A. Touch events
B. Delete events
C. Update events
D. Insert events

Question#8

Pointer events model is proposed by_____.

A. Tesla
B. Microsoft
C. IBM
D. Intel

Question#9

_____API was defined in terms of *Touch*es.

A. Delete events
B. Create events
C. Update events
D. Touch events

Question#10

_____API is defined in terms of *Pointer*s.

A. Create events
B. Update events
C. Delete events
D. Pointer events

Question#11

Pointer is defined for _____ devices.

A. Input
B. Output
C. Both Input and Output
D. IoT

Question#12

Pointer attribute is _____.

A. pointer
B. pointerId
C. screen
D. screenId

Question#13

Pressure is a pointer attribute that means _____.

A. Pressure of contact on screen

B. Pressure of contact on pointer
C. Pressure of contact on width
D. Pressure of contact on height

Question#14

To present the class of pointer, we used _____.

A. Pointer
B. PointerId
C. PointerPressure
D. PointerType

Question#15

To present the main Pointer for a pointer type, we use _____.

A. PointerType
B. PointerPressure
C. IsPrimary
D. IsSecondary

Question#16

Which of the following is event type?

A. Pointerenter
B. Pointerexit
C. Pointercreate
D. Pointerdelete

Question#17

When an element becomes target of pointer, we use _____.

A. Got
B. Gotpointer
C. Gotpointercatch
D. Gotpointercapture

Question#18

When element loses pointer capture, we use _____.

A. Lost
B. Lostpointer
C. Lostpointercatch
D. Lostpointercapture

Question#19

Polyfill library refers to a _____ library.

A. JavaScript
B. HTML
C. PHP
D. CSS

Question#20

While entering data using any input entry method, data should be _____.

A. Visible
B. Not visible
C. Same
D. Not same

Question#21

Which of the following font size data will be difficult to enter?

A. Small
B. Large
C. Both small and large

D. Medium

Question#22

Input entry should be _____ for all the users.

A. Difficult
B. Easy
C. Both difficult and easy
D. Moderate

Question#23

Which of the following is not an input type in HTML5?

A. Date
B. Week
C. Month
D. Decade

Question#24

Which of the following syntax is used for the most common input type?

A. <input type="text">
B. <input type="">
C. < type tel="text">
D. <input email ="text">

Question#25

Which of the following syntax is used for the input type as email?

A. <input type="email">
B. <input type="">
C. < type text="email">
D. <input enter="email">

Question#26

We get a @ sign as well as the .com by using the input type as_____.

A. Text
B. Radio button
C. Hidden field
D. Email

Question#27

Entering an email on the standard keyboard is _____.

A. Easy
B. Difficult
C. Not possible
D. Not allowed

Question#28

_____ Input provides the user with ability to add the numbers.

A. Email
B. Text
C. Tel
D. Radio button

Question#29

We can add *, # , + signs by using input type as _____.

A. Tel
B. Text
C. Email
D. Hidden field

Question#30

Which of the following syntax is used for the input type as Tel?

A. <input type="">
B. <input type="tel">
C. <input enter="tel">
D. <type text="tel">

Question#31

Which of the following Input types is used to enter the date on a Webpage?

A. Tel
B. Date
C. Email
D. Text

Question#32

Which of the following input type is used to enter date and time?

A. <input type="time">
B. <input type="date">
C. <input type="datetime">
D. <input text="datetime">

Question#33

Which of the following can be used for client side validation?

A. Pattern attribute
B. Tel attribute
C. Text attribute
D. Email attribute

Question#34

Which of the following syntax is used for the input type as Password?

A. <input type="password">
B. <input password="type">
C. <type enter="password">
D. <input type="enterpassword">

Question#35

How can we apply the limit on password that must contain 8 or more characters?

A. Pattern =".{8,}"
B. Pattern ="8.{password}"
C. Pattern ="password8.{}"
D. Pattern.8 =".{password}"

Question#36
