MUHAMMAD IMRAN	EDU301 - General Methods of Teaching			
QUIZ NO 1	GRAND QUIZ	MID TERM	PAST MCQs	ALL IN ONE FILE

1. social constructivism is present by _____ **Lev Vygotsky**
2. The domain encompasses objectives that deal with recall or recognition of knowledge. _____ **cognitive**
3. Which of the following is not metaphor for teacher?_____ **teacher Is a guider**
4. ….is not appropriate, if both sides of brain are not working appropriately. _____ **Learning**
5. Learning is there when teachers try to help learners change their ----------instead of focusing on their own teaching. _____ **cognitive structures**
6. - is to teach certain content to the students._____ **METHOD**
7. Teachers' complaint for shortage of time can be resolved through ---------. _____ **Unit planning**
8. ……are much economical and take less space in our working memory_____ **Images**
9. ----- is a short term planning. _____ **Lesson plan**
10. Holistic development means _____ **Complete development**
11. In this state of functioning, a teacher does not invite people to give you suggestions. There is no sharing of ideas_____ **Intentionally Disinviting**
12. A person with ---------- need not have specialized knowledge of his trade._____ **occupation**
13. How many key context are there in schooling? _____ **3**
14. Teaching is an activity to __ knowledge. _____ **Impart**
15. teachers want _____ **career growth**
16. complete formula for teacher growth . **Knowledge + …….+ Reflection = Growth** _____ **Experience**
17. Schools follow a certain ------. _____ **curriculum**
18. ____ means that students may get any change in their behavior. _ **behavioral perspective**
19. "Society for Pakistani English Language Teachers" organize different workshops for -----. _____ **teachers**
20. ---------- education has no regular curriculum. _____ **Informal**
21. Reflective Practice was introduced by ----------. _____ **Jean piajet**
22. Teaching has a ---------- function. _____ **social**
23. What is the highest level of teaching development ? _____ **Intentionally Inviting**
24. Pedagogy is a study of _____ **teaching methods**
25. ……can lead development_____ **Learning**
26. Learning can lead --------. _____ **development**
27. Vygotsky's theory about prior learning and social context included ___ major ideas. _____ **4**
28. Who believe that knowledge is actively constructed by learners? _____ **Nolan and francis**
29. ----- is not restricted to the schools. _____ **Collegial context**
30. Knowledge about different facts is -----. _____ **stratified knowledge**
31. The warmth, respect and appreciation in the eyes of the -------- for the teacher are the actual recognition._____ **students**
32. ___ is an ability to recall or recognize what has been learned or experienced _____ **Retention**
33. In this state of functioning teacher realize that you didn't know everything and they need development. help and advice from your colleagues_____ **Intentionally inviting**
34. Paulo freire was born in _____ **Brazil**
35. Teaching is a way of development certain ___ behaviors among students. _____ **desirable**
36. ___is an organized body of knowledge. _____ **Science**
37. Teacher must give _____ for every students. _____ **feedback**
38. Schooling is not about a single person, it is a -----._____ **Group orientation**
39. stratified knowledge is the Knowledge about _____ **facts**
40. Knowledge is something that is learnt by reflecting, acting on something is called?_____ "**Subjective knowledge**"

41. Educators work to stimute____. _____**Spirit of inquiry**
42. To ---------- is to change. _____**Learn**
43. Teacher must give___ given from the teachers maximizes students learning. _____**Constructive feedback**
44. performance objectives are also known as ….. objectives_____ **behavioral**
45. A ……is worth a thousand words _____ **picture**
46. Teacher has the autonomy of how to teach in a _____**class**
47. A ---------- needs extensive training and specialized knowledge. _____**profession**
48. The level of …..to the profession must be to the range of every student_____ **commitment**
49. Teacher must share ideas with the students so that they can work for a change in ---___**society**
50. ---------- is created when we act and reflect. _____**knowledge**
51. Teacher is more interested in…..instead of conceptual change _____**covering the syllabus**
52. Reflection is of ------ types. _____**2**
53. At second stage of zone of proximal development, a child gets assistance from ------ _____**self**
54. The reflection on every action at the same moment when the action is being taken is ---------- _____**reflection in action**
55. A ---------- education comprises of a basic education that a person receives at school.____ _____**formal**
56. Different cultures have different perceptions about --------._____ **education**
57. Precise statements written in the lesson plans about expectations from students are called_____ **Performance objectives**
58. If teacher play role like a gardener, and use the teaching strategies as a fertilizer than students grows like a:_____ **Seed**
59. Where there is silence, there is no ---------._____ **learning**
60. At ---------- stage of zone of proximal development, a child gets assistance from more knowledgeable other._____
61. A teacher make education attractive for students by using …… teacher learning strategies____
62. One will have more chance of being successful as a teacher if _____
63. Which of the following competency should be the most focused by Good teachers?_____
64. Which of the following is responsible for curriculum planning?_____
65. Curriculum guides actually give us a guideline about what to be taught in different ---- _____**grade levels**

66. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
67. **Facts or principles** that he has memorized by learning.
68. Every student has different **potential** of learning.
69. **Reflective practice** is a way of studying your own experiences to improve the way you work.
70. Zone of proximal concept was also established by **Vygotsky.**
71. This professional standard demands from us to create a climate that promotes the **Professional judgment.**
72. Teacher has the autonomy of how to teach in a **class**.
73. **Task analysis** model is a very important model of learning.
74. Idea of “Teaching is an Art”, was developed by **William James in 1891.**
75. Knowledge about different facts is **stratified knowledge.**
76. Teaching has a very important **social function.**
77. Planning is important as there are three characteristics of **master teachers.**
78. **Intentionally inviting:** This is the highest level of your teaching development.
79. Knowledge is created, when we **act and reflect.**
80. Modes of presentation are **two** i.e. Inductive and deductive.
81. Nothing is learnt unless it is in **long term memory**.
82. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
83. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.

84. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
85. In **vertical level,** it includes link between standards, benchmarks, learning outcomes and instructional objectives
86. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
87. There are **three** foundations of curriculum: sociological, philosophical and psychological.
88. **"Analysis level** questions are higher-order questions that require students to think critically and in depth.
89. The art of developing logical plan for instructional activities is called '**sequencing'**. Such a plan consists of interlink steps.
90. The **taxonomy** has been widely used in curriculum and test construction. From google
91. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
92. Sequence helps to make learning more **manageable.**
93. **Comprehension level** of cognitive "Describe two nation theory".
94. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.
95. **In curriculum planning,** assessment is taken into consideration.
96. Asking question is **a skill.**
97. Questions of students are **more important than the questions** of teachers.
98. **Curriculum documents** are not available in all schools.
99. Individual Education Plans **(IEP)**
100. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the **behaviors**
101. **Content knowledge** is a very important competency of a teacher.
102. **Processes** are also very important in teachers' considerations.
103. **Sequencing** has different principles; these principles are the introduction of simple concepts then concrete examples.
104. Writing Standards and benchmarks in a sequence in **Curriculum Planning.**
105. Action research is very effective research for teachers, **because it aims at improvement**.
106. **Origination** is the highest level of Simpson's hierarchy.
107. **Lesson plan** starts with the subject.
108. There are different **mechanics** to do different things.
109. **Good textbooks** provide a structured sequence of lessons.
110. Working memory is our **conscious memory**.
111. Sequencing steps are in **progression.** They start from simple and go to complex.
112. **Origination** is the level where a child can originate things on his own.
113. Write performance objectives is **necessary**.
114. In order to teach a sequenced lesson teacher need to **add complexity** to the lesson.
115. **Unit planning** is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by **Waish**
116. **Sentence formation** is a prerequisite for paragraph writing.
117. We have limited time to teach in a **class.**
118. **Bloom's Taxonomy** was knowledge level or recall level, where actually students recall their knowledge.
119. You will organize the experience in such a way that you will ask them **to first observe** and then record.
120. Teacher must come up with at least one example so that the students can **understand the concept easily**
121. **Content forms are three**: Facts, Concepts Generalizations 57. A lot of information can be communicated through a **picture**.
122. **Lesson plan** is actually detailed form of unit plan.
123. **Abstract** thinking is very important
124. Curriculum guides are planned by **Ministry of education** in Pakistan.
125. **Questioning** has a lot of significance value.
126. An important thing in inductive mode of presentation is **Process**.
127. **Enabling skills** are those skills which are required to achieve a certain goal.

128. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.

129. **Content and Processes** are also very important in teachers' considerations.

130. Whenever we are **sequencing**, we need to know what a prerequisite for a particular terminal objective is.

131. **The focus in IEP** will be on the needs of the learners rather on the content to be taught.

132. In **debriefing teacher** tells the students to reflect what they have learnt through this process.

133. Elements of planning **11.**

134. **Simulations** are done in the virtual environments and are computer based.

135. **Discovery learning** is a learner-centered method.

136. **Group processes** and the classroom goal, task, reward and participation structures are more directly under the teachers' control.

137. **Classroom structures** are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.

138. . **Synthesis level** Summarize the story including its main idea.

139. There are **four** steps in Taylor's model of curriculum

140. Write an appropriate title for the text.. come from **Synthesis level.**

141. We need to sequence our **learning objectives**.

142. Adding on must not be **confusing.**

143. Instructional aims: **Student-oriented**.

144. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.

145. **Abstractions** are something which is not tangible.

146. Lesson is a piece of a unit NOT a **block of time**.

147. **Learning activities** are those where students are actively involved.

148. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.

149. **Girls** perform poor in mathematics and science.

150. Teacher is a **person** who is making lesson plan, unit plan and term plan.

151. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".

152. . What we do in schools, we never focus on the **higher level** of learning.

153. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors.**

154. Methods are also identified in **instructional planning**.

155. **In evaluation**, we discuss that there are two things; criteria and method.

156. Where there is silence, there **is no learning**.

157. **Metacognition:** is cognitive about cognition.

158. You have to create a check list for assessing **communication skills**.

159. The other name for Learning by reflection is **Socratic Method.**

160. **Master teacher** communicate their instructional objectives effectively to the students.

161. Linear fashion focus **on goals.**

162. Nonlinear fashion focus on **process**.

163. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.

164. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular "**Instructional events**".

165. Teachers have to identify the **methods to monitor** the progress of the students.

166. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.

167. The interesting thing is that our emphasis is **on working memory**.

168. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.

169. **Performance objectives,** there are the three elements present i.e. performance condition and criterion.

170. **Performance objective** we need to align our performance objectives with the curriculum.

1) **Subject/ topic** Unit subject is the title of the whole unit.

171. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.

172. There are **three** levels of plans.

173. **Collegial context** is not restricted to the schools rather now it has become web based

174. There are **6 levels** of Bloom's taxonomy of cognitive domain.

175. **Feeling of efficacy** is very important for the teachers

176. It is our assumption that independent skills are prerequisites, so students know them already.

177. Less planning leads to less learning. **(Walsh, 1992**.

178. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization **(Bush, 2003**).

179. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.

180. Knowledge forms are **Content, Process.**

181. **Mechanism indicates** that a child is independent to do a task by following its mechanics.

182. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.

183. **Schools' policy** is to cover the content as much as possible.

184. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.

185. **Declarative knowledge:** This is the knowledge that is declared in books, research papers, and newspapers.

186. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators**.**

187. **Blind and Low Vision –** A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.

188. **Active learning:** Active learning is where human mind is actively involved in constructing meaning of the experience.

189. ***Freire*** was a Brazilian educator and philosopher who was a leading ...

190. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, Brazil.

191. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.

192. **Science** is an organized body of knowledge.

193. Answering some key questions to create an image of the classroom teaching and learning."

Reflective practice:

194. **Reflective practice** is very important for a teacher.

195. **Nolan and Francis (1992) believe that:** Knowledge is actively constructed by learners.

196. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**

197. "Much human behavior is learnt by observing the behavior of others **(Bandura 1978**

198. **Zone of Proximal Development (ZPD)**

199. The gap between actual and potential level of a child is **Zone of Proximal Development**

200. **Cognitive perspective** is to develop students' academic and thinking skills from a novice level to a more expert level.

201. **Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one's development.**

202. According to **Vygotsky's theory**, language, learning and environment is a social context.

203. Creativity is also a part of **metacognition**

204. Learning depends on **prior learning**

205. Schools not only teach the students but also raise them. **(Sausa,2003)**

206. What students are taught in schools affects the ways they will thereafter see and treat others. **(Schlesinger, 1993)**

207. **CAP:** Cognitive, Affective and Psychomotor

208. **Psychomotor domain** is the domain where your body movements are involved.

209. Perception means **attending to a stimulus**.

210. Set is a readiness for **action**.

211. **Word 'complex'** shows that here the child can do many things independently.
212. 1Adaptation comes from the word '**Adapt**' which means to set yourself in the given situation.
213. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964.**
214. In organization, you start showing that behavior but that is not a **consistent behavior.**
215. "**Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching." (Marzano, Pickering, and Pollock 2001)**
216. Research shows that learning do not take place if presented in isolated items (**Hohn,1995)**
217. Taxonomies provide a **cognitive structure.**

218. Who presented the multiple intelligence theory? _____ **Harvard Gardner**
219. How many levels Bloom's taxonomy? _____**6**
220. What is concept map? _____ **Graphic organization**
221. …….formation is a prerequisite for paragraph._____ **Sentence**
222. ……identifies classroom assessment criteria._____ **Teacher**
223. Art of developing logical plan for instructional activities is called?_____ **"Sequencing"**
224. Methods are also identified in… ?_____ **"Instructional planning"**
225. Good Textbooks provide sequence? _____**"Structured sequence of lessons"**
226. Knowledge has forms?_____ **"Two"**
227. Knowledge is something that is learnt by reflecting, acting on something is called?_ **"Subjective"**
228. A child knows about own cogitation is called?_____ **"Metacognitive knowledge"**
229. 12. Memorized things in? _____**"Facts"**
230. Task analysis model is a very important model as it helps the teacher to identify __**prerequisites.**
231. The process of setting goals, developing strategies is _____**planning**.
232. We discuss criteria and method in _____**evaluation.**
233. The individualized part of IEP means that the plan has to be tailored specifically to your child's __**special needs.**
234. A unit plan is a …..of lesson plans. _____**hierarchy**
235. Methods are also identified in instructional planning _____**Student-oriented**.
236. …… is basically an extended adaptation of a lesson plan._____ **IEP**
237. We can remember those things which are connected with our _____**prior learning.**
238. **Adolescence** is a time of profound brain growth.
239. Advance organizer model is based upon **deductive learning**.
240. Nonlinear fashion focus on **process**
241. Brainstorming is a common tool to **describe** a thing
242. The white hat in the De Bono's six thinking hats signifies **information known or needed**
243. **Teacher** model skill in direct instruction
244. **Network** integration is created among group of students
245. Teacher role is minimized in **unguided** inquiry
246. In United States, pre-school is named as **pre K**
247. **Gatekeeper** equalizes participation
248. Generative topics actually make **connections**
249. **Divergent** thinking is outside the box thinking

250. The learning of **core concepts** is lifetime

251. Different countries have different age levels of **formal** education

252. Children can come up with different ideas and teachings must **accept** all ideas

253. **Children** construct their own knowledge

254. Our teachers do not focus on **core concept**

255. Objects must be in the form that it can be **measured**

256. **British** preschool name Nursery School or simply “nursery”

257. **United States** preschool name pre-school and pre K

258. Child is a natural discoverer. **Bruner**

259. By the **three**, a child has TWICE as many brain connections

260. In order to start working, the cells need to **communicate** with each other

261. A research was conducted and it was reported that teachers mostly focus **hemisphere** of children.

262. For creativity **divergent** thinking is very important.

263. Different types of -functions occurs in the left and right hemisphere **Mental**

264. The networked methodology of integration is **Student centered**

265. Asking question is a **Skill**

266. Brain development continues till the age of **8**

267. We can remember those things which are concerned with our **Right side memory**

268. Integration means putting things **Together**

269. Advance organizer model is based upon **Deductive learning**

270. **Case method is** a very good approach to know problem solving.

271. .Pedagogy means how to teach **Students**/

272. Core concepts are **declarative** knowledge

273. Development cannot be separated from the **social** context in which it occurs

274. Development of **gross motor** skills is very important in preschool or early childhood education

275. **Children** construct their own knowledge.

276. John dewy says that there is no such profession where **knowledge** is separable from doing or practice.

277. **Application** of core concepts in new level is important

278. In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking

279. Teachers want to teach in **depth** but want to cover the syllabus too

280. **Curriculum** is a dead thing teacher’s give life to it.

281. **Researchers** use the word discourse for discussion

282. Teachers must provide the students with opportunities to **discover** things

283. **Performance assessment** can be used to measure student’s problem solving potential as well as group

284. Knowledge can be assessed through **written tests**

285. Usually we do not **question** our tradition and authority

286. Wait time is **thinking** time

287. The last level of Maslow's hierarchy of need is **Self-actualization**

288. **Socratic** Method is the example of discussion method

289. **Edison** invented the bulb

290. Projects tend to be **multidimensional**

291. Different types of **mental** functions occur in the left and right hemisphere.

292. Pedagogy means how to teach **children**.

293. Advance organizer model is based upon **Deductive learning**.

294. **Case method** is a very good approach to know problem solving.

295. Andragogy means how _ learn. **Adults**

296. Beyer says that critical thinking has **two** important dimensions.

297. The inquiry learning cannot be **rushed**

298. **Learners** are responsible for planning. Conducting and evaluating their own effort

299. Process of **assimilation** leads to consideration of new options and points of view

300. **Assimilation** leads to consideration of new options and points of view

301. According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it.

302. Curious observation is the start of the **inductive process**

303. **Students** love integrated curriculum

304. What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,

305. Generative topics actually make __schemes, **connections**, procedure or assessments

306. Schooling average age.... **4/ 3**

307. we are concerned by student.... achievement. **Team**

308. Understand is in.... Level. **First/ conceptual**

309. ..... focus discussion and disposition.

310. Scientific method.... research. **Roots/Psychology/authentic**

311. **Theory** can be falsified.

312. **Perception** means attending to a stimulus

We have limited time to teach in a ---------.	**class**
---------- means problems with reading, writing, spelling, symbols and numbers, because the brain misinterprets what it sees (visual) and hears (auditory).	**Dyslexia**
To write performance objectives is ----------.	**necessary**
Age is the element of -------- diversity.	**physical**
Teachers must communicate their ------ to the students.	**Experiences**

The term ------ is used while explaining multiple diversity among people.	**dyslexia**
The statement “The student will define the 6 levels of Bloom's taxonomy” is an example of ---------- level of cognitive domain.	**Knowledge**
Who gave this statement: “Having a critical spirit is as important as thinking critically”.	**niam**
In --------, planning includes selection of activities.	**horizontal level**
in ------, Bloom developed the taxonomy of cognitive domain.	**1956**
A teacher needs to know the ------ level of the students.	**Motivational**
Objectives have a ----- purpose.	**Limited**
------- is a readiness for action.	**Set**
------- are intent of teaching.	**Objectives**
The prescription of a minimally acceptable level of a performance on the part of a learner is called --------.	**Criterion measure**
Taxonomies provide a --------- structure.	**cognitive**
While writing performance objectives, we focus on the ---------	**action words**
In performance objectives, all the ------- elements must be present.	**three**
While writing performance objectives, we have to use an action word that exactly shows the ----------.	**performance**
------- is the highest level of Simpson's hierarchy.	**Origination**
Curriculum documents are not available in all --------.	**schools**
------ is the guarantee of effective instruction and effective learning.	**Unit planning**
While ---------, you have to see the curriculum framework.	**yearly planning**
The statement "Write an appropriate title for the text" comes in the ------ level of cognitive domain.	**synthesis**
Altering motor activities to meet demands of problematic situation is ---------.	**Adaptation**
A content is consisted of -------.	**Facts - Concepts - Generalizations** **ALL**
The --------- focuses on what the learner will experience, rather than what the instructor will share or do.	**objective**

The term ---------- is actually a teacher who has expertise on his subject and he ensures the quality learning of the students.	**Master teacher**
The last three levels of Bloom's taxonomy of cognitive domain are called as ---------.	**Higher level of learning**
The statement of an observable behavior on the part of learner is ---------.	**performance**
Methods are also identified in ----------.	**instructional planning**
Every educational activity should have a ----------.	**goal**
The objective "The student will compare and contrast the cognitive and affective domains." is an example of ------ level of cognitive domain.	**Comprehension**
The -------- has been widely used in curriculum and test construction.	**taxonomy**
You must tell the students about the ------- processes they are learning.	**thought**
The prescription of a minimally acceptable level of a performance on the part of a learner is called --------.	**Criterion measure**
---------- is a disorder in language formation that may be associated with neurological, psychological, sensory or physical factors.	**Speech impairment**
Who gave this statement: "Schools not only teach the students but also raise them."	**Sausa**

Who gave this statement" Less planning leads to less learning"	Walsh
"Unit planning is the most important as well as most time consuming level of planning for each teacher" who gave the above statement?	Walsh
Girls are less committed to ---	careers
------- knowledge is a very important competency of a teacher.	Content
____ plays an important role in child's learning.	language
Information used as evidence or as part of a report or news article is called ___	fact
Students ____ indicate their learning.	tests
Children construct their own ___.	Knowledge

A teacher is responsible in the _____ development of a child.	cognitive

Lev vygotsky's was born in ___.	Rusia
Idea of "teaching is an art" was development by ___.	William james
Teacher can manage different ___ in school for ethical development of a child.	Activities
A profession has a body of ___.	techniques
The role of a teacher is a changed from a lecturer to ___.	An agent of transformation
Learning is a ___ process.	social
development/learning cannot be separated from _____ in which it occur.	Social context
Learning is a___ endeavor.	social
In ___ teachers do not have autonomy or the power of decision making.	pakistan
Who gave the theory of multiple intelligence.	Howard gardner
_____ education has a structure systems of learning.	formal
A view or opinion that is incorrect because based on faulty thinking or understanding is a ___.	misconception

___ model is an important way of learning.	Observational learning
The role of a teacher is changed from a lecturer to __.	An agent of transformation
A profession allows_____.	autonomy
Education that is not given in proper schools is ___.	Informal education
_____ greatly influences learning.	Prior knowledge
Different cultures have different perception about ___.	education
___ knowledge is acquired, if a child gets cognition about cognition.	metacognitive
___ are something that is memorized.	Facts
Who gave this statement "knowledge is created when we act and reflect"?	friere
_____ is the procedure to gain declarative knowledge.	lecturing

Lev vygotsky died at the age of___.	37
The first process in modeling is ___.	Alternation
Howard Gardner is very famous because of his __.	Multiple intelligence theory
____ is very important for a teacher.	Reflection in practice
___ is important but it does require time.	Conceptual change
___ context of school is “characterized by or having power and authority vested equally among colleagues.”	collegial
Paulo freire was born in ____.	1921
The idea of “teaching is an art or science “was developed in __ by william james.	1891
------- activities are different from teaching activities.	Learning activities
---- is a series of small action steps which are needed to achieve desired goals.	Objectives:
"Describe the two nation theory" comes in -------- level of cognitive domain.	Comprehension:

------- means that a behavior becomes part of your life.	Characterization
-------- comes from curriculum planning.	Holistic vision
The objects through which light could not past are ------- objects.	opaque
A unit plan is a ------- of lesson plans.	Series
There are ----- steps in Taylor's model of curriculum.	four
It is important for the broader curriculum to identify educational --------.	experiences
------ is the title of the whole unit.	Unit subject
There are ------ necessary elements of planning.	11
A teacher needs to know the ------ level of the students.	motivation level
There are -------- types of communication disability.	2
Master teachers are ---------- in their planning.	well-organized

Curriculum is a ----- term.	Broad
------- is essentially a nested process with horizontal and vertical dimension.	Planning
Elements of physical diversity are -------.	3
---------- is a planning of one year of a school.	Long term Planning
A teacher needs to know the ------ level of the students.	Motivational
Detailed implementation comes from --------- planning.	lesson planning
Students' ---------- must be considered before planning.	feedback
Terms in revised Bloom's taxonomy were changed from noun to ----------.	adjectives
------- is the highest level of Simpson's hierarchy.	Origination:

Teachers must communicate their ------ to the students.	Ideas
The prescription of a minimally acceptable level of a performance on the part of a learner is called --------.	Criterion measure:
We have limited time to teach in a ---------.	
There are ----- domains of learning.	three
Benchmarks and standards are written in a sequence in ---------.	instructional
We have to identify the facts, concepts and generalizations while planning a --------.	a unit
Bloom's taxonomy was revised by ----------.	William
Teaching activities are there to teach --------- to the students.	content
------ identifies classroom assessment criteria.	teacher
------ is the gurantee of effective instruction and effective learning.	d unit planning

There are different -------- to do different things.	mechanics
The objective “The student will judge the effectiveness of writing objectives using Bloom's taxonomy” is an example of ------ level of cognitive domain.	Analysis
-------- planning is very challenging and time consuming.	unit planning
"Abstract thinking leads to reasoning with symbols" this refers to ------ stage of Piaget's cognitive development.	Formal operational
-------- do not have attention span.	Children
If we will use the connections our efficiency of doing any task will ------.	increase
Questions in ----- also includes in essential questions.	induction
In order to start working, the cells need to -------- with each other.	communicate
Teacher must ensure ------ development of child.	holistic l
Brain develop very fast in the ------ year after birth.	first
Learners can learn only ----- chunks of information at a time.	5-9
Remarkable changes occur in the brain during the ---------- decade of life.	second
A teacher can teach higher order thinking skills through the --------- process.	
---------- is a time of profound brain growth.	Adolescent
---------- should be made clear to the students.	Core concepts
A ----- year old child has the vocabulary of 2000 words.	
The average weight gain of 6-12 years children in a year is ----------.	5-7

Fragmentation is said to be the ------- level of integration.	primary
Core concepts are ----- knowledge.	declarative
Teaching is very exciting for ------- teachers without integration also.	young

In the context of preschool it includes ------ stages of Piaget's cognitive development.	2
Children can come up with different ideas and teachers must ------ all ideas.	accept
--------- have no obvious right answer.	essential Questions
John dewy says that there is no such profession where ------- is separable from doing or practise.	knowledge
Generative topics actually make ----------.	connections.
Jumping is the example of -------.	Gross motor
The networked methodology of integration is --------.	student-centered
------ always identify their intent.	Teachers
Teachers want to teach in ----- but want to cover the syllabus too.	depth
Child's rights convention of 1989 has mentioned that "---------- is basic right of every child."	Education
Form 1 is --------- integration.	
The green hat in the De Bono's six thinking hats symbolizes ----------.	creativity
--------- are those things that can be changed.	Variables
Group learning will be more efficient for developing the ------.	idea
Bruner's first stage is ------.	Enactive"

	'Collecting data' is the ------- step of Guided Inductive Inquiry.	
	According to Kolb (1984), ---------- is a process of a combination of grasping experience and transforming it.	), Learning
	The word scientific was devised in the -------.	19
	The black hat in the De Bono's six thinking hats symbolizes ----------.	judgment
	Usually we do not ------- our tradition and authority.	question

	---------- invented the bulb.	Edison
	Bruner's second stage is --------.	"Iconic
	The red hat in the De Bono's six thinking hats symbolizes ---------.	feelings
	Problem based learning starts from ---------.	Analysis
	---------- characteristics of critical thinking are presented by Wade (1995).	
	Inquiry is NOT about ----------.	memorizing facts
	During guided inductive inquiry, the -------- plays the key role in asking questions.	teacher p
	Problem based learning also starts from ---------.	Questions
	There are ---------- processes of inquiry.	13
	The term 'Six Thinking hats' was presented by -------	De Bono
	The ---------- is an educated guess about the relationship between the independent and dependent variables.	Hypothesis
	Students will make generalizations that are too -------.	broad
	The solutions, responses provided by learners are not found in ---------.	textbooks

	Children produce their original work after -------.	problem based learning
	Inquiry may involve ---------, procedure and solution.	Problem
	--------- are responsible for planning, conducting and evaluating their own efforts.	Learners
	Scientific method can be used in ------- also.	social sciences
	Roots of the ------- of all social sciences is based on scientific method.	research
	In school we do not have much time to deliver information so we must know the -------.	
	The most important part of integration is -----.	assessment
	---------- thinking is a disciplined manner of thought that a person uses to assess the validity of something.	critical thinking

	---------- talked about logics and he was one of the pioneers.	Aristotle
	--------- of information is important.	depth
	Inquiry is NOT a ---------- technique.	Hypothetical
	------- love integrated curriculum because it provides the context for learning.	Children
	Group learning develops ideas and ---------.	
	Learners progress from specific observations to ----------.	inferences
	The brain thrives on -------.	connections
	During guided inductive inquiry, the ---------- plays the key role in asking questions.	teacher
	Inductive inquiry is of ---------- types.	2
	According to Kolb (1984), Learning is a process of a combination of grasping ---------- and transforming it.	Experience
	Inquiry may involve problem, -------- and solution.	procedure

	In ---------- , students investigate a teacher-presented question.	Guided inductive
	Students must learn to modify their ---------.	conclusions
	-------- is a permanent change in behaviour.	learning
	--------- are much important in scientific method.	variables
	Paper pencil tests can assess the ------ of the students.	
	Inquiry method requires the learner to develop -------- associated with inquiry.	various processes
	---------- inquiry is widely used in our classroom settings.	Information inquiry
	Learners progress from --------- observations to inference or generalizations in GII.	specific observations
	-------- is the domain where our body movements are involved.	Psychomotor
	---------- is actively constructed by learners.	Knowledge

	Idea of "teaching is an art" was developed by-------.	William James
	is a learning style in which learning takes place by the student carrying out a physical activity.	Kinesthetic learnin

	growth cannot take place unless we do not provide opportunities to our students to think at high level.	Intellectual growth
	The theory of Zone of proximal development was given by --------.	Vygotsky
	A child is responding in the form of action but this action is not an independent action is a -------.	Guided Response
	means the knowledge about how to teach the students.	pedagogical knowledge
	There are ------ types of education in our society.	2
	Learning is ---------- by nature.	social
	------ includes all intellectual skills.	Cognativbe domaon
	According to research, the best recognition teachers got is from the ----------.	students
	There are ---------- types of intellectual disability.	
	Developing questioning skills among students comes in	Higher thinking levels:
	means attending to a stimulus	Perception
	Who gave this statement: “Knowledge is created when we act and reflect”?	Friere:

	------ is the level where a child can originate things on his own.	origination
	“Write an appropriate title for the text” is an example of ---------- level of cognitive domain.	Synthesis level
	Teaching is a -------- profession.	noble
	The objective “The student will construct an instructional objective for each level of Bloom's taxonomy” is an example of ------ level of cognitive domain.	
	A teacher is a ---------.	Change agent

	is to teach certain content to the students	METHOD
	cannot be separated from the social context in which it occur	Learning
	It was ---------- century in which perceptions about teaching, learning and education were developed.	16th century
	education has a structured system of learning	formal
	Knowledge is actively constructed by	learners
	A teacher must use ---------- resources in a class.	Low cost
	An educator must work to stimulate the spirit of ---------- among the students.	f inquiry
	What we do in schools, we never focus on the --------- level of learning.	higher level
	Hierarchical levels of Simpson' Psychomotor domain are	7
	The level of --------- to the profession must be to the range of every student.	commitment
	is the mean of creating a dialogue	reflection
	------ is the knowledge that is declared in books,	Declarative knowledge

	research papers or newspapers.	
	------ is the level of understanding.	Comprehension
	Teachers need to know the ------- level of students.	
	We must plan unit before -----.	lessons.
	While evaluating teaching or students' learning, you should always come up with judgements based on ----------.	t evidence
	Planning serves a guide to ----------.	action.
	Lesson is a piece of a unit NOT a block of ---------.	time
	The process of setting goals, developing strategies is -------.	Planning
	In evaluation we discuss --- things.	two
	Process cannot be isolated from --------.	All of abouve

	IEP is basically ---------- adaptation of lesson plan.	extended
	If a teacher plans to take the students for field trips, then he needs to consider ----------.	schools‟ resources
	Performance objectives must be alligned with -------.	curriculum
	---------- research is very effective research for teachers because it aims at improvement.	Action
	The learning of --------- is lifetime.	core concepts
	The average height growth of 6-12 years children in a year is ----------.	

	Learner can process only about one new idea or concept every ------- second.	ten
	In ------- books there is a lot of information than Japanese and German books.	American
	A preschool child of 36 months can now hold ------ different emotions in his mind at the same time.	two
	---------- education is different from other education.	Pre-school and infant educations
	Generative topics are generated from ---------.	leant information
	--------- need to be interesting for the teachers as well as for students	Generative topics
	---------- integration method overlaps concepts as organizer.	shared
	"Child is a natural discoverer" who gave this statement.	Bruner
	------- are related to the lives of people.	Essential questions
	In United States, pre-schooling is named as ----------.	Pre-school
	Learning depends upon the ---------.	environment
	The idea in -------- thinking is that no idea is a stupid idea.	divergent
	Essential questions are related to the ---- of people.	lives

	Brain development continues till the age of ----.	8
	-------- teacher should integrate two or three subjects so that we can save the time.	Primary school
	Core concepts are central to the domain of --------.	knowledge
	Integration means putting things ---------.	together
	Because of integration it will be easier to ask ----------.	essential questions

	------ are most important persons in the application of curriculum.	Teachers
	In British English, pre-schooling is known as ----------.	nursery
	------- construct their own knowledge.	Children
	There are ---------- physical developmental milestones used in pre-schooling.	
	-------- needs to be an integral part of early years of education.	Story time
	------- are unique to every individual.	Experiences
	Teachers mostly concern about ----------.	completion of syllabus
	Form 3 focuses on the integration of subject knowledge with ----------.	Student's Interest
	Bigger ideas are our assumptions and ----------.	belief
	-------- theory is very much applicable in early childhood education.	Vygotsky
	The ---------- curriculum is a great gift to experienced teachers.	integrated
	passive rolesResearch has now determined that remarkable changes occur in the brain during the ----- decade of life.	second
	Development cannot be separated from the ---------context in which it occurs.	social
	By the age ------, a child has TWICE as many brain connections as an adult.	
	Gross motor and fine motor development is involved in ----------.	Physical development

	M. Markus was a ------ who gave the definition of integration.	

	Which needs does a primary reinforcer satisfy?	Food oxygen warmth watre
	Teachers get little assistance from ------- publishers.	textbook
	The brain is not complete at --------.	birth
	Essential questions require ---------- thinking.	divergent
	---------- type of integration is related to shared integration.	sequenced
	Networked integration is created between the ----------.	learners
	--------- is a dead thing teachers give life to it.	Curriculum
	We need to integrate the knowledge with ------ skills.	practical
	------ is a conceptual commitment.	Essential question
	Through -------- it will be easier for the children to ask essential questions.	integration
	Different countries use different names for pre-schooling, but the umbrella term for it is ----------.	Early Childhood Education
	There are ----- stages of Piaget's cognitive development.	4
	Vygotsky's theory includes ------- major ideas.	four
	Our teachers do not focus on ---------.	core concepts.
	---------- integration is created among group of students.	
	---------- integration takes advantage of natural combinations.	Nested integration
	Development of --------- skills is very important in preschool or early childhood education.	Gross motor
	Forms of integration were presented by Fogarty and Stoehr in --------.	1995
	Work on scientific method was started by ------ to Galileo.	Aristotle

	Cooperative learning method can help students develop ---------- skills.	Communication
	Piaget spend actually------- to work on constructivism.	50 years
	The cooperative learning model changes the -------.	reward system
	--------- can be assessed through direct observation.	skills
	---------- is a model which requires student cooperation and interdependence in its task, goal and reward structure.	Cooperative learning
	Cooperative learning methods are those in which more than --------- person work together.	one
	Teachers role is minimized in ---------- inquiry.	
	In cooperative lessons, Students work ------- to master learning goal.	**teams**
	Cooperative learning requires ---------.	
	Assigning different roles is a good thing in --------.	jigsaw technique
	Kagan (1994) roles have been adapted by --------.	Arends
	cooperative learning help students make the ---------- from whole-class to cooperative learning groups.	transition
	In cooperative learning, ---------- are oriented to the group as well as the individual.	Reward system
	More than ---------- of the researches says that cooperative learning helps in the academic achievement of the student.	
	A special challenge for cooperative learning teaching is how to ------- for both team and individual efforts.	grade
	Rubrics are actually instruments -------.	

	In --------- teacher talk time is more than 50% of students talk time.	Recitation
	---------- functions are image and inform.	Concepts
	---------- create productive learning communities.	Effective teachers

	Extended practice leads to ---------.	Overlearning
	Teacher control is ------- process.	authoritative
	Peer tutoring is ----------.	motivational strategy
	---------- lose their significance after sometime.	External rewards
	--------- discussion is a teacher-centered discussion.	Monologic
	--------- is a teacher-centered method.	Presentation
	Direct instruction keeps ------ in passive role.	students
	Practice that is under the watchful eye of the teacher is called -------.	Guided practice
	---------- method is the example of discussion method.	
	Teachers can obtain better classroom discourse by giving their students opportunities to think before they --------.	respond
	Feedback should be appropriate and ---------.	constructive
	The base level of Maslow's Hierarchy of Needs is ---------.	Physiological needs
	Recitation is also called ----------.	
	Presentation is a --------- centered method.	Teacher
	---------- learning is a learner-centered method.	Discovery
	Monologic discussion is -------- centered discussion.	teacher
	Dialogic discussion promote ---------- thinking.	divergent

	Discovery learning is a ---------- centered method.	learner
	In democratic process ------- are involved.	children
	How many categories did Abraham Maslow believe that needs could be classified into?	5
	Crossword puzzles is an example of ---------- learning.	2. Incidental learning:

	-------- in classrooms does not flow just from the teacher.	Influence
	Direct instruction lessons require the unique classroom ----------.	management
	Planning, implementation and evaluation comes in --------.	Teaching cycle
	In --------- there is paraphrasing.	communication
	---------- is basically a discussion method.	
	For learning activities, ---------- centered learning methods must be preferred.	students
	--------- is very much teacher controlled method.	Direct Instruction
	Peer can be great -------- support.	
	---------- is the adding of an aversive stimulus to decrease a certain behavior or response.	Positive punishment
	A ---------- learning environment is a setting for learning that includes a controlled and often simplified copy of a real world system to be studied.	Simulation-based learning
	The other name for presentation method is ----------.	
	Lecture only gives --------- knowledge.	declarative
	---------- are done in the virtual environments and are computer based.	Simulation

	Presentation is also known as ---------- method.	
	The last level of Maslow's hierarchy of needs is ----------.	Self-actualization
	A lot of information is not important ------ information is important.	depth of
	Measuring is a --------- process.	inquiry
	---------- has its intellectual roots in the Socratic Method.	Problem Based Learning
	Bruner's final stage is -------.	Symbolic
	Life is not divided into little blocks of -------.	subjects

	Inquiry may involve problem, procedure and ----------.	Solution
	Aristotle promoted -------.	deduction
	---------- is a condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.	Blind and Low Vision
	---------- knowledge is acquired, if a child only learns facts and memorizes content.	Procedural
	Kinesthetic learning is also known as ----------.	tactile learning
	Teacher needs to have some perceptions and ideas if -------.	political activity
	------ means the knowledge about how to teach the students.	Pedagogical knowledge
	Where there is silence, there is no ---------.	learning
	Lev Vygotsky died at the age of ----------.	37

	------ are something that is memorized.	**Procedures**
	Teaching is about bringing change in ----------.	society
	---------- knowledge is acquired, if a child gets cognition about cognition.	Metacognition
	Holistic development means ---------.	complete development
	------ means that professionals are ethically bound to follow some norms.	Self-Disciplined
	Master teachers ---------- instructional objectives to the students.	communicate
	There are ---------- stages of Zone of Proximal Development.	
	------- means that students may get any change in their behavior.	Behaviour procpective
	Learners need ----- on everything they do.	feedback
	There are ----- categories of exceptionality.	27
	---------- is something that emphasizes that power and decision-making should be shared among some or all members of the organization.	Collegial context

	------ is the procedure to gain declarative knowledge.	lecturing
	Every student has different ------ of learning.	Potential
	------ is also a conceptual change.	Teacher grouth
	---------- means social interaction among the students or the other people as well.	
	There are --------- types of instructional planning that are commonly used in schools.	

	Vygotsky was a -------- psychologist.	Rushinan
	------ is the mean of creating a dialogue.	reflection
	------ are thoes objectives which need to be achieve by the end of lesson.	Instructional objective
	---------- is a way of studying your own experiences to improve the way you work.	Reflective practis
	There are ------ kinds of diversity.	3
	Teacher is more interested in ------ instead of conceptual change.	Covering sylabur
	Which educationist gave the below statement; "What students are taught in schools affects the ways they will thereafter see and treat others"	sausa
	------- means that students may get any change in their behavior.	Direct instrucation
	------ knowledge is a step ahead of declarative knowledge.	Procedural knwliedge
	Gender diversity means ---- in gender.	Difference
	In ----------, the student must be dissatisfied with the current understanding.	
	---------- is the name of degree that a person must get to join teaching profession.	B ed M ed
	In ----- teachers do not have autonomy or the power of decision making.	Pakistan

	---------- context of school is “Characterized by or having power and authority vested equally among colleagues:"	collegial

	According to Gagne, ---------- knowledge is “knowing that.…”	Metacognition
	The gap between actual and potential level of a child is ------.	Zone orf prox dev
	Theory of multiple intelligences was presented by Howard Gardener in ----------.	1983
	---------- knowledge comes in psychomotor domain.	procedural
	Different cultures have different perceptions about --------.	eduucation
	Declarative knowledge is more or less equivalent to Bloom’s ---------- category of learning outcomes.	
	--------- is very famous because of his theory of multiple intelligences.	hHoward gardner
	The ---------- of our colleagues is the foundation of power.	esteam
	At second stage of zone of proximal development, a child gets assistance from ----------.	Direct instr
	------ is where human mind is actively involved in constructing meaning of the experience.	Active learning
	--------- perform poor in mathematics and science.	girls
	-----	method
	Teachers must give ---------- to the students	Constructive feedback

	to maximize learning.	
	------ is a fixed capacity.	intellangence
	The ‘basics’ of the ------- curriculum are mathematics, natural science, history, foreign language & literature.	
	-------- plan is actually detailed form of unit plan.	lesson
	You have to create a check list for assessing-------- skills.	Communication skill

	Being aware of or sensitive to the existence of certain ideas or phenomena and being willing to tolerate them is called --------.	receiving
	Teachers rarely plan in ---------- as encouraged in textbooks.	Linear plan
	Mechanism indicates that a child is --------- to do a task by following its mechanics.	independent
	Precise statement means ------- statement.	An exact
	There are ------ elements of performnce objectives.	3
	Lesson plan starts with the -------.	subject
	When teacher provides guidance to the students, then there is --------.	semantic
	This is not true that if the learning cannot be ------ then there is no learning.	accessed
	You will organize the ------ in such a way that you will ask them to first observe and then record.	accessment
	Curriculum guides are planned by --------.	Ministray of edu
	----- is one of the famous models of curriculum development.	Tyler
	In curriculum planning ------ is taken into consideration.	assessment

	The second name of performance objectives is --------.	behaviour
	Curriculum guidelines are consists of -------.	
	------ is defined as "a systematic design for the development, implementation and evaluation of instruction".	Lesson plan
	In ----- level of cognitive domain, students recall their knowledge.	synthesis
	While planning a unit a teacher needs to identify ----------.	all
	Curriculum guides actually give us a guide line about what to be taught in different ---------.	Grad level
	The first three levels of cognitive domain are called as ---------.	lower

	---------- policy is to cover the content.	school
	The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the -------.	
	The focus in IEP will be on the ---------- of the learners rather on the content to be taught.	need
	To write --------- is necessary, especially when we are going to start teaching.	performance
	---------- is basically an extended adaptation of a lesson plan.	IEP
	------- are usually assessed through analysis method or through observation.	process
	--------- changes were made while revising Bloom’s taxonomy.	
	Good textbooks provide ------- sequence of lessons.	structured
	-------- means that the disposition or learning you are talking about, you must value that disposition.	valuing

	IEP is the abbreviation of ----------.	Indiv edu plan
	Lesson plan is a part of --------- plan.	unit
	The best teachers apply planning ----------.	flax
	The individualized part of IEP means that the plan has to be tailored specifically to your child's special --------.	need
	------ is something which indicates division of time.	all
	Post lesson activities are related to ----------.	evelatiton
	We can do classifying in -------- children also.	
	Learning is a permanent change in ---------.	Behaviour
	In ---------- inquiry, students investigate topic-related questions that are student formulated through student designed/selected procedures.	
	Historical drawings and paintings are used in ---------- inquiry to stimulate questions.	historical

	Andragogy means how --------- learns.	Children
	---------- inquiry involves the processes of searching for information and applying information to answer questions.	Designing instruction
	Different countries have different age levels of --------- education.	informal
	The important thing in ----- is what we know we must share it with others.	Problem solving method
	Pedagogy means how to teach ----------.	children
	By the -------, a child has TWICE as many brain connections as an adult.	three
	The solutions, alternatives or responses provided by learners are not found in --------.	textbook
	------- are those which are linked with core	
	concepts.	
	Piaget spend ------- years to work on constructivism.	50
	Most classroom ---------- proceeds at too rapid a pace.	discourse
	-------- keeps students in passive roles.	Direct instruction method
	If projects are ---------- , they allow the learners to be immersed in one big idea.	Structured
	In --------- the most important thing is assigning the tasks.	management
	Roots of problem based learning are in ---------.	Dialogue
	Inquiry is a ---------- technique.	
	-------- is very useful learner centered teaching and learning strategy.	Problem solveing
	Aristotle talks about -------.	2
	In project learning, performance is assessed on ---------- basis.	indivial
	---------- is overall pattern.	
	In --------- inquiry, teachers role is minimized.	Unguided
	In cooperative lessons, --------- are oriented to the group as well as the individual.	

	Inquiry may involve ----------, procedure and solution.	
	Students work in teams to master learning ----------.	
	Vygotsky was a-------- Psychologist.	russian
	The most important thing in thinking skills is to provide the ----------.	information
