ENG507 Glossary

- **Advanced tongue root (ATR) :**Having the root of the tongue pulled forward so as to widen the pharynx (and, often, to raise the body of the tongue nearer to the roof of the mouth). Pharyngeal sounds are [-ATR], as the pharynx is narrowed.
- **affricate :**A stop followed by a homorganic fricative.
- **allophone :**A variant of a phoneme. The allophones of a phoneme form a set of sounds that (1) do not change the meaning of a word, (2) are all very similar to one another, and (3) occur in phonetic contexts different from one another—for example,syllable initial as opposed to syllable final. The differences between allophones can be stated in terms of **phonological** rules.
- **alternations :**Variations in words that can be described in terms of phonological rules; for example, the difference between [aI] and [I] in divine, divin(ity).
- **alveolar :**An articulation involving the tip or blade of the tongue and the alveolar ridge, as in English [d] in die.
- **alveolar ridge :**The part of the upper surface of the mouth immediately behind the front teeth.
- **alveolo-palatal :**Post-alveolar consonant produced with significant raising of the front of the tongue toward the palate.
- **ambisyllabic :**Belonging to two syllables. A consonant such as [p] in happy is sometimes said to be ambisyllabic.
- **apical :**An articulation involving the tip of the tongue.
- **approximant :**An articulation in which one articulator is close to another but without the tract being narrowed to such an extent that a turbulent airstream is produced. In many forms of English, / j, l, r, w / are approximants.
- **articulator :**One of several parts of the vocal tract that can be used to form speech sounds.
- **aspiration :**A period of voicelessness after the release of an articulation, as in English in pie [pÓaI].
- **assimilation :**The change of one sound into another making it more similar to a neighboring sound, as in the change of underlying [n] to [m] in input [·ImpÁt] or of underlying [z] to [Z] in does she [·dØZSi].
- **back vowel :**Vowel in which the body of the tongue is in the back part of the oral cavity (mouth). The vowels [u, o, O, A] form a set of back reference vowels.
- **bilabial :**An articulation involving both lips, as in English [m] in my.
- **binary feature :**A feature (for example, Lateral) that can be used to classify sounds in terms of two possibilities.

- **breathy voice :**Another name for murmur; a type of phonation in which the vocal folds are only slightly apart so that they vibrate while allowing a high rate of airflow through the glottis, as in Hindi [bH].
- **broad transcription :**A transcription that does not show a great deal of phonetic d etail; often a simple phonemic transcription.
- **cardinal vowels :**A set of reference vowels first defined by Daniel Jones. The vowels of any language can be described by stating their relationships to the cardinal vowels.
- **citation form :**The form a word has when it is cited or pronounced in isolation.
- **click :**A stop made with an ingressive v elaric airstream, such as Zulu [=].
- **closed syllable :**A syllable with a consonant at the end, as the first syllables in English magpie, pantry, completion.
- **coarticulation :**The overlapping of adjacent articulations.
- **coda :**The consonants occurring after the vowel in a syllable.
- **contour tone :**A tone in a language such as Chinese that must be specified as a gliding movement within the pitch range.
- **coronal :**A term for sounds articulated with the tip or blade of the tongue raised toward the teeth or the alveolar ridge (or, sometimes, the hard palate), such as [T, s, t].
- **creaky voice :**See laryngealization.
- **declination :**Gradual intonational pitch fall over the course of an utterance.
- **dental :**Refers to sounds made with the tongue touching the teeth.
- **diacritic :**Small added mark that can be used to distinguish different values of a symbol. For example, the addition of [º] distinguishes a velarized from a nonvelarized sound, as in [l º] as opposed to [l].
- **diphthong :**A vowel in which there is a change in quality during a single syllable, as in English [aI 8] in high.
- **dorsal :**Describing a sound articulated with the back of the tongue.
- **dorsum :**The back of the tongue.
- **downdrift :**The tendency for the pitch to fall throughout an intonational phrase.
- **ease of articulation :**A phonetic force that impacts linguistic sound systems so that patterns that are easier to produce are more likely than difficult patterns.
- **ejective :**A stop made with an egressive glottalic airstream, such as Hausa [k'].
- **epenthesis :**The insertion of one or more sounds in the middle of a word, such as the pronunciation of sense as [s”nts].
- **exemplar theory :**The idea that phonetic categories are represented in the mind as a set of all of the examples of the category that the speaker has produced and/or heard.
- **feature :**A phonetic property of a sound. Some features like Coronal are fairly general, while others like Laminal Dental are more specific.
- **filter :**In acoustic phonetics, a filter is an acoustic tube that enhances some frequency components of a sound source while decreasing the amplitudes of other components.
- **flap :**An articulation in which one a rticulator, usually the tongue tip, is drawn back and then allowed to strike against another articulator in returning to its rest position.
- **formant :**A resonating frequency of the air in the vocal tract. Vowels are characterized by three formants.

- **frequency :**The rate of oscillation in air pressure in a periodic sound wave.
- **fricative :**Narrowing of the distance between two articulators so that the airstream is partially obstructed and a turbulent airflow is produced, as in English [z] in zoo.
- **front vowel :**Vowel in which the body of the tongue is in the front part of the oral cavity (mouth). The vowels [i, e, ”, a] form a set of front reference vowels.
- **geminate :**Adjacent segments that are the same, such as the two consonants in the middle of Italian folla [·folla] ‘crowd’.
- **gesture :**Abstract representation of the motor control plans for linguistically s ignificant vocal tract actions. See also c oordinative structure.
- **glottal :**An articulation involving the glottis, as [/] in many forms of English button [·bØ/n`].
- **glottal stop :**glottal “catch” A stop sound produced by pressing the vocal folds tightly together.
- **glottalic airstream mechanism :**Movement of pharynx air by the action of the glottis. Ejectives and implosives are produced with a glottalic airstream mechanism.
- **glottis :**The space between the vocal folds.
- **hard palate :**The bony structure that forms the roof of the front part of the mouth.
- **homorganic :**Made with the same place of articulation. The sounds [d] and [n], as in English hand, are homorganic.
- **implosive :**A stop made with an ingressive glottalic airstream, such as Sindhi [?].
- **impressionistic transcription :**transcription in which the symbols indicate only the general phonetic value of the sounds.
- **intensity :**The amount of acoustic energy in a sound.
- **interdental :**Articulated with the tongue between the upper and lower teeth. Many speakers of American English use an interdental articulation in words such as thick, thin.
- **intonation :**The pattern of pitch changes that occur during a phrase, which may be a complete sentence.
- **intonational phrase :**The part of an utterance over which a particular intonation pattern extends. There may be one or more tone groups in an English sentence.
- **labial :**An articulation involving one or both lips, such as [f, v, m].
- **labial velar (labiovelar) :**An articulation involving simultaneous action of the back of the tongue forming a velar closure and the lips forming a bilabial closure.
- **labialization :**A secondary articulation in which lip rounding is added to a sound, as in English [S].
- **labiodental :**An articulation involving the lower lip and the upper front teeth.
- **laminal :**An articulation made with the blade of the tongue.
- **laryngeal :**The region of the vocal tract at the glottis in which consonantal articulations such as [h, /] are made.
- **laryngealization :**Another name for creaky voice; a type of phonation in which the arytenoid cartilages hold the posterior end of the vocal folds together so that they can vibrate only at the other end, as in Hausa [b0].
- **lateral :**An articulation in which the airstream flows over the sides of the tongue, as in English [l] in leaf.

- **lax :**A term with no specific phonetic correlates, used when dividing vowels into classes on phonological grounds. In English, the lax vowels are those that can occur in monosyllables closed by [N], such as sing, length, hang, long, hung.
- **length :**The lingustic use of physical duration to distinguish words. See geminate.
- **linguo-labial :**Articulated with the tongue near or contacting the upper lip.
- **lip rounding :**The action of bringing the corners of the lips toward one another so that the mouth opening is reduced.
- **liquid :**A cover term for laterals and various forms of r-sounds.
- **locus :**The apparent point of origin of the formants for each place of articulation.
- **loudness :**The auditory property of a sound that enables a listener to place it on a scale going from soft to loud without considering the acoustic properties, such as the intensity of the sound.
- **monophthong :**A vowel in which there is no appreciable change in quality during a syllable, as in English [A] in father. Compare diphthong.
- **murmur :**Another name for breathy voice; a type of phonation in which the vocal folds are only slightly apart so that they vibrate while allowing a high rate of airflow through the glottis, as in Hindi [bH].
- **narrow transcription :**A transcription that shows phonetic details (such as, in English, aspiration, length, etc.) by using a wide variety of symbols and, in many cases, diacritics.
- **nasal :**A sound in which the soft palate is lowered so that there is no velic closure and air may go out through the nose, as in English [m] in my.
- **nasal plosion :**The release of a plosive by lowering the soft palate so that air escapes through the nose, as at the end of the word hidden.
- **nasal stop :**A complete stoppage of the oral cavity so that the airstream passes only through the nose. Usually, nasal stops are simply called nasals.
- **nasal vowel :**A vowel in which part of the airstream passes out through the nose.
- **nasalization :**Lowering of the soft palate during a sound in which air is going out through the mouth, as in the vowel [oe)] between nasals in English man.
- **nucleus :**The center of a syllable, usually just the vowel.
- **obstruent :**A fricative, stop, or affricate. onset A consonant that occurs before the vowel in a syllable.
- **onset :**A consonant that occurs before the vowel in a syllable.
- **open syllable :**A syllable without a consonant at the end, as the first syllables in English beehive, bylaw, sawing.
- **oral stop :**Complete stoppage of both the oral and nasal cavities, as in [b, d, g].
- **palatal :**An articulation involving the front of the tongue and the hard palate, as in English [j] in you.
- **palatalization :**A secondary articulation in which the front of the tongue is raised toward the hard palate, as in the so-called soft sounds in Russian.
- **palato-alveolar :**An articulation between the tongue blade and the back of the alveolar ridge.

- **perseverative coarticulation :**The persistence of an aspect of the articulation of one sound into the following sound, for example, the laryngealization of a vowel after a glottal stop.
- **pharyngeal :**An articulation involving the root of the tongue and the back wall of the pharynx, as in the Arabic [?].
- **pharyngealization :**A secondary articulation in which the root of the tongue is drawn back so that the pharynx is narrowed, as in some so-called emphatic consonants in Arabic.
- **phonation :**Vibration of the vocal folds in voicing.
- **phoneme :**The smallest distinctive unit in the structure of a given language. See also allophone.
- **phonetic implementation :**Accounting for phonetic variability by writing rules that show the relationship between abstract phonological representations and cross-linguistic, dialectal, or i ndividual variants.
- **phonology :**The description of the systems and patterns of sounds that occur in a language.
- **pitch :**The auditory property of a sound corresponding to a musical note that enables a listener to place it on a scale going from low to high.
- **plosive :**A stop made with a pulmonic airstream mechanism, such as in English [p] or [b].
- **post-alveolar :**A sound produced with constriction between the alveolar ridge and the palate.
- **prominence :**The extent to which a sound stands out from others because of some combination of its sonority, length, stress, and pitch.
- **pulmonic airstream mechanism :**The movement of lung air by the respiratory muscles. Most sounds are produced with a pulmonic airstream mechanism.
- **r-colored :**Vowels that are essentially some form of a syllabic rhotic approximant [’ `].
- **radical :**An articulation made with the root of the tongue.
- **reduced :**A reduced form of a word is a production that exhibits significant deviation from a citation production, including reduced vowels and deleted segments.
- **reduced vowel :**A vowel that is pronounced with a noncontrasting centralized quality, although in the underlying form of a word it is part of a full set of contrasts. The second vowel in emphasis is a reduced form of the vowel / oe /, as in emphatic.
- **release burst :**A burst of noise produced when a stop consonant is released.
- **retroflex :**An articulation involving the tip of the tongue and the back part of the alveolar ridge. Some speakers of English have retroflex approximants in rye and err. Retroflex stops occur in Hindi and other languages spoken in India.
- **rhotacization :**The auditory property known as r-coloring that results from the lowering of the third formant.
- **rhotic :**A form of English in which / r / can occur after a vowel and within a syllable in words such as car, bird, early. Most forms of Midwestern American English are rhotic, whereas most forms of English spoken in the southern part of England are nonrhotic.

- **rhyme :**The vowel (nucleus) and any consonants occurring after the vowel in a syllable. GLOSSARY 309 Copyright

ENG 508 Glossary

- **Anthropologist :**An anthropologist is a person engaged in the practice of anthropology. Anthropology is the study of various aspects of humans within past and present societies. Social anthropology, cultural anthropology, and philosophical anthropology study the norms and values of societies.
- **Aspect :**Tense is a category which allows a speaker to relate situations to time whereas aspect system allows speaker to relate situation and time and to view an event in various ways such as complete or incomplete.
- **Collocation :**Collocation is a familiar grouping of words.
- **Compositional Semantics :**Compositional semantics deals with the way that the meanings of lexical items combine to give phrase and sentence meaning.
- **Davidsonian Semantics :**Davidsonian semantics argues that we can do semantics without possible worlds. Davidsonian Semanticists agree with other formal semanticists that the meaning of a sentence consists in its truth-conditions, but think that possible worlds and the like are not the right way to think about truth – conditions.
- **Deontic Modality :**Deontic Modality is where the verbs mark the speaker's attitude to social factors of obligation, responsibility and permission.
- **Epistemic Modality :**Epistemic Modality expresses the degree of knowledge that how sure is the speaker in his communication.
- **Evidentiality :**Evidentiality is a semantic category which allows a speaker to communicate his/her attitude to the source of his/her information.
- **Formal Grammar :**The study or the use of rules about how words change their form, and combine with other words to express meaning.
- **Hyponym :**A hyponym includes the meaning of a more general word.For example, sister and mother are hyponyms of 'woman'.
- **Idioms :**Idioms are expressions "whose meaning cannot be inferred from the meaning of its parts".
- **Moneo :**'Money' is related to Latin 'moneo' (warn) because money was made in the temple of the goddess Juno Moneta.
- **Non-literal meaning :**Non-Literal Meaning are instances where the speaker deliberately describes something in untrue or impossible terms in order to achieve special effects.
- **Paradigm :**A paradigm is a set of linguistic or other units that can be substituted for each other in the same position within a sequence or structure.

- **Phrasal verb :**A very common type of idiom in English is 'phrasal verb' the combination of verb plus adverb of the kind.
- **Pragmatics :**Pragmatics concerned with the transmission of meaning through language in use.
- **Presupposition :**Presupposition refers to the assumptions implicitly made by the speakers and the listeners.
- **Principle of compositionality :**This says that the meaning of a piece of language is based solely on the meaning of its parts, and the way they are put together. Here the infinity and creativity of language are comprehensible.
- **Signification :**This process of creating and interpreting symbols is called signification - far wider than language.
- **Signified :**The concept that a signifier refers to is called signified.
- **Syntagmatic relations :**Syntagmatic relations hold between two or more words co-present in a sequence.
- **Thematic roles :**Thematic roles mean the roles that referents of the arguments of a verb play in the event or as the state that the verb denotes.
- **Traditional logic :**Logicians tend not to talk about 'ideas' though; the basic unit of traditional logic is the 'proposition'; a significant term in the discussions of meanings.
- **Utterance :**An utterance is an instance of the production of a sentence or a fragment of a sentence.

ENG509 Glossary

- **A-head :**An A-head is the kind of head (like T) which allows as its specifier an argument expression but not an adjunct expression. An A-bar head is the kind of head (like C) which allows as its specifier either an argument or an adjunct expression.
- **A-movement :**Movement from one A-position to another (typically, from a subject or complement position into another subject position).
- **Acronym :**A word derived by taking the initial letter of all or most words in a string and pronouncing them together,
- **Allomorph :**a variant form of a morpheme, that is, when a unit of meaning varies in sound without changing the meaning.
- **Constituent structure :**The constituent structure (or phrase structure, or syntactic structure) of an expression is (a representation of) the set of constituents which the expression contains. Syntactic structure is usually represented in terms of a labelled bracketing or a tree diagram.
- **Derivation :**the formation of a new word from another word or stem. It typically occurs by the addition of an affix.
- **Determiner :**A word like the/this/that which is typically used to modify a noun, but which has no descriptive content of its own.

- **Ditransitive :**A ditransitive structure is a double-object structure like 'She gave me them', where the transitive verb gave has two objects (me and them).
- **Headedness Principle :**An expression is headed if it has a head. The Headedness Principle specifies that every constituent must be headed (i.e. must have a head). So, for example, an expression like 'fond of fast food' is headed by the adjective fond and so is an adjectival phrase.
- **Inflection :**a change in or addition to the form of a word that shows a change in the way it is used in sentences
- **Lexeme :**a basic lexical unit of a language consisting of one word or several words, the elements of which do not separately convey the meaning of the whole.
- **Lexicon :**a lexicon is a language's inventory of lexemes
- **Morpheme :**a meaningful morphological unit of a language that cannot be further divided (e.g. in, come, -ing, forming incoming
- **Morphological derivation :**the process of forming a new word from an existing word, often by adding a prefix or suffix
- **Morphology :**the study of words, how they are formed, and their relationship to other words in the same language
- **Morphosyntax :**An area of linguistics that deals with the relationship and interactions between morphology (the structure of words) and syntax (the structure of larger utterances, such as phrases and sentences).
- **Phonology :**the study of how sounds are organized and used in natural languages
- **Syntax :**the arrangement of words and phrases to create well-formed sentences in a language
- **Tense :**The inflectional category that indicates the time an event or action took place relative to the time of utterance.
- **Transitive verb: A** verb that takes a direct object, e.g., writes.
- **Wh-movement: Transformation** that moves a question word or phrase from a theoretically posited lower position in a sentence to a higher one in question formation.
- **Zero-derivation: A** word-formation process that changes the lexical category of a word without changing its phonological shape. Also called conversion.

EN510 Glossary

- ✓ **Accent :**A distinctive way of pronouncing a language, especially one associated with a particular country, area, or social class.
- ✓ **Argot :**Specialized terminology in general
- ✓ **Bilingualism :**Bilingualism (or more generally: Multilingualism) is the phenomenon of speaking and understanding two or more languages. The term can refer to individuals (individual bilingualism) as well as to an entire society (social bilingualism).

- ✓ **Cliché :**A phrase or opinion that is overused and betrays a lack of original thought.
- ✓ **Code mixing :**Generally refers to alternations between varieties, or codes, within a clause or phrase. Often elicits more strongly negative evaluations than alternations or code switching across clauses.
- ✓ **Code Switching :**In its most specific sense, the alternation between varieties, or codes, across sentences or clause boundaries. Often used as a cover term including code mixing as well.
- ✓ **Communicative Competence :**What a speaker needs to know to communicate effectively in cultural settings
- ✓ **Constraints :**A limitation or restriction.
- ✓ **Creole :**It is a stable natural language developed from a mixture of different languages at a fairly sudden point in time: often, a pidgin transitioned into a full, native language.
- ✓ **Desertion :**The act of deserting or abandoning or the state of being deserted or abandoned
- ✓ **Diachronic :**Concerned with the way in which something, especially language, has developed and evolved through time.
- ✓ **Dialect :**A particular form of a language which is peculiar to a specific region or social group.
- ✓ **Diglossia :**Classically defined as a situation where two closely related languages are used in a speech community.
- ✓ **Diminutive Expressions :**A diminutive form (abbreviated DIM) is a word-formation device used to express such meanings; in many languages, such forms can be translated as "little" and diminutives can also be formed as multi-word constructions such as "Tiny Tim". ...
- ✓ **Discipline :**The practice of training people to obey rules or a code of behaviour, using punishment to correct disobedience.
- ✓ **Domain :**Situations where people typically use a particular language or type of language
- ✓ **Gender :**The state of being male or female (typically used with reference to social and cultural differences rather than biological ones).
- ✓ **Gravity Model :**Model of the diffusion of innovations introduced to sociolinguistics by Peter Trudgill. Social innovations (including linguistic innovations) have been observed to 'hop' between large population centers in a (spatially) discontinuous manner. At its simplest, the gravity model predicts that the larger the city/town, the sooner an innovation is likely to show up there. (i.e., the 'gravitational force' is provided by the weight of numbers of people).
- ✓ **Greetings :**Greeting is an act of communication in which human beings intentionally make their presence known to each other, to show attention to, and to suggest a type of relationship (usually cordial) or social status (formal or informal) between individuals or groups of people coming in contact with each other.
- ✓ **H and L Varieties :**The 'High' and 'Low' versions of a language which are used for different purposes in a society

- ✓ **Ideology :**A system of ideas and ideals, especially one which forms the basis of economic or political theory and policy.
- ✓ **Idioms :**A group of words established by usage as having a meaning not deducible from those of the individual words (e.g. over the moon, see the light).
- ✓ **Imaginary :**Existing only in the imagination or fancy; not real; fancied
- ✓ **Jargon :**Special words or expressions used by a profession or group that are difficult for others to understand.
- ✓ **Language :**A system of communication used by a particular country or community.
- ✓ **Language Accommodation :**In linguistics, accommodation is the process by which participants in a conversation adjust their accent, diction, or other aspects of language according to the speech style of the other participant.
- ✓ **Language Change :**Language change is the phenomenon by which permanent alterations are made in the features and the use of a language over time.
- ✓ **Language death :**Language death is a process in which the level of a speech community's linguistic competence in their language variety decreases, eventually resulting in no native or fluent speakers of the variety.
- ✓ **Language hybridization :**It is a resultant process of frequent code-mixing sometimes; even the grammar or structure of one language is applied to the vocabulary of another. So when two or more languages are frequently mixed, resultantly, a new hybrid variety, Of language takes birth.
- ✓ **Language shift :**Language shift, also known as language transfer or language replacement or language assimilation, is the process whereby a community of speakers of a language shifts to speaking a completely different language, usually over an extended period of time.
- ✓ **Lect :**A specific form of a language or language cluster: a language or a dialect. The term is used when it is not possible or preferable to decide whether something is a distinct language or only a dialect of a language.
- ✓ **Lingua Franca :**Second language spoken by common agreement by people from different language communities for social, economic or political purposes
- ✓ **Linguistic Imperialism :**Linguistic imperialism is the imposition of one language on speakers of other languages. It is also known as linguistic nationalism, linguistic dominance, and language imperialism.
- ✓ **Linguistic Relativism :**The hypothesis of linguistic relativity holds that the structure of a language affects its speakers' world view or cognition. Also known as the Sapir–Whorf hypothesis, or Whorfianism
- ✓ **Linguistics :**The scientific study of language and its structure, including the study of grammar, syntax, and phonetics.
- ✓ **Literature :**Written works, especially those considered of superior or lasting artistic merit.
- ✓ **Phenomena :**A fact, occurrence, or circumstance observed or observable
- ✓ **Pidgin :**It is a grammatically simplified means of communication that develops between two or more groups that do not have a language in common: typically, its vocabulary and grammar are limited and often drawn from several languages.
- ✓ **Politeness :**A behavior that is respectful and considerate of other people.

- ✓ **Primary Education :**Primary Education is the initial stage of education and has as its basic aim to create, establish and offer opportunities to all children, regardless of age, gender or country of origin, to achieve a balanced cognitive, emotional and psychomotor development.
- ✓ **Proverbs :**Proverbs are popularly defined as short expressions of popular wisdom.
- ✓ **Regional Dialect :**A way of pronouncing a language which is common to a region
- ✓ **Register :**In linguistics, a register is a variety of a language used for a particular purpose or in a particular social setting.
- ✓ **Repertoires :**A stock of plays, dances, or items that a company or a performer knows or is prepared to perform.
- ✓ **Research :**The systematic investigation into and study of materials and sources in order to establish facts and reach new conclusions.
- ✓ **Rigidity :**Inability to be to bent or be forced out of shape.
- ✓ **Sayings :**A short, pithy, commonly known expression which generally offers advice or wisdom.
- ✓ **Second Language Acquisition :**Second-language acquisition (SLA), second-language learning, or L2 (language 2) acquisition, is the process by which people learn a second language. Second-language acquisition is also the scientific discipline devoted to studying that process.
- ✓ **Secondary Education :**Secondary schools may be called high schools, academies, gymnasiums, lyceums, middle schools, upper schools, colleges, sixth-form colleges, vocational schools, or preparatory schools, and the exact meaning of any of these varies among the countries.
- ✓ **Slang :**A type of language consisting of words and phrases that are regarded as very informal, are more common in speech than writing, and are typically restricted to a particular context or group of people.
- ✓ **Social Class :**A measure of status which is often based on occupation, income and wealth, but also can be measured in terms of aspirations and mobility. These factors can then be used to group individuals scoring similarly on these factors into socioeconomic classes.
- ✓ **Social network :**The different groups of people you have contact with on a regular basis
- ✓ **Social Networks :**A social network is a social structure made up of a set of social actors (such as individuals or organizations), sets of dyadic ties, and other social interactions between actors.
- ✓ **Sociolinguistics :**The study of language in relation to social factors, including differences of regional, class, and occupational dialect, gender differences, and bilingualism.
- ✓ **Sociology :**The study of the development, structure, and functioning of human society.
- ✓ **Speech Communities :**A group of people sharing a common language or dialect.
- ✓ **Speech Function :**The reason why someone is speaking
- ✓ **Standard English :**The form of the English language widely accepted as the usual correct form.

- ✓ **Style :**Language style is defined as the choice of words used by a specific group of people when they speak.
- ✓ **Synchronic :**Concerned with something, especially a language, as it exists at one point in time.
- ✓ **Tertiary Education :**Tertiary education also referred to as third stage, third level, and postsecondary education, is the educational level following the completion of a school providing a secondary education.
- ✓ **Urbanization :**The process of making an area more urban.
- ✓ **Variety :**It is a specific form of a language or language cluster.

ENG511 Glossary

- **Conceptualization :**Initial stage of language production, where a pre-verbal message is generated based on the speaker's or writer's intentions.
- **Declarative knowledge :**Knowledge we have in long-term memory, also known as 'world knowledge'.
- **Filled pause :**Type of hesitation where the speaker utters sounds that are not real words while pausing. Example: Um, eh, ah, er, mm
- **Formulation :**Part of the language production process that imposes linguistic form on the abstract pre-verbal message.
- **Grammatical encoding :**Process of generating sentences, using a string of lemmas with their functions specified. Important part of the formulation component of language production.
- **Hesitation :**Interruption to fluent speech, which may reveal aspects of the planning process. Example: silent pause, filled pause (um, er), restarts, etc.
- **Linearization :**Aspect of macroplanning where the order for expressing information is chosen. Example: Walk towards the sea and stop at the edge of the cliff is clearly different from Stop at the edge of the cliff and walk towards the sea.
- **Macroplanning :**Process of selecting a series of speech acts to complete a communication goal. See also microplanning.
- **Mental Lexicon :**Dictionary in our head, consisting of representations for the forms and contents of words.
- **Microplanning :**Process of determining the pre-verbal message for each speech act. See also macroplanning.
- **Neurophysiology :**Study of brain structures, often to discover which parts of the brain are responsible for particular tasks, e.g. language processing.
- **Procedural knowledge :**Type of knowledge involved in generating messages, which tells us how to perform tasks or realise goals. Example: p = I went to the dairy. If my intention is to commit myself to the truth of p, then I will assert p.

- **Prosody :**Suprasegmental organisation of utterances, including intonation, stress and rhythm. Topics: Planning, Interpreting sentences, General linguistic terms
- **Psycholinguistics :**Study of the mental representations and processes involved in language use, including the production, comprehension and storage of spoken and written language. Topic: Introduction
- **Repeat :**Semantically non-significant repetition which can be of a single sound or a longer sound sequence. Example: I f-f-finally managed to get So I ... I arrived in Rome
- **Representation :**Stored or constructed mental form of a linguistic unit. Example: For instance, words may have mental representations, and sentences may have (temporary) representations constructed as part of production or comprehension processes.
- **Self-interruption :**Where the speaker interrupts their own flow of speech, often to repair an error. Example: The speaker interrupts himself after I in whereas certainly I - an-and sort of
- **Situational knowledge :**Type of knowledge involved in discourse, which includes for example, the speaker's knowledge of the listener and of previous discourse.
- **Slip of the tongue :**Another term for speech error Example: There are many types of speech error. See anticipation, perseveration, exchange, blend, substitution, omission, addition, malapropism, spoonerism.
