Question: 11 (Marks: 1) Attempted Questions: 32 Total Questions: 32

Which of the following statements about plagiarism is most accurate?

Choices:

- It is so easy to "copy and paste" from the internet that everyone does it nowadays. If a proper reference is given, where is the harm in that?
- How can we say for sure where our own ideas come from exactly? If we tried to give a reference for everything we could never hope to succeed.
- Any suggestion that we have written what another actually wrote is morally wrong. Anyway, the whole point of a literature review is to show what we have read and what we thought about it.
- Plagiarism is such an awful crime that those found guilty should be obliged to wear a scarlet "P".

Given the situation below, discuss with reasons, whether it will fall into the category of Applied or Basic research?

Now a days companies are much interested in acquiring other firms even when the others operate in totally unrelated area of business. For example, ABC Industries manufacturing asphalt plants for road construction acquired XYZ Company, and later acquired yet another company engaged in the business of food processing. Such acquisitions are claimed to "work miracles". However, given the instability of the stock market and the slowing down of business, many companies are not sure whether such acquisitions are becoming too risky. At the same time, they also wonder if they are missing out on a great business opportunity if they fail to engage in this activity. Some research is needed here!

Answer:
