EDU302 Quiz 3 File by Tanveer Online Academy

In which of the following style of language development, children apply language to discuss their emotions and needs?	**Expressive**
Which of the following perspective of language development asserts that people are naturally inclined to learn language?	**Nativist**
Which one of the following focuses on the consistency of measurement?	**Reliability**
Which of the following component of language studies human actions, thoughts and linguistic signs in real situations?	**Pragmatics**
Which of the following style of language development is denoted as labeling different objects?	**Referential**
Which of the following is a basic unit of phonology in linguistics?	**Phoneme**
Which of the following defense mechanism is also called as substitution?	**Compensation**
Which of the following perspective of language development argues that language acquisition has both biological and social components?	**Interactionist**
Which of the following defense mechanism involves taking out frustrations on people or objects that are less threatening?	**Displacement**

How many styles of language development are there?	**Two**
Which of the following component of language is related to the vocabulary building?	**Morphology**
Which of the following defense mechanism involves converting unacceptable impulses into more socially acceptable behaviours?	**Sublimation**
Which of the following component of language deals with the structure of sentence and the sequence of words in it?	**Syntax**
Who advocates the notion that language is gained in the same manner as behavior through operant conditioning?	**B.F. Skinner**
Which of the following perspective of language development suggests that children learn language through reinforcement and punishment?	**Learning**
Which of the following defense mechanism involves a refusal to accept reality of a situation?	**Denial**
Which of the following component of language deals with the sounds in a language?	**Phonology**
Which of the following component of language studies the meanings in a language?	**Semantics**
Which of the following learning disability is most commonly associated with trouble learning to read?	**Dyslexia**
Which of the following type of test illuminates the student's thought process in more detail?	**Essay**

Which of the following area of individual differences refer to the variations in the way people think, feel, and behave?	**Psychological**
Which of the following can be characterized as the capacity to think about the utilization of language?	**Meta-linguistic awareness**
In which of the following defense mechanism, a person invents acceptable excuses for an unacceptable behavior?	**Rationalization**
According to Freud, which of the following stage of psychosexual development takes place approximately between the ages of 12 months and 03 years?	**Anal**
What does cognition refer to?	**Thought processes and activities of the human mind**
According to Freud, which of the following component of personality operates based on the reality principle?	**Ego**
What is the information processing approach?	**A cognitive approach to**

	understanding how people acquire, store, and recall new information
What is cognition?	**Refers to thinking and mind**
What is metacognition?	**Thinking about knowing**
Who developed the concept of mental age to measure intelligence?	**Alfred Binet**
What specific criticism has been raised against multiple choice tests?	**Reward rote memorization**
Among the following terms, which one specifically involves the assignment of a numerical value to an object or event according to rule?	**Measurement**
Which of the following refers to a personality dimension describing someone who is sociable, gregarious and assertive?	**Extroversion**

What is a quick and cost-effective way of measuring students' intelligence?	**Group intelligence tests**
According to Piaget's cognitive theory, what are the four stages of cognitive development?	**Sensorimotor, Pre-operational, concrete operational, and formal operational**
Which of the following is defined as the extent to which a test accurately measures what it is intended to measure?	**Validity**
According to Freud, which of the following level of mind involves everything of which a person is aware at any given moment?	**Conscious**
What are the three basic components of intelligence in Sternberg triarchic theory?	**Analytical, creative, and practical components**
What does IQ stand for?	**Intelligence quotient**

What is the formal operational stage?	**The ability to engage in logical and systematic thinking about abstract and hypothetical situations**
What is the controversy in the area of educational and developmental psychology related to intelligence?	**Whether intelligence is an inherited ability or can be developed through personal and contextual experiences**
What is the benefit of using group intelligence tests?	**They are quick and cost-effective**

According to Freud, which of the following level of mind holds memories, feelings, thoughts and other information that are hidden from conscious awareness?	**Unconscious**
What is a useful strategy for younger students or visual learners to develop their observation and categorization skills?	**Asking them to make comparisons, classify and categorize objects, things, or events**
According to Freud, which of the following is the primitive and instinctual component of personality?	**Id**
Which of the following term is derived from the Latin word 'persona'?	**Personality**
What is an important cognitive skill that preschool children develop by the age of 2-3 years?	**Eye-hand coordination**
What does intellectual development refer to?	**Cognitive abilities and capacities related to**

	mental processes
What are the two most commonly used individual tests to measure intelligence?	**Stanford-Binet test and Wechsler scales**
Which of the following approach can be defined as experiences that are above and beyond the regular curriculum?	**Enrichment**
Which of the following may refer as a motivating force that impels us to attend to a person, a thing, or an activity?	**Interest**
What makes a good intelligence test?	**Reliability and validity**
According to Freud, which of the following component of personality is guided by the moral principle?	**Superego**
'Shortness or tallness of stature, darkness or fairness of complexion' are the examples of which of the following area of individual differences?	**Physical**

Who propounded the psychoanalytic theory in the early 1900s?	**Sigmund Freud**
Which of the following is NOT one of the personality traits suggested by Gordon Allport?	**Surface**
How many types of intelligence did Gardner categorize intelligence into?	**8**
Which of the following area of individual differences can be described as variations in weight, height and size of the body?	**Physical**
Which of the following consists of physical, intellectual, social, moral, political, economic and cultural forces?	**Environment**
Which of the following is a neurodevelopmental disorder that is characterized by inattention and impulsivity in the behaviour of children?	**ADHD**
What is the concrete operational stage characterized by?	**Children's ability to think logically about**

	concrete objects
Which of the following defense mechanism involves transferring the blame of one's own shortcomings, mistakes and misdeeds to others?	Projection
The Formal operational stage in Jean Piaget's cognitive development theory starts from:	11 years to own word
Which of the following refers to a purposeful collection of evidences of student's academic work in a given period of time?	Portfolio
Which of the following coordination abilities involves using visual information to guide hand movements?	Eye-hand coordination
Which of the following factors can influence the transfer of learning?	Culture
Lev Vygotsky's socio-cultural approach builds upon the role of language and:	Cultural tools
According to the Trace Decay Theory, what is the duration of short-term memory?	30 seconds
When learners can solve different but similar problems of equal complexity, which type of transfer does it belong to?	Lateral
Which of the following options best describes the process by which a teacher provides support and guidance to help learners develop their skills and knowledge?	Scaffolding
Which of the following is a common characteristic of preschool-aged children?	Distractibility
Which of the following developments is related to cognitive abilities and capacities?	Intellectual
The pre-operational stage in Jean Piaget's cognitive development theory starts from:	2-7 years
Cognition refers to thinking and:	Mental processes

What is the fourth stage of Jean Piaget's cognitive development theory?	**Formal operational**
Which of the following are examples of learning difficulties?	**Dysgraphia**
Which of the following area is the greatest controversy of Intelligence as an inherited ability (nature) or nurture?	**Psychology**
Which of the following terms refers to the ability to think about one's own thinking?	**Reflection**
Which of the following is a dynamic process?	**Learning**
Which of the following tests have been used to measure intelligence?	**Standardized**
Lev Vygotsky's socio-cultural approach builds upon the role of language and:	**Cultural tools**
Which of the following views of intelligence suggests that intelligence can be improved with practice and a supportive environment?	**Incremental**
In which Piaget's cognitive development stage, children use their intuition and perception to understand the world and solve problems?	**Pre-operational**
Early psychologists viewed intelligence as primarily:	**Inherited**
The sensory-motor stage in Jean Piaget's cognitive development theory starts from:	**Birth to 2 years**
Who introduced the concept of Zone of Proximal Development (ZPD)?	**Lev Vygotsky**
In which of the following years of schooling do children's cognitive development undergo rapid changes?	**Elementary school years**
Which of the following can impair mental abilities and cause memory problems?	**Chronic alcoholism**
How many main types of transfer of learning are there?	**3**
Which of the following theory, depicts analytical, creative, and practical components of intelligence?	**Sternberg's triarchic**
What is the third stage of Jean Piaget's cognitive development theory?	**Concrete operational**

What are the four aspects of human personality?	**Physical, emotional, mental and social**
Long-term memory refers to the storage of information in the brain for an extended period, ranging from:	**Hours to years**
In which approach is the human brain analogous to a computer machine?	**Information processing**
In which Piaget's cognitive development stage, children are unable to understand conservation?	**Pre-operational**
Who proposed the socio-cultural theory?	**Lev Vygotsky**
Children gain cognitive maturity by:	**Age**
During which age range do most children typically start to develop their meta-linguistic awareness?	**6 to 8**
Which of the following is NOT one of the Big Five personality factors?	**Aggression**
Which of the following is a learning disability that affects reading and language processing?	**Dyslexia**
Cognition is the study of:	**Thought Processes**
In which Piaget's cognitive development stage, children are unable to understand conservation?	**Pre-operational**
Which of the following terms refers to the modification of behavior?	**Learning**
Which of the following is a useful technique for improving memory?	**Creating memory triggers**
Which of the following processes is utilized when explaining one's strengths in academic writing?	**Metacognition**
Which of the following terms refers to the apparent loss of information already encoded and stored in an individual's long-term memory?	**Forgetting**
The Concrete operational stage in Jean Piaget's cognitive development theory starts from:	**7-11 years**

What is the first stage of Jean Piaget's cognitive development theory?	**Sensory motor**
In which Piaget's cognitive development stage, do children gain the ability to get engaged in logical and systematic thinking in abstract and hypothetical situations?	**Formal operational**
What is the second stage of Jean Piaget's cognitive development theory?	**Pre-operational**
Which of the following is a key role of the teacher in supporting learners' intellectual development?	**Engaging Learning Environment**
According to Spearman, what is responsible for an individual's overall success in different tasks?	**General ability**
Generally, intelligence tests have been divided into:	**Individual and Group**
What is the benefit of using group intelligence tests?	**Determine the student's level of anxiety**
Which of the following refers to a process for establishing the relationships between two or more variables?	**Correlation**
How many stages did Jean Piaget's present in his cognitive development theory?	**Four**
