Statistics Mcq Questions

Q1._____is not a common measure of central tendency.

a)Mean

b)Median

c)Mode

d)Range

Q2. _____ is not a measure of variability

a)Median

b)Standard Variance

c)Variance

d)Range

Q3.Which of these is a type of statistics?

(A) Descriptive statistics

(B) Inferential statistics

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

(C) Industry statistics

(D)Both A and B

Q4.Variables which can be measured in terms of height , weight and length are ___?

A) continuous variables

B) measuring variables

C) flowchart variables

D) discrete variables

Q5. The discrete variables and continuous variables are the types of

A. open end classification

B. time series classification

C. qualitative classification

D. quantitative classification

Q6. In the systematic sampling, the value of k is __?

A. sampling interval

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

B. sub stage interval

C. secondary stage interval

D. multistage interval

Q7. ____ involve methods of organizing ,picturing, and summarizing information from samples and populations.

a) Descriptive statistics

b) Inferential statistics

c) Analytical statistics

d) All of the above

Q8._____ is a descriptive measurement computed from an entire population of data.

a) Statistics
b) Parameter
c) Clustering
d) None of these

Q9. Score Of computer exam is an example of ___?

a) Ratio data

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

b)Interval Data
c) Ordinal Data
d)Nominal Data

Q10.Pin Code is an example of ___?

a) Ratio data
b)Interval Data
c) Ordinal Data
d)Nominal data

Q11. Sample is regared as a subset of___?

(a) Data

(b) Set

(c) Distribution

(d) Population

Q12. _____technique where every item in the population has equal probability of being selected?

(a) Simple random sampling

(b) Stratified random sampling

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

(c) Systematic sampling

(d) Probability sampling

Q13. A number in a data-set which is very different from others is called _____?

a)Error
b)Mode
c) Outliers
d)Median

Q14. The number of observations in a particular class is called:

a) Width of the class

b) Class mark

c) Frequency

d) None of the above

Q15. The square root of the variance is called the _____ deviation.

a) empirical
b) mean

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

c) continuous
d) standard Deviation

Q16. When the correlation coefficient, r, is close to one:
a) There is no relationship between the two variables
b) There is a strong linear relationship between the two variables
c) It is impossible to tell if there is a relationship between the two variables
d) The slope of the regression line will be close to one

Q17. If the assumed hypothesis is tested for rejection considering it to be true is called?
a) Null Hypothesis
b) Statistical Hypothesis
c) Simple Hypothesis
d) Composite Hypothesis

Q18. The values of mean, median and mode can be
a) Some time equal
b) Never equal

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

c) Always equal

d)None of these

Q19.Cumulative frequency is____ frequency?

a)Decreasing

b)Increasing

c)Different

d)None of these

Q20. If the mean of the sampling distribution is equal to the parameters then estimators will be

A)Biased

B)Consistent

C)Sufficient

D)Unbiased

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

b)PCA

c)Linear Regression

d)Decision Tree Answer

Q2. Which of the following is not type of learning?

a)Unsupervised Learning

b)Supervised Learning

c)Semi-unsupervised Learning

d)Reinforcement Learning

Q3. Fraud Detection, Image Classification, Diagnostic, and Customer Retention are applications in which of the following

a)Unsupervised Learning: Regression

b)Supervised Learning: Classification

c)Unsupervised Learning: Clustering

d)Reinforcement Learning

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

Q4. Which of the following is a widely used and effective machine learning algorithm based on the idea of bagging?

A. Decision Tree

B. Random Forest

C. Regression

D. Classification

Q5. A model can learn based on the rewards it received for its previous action is known as:

A. Supervised learning

B. Unsupervised learning

C. Reinforcement learning

D. Concept learning

Q6. Which of the following is an application of reinforcement learning?

A) Topic modeling

B) Recommendation system

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

C)Pattern recognition

D)Image classification

Q6. What would be the best regression model for more than one independent variable?

A) Simple Linear Regression

B) Multiple Linear Regression

C) Logistic Regression

D) All of the Above

Q7. Regression is a __?

A. Supervised Learning Algorithm

B. Unsupervised Learning Algorithm

C. Reinforcement Learning Algorithm

D. None

Q8. Linear regression is___ to Outliers

A) sensitive

Created in Photo-to-PDF One Click Converter. Download here: https://firehawk.ai/phototopdf/

B) not sensitive

C) not affected by outliers

D) None

Q9.What does k stand for in the KNN algorithm?

A. Number of neighbors

B. Number of output classes

C. Number of input features

D. None

Q10. For clustering, we do not require-

A. Labeled data

B. Unlabeled data

C. Numerical data

D. Categorical data

Q11. The average squared difference between classifier predicted output and actual output.

a) mean squared error
