

STA630

Quiz 2

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Quiz 2

1. A master plan which specifies the methods and procedures for collecting and analyzing the data is called: Research design
2. Which of the following is/are the objectives of the literature review? All of the above
3. All of the following are the principles of asking interview questions, Except: ask questions exactly as they are worded in the questionnaire
4. How a particular issue or theory has evolved over time is studied in: Historical literature review
5. _____ Is not an example of non-probability sampling technique Cluster
6. It is a variable that has distinct, discrete values but no precise numerical flow. For example, gender can be thought of as a discontinuous variable with two possible values, male or female. What is it? Discrete variable
7. _____ Is the list of elements from which the sample is drawn. Sampling frame
8. Which of the following types of processes, research falls in? A process to discover the truth
9. Quantitative data is _____. Expressed in numerical form
10. A literature review requires a/an: All of the given options
11. _____ May be necessary in situations in which the respondent begins to lose track of the question. Probing
12. The selection of a method for data collection depends on which of the following factors: All of the above
13. The small scale trial run of a particular item is called _____. Pilot test
14. Which of the following is also referred to as working definition? Operational definition
15. "Have you ever had or been treated for skin allergy?

Yes

No"

Which type of question it is? Double barreled question

16. Which of the following can be referred to as a concept? A key idea about any object
17. Which of the following is an example of an issue that would be checked in a pilot testing? Logical answers between questions (i.e. attributes should be rated high if purchases interest is high)
18. Which of the following is NOT an Applied Research? Formulative Research
19. Which of the following is not a data collection method? Correlational method
20. A good review of the literature increases a reader's confidence in the researcher's: All of the above
21. Which of the following options can be a reason to conduct research? To generate theories
22. Which of the following is the least obtrusive and most accurate method for recording data in an interview? Audiotaping
23. Theoretical framework provides the logical base for developing: Analysis
24. "How much time is needed to locate the respondents?" is a part of _____ aspect which needs to be evaluated during pilot testing. Sampling procedure can be checked
25. A researcher should practice which of the following guideline while conducting a research project? All of the given option
26. Pilot study is _____. A small scale study

Quiz 2

27. In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the: Dependent variable
28. The faculty members of a university consist of 85% staff with masters as highest qualification……. Quota Sampling
29. _____ is the philosophical stance according to which the senses are the ultimate source of human knowledge. Empiricism
30. A sample can be defined as: some selected elements from a population through which we can draw conclusions about all population
31. Stipulation of logical relationship between any two variables means: Formulation of a proposition
32. A numerical value calculated from population is called Parameter
33. Unilever launched a new product line but the revenues are not increasing, the company will undergo _____ that help managers to understand, predict and control an environment. Research
34. Which of the following is/are principles(s) of questionnaire construction? All of the given options
35. According to Empiricism, _____ is the ultimate source of all our concepts and knowledge. Sensory experience
36. An expectant pause is a part of: Verbal communication
37. Identify the option that explains the idea that knowledge is verifiable by experience or observation. Empiricism
38. The list of all units in a population is called sampling frame
39. What does 'verifiable' mean in the context of scientific research? Results can be duplicated or confirmed by others
40. Which of the following is pivotal in capturing accurate variables researcher wants to study? Question design and development
41. Problem statement is a _____ statement of the question or issue that is to be investigated with the goal of finding an answer or solution: All of the above
42. The purpose of reviewing existing literature is: To find out what is already known about your area of interest
43. Which of the following is the focus of scientific research? Objectivity
44. Which of the following is NOT a method of narrowing a topic? Pilot testing
45. The unemployment among arts students is high is an example of which type of hypothesis? Descriptive hypothesis
46. Methodological review helps to: Point out how methodology varies by study
47. Debriefing involves: All of the given options
48. A ___ Hypothesis states no relationship between two variables: Null hypothesis
49. Null hypothesis states: Absence of relationship
50. A study conducted when no information is available on how similar problems have been solved in the past is known as: Exploratory research
51. Which type of the review tells the reader how a project fits into the big picture and its implications for a field of knowledge? Context review

Quiz 2

52. "The extensive use of chocolate causes pimples". The given hypothesis is a (an): Explanatory hypothesis
53. Basic and Applied Research are the classifications of research on the basis of: Use of the research
54. If a researcher is studying the effect of using laptops in his classroom to ascertain its merit and worth. Which type of an applied research he is conducting? Evaluation research
55. "Higher the job satisfaction, lower will be the rate of turnover". What is the direction of relationship does this proposition present? Negative relationship
56. Historical review helps to: Traces the development of an issue over time
57. What is opposite of a variable? A concept
58. "The higher the motivation, the higher the efficiency" is an example of: Relational Hypothesis
59. Which of the following describes a primary purpose of conducting research? To find answers or solutions to specific problems
60. While discussing about ethics in research, which of the following is not considered as a concerned party? Government
61. It is a variable that has distinct, discrete values but no precise numerical flow. For example, gender can be thought of as a discontinuous variable with two possible values, male or female. What is it? Discrete variable
62. Traces the development of an issue over time: Historical review
63. Identify the option that can be a disadvantage of cross-sectional research. It cannot capture the change process
64. A good review of the literature increases a reader's confidence in the researcher's _____. All of the above
65. ____ is an example of a concrete concept. Family dissolution
66. The introduction section of a research proposal contains information about all of the following except Design of the study
67. Theoretical review helps to: Compare how different theories address an issue
68. Research on world census regarding covid-19 is a type of _____ research. Macro
69. _____ variable is a name used to describe the dependent variable in a variety of statistical modeling contexts, including multiple regression, discriminant analysis, and canonical correlation. Criterion
70. Statistical generalizability refers to: How the result is useful for a broader group
71. Which of the following option is NOT the role of theory? Theory as memorization
72. To analyze the effects of re-branding on the level of customer loyalty is an example of which of the following options? Explanatory research
73. If there is no theory yet, you cannot conduct: Inductive
74. "Higher the level of job satisfaction, higher will be the employees' performance." Which type of relationship the movement of variables determines? Direct relationship
75. Hypothesis is also called: Testable proposition
76. A reader can easily see and comprehend the theorized relationships through: Schematic Diagram
77. What does the term "deterministic" imply in scientific research? All events are assumed to have identifiable causes
