Zoo502 quiz 4 solved

By VU Experts Zoologists

Regards : MeRRy

1. In blood .....of Carbon dioxide is transported in form of carboxyhemoglobin. **23%**

2. respiratory system of birds consists of ..... air sac **7 or 9**

3. Lung ventilation or breathing is a mechanical process that consists of .....phases. **two**

4. Male human forcefully expel an additional ....,.....of air with maximum use of the accessory muscles. **1000 mL**

5. Hemoglobin is called oxyhemoglobin when. Is bound. **Oxygen**

6. blood with hemoglobin is 20 ml per 100 ml blood at..... at Sea level. **37℃**

7. large number of rete mirabile, in. Tuna (fish) which are used to regulate the temperature of the ..... **All (**brain, Muscles, and eyes.)

8. The amount of air that moves into or out of lungs during a single respiratory cycle under quiet, resting Conditions. **Resting Tidal Volume**

9. Which of following is not a respiratory pigment. **Charcoal**

10. Angiotensin II is produced in **lungs**

11. Serotonin is found in high concentration in the .....and blood platelets. **Gut**

12. Averages Total air holding capacity in an adult human females is about. **4200 mL**

13. Averages Total air holding capacity in an adult human males is about. **6000 mL**

a) Fenestrated capillaries are found in. **renal glomerulus, intestines and endocrine glands.**

14. Branchioles are important part of. **Respiratory system**

15. If all sites on the hemoglobin molecule are occupied by 02, the blood is ..... saturated **100%**

16. Alveoli are tiny air sacs in. **Lungs**

17. Which one of the following is not associated with the classification of capillaries??? **Exocrine capillaries**

18. Lung volumes and lung capacities refer to the volume of air associated with different phases of the. **Respiratory cycle**

19. .....do not possess a diaphragm. **Reptiles**

20. Chlorocruorin is a..... Respiratory pigment found in blood. **Green**

21. air capillaries are the sites where the oxygen and carbon dioxide are **Exchanged.**

22. Gas transfer system involves ..... Basic steps. **Four**

23. Amphibia, reptiles and mammals has .....Baroreceptors in central cardiovascular system. **Unmyelinated**

24. .....is a potent of vasoconstrictor hormone. **Endothelin**

25. A.....is a complex of arteries and veins lying very close to each other. Found in some vertebrates. **Rete Mirabile**

26. ..... Is a of ventilation in which air enters into the lungs. **Inspiration**

27. During inspiration the diaphragm..... **contracts**

28. Sinusoidal capillaries Are found in ..... **liver, bone marrow, spleen**

29. Parabronchi are found in the lungs of ..... **birds**

30. On the basis of their wall structure capillaries are classified into. ..... Types. **Three**

31. In expiration phase of ventilation air with low .....**.and high...,.....** content is Moved out . **Oxygen and CO2**

32. Continuous capillaries located in .....**..(ALL) (**muscle, nervous tissue, lungs,)

33. A Hemoglobin molecule contains .....**,..**iron containing heme groups. **four**

34. Baroreceptors Sense and monitor..... Blood pressure changes. **Arterial**

35. Oxygen bind with hemoglobin .....**..97%**

36. Hemoglobin increase oxygen binding capacity of blood by.....times. **70**

37. Capillaries are microscopic vessels about 1 mm long and in..... diameter. **3 - 10 µm**

38. Respiratory Surface area of the lung is between .....**.50 and 100 m2**

39. Thromboxane A, formed in the plasma by .....causes vasoconstriction. **Platelets**

40. About _____ carbon dioxide is carried in the plasma as bicarbonate ions. **70%**

41. Myelinated B-type afferent fibers respond to ..... i**ncreases in the rate of filling and volume of the atria.**

42. Carbon monoxide gas has ..... times more affinity for hemoglobin than oxygen. **200**

43. Lungs are located in the**..... thoracic cavity.**

44. about..... carbon dioxide occur in blood as carboxyhemoglobin. **23%**

45. Carbon dioxide occur in blood..... form **three**
