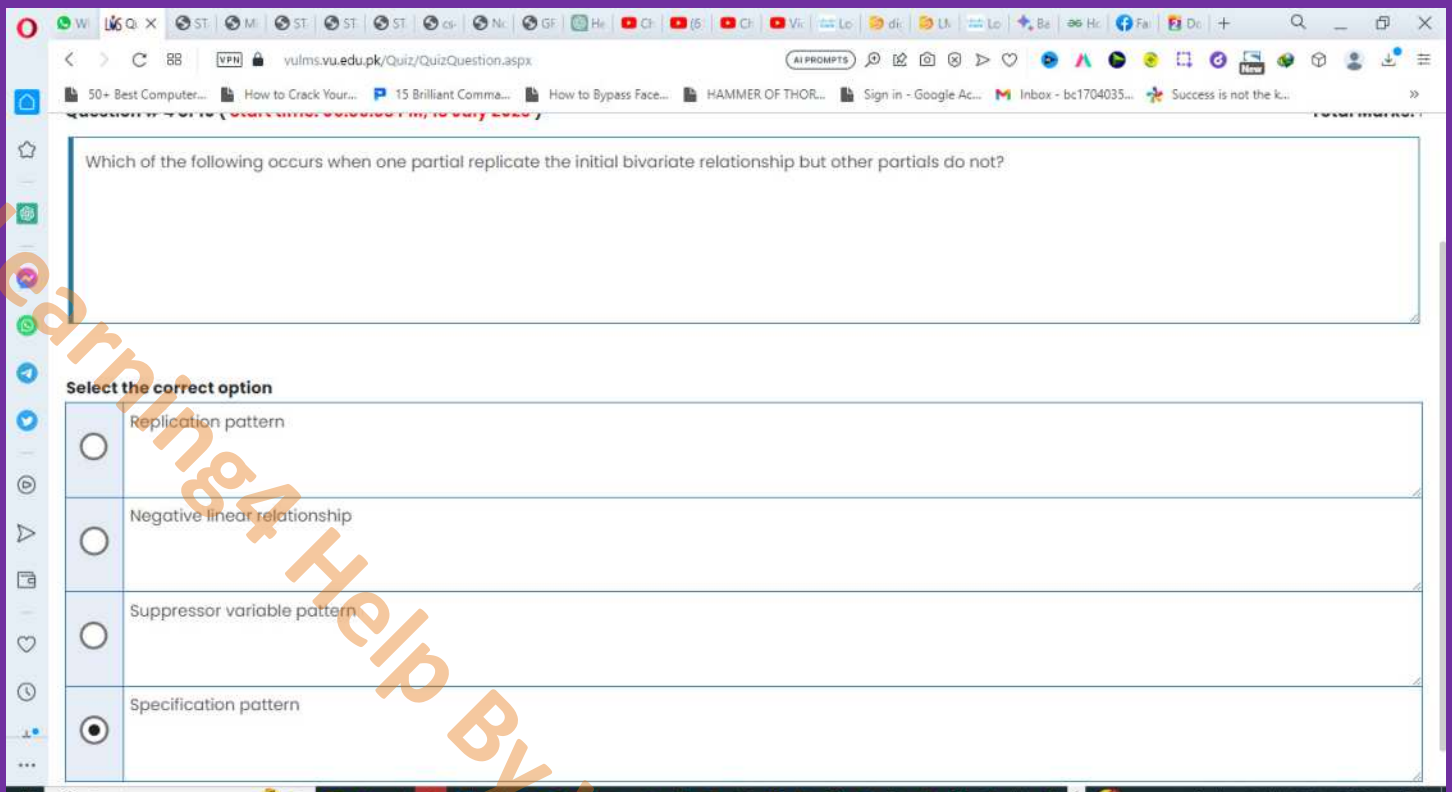

- ○ Solomon's Four Group Design
- ○ Classical Experimental Design
- ○ Two Groups Posttest-only Design
- ◉ Pretest and Posttest Experimental and Control Group Design

Learning4 Help By Waqas Qureshi 03421718143

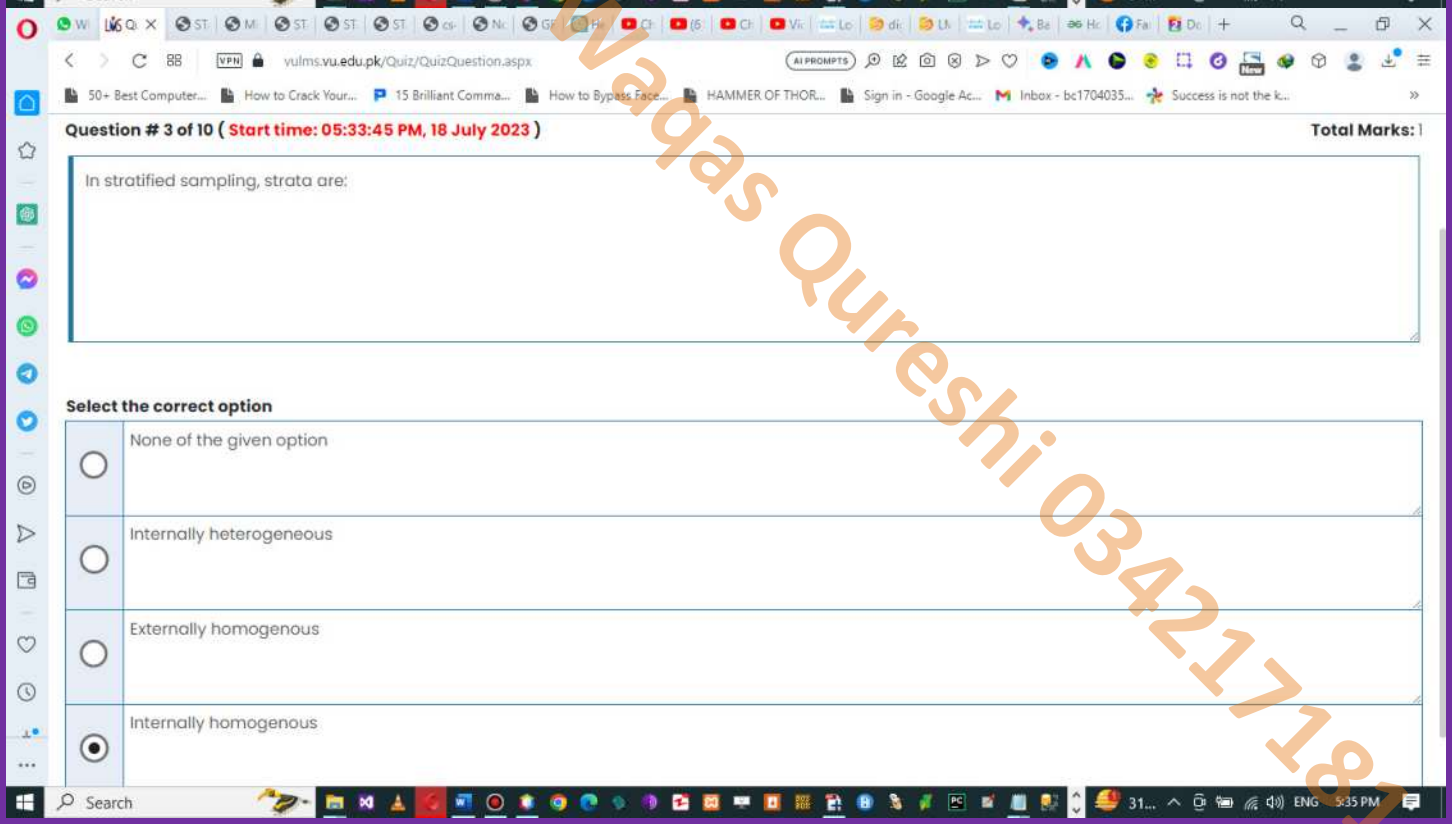

Learning4 Help By Waqas Qureshi 03421718143

Which of the following occurs when one partial replicate the initial bivariate relationship but other partials do not?

Select the correct option

- Replication pattern
- Negative linear relationship
- Suppressor variable pattern
- Specification pattern

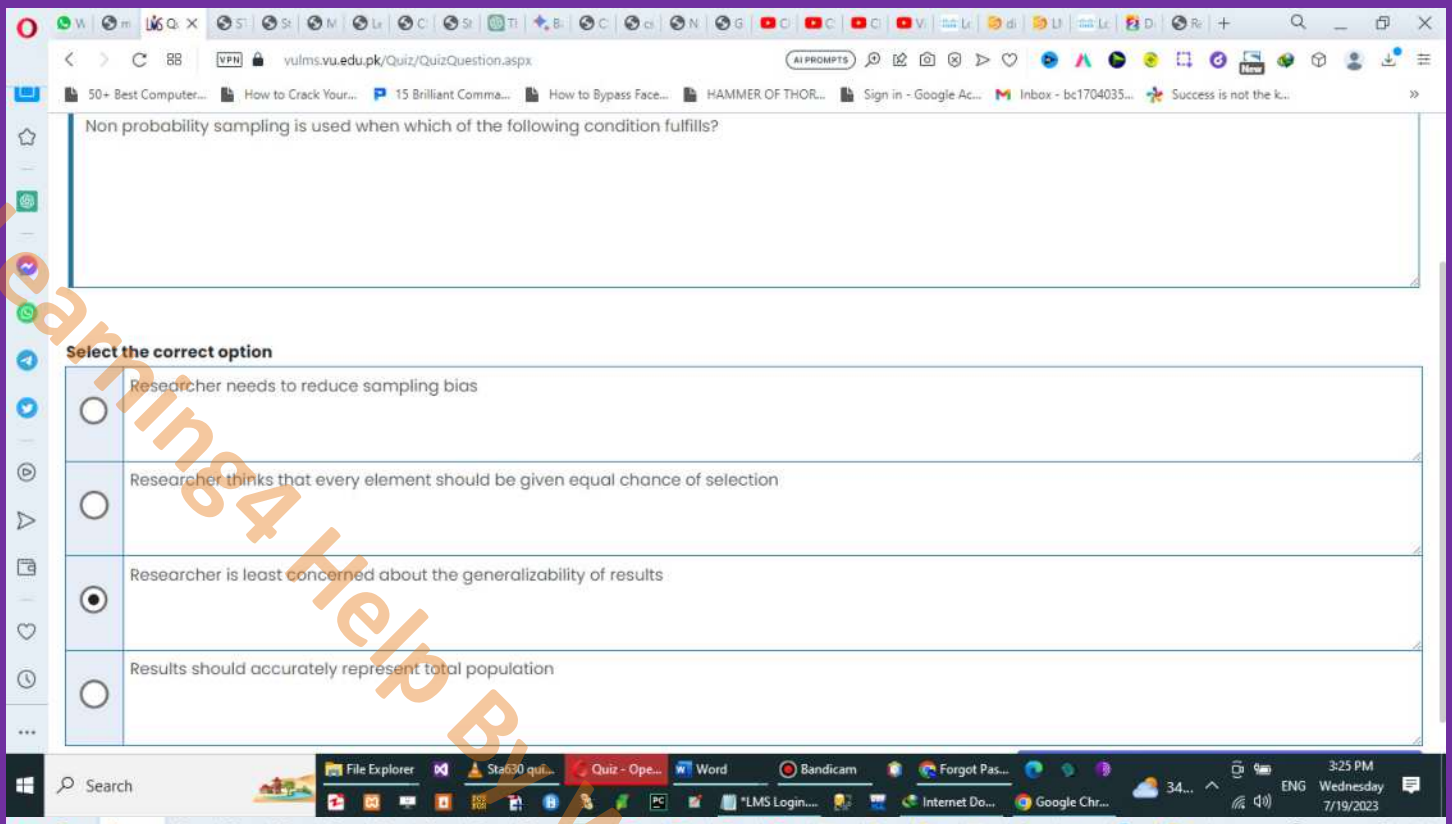

Question # 3 of 10 (Start time: 05:33:45 PM, 18 July 2023) **Total Marks:** 1

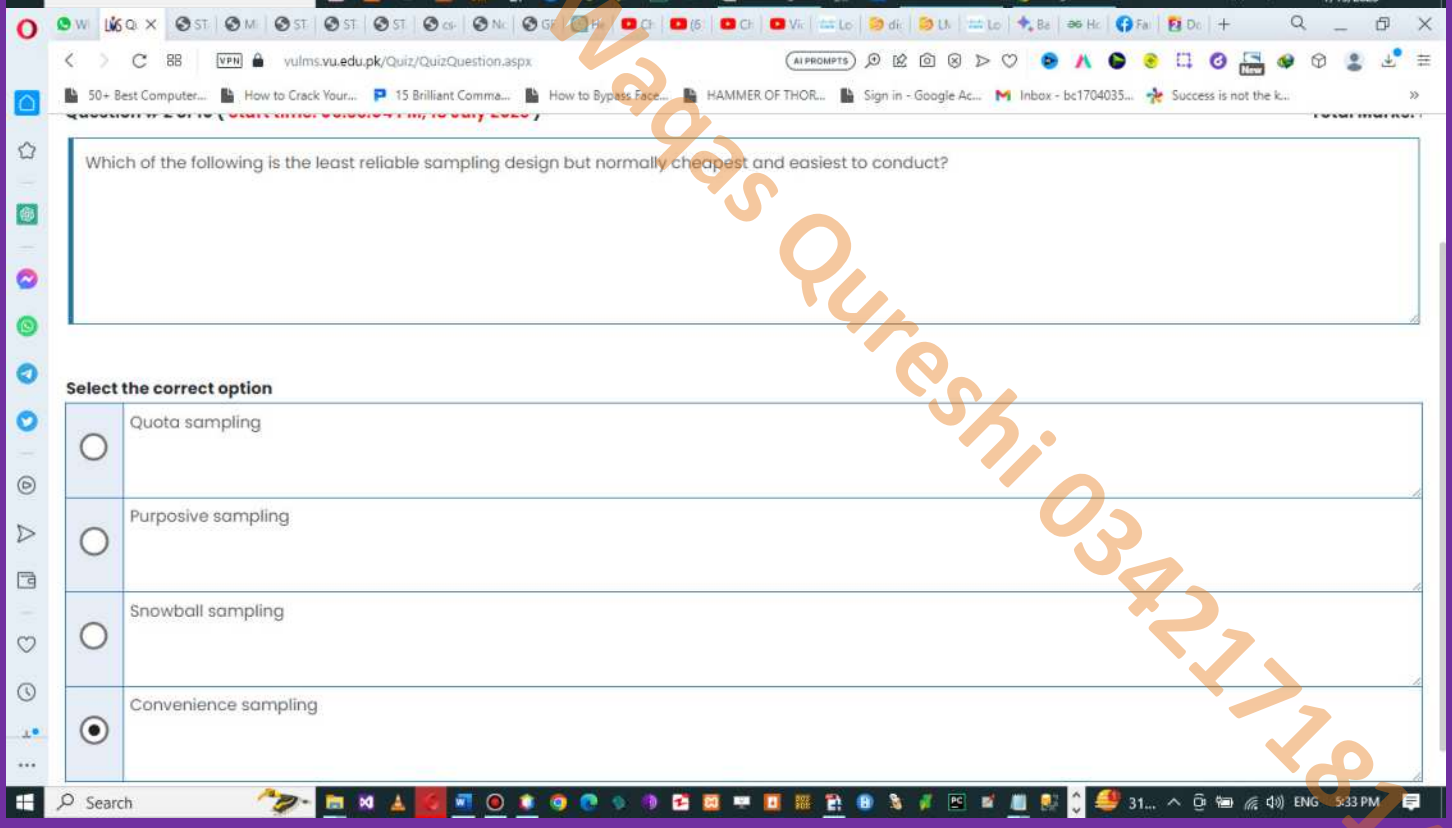

In stratified sampling, strata are:

Select the correct option

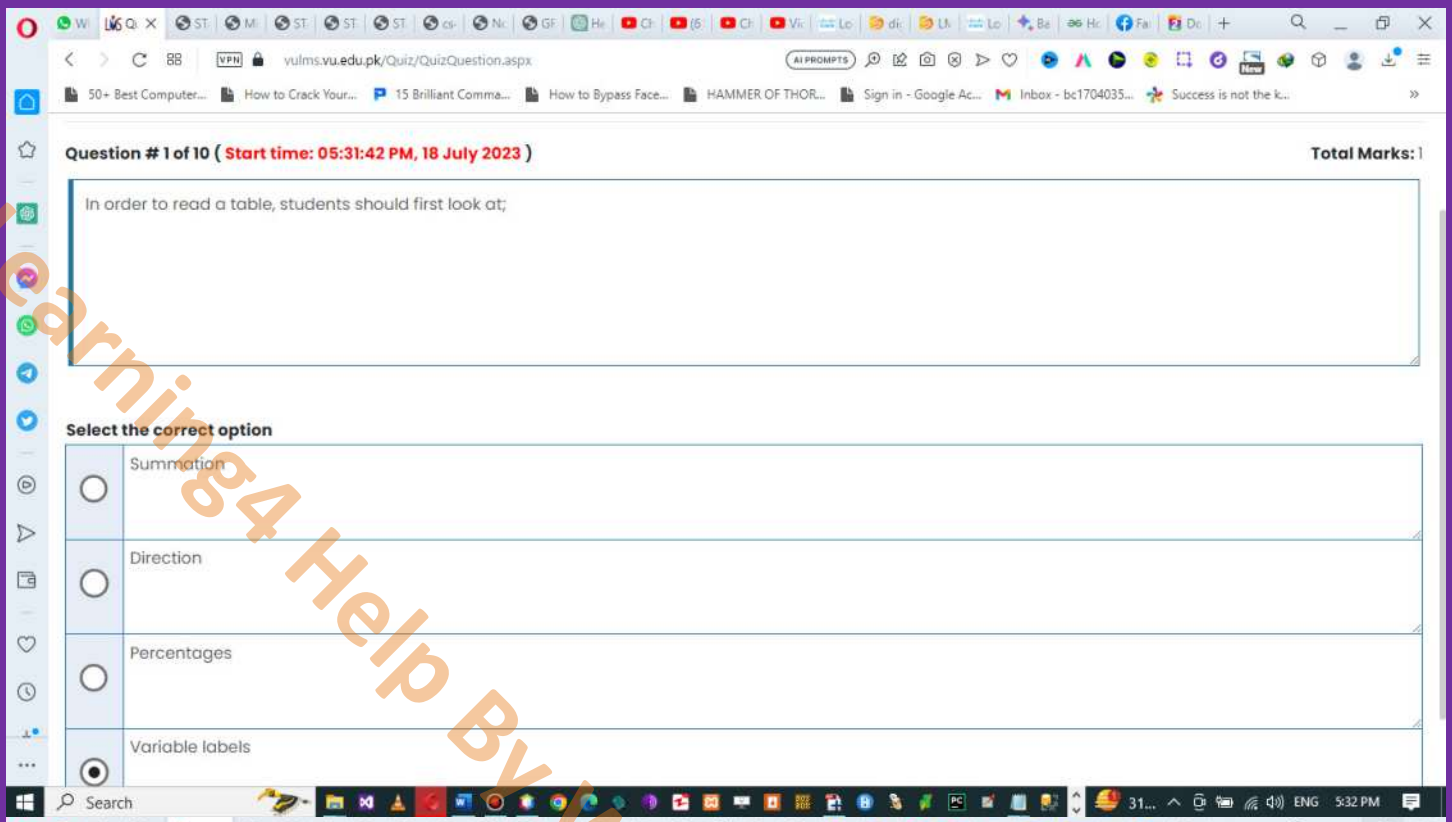

- None of the given option
- Internally heterogeneous
- Externally homogenous
- Internally homogenous

Learning4 Help By Waqas Qureshi 03421718143

Learning4 Help By Waqas Qureshi 03421718143

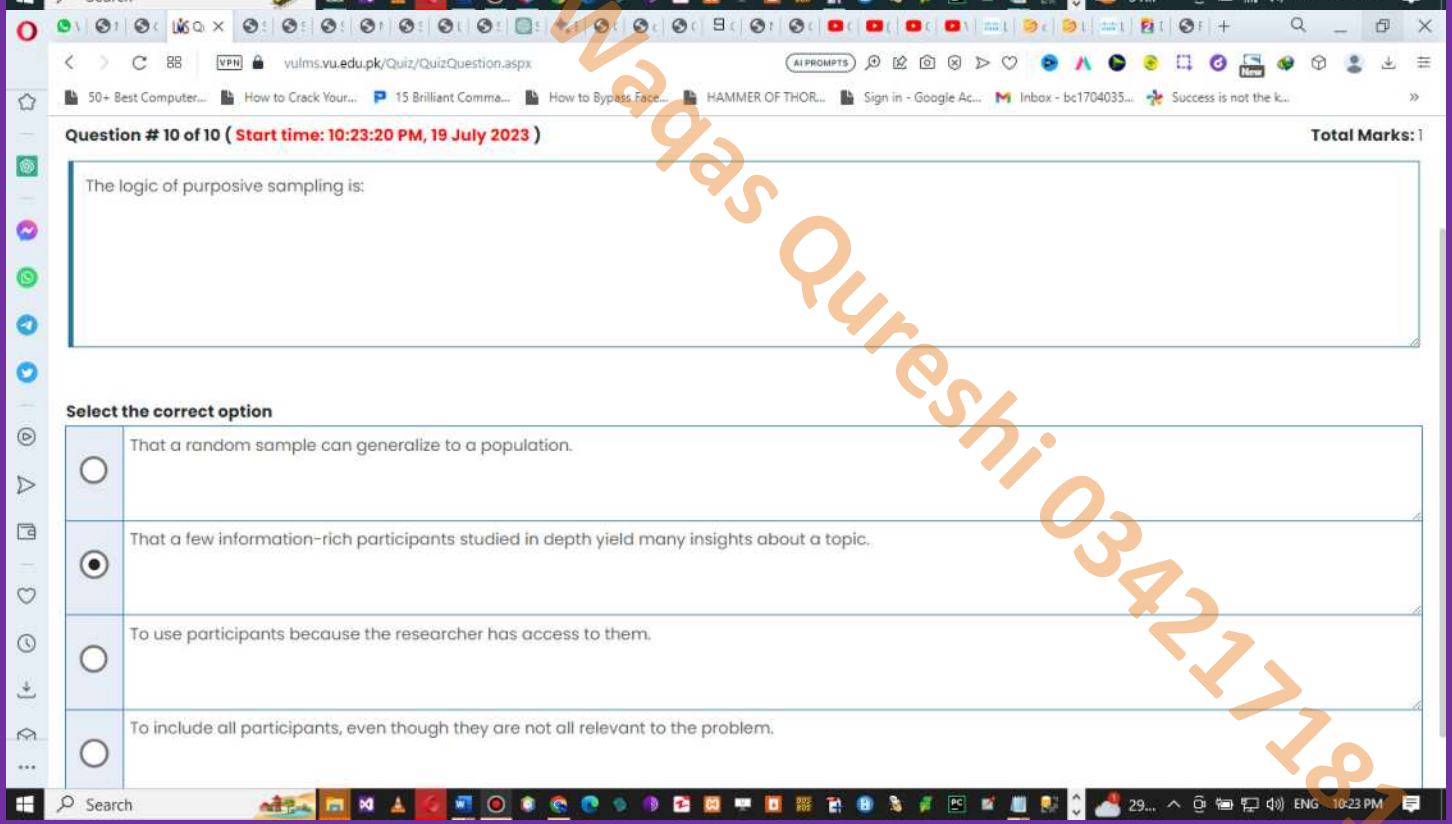

Question # 1 of 10 (Start time: 05:31:42 PM, 18 July 2023) Total Marks: 1

In order to read a table, students should first look at;

Select the correct option

- Summation
- Direction
- Percentages
- Variable labels

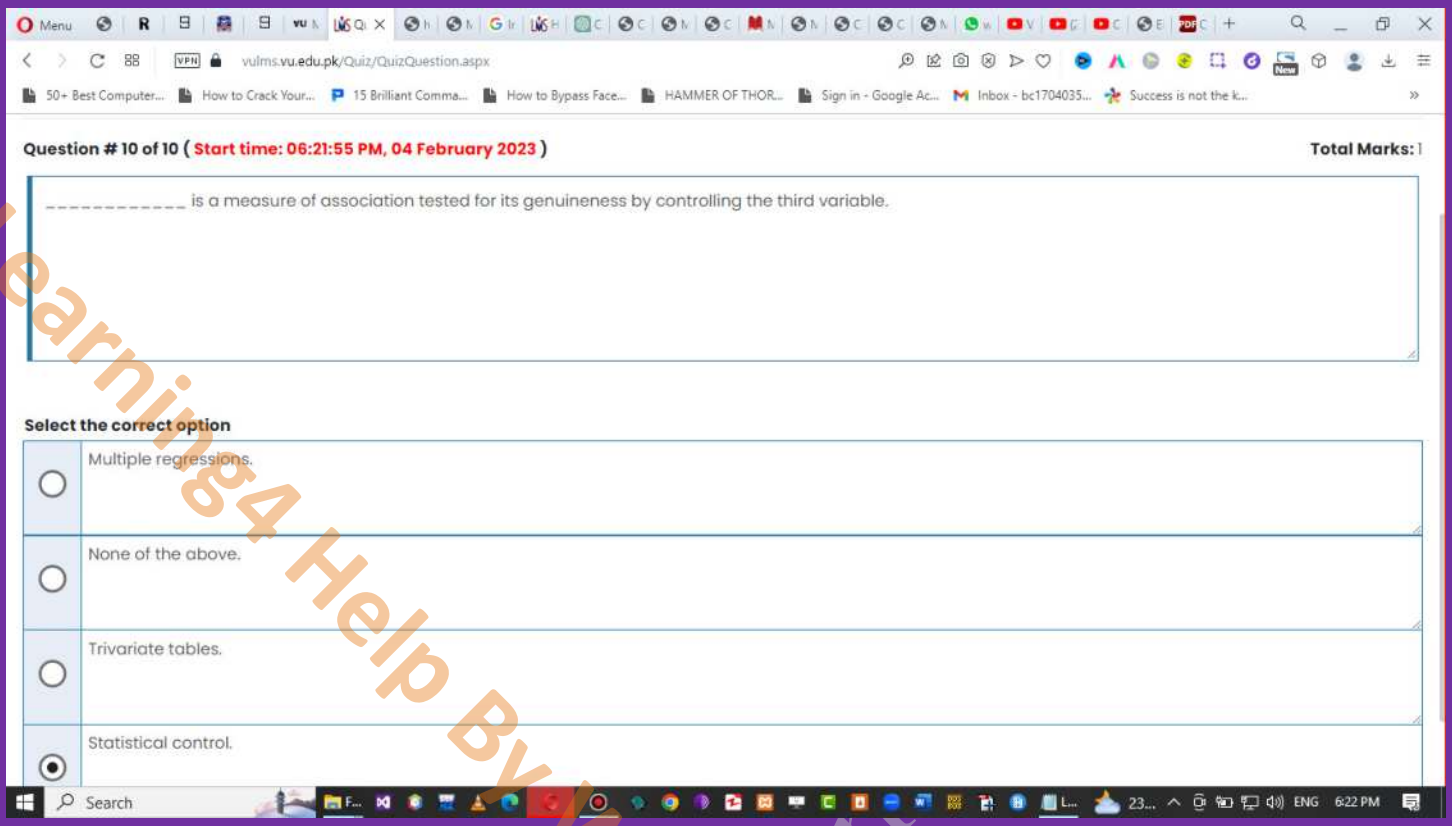

Question # 10 of 10 (Start time: 10:23:20 PM, 19 July 2023) Total Marks: 1

The logic of purposive sampling is:

Select the correct option

- That a random sample can generalize to a population.
- That a few information-rich participants studied in depth yield many insights about a topic.
- To use participants because the researcher has access to them.
- To include all participants, even though they are not all relevant to the problem.
