1. Fish consuming or craving large quantities of food are called?

Answer: Voracious

2. ___is an active, voracious predator of fish and invertebrates?

Answer: Shark

3. Fish consume decaying plants and animal matter as food?

Answer: Detrivores

4. Detritivores are ___of all species?

Answer: 10%

5. Detrivores may also obtain nutrition by?

Answer: Coprophagy

6.___is a feeding strategy involving the consumption of feces?

Answer: Coprophagy

7. ___fishes form an important part of the ichthyomass in the Amazon basin?

Answer: Detritivorous

8. The___constitute more than 30% of the total fish yield in the Amazon basin?

Answer: Characiformes

9. Most immature adult fish are usually?

Answer: Plankton eater

10. This type of fish eats certain selected foods?

Answer: Stenophagic

11: This type of fish eats a variety of foods/

Answer: Euryphagic

12: ___typically live in the upper layers of the acquaculture and consume food from the surface?

Answer: Surface feeders

13: ___Prefers algae and other submerged vegetation?

Answer: Marginal feeders

14: ___Often live in the middle layer of the aquarium?

Answer: Middle feeders

15: They eat bottom food such as rotten food?

Answer: Bottom feeders

16. Fish can be divided into___categories based on the type of prey and swallowing?

Answer: 5

17. The Southeast Asian archer fish preys on___by spitting on nearby trees?

Answer: Insects

18. Parrot fish or butterfly fish graze on?

Answer: Coral reefs

19. ___Often eat the larvae of dipteran insects from the bottom of lakes?

Answer: Bluegills

20. Deep sea eel is also?

Answer: Parasitic

21. Female fish obligatorily responds by developing a ___ through which males can absorb nutrients?

Answer: Fleshy papillae

22. In this case, the fish swallow the living creatures that live in the water?

Answer: Strainers

23. An adult Menhaden is capable of staining as much as___of water per minute by gill rakers?

Answer: 1-2 gallons

24. Sometimes ducklings and small birds are also seen in the belly of___?

Answer: goosefish

25. __are used to make bait to catch game fish?

Answer: Frogs

26. ___change their eating habits as the seasons change?

Answer: Bermuda angelfish

27. Even small rats,snakes and tortoises can be found in the stomachs of ___/

Answer: Pike Lepisosteus or Amia

28. The___is an excellent source of protein?

Answer: Fish flesh

29. Larvivorous fish eat?

Answer: Larvae of mosquito

30. Some fish like the___ are of zoological importance because of their discontinuous distribution and anatomical features?

Answer: Lungfish

31. The fish waste after the extraction of oil, is used as?

Answer: Fertilizers

32. It is a sticky product, obtained from the skin of the cod and is used as gum?

Answer: Fish Glue

33. It is a gelatinous substance, obtained from the air bladder of perches?

Answer: Isinglass

34. Indian salmons and___are used in the preparation of special cement and in the clarification of wine and beer?

Answer: Catfish

35. Global trade in fish over___billion in 2008?

Answer: $102

36. The silvery boney scales of ___are used in the manufacture of artificial pearls especially in___?

Answer: Cypnmids+ France

37. Blue revolution refers to?

Answer: Fish production

38. Green revolution refers to?

Answer: For producing enough food for all

39. ___Deals with the fishery aspects of waters other than marine water?

Answer: Inland fishery

40. Mixed farming is called?

Answer: Composite fish farming

41. Marine fisheries are conducted in all the oceans and seas of the world, including?

Answer: Bays and estuaries

42. ___Migrates from the sea to the river for breeding?

Answer: Hilsa

43. Abdominal dropsy of carps caused by?

Answer: Aeromonas punctuata

44. Furunculosis of salmon and trout is caused by?

Answer: Aeromonas salmonicida

45. VHS stands for?

Answer: Viral haemorrhagic septicaemia

46. Over 20% from areas of upwelling that make up___of ocean surface area?

Answer: 0.1%

47. MSY stands for?

Answer: Reduction in maximum sustainable yield

48. ___of available fish stock fully exploited, overexploited or depleted?

Answer: 80%

49. Bycatch may be upto ___times more than the intended catch?

Answer: 8 times

50. Driftnets or gill nets banned in?

Answer: 1989

51. It refers to the rate of biomass production?

Answer: Productivity

52. The top-soil is the major site for?

Answer: Decomposition

53. An ecosystem can be small as an?

Answer: Ocean

54. Only 3.5% is freshwater, and the rest ___ is saltwater in the form of ocean?

Answer: 96.5%

55. Hagfish are deep-sea?

Answer: Bottom dwellers

56. Most species of ___ inhabit marine environments?

Answer: Chondrichthyes

57. Roughly ___ of species inhabit freshwater environments, ranging from desert springs to high altitude streams?

Answer: 40%

58. There are currently over ___ species of fish that are at risk of extinction/

Answer: 1,100

59. For example, in many regions, such as ___ the fishing industry is a major source of employment?

Answer: Alaska

60. Some organisms are specialists and others are generalist in terms of?

Morphology
