c) Control group.

d) Independent group.

Correct option: c) Control group.

4. Which of the tables is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?

Options:

a) SPSS Table.

b) Frequency Distribution Table.

c) MINITAB Table.

Correct option: b) Frequency Distribution Table.

5. In stratified sampling, strata are:

Options:

a) Externally heterogeneous.

b) Externally heterogeneous.

c) Internally heterogeneous.

d) None of the given option.

Correct option: a) Externally heterogeneous.

6. To establish that variable X causes variable Y, all of the following conditions should be met, EXCEPT:

Options:

a) Other factors should possibly cause the change in the dependent variable Y.

b) Both X and Y should co-vary.

c) X (the presumed causal factor) should precede Y.

d) None of the given options.

Correct option: d) None of the given options.

7. A process of changing data from their original form to a format that is more suitable to perform data analysis is called as:

Options:

a) Information creation.

b) Data transformation.

c) Data transformation.

d) Information transformation.

Correct option: b) Data transformation.
