Introduction to Computing
Module #1 Mcqs with Answers

Question 1: What is Computer Science?
A) The discipline that seeks to build a scientific foundation for topics such as hardware, software, and programming.
B) The study of plants.
C) The process of designing and building computer hardware.
D) None of the above.
Explanation: Computer Science is the discipline that seeks to build a scientific foundation for topics such as hardware, software, and programming.

Question 2: What is computer hardware?
A) Software
B) Programs
C) Physical parts of a computer system
D) Instructions

Question 3: What is computer software?
A) A set of instructions that tells a computer what to do or how to perform a task.
B) The physical parts of a computer system.
C) The process of designing and building computer software.
D) None of the above.

Question 4: What is computer programming?
A) The process of designing and building an executable computer program for accomplishing a specific computing task.
B) The study of computer hardware.
C) The process of designing computer networks.
D) None of the above.

Question 5: What is a computer network?

A) A set of computers connected for the purpose of sharing resources.
B) A type of computer software.
C) The process of designing and building computer hardware.
D) None of the above.

Question 6: What is computer graphics?
A) The discipline of generating images with the aid of computers.
B) The study of computer hardware.
C) The process of designing and building computer software.
D) None of the above.

Question 7: What is a robot?
A) A type of computer software.
B) A machine capable of carrying out a complex series of actions automatically
C) The process of designing computer hardware.
D) None of the above.

Question 8: What is a database?
A) The process of designing and building computer software.
B) A type of computer hardware.
C) A collection of data organized for rapid search and retrieval by a computer.
D) None of the above.

Question 9: What is an algorithm??
A) A type of computer hardware
B) A computer network
C) A set of instructions designed to perform a specific task.
D) None of the above.

Question 10: What is information processing?
A) Communication between computers.
B) A type of computer software
C) Manipulation of digitized information by computers and other digital electronic equipment
D) None of the above.

Question 11: Which of the following is an application of Computer Science?
A) Telecommunications
B) Banking.
C) Hospitals.
D) All of the above.

Question 12:According to a famous job market website in Pakistan, where are most of the jobs available?
A)None of these.

B) Business.
C) Engineering.
D) Computer Science.

Question 13:According to Forbes magazine, which job has been ranked as the Number 1 job in the US?
A) Teacher.
B) Doctor.
C) Software Developer
D) None of the above.

Question 14: Which of the following areas in Computer Science have been ranked by Forbes magazine?
A) Artificial Intelligence and Machine Learning
B) Data Science.
C) Virtual Reality.
D) All of the above.

Question 15:How does studying basics of Computer Science benefit individuals studying fields other than CS?
A) It is not beneficial for them.
B) It helps them understand basic concepts of computers.
C) It is compulsory for everyone.
D) None of the above.

Question 16: What is the main focus of Computer Science?
A) Hardware
B) Software
C) Building a scientific foundation for various topics
D) None of the above.

Question 17: Which of the following is a part of computer hardware?
A) Software.
B) Motherboard.
C) Applications.
D) None of the above.

Question 18: What is the purpose of computer software?
A)To perform a specific computing task.
B) To store data.
C) To provide security.
D) None of the above.

Question 19: What is the process of designing and building an executable computer program called??
A) Computer networking.
B) Computer programming.
C) Computer graphics.
D) None of the above.

Question 20: What is a computer network??
A) A single computer.
B) A collection of physical parts of a computer system.
C) A set of computers connected for sharing resources.
D) None of the above.

Question 21:What is computer graphics?
A) Generating images with the aid of computers.
B) Storing data.
C) Analyzing data.
D) None of the above.

Question 22: What is computer architecture?
A) The process of designing and building an executable computer program for accomplishing a specific computing task.
B) The design and organization of a computer system, including its hardware and software components.
C) The study of computer hardware.
D) None of the above.

Question 23: What is computer modeling?
A) The process of creating and manipulating digital representations of objects or systems.
B) A type of computer software.
C) The process of designing computer networks.
D) None of the above.

Question 24: What is computer simulation?
A) The process of designing and building an executable computer program for accomplishing a specific computing task.
B) The imitation of the operation of a real-world process or system over time.
C) The study of computer hardware.
D) None of the above.

Question 25: What is computer animation?
A) The process of creating moving images from computer-generated graphics.
B) A type of computer hardware.
C) The process of designing computer networks.

D) None of the above.

Answers module #1

Question 1: A) The discipline that seeks to build a scientific foundation for topics such as hardware, software, and programming.

Question 2: C) Physical parts of a computer system

Question 3: A) A set of instructions that tells a computer what to do or how to perform a task.

Question 4: A) The process of designing and building an executable computer program for accomplishing a specific computing task.

Question 5: A) A set of computers connected for the purpose of sharing resources.

Question 6: A) The discipline of generating images with the aid of computers.

Question 7: B) A machine capable of carrying out a complex series of actions automatically

Question 8: C) A collection of data organized for rapid search and retrieval by a computer.

Question 9: C) A set of instructions designed to perform a specific task.

Question 10: C) Manipulation of digitized information by computers and other digital electronic equipment

Question 11: D) All of the above.

Question 12: D) Computer Science.

Question 13: C) Software Developer

Question 14: D) All of the above.

Question 15: B) It helps them understand basic concepts of computers.

Question 16: C) Building a scientific foundation for various topics

Question 17: B) Motherboard.

Question 18: A) To perform a specific computing task.

Question 19: B) Computer programming.

Question 20: C) A set of computers connected for sharing resources.

Question 21: A) Generating images with the aid of computers.

Question 22: B) The design and organization of a computer system, including its hardware and software components.

Question 23: A) The process of creating and manipulating digital representations of objects or systems.

Question 24: B) The imitation of the operation of a real-world process or system over time.

Question 25: A) The process of creating moving images from computer-generated graphics.

CS101 Module#2 Mcqs With Answers

Question 1: What is Breadth First Learning?
A) Learning one course in detail before moving to the next
B) Learning a basic introduction to almost all courses of Computer Science.
C) Learning only the theoretical aspects of a course
D) None of the above

Question 2: What is the alternative to Breadth First Learning?
A) Depth First Learning
B) Specific Learning
C) Comprehensive Learning
D) None of the above

Question 3: What will be covered in Breadth First Learning?
A) Study of only practical aspects of CS
B) Detailed study of one major course in CS
C) Abstract view of all major courses in CS
D) None of the above

Question 4: What will be covered in the topic of Search Engine Usage Techniques?
A) Programming Languages
B) Data Abstraction
C) Data Storage
D) Searching techniques over the internet

Question 5: What is the role of Data Storage in computer systems?

A) To manipulate data
B) To search for data
C) To store data in hardware
D) To communicate over networks

Question 6: What is the primary focus of studying Algorithms?
A) To understand hardware components
B) To develop software applications
C) To analyze data patterns
D) To design computer networks

Question 7: How does Data Abstraction help in designing complex systems?
A) By revealing all complexities
B) By hiding complexities
C) By simplifying the data
D) By removing the need for programming

Question 8: What is the focus of Database Systems in Computer Science?
A) To manage hardware components
B) To design computer algorithms
C) To analyze data patterns
D) To store and link data

Question 9: How does Computer Science impact society?
A) By creating social networks
B) By influencing social behaviors
C) By advancing technology
D) By providing entertainment

Question 10: What is the purpose of studying Content Filtering, Spam, and International laws?
A) Internet security
B) Data storage
C) Privacy protection
D) Network communication

Question 11: Which software is used for word processing?
A) Microsoft Access
B) Microsoft Word
C) Microsoft Excel
D) Microsoft PowerPoint

Question 12: What is the purpose of Presentation Development?
A) To create databases
B) To design computer algorithms

C) To build software applications
D) To create visual presentations

Question 13: What is the function of Spreadsheet software?
A) To create word documents
B) To create presentations
C) To perform calculations on data
D) To create databases

Question 14: Which DBMS tool will be implemented for database management?
A) Microsoft Word
B) Microsoft PowerPoint
C) Microsoft Excel
D) Microsoft Access

Question 15: What is the purpose of Web Page Development?
A) To create word documents
B) To design computer algorithms
C) To build websites
D) To create databases

Question 16: What is the goal of Search Engine Usage Techniques?
A) To perform advanced data analysis
B) To effectively search over the internet
C) To design search engine algorithms
D) To understand search engine architecture

Question 17: What is the focus of Data Manipulation?
A) To store data in hardware
B) To search for data
C) To manipulate data
D) To communicate over networks

Question 18: Which of the following areas in Computer Science have been ranked by Forbes magazine?
A) Artificial Intelligence and Machine Learning
B) Data Science
C) Virtual Reality
D) All of the above

Question 19: What is a computer network?
A) A set of computers connected for sharing resources
B) A single computer
C) A type of software

D) None of the above

Question 20: What is computer programming?
A) Writing emails
B) Installing software on a computer
C) Designing and building an executable computer program
D) None of the above

Answers module#2.

Question 1: What is Breadth First Learning?
Answer: B) Learning a basic introduction to almost all courses of Computer Science.

Question 2: What is the alternative to Breadth First Learning?
Answer: A) Depth First Learning

Question 3: What will be covered in Breadth First Learning?
Answer: C) Abstract view of all major courses in CS

Question 4: What will be covered in the topic of Search Engine Usage Techniques?
Answer: D) Searching techniques over the internet

Question 5: What is the role of Data Storage in computer systems?
Answer: C) To store data in hardware

Question 6: What is the primary focus of studying Algorithms?
Answer: B) To develop software applications

Question 7: How does Data Abstraction help in designing complex systems?
Answer: B) By hiding complexities

Question 8: What is the focus of Database Systems in Computer Science?
Answer: D) To store and link data

Question 9: How does Computer Science impact society?
Answer: C) By advancing technology

Question 10: What is the purpose of studying Content Filtering, Spam, and International laws?
Answer: A) Internet security

Question 11: Which software is used for word processing?
Answer: B) Microsoft Word

Question 12: What is the purpose of Presentation Development?

Answer: D) To create visual presentations

Question 13: What is the function of Spreadsheet software?
Answer: C) To perform calculations on data

Question 14: Which DBMS tool will be implemented for database management?
Answer: D) Microsoft Access

Question 15: What is the purpose of Web Page Development?
Answer: C) To build websites

Question 16: What is the goal of Search Engine Usage Techniques?
Answer: B) To effectively search over the internet

Question 17: What is the focus of Data Manipulation?
Answer: C) To manipulate data

Question 18: Which of the following areas in Computer Science have been ranked by Forbes magazine?
Answer: D) All of the above (Artificial Intelligence and Machine Learning, Data Science, Virtual Reality)

Question 19: What is a computer network?
Answer: A) A set of computers connected for sharing resources

Question 20: What is computer programming?
Answer: C) Designing and building an executable computer program.

CS101 Module#3 Mcqs With Answers

Question 1: What is the primary function of a search engine like Google?
A) Index web pages
B) Create web pages
C) Design websites
D) Store web pages

Question 2: How can you search on Google?
A) Type https://www.google.com/ in the address bar
B) Type your query in the text box on the Google homepage
C) Click on the microphone icon and speak your query
D) Both A and B

Question 3: What is a query in the context of a search engine?
A) The result of a search

B) The process of searching
C) The set of words given to the search engine for searching
D) The ranking of search results

Question 4: How does Google find pages when you type a query?
A) It finds pages that contain all the terms given in the query
B) It finds pages that contain any of the terms given in the query
C) It finds pages that contain none of the terms given in the query
D) It finds pages randomly

Question 5: What happens when you type a query in double quotations on Google?
A) Google ignores the query
B) Google treats it as a phrase search
C) Google considers it as a spelling mistake
D) Google treats it as a wildcard search

Question 6: What is the purpose of the microphone option on Google?
A) To listen to music
B) To search by speaking
C) To record voice notes
D) To play audio files

Question 7: How can you flip a coin using Google?
A) By typing "Flip a Coin" in the search bar
B) By clicking on the coin icon on the Google homepage
C) By saying "Flip a Coin" into the microphone
D) By shaking your device

Question 8: Why is query formulation important when searching on Google?
A) To confuse the search engine
B) To get more search results
C) To ensure relevant search results
D) To slow down the search process

Question 9: How does Google treat capitalization in search queries?
A) It distinguishes between capital and small letters
B) It ignores capitalization
C) It treats capital letters as search operators
D) It converts all letters to lowercase

Question 10: What is the purpose of a search engine?
A) To create web pages
B) To design websites
C) To index web pages

D) To store web pages

Answers module#3

Question 1: What is the primary function of a search engine like Google?
Answer: A) Index web pages

Question 2: How can you search on Google?
Answer: D) Both A and B (Type https://www.google.com/ in the address bar or type your query in the text box on the Google homepage)

Question 3: What is a query in the context of a search engine?
Answer: C) The set of words given to the search engine for searching

Question 4: How does Google find pages when you type a query?
Answer: A) It finds pages that contain all the terms given in the query

Question 5: What happens when you type a query in double quotations on Google?
Answer: B) Google treats it as a phrase search

Question 6: What is the purpose of the microphone option on Google?
Answer: B) To search by speaking

Question 7: How can you flip a coin using Google?
Answer: A) By typing "Flip a Coin" in the search bar

Question 8: Why is query formulation important when searching on Google?
Answer: C) To ensure relevant search results

Question 9: How does Google treat capitalization in search queries?
Answer: B) It ignores capitalization

Question 10: What is the purpose of a search engine?
Answer: C) To index web pages.

CS101 Module#4 Mcqs With Answers.

Question 1: How can you search for the weather in a specific location on Google?
A) By typing "Weather" followed by the location name
B) By typing "Location" followed by the weather
C) By typing "Weather" followed by the city name
D) By typing "Weather" followed by the country name

Question 2: How can you perform calculations on Google?

A) By typing the calculation in words
B) By typing the calculation as a mathematical expression
C) By using the calculator tool on Google
D) By clicking on the calculator icon on Google

Question 3: What query would you use to find the result of 12 multiplied by 391?
*A) 12*391*
B) Multiply 12 by 391
C) 12+391
D) 12/391

Question 4: How can you convert currency using Google?
A) By typing the amount followed by the currency code
B) By typing the currency code followed by the amount
C) By typing the amount followed by "to" and then the target currency
D) By typing "Currency Conversion" followed by the amount and currencies

Question 5: What query would you use to convert 100 Euros to Pakistani rupees?
A) 100 Euros to PKR
B) 100 Euros in PKR
C) Convert 100 Euros to PKR
D) Euros to PKR 100

Question 6: How can you convert kilometers per hour (Kph) to miles per hour (Mph) on Google?
A) By typing "Kph to Mph"
B) By typing the conversion rate
C) By typing the speed in kilometers
D) By typing the speed in miles

Question 7: How can you convert meters (m) to centimeters (cm) on Google?
A) By typing "m to cm"
B) By typing the conversion rate
C) By typing the length in meters
D) By typing the length in centimeters

Question 8: Which query is NOT related to searching tricks on Google?
A) "Subtract 10 from 30"
B) "Sin 90"
C) "Pakistan Cricket team"
D) "Baadshahi Mosque"

Question 9: How can you search for information about Minar-e-Pakistan on Google?
A) By typing "Minar-e-Pakistan" in the search bar
B) By typing "Information about Minar-e-Pakistan"

C) By typing "Minar-e-Pakistan history"
D) By typing "Minar-e-Pakistan location"

Question 10: What query would you use to find the result of 80 divided by 100 multiplied by 200?
A) 80/100200
B) Divide 80 by 100 and multiply by 200
C) 80(100/200)
D) 80/100+200

Answer module#4.

Question 1: How can you search for the weather in a specific location on Google?
Answer: C) By typing "Weather" followed by the city name

Question 2: How can you perform calculations on Google?
Answer: B) By typing the calculation as a mathematical expression

Question 3: What query would you use to find the result of 12 multiplied by 391?
*Answer: A) 12*391*

Question 4: How can you convert currency using Google?
Answer: C) By typing the amount followed by "to" and then the target currency

Question 5: What query would you use to convert 100 Euros to Pakistani rupees?
Answer: B) 100 Euros in PKR

Question 6: How can you convert kilometers per hour (Kph) to miles per hour (Mph) on Google?
Answer: A) By typing "Kph to Mph"

Question 7: How can you convert meters (m) to centimeters (cm) on Google?
Answer: A) By typing "m to cm"

Question 8: Which query is NOT related to searching tricks on Google?
Answer: D) "Baadshahi Mosque"

Question 9: How can you search for information about Minar-e-Pakistan on Google?
Answer: A) By typing "Minar-e-Pakistan" in the search bar

Question 10: What query would you use to find the result of 80 divided by 100 multiplied by 200?
Answer: A) 80/100200

CS101 Module#5 Mcqs With Answers.

Question 1: What symbol can you add to a Google search query to search on a specific social media platform?
A) #
B) @
C) $
D) ?

Question 2: How can you search for laptops priced around 50000 Pakistani Rupees?
A) Laptop 50000
B) Laptop pkr 50000
C) Laptop price 50000
D) Laptop in 50000

Question 3: What symbol is used to identify popular hashtags on social media?
A) #
B) @
C) $
D) ?

Question 4: How can you exclude results containing a specific word from your Google search?
A) Jaguar +cars
B) Jaguar -cars
*C) Jaguar *cars*
D) Jaguar /cars

Question 5: Which method should you use to search for an exact phrase on Google?
A) Enclose the phrase in square brackets []
B) Enclose the phrase in double quotes ""
*C) Use the * symbol before the phrase*
D) Use the + symbol before each word in the phrase

Question 6: How can you search for pages that contain any word before the exact phrase "is thicker than water"?
A) " is thicker than water"*
B) "is thicker than water"
C) " is thicker than water *"*
*D) "is thicker than water *"*

Question 7: What does adding "pkr" in a Google search query indicate?
A) The query is related to pricing
B) The query is in Pakistani Rupees
C) The query is for a product
D) The query is for a service

Question 8: Which symbol is used for exact phrase matching in Google search?
*A) **
B) $
C) #
D) "

Question 9: How can you search for a hashtag on social media platforms?
A) "hashtag"
B) "@hashtag"
C) "#hashtag"
D) "$hashtag"

Question 10: How can you search for pages containing the exact phrase "climate change"?
A) "climate change"
B) #climatechange
C) climate change
*D) climate * change*

Question 11: What is the purpose of using the "@" symbol in a Google search query?
A) To search for email addresses
B) To search for social media content
C) To search for website URLs
D) To search for news articles

Question 12: How can you search for pages containing the phrase "technology trends" with any word before it?
A) " technology trends"*
B) "technology trends"
C) " technology trends *"*
*D) "technology trends *"*

Question 13: What does using double quotes around a phrase in a Google search indicate?
A) That the phrase should be translated
B) That the phrase should be searched exactly as written
C) That the phrase is a book title
D) That the phrase is a movie title

Question 14: What should you do to search for a phrase with uncertain words at the beginning?
A) Use double quotes around the entire phrase
B) Use a single asterisk (*) before the uncertain words
C) Use a question mark (?) before the uncertain words
D) Use double quotes around uncertain words

Answers module#5.

Question 1: What symbol can you add to a Google search query to search on a specific social media platform?
Answer: A) #

Question 2: How can you search for laptops priced around 50000 Pakistani Rupees?
Answer: D) Laptop in 50000

Question 3: What symbol is used to identify popular hashtags on social media?
Answer: A) #

Question 4: How can you exclude results containing a specific word from your Google search?
Answer: B) Jaguar -cars

Question 5: Which method should you use to search for an exact phrase on Google?
Answer: B) Enclose the phrase in double quotes ""

Question 6: How can you search for pages that contain any word before the exact phrase "is thicker than water"?
Answer: C) " is thicker than water *"*

Question 7: What does adding "pkr" in a Google search query indicate?
Answer: B) The query is in Pakistani Rupees

Question 8: Which symbol is used for exact phrase matching in Google search?
Answer: D) "

Question 9: How can you search for a hashtag on social media platforms?
Answer: C) "#hashtag"

Question 10: How can you search for pages containing the exact phrase "climate change"?
Answer: A) "climate change"

Question 11: What is the purpose of using the "@" symbol in a Google search query?
Answer: B) To search for social media content

Question 12: How can you search for pages containing the phrase "technology trends" with any word before it?
Answer: C) " technology trends *"*

Question 13: What does using double quotes around a phrase in a Google search indicate?
Answer: B) That the phrase should be searched exactly as written

Question 14: What should you do to search for a phrase with uncertain words at the beginning?

Answer: B) Use a single asterisk (*) before the uncertain words.

CS101 Module#6 Mcqs with Answers.

Question 1: What operator is used to search within a specific range of numbers?
A) .. (two dots)
B) //
*C) **
D) --

Question 2: Which Boolean operator is used to find pages that contain both terms, but not necessarily together?
A) And
B) Not
C) OR
D) NOR

Question 3: How can you search for pages within a specific website?
A) in
B) site
C) on
D) at

Question 4: What operator is used to find related websites to a specified website?
A) like
B) similar
C) related-to
D) related

Question 5: How can you search for the cached version of a website?
A) cache
B) cached
C) view
D) history

Question 6: What operator is used to search for a specific file type?
A) type
B) ext
C) file
D) filetype

Question 7: Which operator is used to find pages that contain either of the specified terms?
A) Either
B) Choice

C) Or
D) OneOf

Question 8: How can you search for information about a specific website?
A) about
B) details
C) about
D) info

Question 9: What operator is used to specify an alternative term for the search?
A) alt
B) alternative
C) synonym
D) ~

Question 10: How can you search for pages that contain numerical ranges?
A) Range
B) Numbers
C) ..
D) NumRange

Question 11: What operator is used to search for pages that contain a specific term in the title?
A) Title
B) InTitle
C) Headline
D) -

Question 12: Which operator is used to search for pages that contain a specific term in the URL?
A) URL
B) InURL
C) Link
D) -

Answer module#6

Question 1: What operator is used to search within a specific range of numbers?
Answer: A) .. (two dots)

Question 2: Which Boolean operator is used to find pages that contain both terms, but not necessarily together?
Answer: A) And

Question 3: How can you search for pages within a specific website?

Answer: B) site

Question 4: What operator is used to find related websites to a specified website?
Answer: D) related

Question 5: How can you search for the cached version of a website?
Answer: B) cached

Question 6: What operator is used to search for a specific file type?
Answer: D) filetype

Question 7: Which operator is used to find pages that contain either of the specified terms?
Answer: C) Or

Question 8: How can you search for information about a specific website?
Answer: A) about

Question 9: What operator is used to specify an alternative term for the search?
Answer: D) ~

Question 10: How can you search for pages that contain numerical ranges?
Answer: C) ..

Question 11: What operator is used to search for pages that contain a specific term in the title?
Answer: B) InTitle

Question 12: Which operator is used to search for pages that contain a specific term in the URL?
Answer: B) InURL

CS101 Module#7 Mcqs with Answers

Question 1: How can you find the stock market trend for the company "Apple" using search operators?

A) stocks:appl

B) stock:apple

C) stocks:appl

D) stocks:aapl

Question 2: Which operator can you use to see the map of Lahore?

A) map:LHR

B) maps:Lahore

C) map:Lahore

D) location:Lahore

Question 3: How can you find information about the movie "Steve Jobs"?

A) movie:jobs

B) film:Steve Jobs

C) movie:Steve Jobs

D) film:Steve

Question 4: Which website can you visit to compare two foods based on their nutrient values?

A) www.fooddata.com

B) www.myfooddata.com

C) www.foodcomparison.com

D) www.nutritioncompare.com

Question 5: How can you find the definition of the term "Computer" using search operators?

A) Define:Computer

B) Term:Computer

C) Definition:Computer

D) Computer:Define

Question 6: Which link should you use to search for images on Google?

A) www.google.com/images

B) www.images.google.com

C) images.google.com

D) www.google.com/search/images

Question 7: How can you perform funny tricks like rotating the Google screen to 360 degrees?

A) Funny:360

B) Rotate:360

C) Tilt

D) Spin:360

Question 8: What operator can you use to find the stock market trend for the company "Microsoft"?

A) stocks:msft

B) stock:msoft

C) stocks:microsoft

D) stock:msft

Question 9: How can you find the definition of the term "Globalization" using search operators?

A) Define:Globalization

B) Term:Globalization

C) Definition:Globalization

D) Globalization:Define
