ZOO507 QUIZ 1 SOLVED

Provide by VU Answer

1. Product of photosynthesis are ____.

a) Glucose and water

b) Glucose and oxygen

c) Glucose and carbon

d) Food and Sulphur

2. How many types of biotic community are there?

a) 2

b) 3

c) 4

d) 5

3. The normal body temperature of human beings is ____.

a) 36 degree C

b) 37 Degree C

c) 38 Degree C

d) 39 Degree C

4. Low quality energy is ____.

a) dispersed form of energy

b) has more capacity to do useful work

c) energy released by burning natural gas, gasoline or coal.

d) concentrated sunlight

5. Commensalism is a ____ relationship?

a) Harmful for both species

b) Useful for both species

c) Useful for one species and harmful for other

d) Useful for one species and second is neither helped nor harmed

6. Animals like birds and mammals that maintain their internal body temperature constant are called ____.

a) Homeotherms

b) Hetrotherms

c) Poikilotherms

d) Ectotherms

7. Which one of these is NOT True about torper?

a) Lowered body temperature

b) Higher metabolic activity

c) Lowered metabolic activity

d) only for short duration

8. ____ is defined as the number of species represented in a specific region, landscape or an ecological community.

- a) Coevolution
- b) Commensalism
- c) Species richness**
- d) Population density

9. Which one of the animals do not go under winter sleep?

- a) Snails**
- b) Bats
- c) Salamanders
- d) Frogs

10. The formation of a climax community from an abandoned farm land is a an example of ____.

- a) autogenic succession

b) allogenic succession

c) primary succession

d) secondary succession

11. The term ____ is used for maintenance of an internal body temperature of an organism.

a) Thermometer

b) Thermoregulation

c) Homeothermal

d) Homeostasis

12. The food chain from grass to hawk and again it comes back to grass with the help of fungi. In the above explain food chain, what is grass?

Producers

13. Which of the following does not belong to herbivore fauna of the coniferous forests. _____ **Fox**

14. Human activities tend to _the rate of runoff **Increase**
15. Elements move through _components of earth system. **4**
16. Liquid water is present in: ____ **hydrosphere**
17. Relative amount of energy, biomass, number of organisms at each level in ecosystem is called _ **Ecological Pyramid**
18. Which of the following is not part of Arctic tundra? ____ **Inner Mongolia**
19. In ecological succession the entire successional sequence is called as a _____. **sere**
20. In ecological succession the ____ community have high species diversity. **Climax**

28. The soil of tropical rain forests is rich in **Humus**

29. ____ Is the number of populations per unit of total space **Crude density**

30. Organism which break down detritus into matter particles
detritivores

31. A is the role which a specie can play in the community and also includes the type of food it eats and the relationship with other species.
niche

32. Which one of these causes' disease in cattle and effects its distribution in Africa? **tsetse**

33. Any group of organisms of the same species occupying a particular place and functioning part of community. **Biotic**

47. The animals that are fed on plants are classified as **herbivores**
48. **Commensalism** is an association between two organisms in which one benefits and the other is neither benefited nor harmed.
49. Which one of the following hosts offers home to the larval stage or the asexual forms of the parasite? **inter mediate**
50. What is the mean annual temperature of boreal coniferous forests?
Below 0°C
51. The pioneer community like microbes, lichensand create soil for other plants to grow. **mosses**
52. Tropic of Capricorn lies at **23** degree in southern hemisphere.
53. **2nd** law of Thermodynamics is about the quality of energy.
