A Dynamic and Changing Society:

As society continues to change it is important for school and people incharge of education specially at the policy level to look into that what needs to be change, how often it needs to be changed and the change must happen in a timely manner.

Society as a Source of Change:

- Society changes rapidly.
- Sometimes education cannot cope up with the fast changing society
- Making the “Preparing for students for the world of Tomorrow” difficult.
- Think about what we (society) have today that we didn’t have last year, or five years ago, or even ten years ago.
- Schools as Agents of Change
- Knowledge as an Agent of Change

//Compiled_by_Mahnoor//

Reading Content

Schools as Agents of Change:

Sometimes ago, when we talked of literacy, we talked of the 3Rs only which was reading, writing and arithmetic. Those 3Rs have gone; focusing today on only those 3Rs will not help our students. Literacy today is more than simply being able to read, write and being able to do simple quantitative skills. Today we talk off:

- Cultural literacy
- Scientific literacy
- Computer literacy
- Technological literacy
- Electronic/media literacy
- Information literacy

If all this literacy has to be taught, it has to come down to the school level. And therefore, schools have to be agents of change.

- Dealing with diversity
- Diversity of culture
- Impact of globalization
- Race, class, gender
- How do schools deal with this?

Knowledge as Agents of Change:

Has knowledge grown? Of course it has, thought of when you went to school and what you are teaching your students is not the same.

Explosion of knowledge: Quantity of the material has increased, not sure about the quality but certainly the quantity of the material that a teacher is expected to teach

Knowledge as Agents of Change:

Has knowledge grown? Of course it has, thought of when you went to school and what you are teaching your students is not the same.

Explosion of knowledge: Quantity of the material has increased, not sure about the quality but certainly the quantity of the material that a teacher is expected to teach is increased and that will keep on happening. Knowledge will increase when new information is created.

What knowledge is of most worth? All the information is not needed by anyone, how much of that new information are we going to give to our students.

Organizing knowledge, subject-centered: Because of the growth of knowledge, knowledge has been organized into subjects e.g. English, physics, mathematics etc.

Areas of knowledge: Now there is a need to guide the students in areas of knowledge that which areas are of their keen interest.

Sociological Foundations of Education: Main elements

- Theories about the relation between school and society
- Whether schooling makes a major difference in individual's lives
- How schools influence social inequalities
- How school processes affect the lives of children, teachers, and other adults

Video Reading

Reading Content

Individual Actions

Individuals can take one of the two types of actions. In society, the reasons you behave in a particular way is because an external force makes you do it. For example, you could not pass the red signal; you have to stop because following the rules of presence of police makes you do it. This is known as **"determinism"** (Determined by external forces)

The other way is shaped by the individuals **"Voluntarism".** You behave in a particular way because that's the way you know the right way to behave and this is known as voluntarism. You voluntarily behave in a particular manner not because an external force is demanding to behave in a particular way. Mostly if observed in a society, determinism takes the upper hand, most individuals behave in society because they know if they don't the consequences will not be good.

Sociological perspective recognizes free will within the context of the power of external circumstances.

Sociological Foundations of Education: Theoretical Perspectives

- **Functional Theories:** stresses the interdependence of the social system, how well the parts are integrated with each other.
- **Emile Durkheim:** education in all societies of critical importance in creating moral unity, social cohesion, and harmony . . . moral values are the foundations of society

EDU101 - Foundations of Education

Lesson 129 : Functionalists

Video Reading

Reading Content

Functionalists

- Assume that consensus is the normal state in society and conflict represents a breakdown of shared values.
- Educational reform is to create structures, programs and curricula that are technically advanced, rational, and encourage social unity.

Video Reading

Reading Content

Conflict Theories-1

- Social order is based on the ability of dominant groups imposing their will on subordinate groups through force, cooperation, and manipulation.
- The glue of society is economic, political, cultural, and military power.
- Ideologies legitimate inequality and unequal distribution of goods as inevitable outcome of biology or history.
- Whereas functionalists emphasize cohesion, conflict theorists, emphasize struggle in explaining social order.
- Karl Marks is the intellectual founder of conflict theories.

Video Reading

Reading Content

Conflict Theories-2

- The “Achievement Ideology” of schools disguises the real power struggle which correspond to the power struggles of the large society.
- Educational expansion best explained by status group struggle . . . educational credentials such as college diplomas primarily status symbols rather than indicators of actual achievement to secure more advantageous places in employment and social structure.
- **“Cultural capital”** passed on by families and schools . . . schools pass on social identities that either help or hinder life chances.

Video Reading

Reading Content

Interactional Theories

- Primarily critiques and extensions of functional and conflict perspectives
- It is exactly what one does not question that is most problematic at a deep level e.g. how students are labeled “gifted” or “learning disabled”
- Speech patterns reflect social class backgrounds and schools are middle-class organizations, disadvantages working class children.

Reading Content

Effects of Schooling on Individuals

Schooling should have three effects on individuals

- Knowledge
- Attitudes
- Employment

Education and mobility, the “civil religion” . . . education amount vs. route . . . for the middle class, education may be linked to mobility but or the rich and the poor, it may have very little to do with it.

Inside the Schools:

- Schools from an organization point of view . . . effects of school size.
- Curriculum expresses culture.
- Tracking in public schools, rarely in private schools.

Video Reading

Reading Content

Teacher Behavior inside classroom

- A teacher has 1000 interpersonal contacts with students each day
- Difference of teacher expectations for different students . . . based on what?
- A teacher at any given time performs multiple roles; instructor, disciplinarian, bureaucrat, employer, friend, confident, educator . . . can lead to “role strain”

Student Peer Groups and Alienation:

- Students in vocational programs and headed towards low status jobs most likely to join a rebellious subculture.
- Average 12 years old has seen 18000 television murderers.
- Four major type of college students: careerists, intellectuals, strivers, unconnected.
- Schools are far more than collections of individuals; they develop cultures, traditions, and restrains that profoundly influence those in them.

Education and inequality:

Income differences becoming wider, the Pakistani society is turning into a “bipolar” society of great wealth and great poverty and ever shrinking middle class.

The following must be eliminated from the society in order to bring equality:

- Inadequate schools
- Tracking
- De facto Segregation

Education and inequality:

Income differences becoming wider, the Pakistani society is turning into a “bipolar” society of great wealth and great poverty and ever shrinking middle class.

The following must be eliminated from the society in order to bring equality:

- Inadequate schools
- Tracking
- De facto Segregation
- Gender descrimination

Reading Content

Bernstein's Theory

- Bernstein talks about **code** which is a regulatory mechanism that determines what happens where? In education, he talks of two things; curriculum and pedagogy.
- **Code** refers to a "regulative principle which underlies various message systems, specially curriculum and pedagogy."
- The group of experts gets together and put the curriculum. Then another group of experts get together and transfers that curriculum into the textbooks. And then the teacher teaches. So, with the same textbook teachers will teach differently.
- Curriculum defines what counts as valid knowledge . . . pedagogy defines what counts as valid transmission of knowledge and evaluation defines what counts as valid realization of knowledge on the part of the taught.
- Bernstein's work on pedagogic discourse is concerned with the production, distribution, and reproduction of official knowledge and how this knowledge is related to structurally determined power relations.
- The schools reproduce what they are ideologically committed to eradicating.
- Changes in the division of labor create different meaning systems and a code . . . incorporates a conflict model of unequal power relations.
- Such functioning does not lead to consensus but forms the basis of privilege and domination.

Video Reading

Understanding the School Process

- Origins of social expectations have been attributed to such diverse variables as social class, physical appearance, contrived test scores, sex, race language patterns, and school records.
- Labeling theory as an explanatory framework for the study of social deviance appears to be applicable to the study of education as well. We have to stop labeling students, if a child is slow in doing a task and needs more time, teacher must provide him sufficient time to perform a task. By doing so the student may perform better. The problem is that teachers are not willing to give extra time to the students that they need, simply to show to the teacher that he /she can do it. So, with this diverse variables that a teacher use in order to design expectations for students coupled with labeling that they do is what puts most students at a disadvantage, that should be stopped.

Video Reading

Reading Content

Labeling Theory-1

- The labeling approach allows for an explanation of what, in fact, is happening within schools.
- Over time, the consequences of having a certain evaluative tag influence the options available to a student within a school.
- Labeling theory is interested in *why* people are labeled and who it is that does the labeling.
- Deviance is a social judgment imposed by a social audience.
- How does a community decide what forms of conduct should be singled out for this kind of attention?
- Social control can have the paradoxical effect of generating more of the very behavior it is designed to eradicate.
- Deviance is functional to clarifying group boundaries, providing scapegoats, creating out-groups who can be the source of furthering in-group solidarity. In other words, if teachers expect students to misbehave, then that's the way they should be treated as a normal expectation in a classroom. Every individual is not going to behave appropriately.
- "The first dramatization of the 'evil' which separates the child out of his group . . . plays a greater role in making the criminal than perhaps any other experience . . . he now lives in a different world. He has been tagged. The person becomes the thing he is described as being."
- "The secondary deviant . . . is a person whose life and identity are organized around the facts of deviance." It is teachers who use labels such as "bright" or "slow".

Video Reading

Reading Content

Labeling Theory-2

- School achievement is not simply a matter of a child's native ability, but involves directly and inextricably the teacher as well.
- Race and ethnicity are powerful factors in generating teacher expectations.
- High expectations in elementary grades are stronger for girls than boys.
- Expectations teachers hold for students can be generated as early as the first few days of school and then remain stable from then on.
- "If men define situations as real, they are real in their consequences." Self-Fulfilling Prophecy
- The higher one's social status, the less the willingness to diagnose the same behavioral traits as indicative of serious illness in comparison to the diagnostic given to low status persons.
- The teacher expectations are not automatically self-fulfilling.

Video Reading

Reading Content

Processing Social-Educational Priorities

- What should be a school priority?
- Education for All; child-centered, activity-centered, experience centered.
- Focus on Academically Talented Students
- Curriculum to challenge the “Smart” students.
- Focus on Disadvantaged students. How to help the disadvantaged students gain same access to education? Here not the mentally retorted or suffering any swear disability are considered but those who suffer from dyslexia etc. these students can learn from their better achieving peers. That is why when teachers make groups of students, they should make mix ability groups so that all students can learn from others experiences also.

Planning for Educational Change

- What is the aim of education? Should aim of education be changeable? Yes, it should change because as technology progresses and moves, we must have the same aim in education. How we have moved from a paper-pencil culture to a paperless classroom culture. That will someday soon be a reality. So, today many of our colleges and Universities, there are people with smart phones and laptops who can do a lot with these hatcheries. So, the aims of education need to be changed. You cannot live with the same aims forever.
- Schools should prepare education that is not separate from the world. The world is not static.
- Creating relevant curriculum for the changing world.

Curriculum and Society:

- The curriculum should consider the world today. But an ideological curriculum should not forget the curriculum for preparing students for the kingdom of God and the hereafter.

Historical Foundations of Education: Introduction

We are living in 21st century; there have been communities and societies before us that have played a role in the development of trends in education.

- **Pre-literate Societies (before writing) 7000 BC – 5000 BC:** pre-literate societies are societies and communities that existed before writing began. So, obviously the means by which information or stories were transmitted was oral. People communicated through oral language from one generation to the next and that's how information got moved.

Goals of education under pre-literate society:

- To teach survival skills
- Teach group harmony

Who were the students in pre-literate societies?

- All children
- No grouping according to age
- All children get together and listen to what people had to tell them.

Instructional methods in pre-literate societies:

- Informal methods
- Children imitate adults

Curriculum in pre-literate societies:

- Practice hunting
- Fishing

Curriculum in pre-literate societies:

- Practice hunting
- Fishing
- Songs
- Poems
- Dances

Agents:

- Parents
- Liberal leaders
- Religious leaders

Influence on Education:

- Informal
- Transmission of skills

Reading Content

Influence of Chinese (3000 BC – 1900 AD)

Educational goals:

- Prepare elites to govern the empire according to Confucian principles. (Here are three key terms in this goal: **Elite** means everybody was not meant to be educated. A common man did not receive any education, **Secondly;** they had to govern the empire. They had to be leaders and strong people up at the top and front. This was the sole purpose of giving education only to the elite. Another limitation was that the education these people got was limited to Confucian principles; only Confucius thought was transmitted to the next generation. Nothing new was added from the outside.)

Students:

- Males of upper class

Instructional Methods:

- Memorization and recitation

Curriculum:

- Confucian Classics

Agents:

- Government officials

Influence on Education:

- Written examination for civil service

Ancient Indian Society

3000 BC – Present India

Educational Goals:

- To learn behavior and rituals based on Vedas

Students:

- Males of Upper classes

Instructional methods:

- Memorizing and interpreting sacred texts

Curriculum:

- Vedas and religious texts

Agents:

- Brahmin Priest scholars

Influence on education:

- Cultural transmission and assimilation, spiritual detachment

Video Reading

Reading Content

Influence of Egyptians (3000 BC – 300 BC)

Educational Goals:

- To prepare priest according to scribe for the empire

Students:

Males of upper class

Instructional Methods:

- Memorization and copying texts

Curriculum:

- Religious or Technical texts

Agents:

- Priest and scribes

Influence on education:

- Restriction on educational controls to priest elites

Reading Content

Influence of Greek (1600 BC – 300 BC)

Educational goals:

- To cultivate civic responsibility

Students:

- Male children ages 7 to 20 years

Instructional Methods:

- Memorization and recitation in primary schools, lecture, discussion, and dialogue in higher schools

Curriculum:

- Athens: reading, writing, arithmetic, drama, poetry, music, Sparta: Drill, military, songs and tactics.

Agents:

- Athens: private teachers, philosophers. Sparta: military teachers

Influence on education:

- Athens: well rounded, liberally educated person. Sparta: Concept of military state.

Video Reading

Reading Content

Influence of Romans (750 BC – 450 AD)

Educational Goals:

- Develop civic responsibility for the empire,
- Administrative and military skills

Students:

- Male children ages 7 – 20

Instructional Methods:

- Memorization and recitation in ludus; declamation in rhetorical schools (lutus is the primary school for everybody) declamation is the ability to create and give a speech.

Curriculum:

- Reading, writing, arithmetic, law and philosophy

Agents:

- Private schools and teachers, schools of rhetoric

Influence on Education:

- Practical administrative skills
- Relate education to civic responsibility

Reading Content

Influence of Arabic Society (700 AD – 1350 AD)

Educational Goals:

- Cultivate religious commitment to Islamic beliefs,
- Expertise in mathematics, medicine and science

Students:

- Male children of upper class ages 7 – 20

Instructional Methods

- Memorization and recitation in primary schools, imitation and discussion in higher schools

Curriculum:

- Reading, writing, arithmetic, religious literature, scientific studies

Agents:

- Mosques. Court schools

Influence on Education:

- Arabic numerals and computation, medicine and science materials

Reading Content

Influence of Medieval on Education (500 AD – 1400 AD)

Educational Goals:

- Develop religious commitment, knowledge, and ritual; establish social order, prepare for appropriate rules.

Students:

- Male children of upper class
- Girls and women entering religious community ages 7-20

Instructional Methods:

- Memorization and recitation in lower schools,
- Text analysis discussion in higher school and universities

Curriculum:

- Athens: reading, writing, arithmetic, philosophy, theology, military and chivalry

Agents:

- Parish
- Chantry
- Cathedral schools
- Universities
- Knighthood

Influence on Education:

- Structure and organization of the University
- Institutionalization of knowledge

Reading Content

Influence of Renaissance Period (1350 AD – 1500 AD)

Educational Goals:

- Cultivate Humanist experts in Greek, and Latin classes; prepare people to serve dynastic leaders

Students:

- Male children of aristocracy and upper classes, ages 7-20

Instructional Methods:

- Memorization and translation, and analysis of Greek, and Roman classes, classical literature, poetry and art.

Curriculum:

- Latin and Greek classical literature, poetry and art

Agents:

- Classical Humanists educators and schools like Lycee, gymnasium and Latin school,

Influence on Education:

- Emphasis on literary knowledge, excellence and style in classical literature,
- two track system of schools

Reading Content

Influence of Reformation period (1500 AD – 1600 AD)

Educational Goals:

- Cultivate a commitment to a particular religious denomination, and general literacy

Students:

- Boys and Girls ages 7-12 in vernacular schools,
- Young men of upper class in humanist schools.

Instructional Methods:

- Memorization drill, indoctrination, catechetical instruction in vernacular schools, translation and analysis of classical literature in humanistic schools

Curriculum:

- Reading, writing, arithmetic, catechism, and rituals.
- Latin and Greek theology

Agents:

- Vernacular elementary school for general public,
- Classical schools for upper class.

Influence on Education:

- Commitment to universal education to provide literacy for everyone; origins of schools systems, dual track school system based on socio economic class and career goals.

Important Educational Theorists-1

Confucius (Chinese)

- **Philosophy was:** Developed ethical system based on hierarchy, human relations and roles, emphasized order and stability
- **View of Human Nature:** Human beings need the order of a stable society. People accept duties that come with their station life.

Socrates

- **Philosophy:** Philosophical idealism, political conservation
- **View of Human Nature:** Humans define themselves by self-examination

Video Reading

Reading Content

Important Educational Theorists-2

Plato

- **Philosophy:** Philosophical idealist, social conservation, added intuition
- **View of Human Nature:** Humans can be classified on intellectual capabilities

Aristotle

- **Philosophy:** Realists, views society based on realism and observation
- **View of Human Nature:** Humans have the power of rationality to guide their conduct

Reading Content

Ancient Turks-1 (Muslim World)

- "Alp" concept was widespread (Alp is the kind of human beings defined by the Turks)
- Alp human being is defined as: warrior, wise, extroverted, nomad, gaining knowledge from ancestors and old wise people.
- Oldest Turkish written texts go back to a period before Islam
- In Ancient Turks (before Islam) there is no gender difference in educating youngsters
- When Western education is being influenced by Christianity, the eastern education was being influenced by Islam
- The "God" and theology concepts encapsulated education
- In this period, an "absolute truth" concept gained importance and taught to people in a domestic way

Video Reading

Reading Content

Ancient Turks-2

- Turks accepted Islam in 10th Century
- Madrasas opened in Samerkant, Bukhara, Tashkent, Kashgar
- Education was organized and structured in these schools
- Subjects: religion and social studies were taught
- Agents: Farabi, Ibn-e-Sina, Biruni were some examples that were raised in these institutions.
- They synthesized philosophies from Turk-Islam traditions, Ancient Greek and Roman Philosophers as well
- This period lasted for Gokturks, Uygurs, Karahanlis, Selcuks, and Ottomans.

Eastern Philosophers:

Farabi (870 - 950)

- **Philosophy:** Base for human nature is knowledge. Human mind can distinguish right from wrong through wisdom
- **View of Human Nature:** The ultimate knowledge is innate
- **Educational Philosophy:** Distinguished teaching from education
- **Teaching:** Reveal scientific knowledge and art
- **Education:** create theoretical virtues in society, education must be easy to hard, simple to complex, near to far

Video Reading

Reading Content

Eastern Philosophers-1:

Ibn-e-Sina (980 - 1037)

- **Philosophy:** Moral virtues are as important as knowledge itself
- **View of Human Nature:** Children are innocent and clean from the start, should be taught moral values.
- **Educational Philosophy:** Children should be taught without pressure, children should be taught from ages 6 -14
- **Agents:** should be religious, honest, wise persons that can recognize children's abilities

Biruni (973 - 1051)

- **Philosophy:** in order to love each other humans should learn and respect each others language, religion, traditions and thinking
- **View of Human Nature:** Humanistic perspective
- **Educational Philosophy:** He was expert in astronomy, physics, botany, pharmacology, geography. Beruni believed scientific work should be cleaned of magic, superstition and anything that opposes logic

Video Reading

Reading Content

Selcuks Period

- Madrasas should have a certain period of education
- Memorization as well as discussion were methods used to teach
- Both religious and vocational oriented education
- Moral virtues were especially emphasized and taught as well as akills
- Children were taught Islamic educational virtues: cleanliness, generosity, good will, and humanity
- Famous names in this period include Maulana Jalaluddin Rumi, Yunus Emre, Asif Pasha ve Haci Bektasi Veli
- Poetry was an important part of education and God and human love issues were the main subjects.

Lesson 157 : Ottoman Period

Video Reading

Reading Content

Ottoman Period

- Madrasas were important educational institutions and were developed further in Ottoman Period.
- Rich people as well as government build Madrasas everywhere.
- The structure was primary, middle and high school.
- They were free and boarding schools.
- Only sunni muslim males were accepted in madrasas, no girls were allowed in the madrasas.
- The teachers were called “maderris”.
- Religious, philosophical subjects as well as literature, science, math, and languages were taught.
- Education was considered as a religious and moral duty.

Video Reading

Reading Content

Structure of Ottoman Period

16th Century

- Ottoman schools were divided into two: Maktap and Madrasa
- Maktap: To train people to serve the palace, government and military people.
- The Maktaps were everywhere and trained workers for the empire.
- These are schools funded by foundations, the administration was not central.
- Fateh opened “Enderun” Palace School which included talented children of non-muslim families. Not all children of non-muslim families were admitted in these schools but those who are talented and show their potential.
- The language for education was Arabic, but Turkish and Persian were also taught.

Industrialization

The French revolution brought about a major change in education. At the time of French revolution throughout Europe and England, there was a change. That change was clearly seen in technology. Technology focused on the development of new machines and items coming out of the mechanical world. Those changes also influence what is needed to be done in education. As technology produces new machinery, people need to know how to operate these.

- In England and all over Europe after the French Revolution, there is an expansion of technology such as machinery that works with petrol and steam.
- Education was influenced by these changes.
- Factory workers came about.
- In this period, systems such as, Socialism, Communism, Liberalism, and Capitalism started gaining popularity.
- The free thinking brought by the French Revolution combined with industrial Revolution caused education to take shape in this direction.
- Education was needed by large masses.
- New Philosophies came about: Materialism, Socialism, Positivism etc.

Theorists of this Period (Industrialization)-1

Pestalozzi (1746-1827) believed that education should be for everyone.

Social education:

- Learning through experimentation
- Education is for everyone.

Herbart (1776 - 1841)

- He says that you need to manage, educate and discipline young people.
- The purpose of education is to serve individuals
- Attention was focused on the individuals.

Frobel (1782-1852)

- Focused on pre-school education
- Emphasized that children should be educated from 3-4 years
- Founded “Kindergarten”.

Reading Content

Theorists of this Period (Industrialization)-2

Tolstoy (1828-1910)

- He believed in Education for freedom
- Suggested master-apprentice relation for teacher-student
- He was extremely against physical punishment and memorizing.

John Dewey (1859 - 1952)

- Education for employment and life
- Education is life, it is not preparation for life.
- Education teaches a child to think through action
- Teacher must be a guide to students not a dictator.

Maria Montessori (1750-1952)

- Sensory education
- Used mostly on early years education
- Learning through self discovery and interest
- Uninterrupted play/work time, loosely structured classrooms

Reading Content

Ottoman Education-1

The industrialized age is actually sandwich between the 16th century and the 18th century Ottoman empire. When we see from the Industrialization and Ottoman period, there is a reform in education. This period is seen as change in education, at least in the Turkish empire at that time.

- Between 1779-1839 was a reform period in education
- First in military education, military schools were opened.
- In 1824, Al Mahmut made primary education mandatory.
- Later middle and high schools and higher education was formed (Rustiye mekteplerie, Idadi, Sultani and Darulfunun) These were the Turkish names for those high schools.
- 1856 Islahat Farmani was formed, that is changes in education.
- Primary education was mandatory
- Rustiye must exist in places with 500 houses (primary schools)
- Idadiye must exist in places with 100 houses (middle schools)
- Darulfunun (University) must exist in Istanbul. (Capital of Turkish empire at that time)
- Male teacher and female teacher schools will open.
- Money will be collected from public for education
- Education will be centralized.

Video Reading

Reading Content

Ottoman Education-2

- Kanun-I-Esasi: mandated that education is for everyone.
- There will be no interference on religious education
- Education is free for public.
- Al Abdul Hamit Period: After losing Russian war, education gained importance. Why? Because when the Turkish lose the Russian war, it was seen as an impediment and so what resulted was a need to educate.
- Vocational and art schools increased
- Increased freedom in press.
- Higher education for girls and girls started working in government offices.
- Pre-school education and professional education.

Reading Content

20th Century Education

Europe and America

- Education started being considered as a field.
- In 1950s Skinner with his experiments in education published education findings.
- In 190s and 1970s the theories of educational research peaked and the discussion “is education applied or theoretical science” formed.
- In 1980s, constructivist, multiple intelligence, brain based learning and life based humanist learning gained importance.

Latest Developments:

- Teacher education
- 1997 educational faculties
- Education in post graduate education
- Constructivist approach
- Multiple intelligences
- Capital punishment banned at schools

Historical Foundations of Education (Recap)

Historical Foundations starts with pre-literate society and what happened with teaching and learning. Number of Ancient civilizations was discussed. How civilizations were changed from one to the next. How Europe established through the Renaissance Period and the Industrialization. So, we have to learn from the past, take what we need, modify and change what needs to be modified. Because obviously we cannot teach something that is 400 years old, it just wouldn't work. Then The Muslim Influence in the Subcontinent is discussed over the Muslim rule of eight dynasties that spread over 650 years. Islamic education focuses on both secular and religious education.

Historical Foundations: Pakistani Perspective

Introduction:

With Pakistan's creation, a new nation was created and hence there was a need to look at the existing educational facilities and what could be done to improve on that. In addition, it was necessary to look at the literacy rate of the country at a time and focus on means of improving that literacy rate.

Educational Conference 1947

Under the dynamic leadership foreside and vision of Quaid-e-Azam Muhammad Ali Jinnah, soon after the creation of Pakistan the first educational conference was held in Karachi in December 1947.

Two Nation Theory

Since Pakistan came into being on the basis of Two Nation Theory, the conference recommended that the educational system should be based on this and a society be created that should reflect Islamic education.

Literacy be ended

When Pakistan came into being, the literacy rate was low than those of advanced and progressive countries. The conference recommended it to be raised to hundred percent through primary and adult education programs.

Primary and Religious education compulsory

Along with the recommendation of doing away with literacy, the conference recommended the religious education as a compulsory subject of Quran and Sunnah

Primary and Religious education compulsory

Along with the recommendation of doing away with literacy, the conference recommended the religious education as a compulsory subject of Quran and Sunnah.

Educational conference 1947 - 1

Promote National Unity

The Conference strongly recommended to promote a passion of national unity among all people of the provinces to avoid damage by provincial prejudices to the progress of the country.

Establishment of a Democratic Society

A recommendation was made to set up a democratic society in the country and there was a stress to train the citizens in the civic matters so that they may be able to know about their rights and duties.

Urdu as a Medium of Instruction

Urdu has gained a high ranking status in the subcontinent because this was the only language that was spoken and understood. Therefore, the conference recommended to adopt it was as the medium of instruction as a means of unity among provinces.

Educational conference 1947 - 2

English as Means of Instruction be Abolished Gradually

English language as a means of instruction was seen as a memory of the English rule over India. After getting freedom, there was a need to abolish English as a medium of instruction. The conference recommended the abolishment of English Language gradually.

The Formation of Central Educational Consultation Board

The conference recommended the formation of a Central Educational Consultation Board which should comprise of provincial ministers of education DPIs; members of the National Assembly and eminent educationists of all provinces. The duty of this board was to plan educational system and to device educational programs for the provinces.

Reorganization of Technical Education

The conference advised to reorganize the technical education in Pakistan. For this purpose, Industrial Research Council and Technical Education were recommended to be set up.

Increase in Primary Education Period

The conference recommended the period of primary education to be increased from four years to five years.

Women Education

The conference stressed women education and recommended coeducation at primary stage.

Adult Education

The conference stressed adult education to increase the rate of literacy in the country in a very short period and therefore recommended to take speedy measures to arrange for adult education.

Educational conference 1947 – 5

The Conference of 1947, in the light of its recommendations, agreed upon the following objectives of education:

1. The preservation of Nazaria Pakistan
2. Training for good citizenship
3. Training for Democracy
4. Urdu as Medium of Instruction
5. Abolition of Literacy in the Country
6. Primary Education compulsory for all
7. Compulsory religious education
8. Gradual abolition of English as Medium of Instruction
9. Reorganization of Technical Education
10. Promotion of National Unity

National Education Commission 1959 (Primary Education)

Objectives

1. According to the Commission, primary education should enable a student to read and write.
2. To promote a child's mental, social, moral and physical growth.
3. To create a sense of good citizenship among children.
4. To create a sense of self confidence and curiosity in the child.
5. To create a passion for hard work in the child.
6. To equip the child with information and skill.
7. To create a love for physical work and games.

Primary Education 1959 (Curriculum)

1. The curriculum should be according to the need and ability of the child.
2. Practical and Planning methods be used for teaching children.
3. National Language be taught to all children.
4. A sense for the dignity of manual work be created.
5. A passion for patriotism be created in children.
6. National Anthem be sung in the morning assembly and Pakistan flag be hoisted.

Organization

1. Primary Education be organized at the district level.
2. An education committee be set up in every district with Deputy Commissioner as its Chairman and the District Education Officer along with four members.
3. Every district be divided into Union Committees which should consist of three members nominated by the Deputy Commissioner of the District.
4. The power of the transfer of teachers is given to the Union Committees.

Financing

1. Land, property and equipment of primary schools should be the responsibility of the people.
2. Half of the total expenditure of primary education should be borne by the provincial governments and the other half be met through district taxes.
3. A provincial committee is set up to meet the educational needs under the chairmanship of the

Secondary Education 1959 – 1

Duration

The commission recommended that the education from class ninth to twelfth be considered as secondary education. However, so far, the elementary education period was not raised to the class eight.

Secondary education will consist of three stages:

- From sixth to eighth class – Middle
- From ninth to tenth class – Secondary
- From eleventh to twelfth class – Higher Secondary

Curriculum

1. Curriculum should consist of compulsory and optional subjects.
2. Optional subjects may be placed into many groups so that children can choose based on their taste and interest.
3. English should be taught as a practical language rather than literature.
4. Science, Mathematics and National Language be given more stress.
5. Religious education be made compulsory at middle stage.
6. In the Secondary stage, skills like woodwork, agriculture, economics, typing and mental work be introduced.

Examination System

1. The examination system of secondary stage be

Examination System

1. The examination system of secondary stage be reorganized. Examinations should be held after tenth and twelfth classes.
2. Examination record of all examinations be kept safe for certain period.
3. Secondary Education Boards be allowed to issue certificates.
4. Private students should have the same syllabus as those of the regular students and they should be allowed to sit in the examination.

Secondary Education 1959 – 2

Service Conditions for Teachers

1. At the secondary stage, trained teachers be appointed.
2. Refresher courses be held during service.
3. A substantive rise in pays of teachers be affected.
4. Education year will consist of forty weeks. Summer vacations for two months, winter vacations for 10 days.
5. Casual leaves of twenty days be decreased to five days only.
6. The teacher's workload should consist of sixteen hundred hours annually. Of these, eight hundred hours for teaching and the rest eight hundred for guidance and counselling.
7. Secondary schools should be provided with the building, playground and necessary equipment.
8. The President of Pakistan and Provincial Governors should award prizes in the forms of medals and cash to teachers showing good work.

Higher Education 1959 – 1

Duration

1. Higher education has a separate status of its own. Therefore, intermediate classes should be handed over and shifted to Secondary Education Boards.
2. Every University should fix a standard for admission by itself.

Syllabus

1. The syllabus should be prepared according to the needs of the modern age.
2. A separate department for teaching of world's important and current languages according to the industrial, commercial, and administrative and defence needs be opened.
3. Modern disciplines like Business Administration, Journalism, Sociology, HIome Economics etc. be taught bringing these in harmony with needs of the modern age.

National Education Commission 1959 (Critical Analysis)

- Many educational needs were identified.
- To fulfil these needs various recommendations were presented.
- When these recommendations were implemented by the government, a great help was found to harmonize the education system with the national objectives and modern trends of the time.
- However, there were certain recommendations which were against the national temperament.

1. The National Education Commission ignored the Islamic objectives while determining the educational objectives. This produced a hindrance in the promotion of Nazria Pakistan.
2. The Commission recommended to make good citizens and good scientists but to make them good Muslims did not present a solid proposal.
3. The Education System which the Commission recommended was not purely a Pakistani system but was a blue print of the system of British rulers which they devised for their colonial countries. Such a system was not a reflector of an Islamic State like Pakistan.
4. The Commission stressed to set up public schools. These schools only served the purpose of elites of the country and Pakistani common people could not avail themselves of these schools. This showed that system of education was reserved for some special classes of the society.
5. Instead of bringing about a revolutionary change in administrative structure, the old structure was

National Education Policy 1970 - 1

Also known as "The Noor Khan Report", because of the extensive work of one individual in the process of formulating this policy.

Guiding principles and objectives for Growth of Education

1. Education should play a central role to sustain Islamic values and national unity.
2. Scientific and technical education be given attention to fulfil the economic needs of the country.
3. The role of the teacher is decisive in improving the standards of education.
4. Decentralization of powers for educational administrative control in order to get financial independence and educational freedom.

Reading Content

National Education Policy 1970 – 2

Primary Education

- This has been thought as a basic principle in the government policy.
- Is was recommended to make common the primary education up to class five by 1980 and then be raised to the level of class eight.
- Education of girls was to be encouraged.

Secondary Education

- Scientific, technical and professional education has been stressed.
- A target of education of four hundred thirty thousand (430,000) students has been fixed in the plan of 1970.

Higher Education

- The curriculum has been stressed to be reorganized to improve higher education.
- New colleges be opened for science education.
- Centers for excellence be opened in the Universities where research work be done.
- A University Grant Commission be established to coordinate the work and standard of universities.

Adult Education

- In the Education Policy of 1970, adult education has been stressed much and the setting up of an Education Corps has been recommended.

Reading Content

National Education Policy 1970 – 4

Training of Teachers

- It has been recommended in the report that one hundred and thirty eight thousand (138,000) teachers be provided training and one hundred and fifty thousand (150,000) teachers be trained during services.

National Language as Medium of Instruction

- It has been recommended in the report that a commission be set up to make the national language the medium of instruction.
- Textbooks be published in Urdu language.

National Education Policy 1970 – 5

Scientific and Professional Education

The following measures have been proposed for this:

- Scientific Research Centers be set up in the country
- Training centers in industries be opened for professional education.

New Universities

- It has been recommended in the report that the number of students in secondary schools has increased to the level that students find difficulty in getting admission in the present universities.
- Therefore, according to the phased program, new universities be established.

University Grant Commission

A University Grants Commission be established with the following duties:

- To hold communications with all universities
- To determine the financial needs of the universities and to distribute the amount of grant.
- To review the development plans of the universities
- To plan to promote university education

National Education Policy 1972 – 1980

Objectives of education

- To preserve and promote the ideology of Pakistan
- To establish a National Unity by promoting social and cultural unity through education
- To prepare such individuals by building their character who should be aware with the technical and social changes and who should have a sense of betterment.
- To promote qualities of leadership among students
- To create a sense of dignity of labour

Reading Content

National Education Policy 1972 – 1980 (1)

Free and Compulsory Education

- In the policy of 1972, education was made compulsory at the primary level for children and it was announced that in October, 1972 education up to middle level will be made free and in October 1974 it will be free up to matric level.

Technical Education

- It was recommended that polytechnic institutions be upgraded to polytechnic colleges.
- The students will be provided two years of practical training after passing a three-year diploma course.
- Subjects like Industrial Arts, Weaving, Tannery, Wood Work, Masonry, Glass making be introduced in technical schools and teaching of these subjects be started.
- Diploma holders from polytechnics be allowed BTech degree after passing a course of one year.

National Education Policy 1972 – 1980 (2)

Nationalization of Institutions

- All private institutions were nationalized on October 1, 1972. The owners of these schools were paid no money or any other compensation.
- The servants of the institutions were given the same pay and allowance equal to those of government institutions.
- It was a great deed of course because in this way privately managed schools and colleges had been deprived of doing any injustice to servants and teaching staff.

Reading Content

National Education Policy 1972 – 1980 (3)

Facilities and Training of Teachers

- Refresher courses and training abroad for teachers were to be arranged.
- In addition, a School Service Academy was proposed to be established on the pattern of Civil Service Academy.
- It was told that there were one hundred and sixty thousand (160,000) teachers in all and the existing institutions for the training of teachers will be able to train up to 1980 another one hundred and four thousand (104,000) teachers.
- The number of teachers was insufficient, therefore, education as a subject be given proper attention and students graduating with this subject to be provided job of teacher.
- Some retired civil servants, military service people and students of a university will be included in the National Education Corps.
- Better pay scales have been recommended for teachers and leave salary was allowed to teachers.

National Education Policy 1972 – 1980 (4)

Facilities for Students

- Much attention has been given to students in this policy.
- Education up to matric for all students was made free.
- Rs. Twenty million were allotted for scholarship of students in 1971-72.
- Students were allowed to have loans from banks to be returned in instalments after getting jobs.
- In addition to this, travelling facility, facility of medical check-up and book banks were established.
- Welfare Committees were set up for students in the institutions and they were allowed to elect members from themselves.

National Education Policy 1972 – 1980 (5)

Setting of New Universities

- There were seven universities in the country in 1972.
- In Baluchistan, a university was opened.
- NED College Karachi, Agriculture College of Tando Jam (Sindh), Engineering College of Jam shoro were given the status of universities.
- In addition, for medical education, three new colleges one each at Karachi, Larkana and Nawab Shah were opened.

Centers of Excellence

- Centers for Excellence were to be set up in the universities to provide chance and facility of research to able and intelligent students.
- The main aim of these Centers was to produce experts in the field of Chemistry, Physics, Irrigation, Civics, Fishery and Water Outlets.

National Professorship

The policy stressed to start the plan of national professorship so that able and intelligent professors should not leave teaching jobs because of low salaries in colleges to join administrative posts having more benefits.

National Education Policy 1972 – 1980 (6)

New Boards Be Set Up

- The existing Secondary Boards of Education were not sufficient to meet the needs of the students. So, it was decided to set up new boards to make the system of examination more easy and effective.

Amendment in University Ordinance

- It was said in the educational policy that the infamous University Ordinance be amended to bring it in line with democratic law making system. The autonomous position of universities be restored. For this purpose, selected representatives of teachers and students be included in the higher learning institutions.

University Grants Commission

- The Commission of 1959, recommended the establishment of University Grants Commission. In the report of Noor Khan in 1970, it was again recommended. In the Policy of 1972, it was established practically.
- Its aim was to coordinate the universities in their research work, to plan educational projects and to distribute the amounts of grants to the universities according to the needs in the fields of research.

Religious Education

- Islamiat was made compulsory up to matric level and it was decided that in the textbooks of Islamiat nothing repugnant to the teaching of Islam should be included.

National Education Policy 1972 – 1980 (7)

Critical Analysis

1. Instead of opening public schools for the elite class, government opened hundreds of schools and colleges for the middle class. New universities for the higher education were also established in large numbers.
2. From October 1972, all privately managed were nationalized. Millions of teachers and other servants in the privately managed schools were saved from the exploitation of the management of these schools.
3. National book Foundation was set up to provide students cheap and quality books, moreover, in-time supply of books were insured.

National Education Policy 1972 – 1980 (8)

Critical Analysis (Cont....)

Many universities were established in the country. The following were given university status:

- Jamia Islamia, Bahawalpur
- Agriculture College Tando Jam
- NED College Karachi
- Jam Shoro Educational College

1. Semester system was started in educational institutions. 75% marks for external and 25% marks for internal exam were fixed but this system could not succeed because it was not according to the taste and temperament of teachers and students.
2. Compulsory Military Training created passion for the service of country and increased the defence ability.
3. Adult Education Centers were established in the country to try and end literacy. This increased the rate of literacy.

National Education Policy 1978 – 1

Objectives of Education

1. To create a love and affinity among public and students of Pakistan for Pakistan.
2. To create a sense among students that being Pakistani, they are members of Islamic world at the international level.
3. To prepare such citizens well equipped with the Ideology of Pakistan.
4. To build the character of people and individuals in the light of Quran and Hadith.
5. To give equal chance of education to all without any discrimination of religion and to give minorities the facility for their culture and religion.
6. To promote the abilities of individuals through proper education.
7. To provide basic education to all citizens without having a consideration of their cast and sect.

National Education Policy 1978 – 2

Objectives of Education (Cont. ...)

1. To create a passion and discipline in the new generation
2. To promote scientific, professional and technical education in the country

Basic of Islamic Education

- The foundation of educational system of Pakistan was based on the Islamic Ideology of Pakistan and Muslim Nationalism.
- The aim was to mould the character of individuals into Islamic world so that an exemplary society be created.

Universal Primary Education

- The target was to open 13,000 primary schools so that by 1992 all children of the country could get admission in primary schools. In addition to this, 5000 Masjid schools were to be opened so that children can get religious education along with primary education.
- A target of opening 1,000 workshop schools was also fixed. The aim was to teach children different domestic handicrafts and skills so that they might become useful members of the society.

Secondary Education

- 1,000 middle schools were to be upgraded to secondary schools and 200 new secondary schools were to be opened.

- A target of opening 1,000 workshop schools was also fixed. The aim was to teach children different domestic handicrafts and skills so that they might become useful members of the society.

Secondary Education

- 1,000 middle schools were to be upgraded to secondary schools and 200 new secondary schools were to be opened.
- This would increase the number of students from 1,800,000 to 2,800,000 at the secondary level.
- Science education to be more effective at the secondary and higher secondary stages.

National Education Policy 1978 – 3

Higher Education

- It was decided to provide new buildings and necessary equipment up to 1992 to encourage research at the university level. It was also decided that expenditures of universities will be met by the central government.

Compulsory Teaching of Islamiat, Pakistan Studies and Arabic

- In every sector of education, national and Islamic identity must be stressed.
- At the intermediate level, teaching of Islamiat and Pakistan Studies was made compulsory.
- Arabic language was also considered necessary being language of Quran and Hadith.
- The cultural heritage of Muslims is also in Arabic language. So, it was decided to make it compulsory at middle stage and programs of Teaching Arabic started through Radio and TV.

Adult education

- The opening of 10,000 centers for adult education was proposed.
- The centers will be equipped with necessary equipment with the help of UNESCO and 10,000 television sets will be provided.

Reading Content

National Education Policy 1978 – 4

Adult Education (Cont....)

- Allama Iqbal Open University will prepare programs for adult education through Radio and TV
- It was expected that the rate of literacy will become 35% in 1992 and it will be 100% in 2010.

Women Education

Women education is important for every nation. According to Ibraham Lincon:

“When you educate a man, you educate an individual only; but when you educate a woman, you are actually educating the whole family.”

- To educate girls 500 mohalla schools were opened.
- 10% increase in the number of girls getting admission in educational institutes will be made.
- Post graduate classes for women will be started.
- Women working in villages to get residence.

Why target for literacy was not met

1. Reduction in the amount allotted for education
2. Opening of new primary schools: It was planned in the policy to open 13,000 new primary schools and 5,000 new masjid schools but because of financial difficulties this target could not be achieved.
3. Less increase in number of students: It was necessary to increase the number of students at the primary stage to increase the literacy rate; the desired increase in the number of students could not be achieved and thus literacy rate could not be increased.
4. Less facilities for Teachers: It has been a sorrowful condition since Pakistan came into being that the teachers have not been given a status economically and socially to enable them to do their teaching work whole heartedly after being free from financial worries.

National Education Policy 1992 – 1

Aims of Education:

- To promote Islamic values through education
- A large number of educated men and women will be prepared to bring healthy changes in society
- The whole educational system should be reorganized and be established on modern lines
- A trend of critical thinking will be produced in students instead of learning by rote
- A practical type of education will be given to the students to enable them to create means of livelihood.

National Education Policy 1992 – 2

Primary Education

- Primary education to be made compulsory and free for all. Within 10 years, 100% admissions of children should be made possible in primary schools
- At least two rooms and five teachers should be a primary school
- Within the passage of time, the primary education be converted into basic education.
- Women teachers should be appointed in the primary schools gradually to replace male teachers
- There should be age relaxation for the teachers of primary schools
- The privately managed primary schools should be encouraged; to check their business-like attitude strict rules to be framed.
- An education foundation be established at a provincial and federal level to promote education in the privately managed institutions.
- The provinces be allowed to adopt provincial or national language or English as medium of instruction in the institutions.

National Education Policy 1992 – 3

Secondary Education

- At schools level, two types of institutions be established: high schools for general education and high schools for professional education
- From class 1 to high school education, the syllabus should be of twelve years duration.
- Higher secondary education will be delegated to the school section instead of colleges.
- In high schools, laboratories for science subjects shall be established separately.
- At the high level stage, more than one book should be prescribed and the schools will have the option to choose among those books.

National Education Policy 1992 – 4

Higher Education

- Special funds be provided for the departments doing research work.
- Substantive amount be given to the colleges and universities to enable them to equip the research laboratories and libraries.
- Twenty new universities will be opened next ten years and these will be the private sector universities.
- A National Council of Academic Awards and Accreditation be set up to make this process authentic and transparent.
- The cooperation and relationship of Pakistani Universities with foreign universities be strengthened.
- A research allowance to professors supervising and guiding the students for PhD and Mphil will be given.
- The relationship between local industries and universities be made strong and in this connection a committee be set up which should include professors and investors from different industries.

National Education Policy 1992 – 6

Education for Rural Development

- The backward and rural areas will be provided with the same facilities which the urban areas enjoy. In the rural colleges and in universities, a subject Education for Rural Uplift will be introduced.

National Testing Service

- A test for admission into the professional institutions will be held. For the test, different trials will be prepared so that the malpractices of Intermediate Boards can be checked. For the preparation of these tests, the National Testing Service will be set up and have the cooperation of local and foreign experts.
- The policy has been acted upon since 2003 for admission to medical and engineering colleges and universities.

National Education Policy 1998 – 2

Objectives of Education (Cont. . .)

- Hard work should be done for the promotion of information technology. Computer education at the middle and matric level should be introduced.
- All schools in the country should have facility of computers in classrooms to be used for instruction.
- After establishing more technical and professional institutions, a trained manpower will be provided which will result in the industrial progress of the country.
- At present, the educational budget is 2% of the GNP of the country.
- This shall be increased and an attempt will be made to increase it continuously to reach 5% of GNP of the country.

National Education Policy 1998 – 3

Primary education

- Existing facilities to be availed fully and new facilities to be provided.
- Media to be fully used for promotion of elementary education.
- Uprooting all types of social injustice, work will be done for equal chances of education for all.
- Promoting the elementary education, through formal and informal resources will be done.
- Terms and conditions of service for teachers will be made better and employment of teacher will be on merit basis; it will be tried to appoint teachers near their residences as much as possible.
- Poor students will be provided books and notebooks free of cost at the beginning of the educational year.
- In the elementary classes, slates and wooden planks will be introduced again.
- Subjects like cleanliness of atmosphere, use of computer, population planning, moral values and basic health will be included in the curriculum.

Video Reading

Reading Content

National Education Policy 1998 – 4

Secondary Education

- A model high school or a higher secondary school should be opened in every district where O and A level education be given.
- Curriculum of secondary and higher secondary schools be reformed and innovated.
- An Education Service Commission will soon be set up for the recruitment of teachers.
- Education cards for helping the needy poor students shall be issued as a permanent measure.
- At the secondary stage, compulsory subjects will have to be studied by all students whereas optional subjects will be according to the choice and interest of the students keeping in view their own future profession.
- The issue of admission forms, conduct of examination and declaration of result will be at the same date and time.
- National Testing Service System will be extended to other educational departments.
- At the secondary, project methods of teaching will be introduced and adopted, instead of stressing the theory, learning by doing procedure will be utilized.

Constitution of Islamic Republic of Pakistan

1973 Article 37 – b says:

"The State shall remove illiteracy and provide free and compulsory secondary education within minimum possible period."

Concurrent Legislative List may include:

Curriculum, syllabus, planning, policy, centers of excellence, standard of education and Islamic education. (This was what is highlighted in the constitution.) Moving from there in 2000 we turned into a new millennium. Many countries develop millennium goals. So, Pakistan also put forth what we called "Millennium Development Goals". These are highlighted below:

Millennium Development Goals

2001

- Ensuring that by 2015 all children, particularly girls, children in difficult circumstances and those belonging to ethnic minorities, have access to and complete free and compulsory primary education of good quality.
- Eliminating gender disparities in primary and secondary education by 2005 and achieving gender equality in education by 2015, with a focus on ensuring girls' full and equal access to and achievement in basic education of good quality.

Problems and Issues in Education

From the very start let us be clear these problems and issues are not unique to education in Pakistan only. They exist even in the real world. People may claim that everybody has equal opportunities but that is not true, the difference however is, on the impact this makes to the country you belong to. The first issue is:

Education for All

- Equality of rights between men and women, especially as it applies to access to education, has contributed to the development of concept of the right to education for all.
- As a result, the education sector's greater openness to girls has made it possible to re-examine the issue of social justice and promote egalitarian gender relation.
- Thus girls and women must be given priority in the field of education. As analysis and reports reveal persistent gender inequality in this sphere.

Education for All

A few stages in this process are listed below:

- 1960: Convention against Discrimination in Education (Paris)
- 1979: United Nations Convention on the Elimination of All Forms of Discrimination against Women (United Nations, New York)
- 1990:World Declaration on Education for All (Jomtien, Thailand)
- 1995: Declaration and Platform for Action, Fourth World Conference on Women (Beijing, China)
- 2000: Dakar Framework for Action, “Education for All: Meeting Our collective Commitments”, World Education Forum (Dakar, Senegal)
- 2000: United Nations Millennium Declaration (United Nations, New York)
- 2005: Plan for Action of the World Program for Human Rights Education (United Nations, New York)

Key Stages of Education for All – 1

Convention against Discrimination in Education, UNESCO, Paris, 1960

- The term 'Discrimination' includes any distinction, exclusion, limitation of preference which, being based on race, colour, sex, language, religion, political or other opinion, national or social origin, economic condition or birth, has the purpose or effect of nullifying or impairing equality of treatment in education.
- Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms; it shall promote understanding, tolerance and friendship among all nations, racial or religious groups.

Reading Content

United Nations Convention on the Elimination of All Forms of Discrimination against Women (United Nations, New York) 1979

- State parties shall take all appropriate measures to eliminate discrimination against women in order to ensure to them equal rights with men in the field of education and in particular to ensure, on a basis of equality of men and women.
- The same conditions for career and vocational guidance, for access to studies and for the achievement of diplomas in educational establishment of all categories in rural as well as in urban areas; this equality shall be ensured in pre-school, technical, professional and higher education, as well as in all types of vocational training.
- Access to same curricula, the same examinations, teaching staff with qualifications of the same standard and school premises and equipment of same equality.
- The elimination of any stereotype concept of the roles of men and women at all levels and in all forms of education by encouraging coeducation which will help to achieve this aim and, by the revision of textbooks and school programs and the adaptation of teaching methods.

Video | Reading

Reading Content

World Declaration on Education for All, 1990

- The most urgent priority is to ensure access to, and improve the quality education for girls and women, and to remove every obstacle that hamper their active participation. All gender stereotyping in education should be eliminated.
- Curricula and teaching materials remain gender-biased to a large degree, and are rarely sensitive to the specific needs of girls and women. This reinforces traditional female and male roles that deny women opportunities for full and equal partnership in society.
- Lack of gender awareness by educators at all levels strengthens existing inequalities between males and females by reinforcing discrimination tendencies and undermining girls' self-esteem.

Reading Content

Framework for Action, "Education for All: Meeting Our collective Commitments", World Education Forum, 2000

- Ensuring that by 2015 all children, particularly girls, children in difficult circumstances and those belonging to ethnic minorities, have access to and complete free and compulsory primary education of good quality.
- Eliminating gender disparities in primary and secondary education by 2005, and achieving gender equality in education by 2015, with a focus on ensuring girls,' full and equal access to and achieving in basic education of good quality.

Millennium Declaration, United Nations 2000

- Goal 1: Ensure Primary Education For All
- Goal 2: Promote gender equality and empowerment for women
- To ensure that, by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling and that girls and boys will have equal access to all levels of education.
- To promote gender equality and the empowerment of women as effective ways to combat poverty, hunger and disease and to stimulate development that is truly sustainable.

Plan for Action of the World Program for Human Rights Education (United Nations, New York) 2005

- Human rights education can be defined as education, training and information aiming at building a universal culture of human rights through the sharing of knowledge, imparting of skills and moulding of attitudes directed to:

a) The strengthening of respect for human rights and fundamental freedoms

b) The full development of human personality and the sense of its dignity.

c) The promotion of understanding, tolerance, equality and friendship among all nations, indigenous peoples and racial, national, ethnic, religious and linguistic groups.

d) The building and maintenance of peace.

e) The enabling of all persons to participate effectively in a free and democrartic society governed by the rule of law.

f) The promotion of people-centered sustainable development and social justice.

Promoting Gender Equality – 1

- The elimination of stereotype and the most blatant sexism is insufficient. All representations of men, women, boys and girls must be monitored.
- Characters embody representations of male and female, and it is on characters that action must be taken.
- All characters form part of the gender system presented in a textbook, but the system is not present in the same way throughout the textbook.
- All gendered representations of male and female must therefore be monitored accordingly, taking into account.
- Both text and illustrations, while it may seem easier to monitor illustrations (especially in terms of the number of characters), which are scarcer and take up more space than text, this does not imply more balanced representations.

Promoting Gender Equality – 2

- In addition, the connection between the text and illustrations must be analyzed carefully. A gender-neutral text may be accompanied by an inconsistent illustration.
- Text and illustrations must be redundant or conflicting, they may reinforce or, conversely, weaken each other's messages.

How should character be gendered?

In texts

- A character's sex is indicted by the grammatical gender of the pronoun, proper noun or common noun. These different designations also define a character's social identity and immediately place the character in the public or private sphere; therefore, language (grammar and vocabulary) plays a vital role here.
- Various types of designations can be combined:
  - v A pronoun: he/she
  - v A first name: male/female
  - v A surname
  - v A family relationship:
  - v Another relationship: friend, neighbour, colleague
  - v A profession/occupation

Video Reading

Reading Content

How should characters be gendered?

- Use the same type of designation for male and female characters. For example, the term “housewife” which has no proper masculine equivalent, should be avoided, should be avoided. If the word “mother” is used, then so too must “father”.
- Vary the designation of male and female characters while taking care to place them in a variety of spheres and social functions.
- If characters of both sexes appear in the same text, do not automatically start with the male character.
- Use the masculine and feminine forms in the case of a masculine plural, for example, “sportsmen” and “sportswomen”.
- Use a neutral form of titles and functions if one exists, for example, chairperson.
- Pay attention to the meanings of the words employed, which must not ridicule, demean or imprison a character in a role.

In illustrations

- The question of how to gender characters in illustrations is complex and calls for careful thought.
- It is a matter of knowing which symbol to use to indicate male and female.
- This must be resolved with reference to the cultural contexts while bearing in mind the gulf between

In illustrations

- The question of how to gender characters in illustrations is complex and calls for careful thought.
- It is a matter of knowing which symbol to use to indicate male and female.
- This must be resolved with reference to the cultural contexts while bearing in mind the gulf between tradition and modernity.
- Choices may consistently convey bias, for example, if female dcharacters are shown wearing traditional Pakistani garments while male characters wear western clothes, and so on.

Purity must be ensured

- Between men, women, girls, boys in both text and illustrations
- In all the different part of the textbooks, such as, the lessons, passages of text and exercises.
- In the casting of "hero" characters and minor figures.
- In position and size of character in illustration.
- In presenting and referring to well-known figures in the fields of politics, science, literature, sport, the arts and economics.

Environmental Education - 1

Tbilisi Conference, USSR, 1977

First major conference on the theme of Environmental Education where the following objectives were proposed:

- To create environmental awareness
- To disseminate knowledge and skills
- To initiate new behavioural approaches, at the individual or group levels, towards environment.
- To develop inter-disciplinary view of environment as a dynamic system and to emphasis its complexity
- To help in promotion of environmentally sound development-program towards sustainable growth.
- To create an atmosphere of national, international understanding and global cooperation in areas of environmental priority.

Video Reading

Reading Content

Environmental Education – 2

Educational Objectives

- Firstly, by bringing about positive attitudinal and behavioural changes in teachers and students, in respect of environmental problems and conservation.
- Secondly, by creating awareness about past, current and expected situations of environmental considerations in pursuit of sustainable environment.
- Thirdly, by disseminating information and exchanging knowledge and experience gained in achieving the goals of sustainable development
- Fourthly, encouraging and developing critical thinking among students in dealing with real-world environmental challenges, in general, and those of local origin in particular.

Environmental Education – 3

Mainstreaming Human Rights

- Right to health services (investment in environmental health will significantly reduce curative health cost)
- Right to fresh air
- Right to safe drinking water and sanitation
- Right to food, education, shelter and security.
- Enforcement of environmental law and institutional development
- Decision makers sensitized to plan and implement friendly policies
- Responsible media to raise right issues at the right time in a right manner and a right weightage
- Research and development leading to environmental excellence and quality education

Reading Content

Environmental Education – 4

Integration of Environment in Teacher's Training

- Positive attitudinal and behavioural change towards environment
- Socially, culturally, ecologically more responsible
- Positive change in living environment
- Expand and protect forest, pastures, wild life, conserve natural resources (water, soil, marine and mineral) etc.

Mega Issues

- Greening Pakistan: increase forestry, wildlife, creation of lungs of cities (pockets of plantation in big cities by recycled water)
- Cleaning Pakistan: all mega industry projects to have mandatory environmental experts to introduce cost effective environmental experts to introduce cost effective environmental friendly input/output to ensure follow up of EIA and quality assurance.
- Strategic Pakistan: address long term mega issues; priority setting in local, national, regional, international context; decisions by government channelled through sectoral think tank for collective good using Pakistan based technology.
- Mega issues of Pakistan: water conservation, surging population, minimizing climate change impact (glacier melting), increase water storage capacity for food

Reading Content

Linguistic Inequalities- 2

Role and status of Urdu and English:

- English – Official language and gatekeeper for entry into prestigious higher education institutions, high salaried jobs; also the language of military and bureaucracy.

Reading Content

Linguistic Inequalities- 3

'Truism in Pakistan'

- English is necessary for individual and national development.
- English is a passport to success and upward social mobility
- English is the key to national progress

Educational context in Pakistan School Level

- Three parallel systems of education:
- Urdu-medium schools (mainly state operated)
- English-medium schools (mainly private)
  - Elitist
  - Non-elitist (so-called English-medium)
  - Madarasas (Mainly Arabic)
- Two track within English-medium
  - O/A level
  - Matric/Intermediate

What's the issue?

- **Linguistic (and social) inequality** mediated through kinds of educational institutions, and educational practices in Pakistan.
- Medium of instruction
- Tracking at secondary and post-secondary level.
- Therefore, need for:
- Systematic situation analysis

What's the issue?

- **Linguistic (and social) inequality** mediated through kinds of educational institutions, and educational practices in Pakistan.
- Medium of instruction
- Tracking at secondary and post-secondary level.
- Therefore, need for:
- Systematic situation analysis
- Debate and dialogue about relative role(s) and status of Urdu, English (and regional languages)
- Improving quality of teaching-learning of English in schools and HEIs.

Trends and Challenges in Education

Inclusive education

- When every child is welcomed and valued regardless of ability or disability.

Inclusive education is an attitude

- It means the doors to school, classroom and school activities are open to every child.
- The focus is on giving every child the help he/she need to learn.

Video Reading

Reading Content

Inclusive Education Is NOT

- Dumping kids with disabilities into general classroom without the supports and services they need to be successful.
- Cutting back to special education services as a trade-off for being in the general education classroom background.
- Sacrificing the education of kids without disabilities so kids with disabilities can be included.

Special education Is:

- Individualized supports that give kids with disabilities the extra help they need to learn from general curriculum.

Inclusive education

- **Physical therapy**
- **Curriculum adaptation**
- **Communication board**
- **Behaviour plan**
- **Environmental accommodation**

Video Reading

Reading Content

Inclusive education -1

- Students can not learn general curriculum unless they are in the room where it is being taught.

It is not about the place

- All students must have access to general curriculum.
- This is true matter what class they are in.
- Even students in the most segregated classes MUST have access to the general curriculum for their age and grade.

Accommodation or Modification?

- Accommodations are used when the student is expected to learn the same curricular content. But the student may be taught in a different way or need changes in the environment.
- Modifications are used when the student is expected to learn less or different curricular content. This could require the modification of assignments, tests, worksheets and other materials in classroom.

Video | Reading

Reading Content

What are accommodations?

Accommodation are changes in teaching methods.

It can include changes in:

- **When you teach**
- **Who teaches**
- **How you teach**
- **How the student can respond**
- **Materials you use**

Accommodation – translation

A and B are brothers. A is older. The two go to a school which is found less than 5 kilometres from their home in Paris. Although there is a difference I age of 3 years between 2 brothers, their grade levels are only 2 years apart. A is in the 4th. What class is B in?

Accommodation – Bare Essentials

A and b go to school in Paris. A is older. They are 2 grades ap-art. A is in the 4th. What class is B in?

Video Reading

Reading Content

Room Accommodations

- Special chairs and cushions, lower or high table or chair, titled desk top.
- Different or additional lightening, sitting by a window for natural light.
- Sitting close to the blackboard or teacher, sitting away from others.
- Stand instead of sitting, or sitting instead of standing
- Picture schedules, visual cues or visual timer
- Colour coding
- Visual organization of the room and supplies
- Keeping materials for students and handing out as needed.
- Have at least part of the room bare with nothing on walls, ceilings or floor.

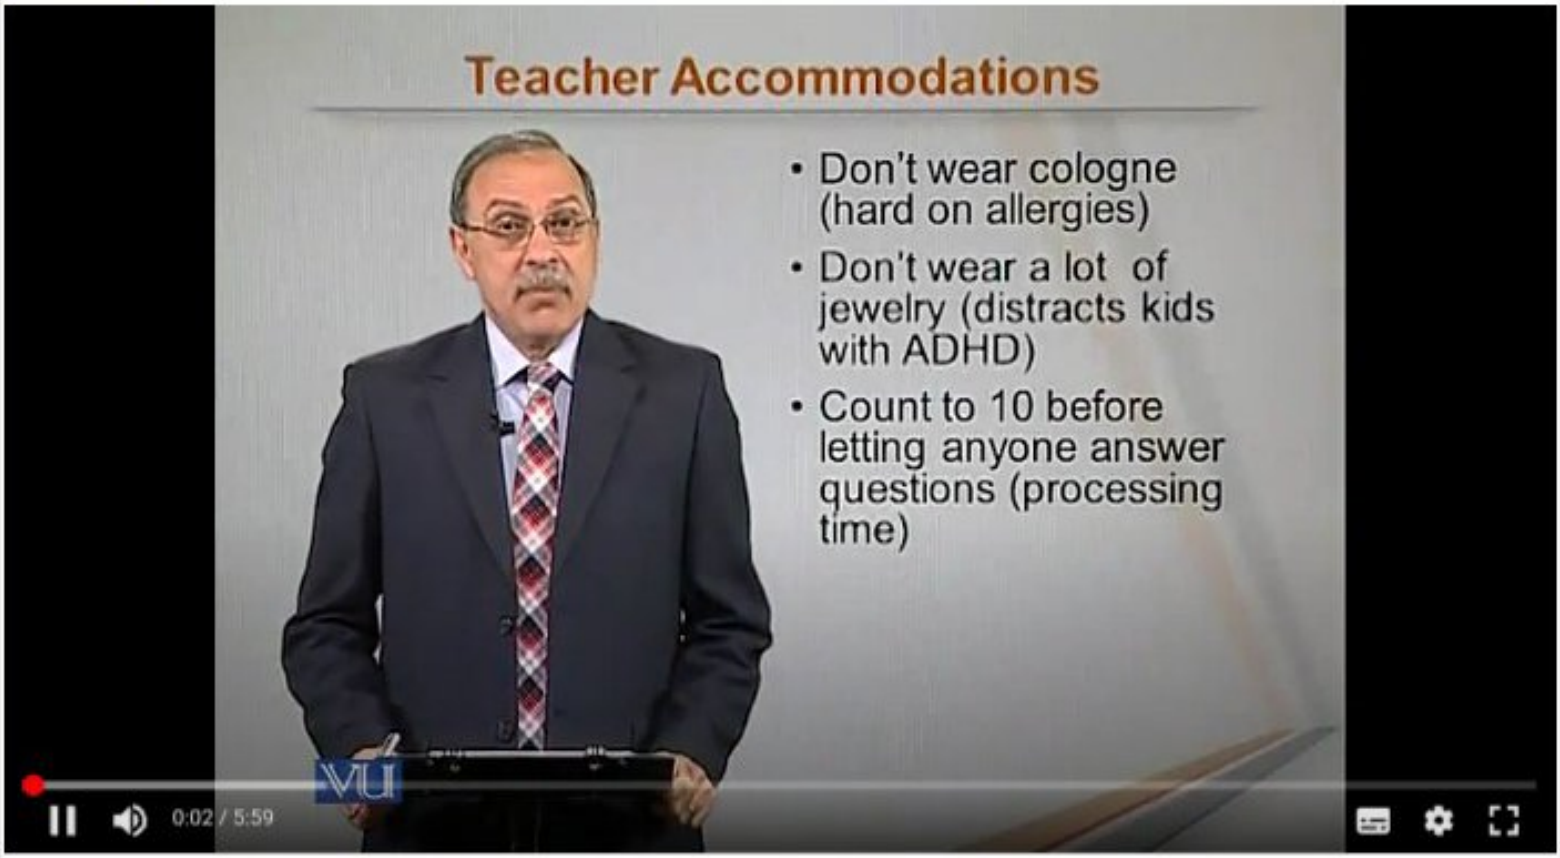

Teacher accommodators

- Do not wear cologne
- Do not wear a lot of jewellery
- Count to 10 before letting anyone answer questions (processing time)

Disability Leads to Poverty

Disability leads to poverty in the following ways:

- Loss of income
- Additional cost of disability management
- Exclusion from services and/or social and community activities because of stigmatization and other negative attitude of the society
- Reduced opportunities for work for the families with children having disability
- Low expectations in terms of capacity to learn
- Lack of technical and financial support
- Disabling environment particularly with reference to social services such as healthcare, education, protection
- Unfriendly job market

Video Reading

Reading Content

Poverty Leads to Disability

Poverty creates following conditions which increases the risk of disability:

- Overburden and impoverished family (not able to meet basic needs)
- Poor nutrition and poor body defence against disease
- Illiteracy and lack of awareness about health and welfare
- Poor health due unaffordable healthcare cost
- Lack of access to basic services that prevent disability
- Over-working more often in risky physical labour environments
- Un-employment, under-employment and low wage rate

Video | Reading

Reading Content

Inclusive Education - 1

The Only Way Forward

- The dream of 100% enrolment as perceived in the UN Millennium Development Goals can not come true without addressing the educational needs of children with disabilities.
- Special schools, inspite of all their benefits, have failed to nurture a natural growth of these children because of social segregation.
- The cost of special education is Rs. 30,000 per child per year as compared to Rs. 2500 for a child studying in an ordinary school.
- The most economical solution will be to make the primary school functioning at the doorstep open to all children through inclusive education.

Inclusive Education - 2

Two Dominant Barriers to IE in Pakistan

- When a journey towards inclusive education was ready to take off the federal government developed the education ministry to provincial governments.
- The provincial governments are not conceptually very clear what to do next.
- At provincial level, the movement of inclusive education seems losing its momentum because of two barriers:
  1. Attitudes of ordinary school teachers
  2. Attitudes of special education teachers

Attitudes of ordinary school teachers

Firstly, they feel that they are not fully competent and supported for this major shift and it will be difficult to create a welcoming environment for children with special needs even if they are really willing to do it.

Secondly, the public school is already under furious criticism for its extremely low educational standards. The inclusion of special children will further deteriorate the quality of instruction and the school may collapse.

- The students and parents will resist this shift
- They fail to see the strength of inclusive education as a school improvement plan.

Attitudes of Special Education Teachers

- They argue that special needs children require a type of “clinical care” that will never be possible in a free and

Attitudes of Special Education Teachers

- They argue that special needs children require a type of “clinical care” that will never be possible in a free and least restricted environment of public school.
- The students of public schools will not accept them and they may bully, hate and show aggressive behaviour against children with special needs.
- Deep in their minds they feel inclusive education is a threat to their jobs and future career.
- They fear that in case the inclusive education is successfully implemented in Pakistan, they will be out of jobs.

Challenges in Education System - 1

Challenge No 1 - Low level of literacy

Initiatives

- Pakistan have one of the lowest literacy rates with high gender disparity in the rigion, it is currently 51.6% (male 63.7% and female 39.25)
- The wide inter and intra provincial disparities present a discriminating scenario.

Challenge no 2 - Access to basic education

Initiatives

- Gross enrolment in primary schools is 855.
- Girls are less enrolled than the boys but the gender differentials are greater in rural areas.

Some major factors for low enrolment are:

- Poverty
- Long distance from school
- Poor physical infrastructure
- Functional problems
- Not related to market demands
