

ENG529

Finals 2K26

By Nimma Malik

IMIP Acronyms

Interaction approach (IA)

Sociocultural theory (SCT)

Intelligent tutoring system (ITS)

Science of Learning and Educational Technology (SoLET)

Automated writing evaluation (AWE)

Natural language processing (NLP)

Educational Testing Service (ETS)

Text-to-Speech (TTS)

Speech recognition (SR)

Open educational resources (OER)

Student response system (SRS)

Computer-mediated communication (CMC)

Artificial reality simulators (ARS)

Asynchronous communication events (ACMC)

Synchronous chat (SCMC)

Corpus of Contemporary American English (COCA)

Zone of proximal development (ZPD)

Interactive whiteboard (IWB)

Natural language processing (NLP)

Human-Computer interaction (HCI)

Human human interaction (HHI)

Social networking sites (SNS)

ENG529 Finals

Computer-assisted pronunciation training (CAPT)
Automated Writing Evaluation (AWE)
Visual- syntactic text formatting (VSTF)
Automatic Speech Recognition (ASR)
Social networking sites (SNS)
Task-based instruction (TBI)
Task-based language teaching (TBLT)
Computer-assisted language learning (CALL)
Second language acquisition (SLA)
Sending short messages (SMS)
MALL (Mobile Assisted Language Learning)
Cognitive theory of multimedia learning (CTML)
Programmed Logic for Automatic Teaching Operations (PLATO)
Colossal Cave Adventure (CCA)
Mobile-device supported peer-assisted learning (MPAL)

IMP MCQs

- 1) The term **'blended learning'** refers to every time teachers mix different media (e.g. print, audio, and video) with classroom interaction.
- 2) Teaching cannot be defined separately from **learning**. **True**
- 3) The costs involved in blended learning must be **considered** as they might not be negligible, especially at the beginning of the process.

ENG529 Finals

- 4) **Electronic** assessment, also known as e-assessment, online assessment, computer-assisted/mediated assessment and computer-based assessment
- 5) Effective integration of technology is achieved when students can select technology **tools** to help them obtain information promptly.
- 6) Meaning exists in the text and readers are **passive recipients** of the information.
- 7) Students who are engaged and interested in things they are studying are expected to have better knowledge **retention**.
- 8) Commercial courseware is **ready-made, licensed**, and sold by companies.
- 9) Virtual worlds have grown from their **text-based** infancy of the **1970s** to the 3D immersive environments of today.
- 10) For successful decoding, readers need to acquire a set of **hierarchically ordered** sub-skills that sequentially help improve comprehension ability (**LaBerge and Samuels 1985**)
- 11) Technology can encourage more active participation in the learning process which can be hard to achieve through a traditional lecture environment. **True**
- 12) **The cognitive view** brings the role of background knowledge into play and highlights the interactive nature of reading and the **constructive** aspects of comprehension.
- 13) Different types of online assessments contain elements of one or more of the following components, depending on the assessment's purpose: formative, diagnostic, or **summative**.
- 14) The cognitive view is also referred to as the **"top-down"** model and was introduced to counteract the **over-reliance**.
- 15) E-marking can be combined with electronic examinations, whilst in other cases, students will still **handwrite** their exams with papers scanned in securely and uploaded into an e-marking system.
- 16) Peer support is an **integral part** of a blended approach, as teachers cannot be on hand to help learners all the time.
- 17) **Academic factors** such as difficulty and/or relevance with course material.

ENG529 Finals

- 18) Range and quantity of applications of new technologies for reading have grown rapidly. **True**
- 19) **Integrating technology** into the curriculum is necessary to stay updated and take benefit of the **latest** technological advances happening around the globe.
- 20) **Dictionaries, Glosses, and Annotations** the increasing availability of electronic corpora and online technology has facilitated the creation of tools.
- 21) The affordance of interactivity also leads to distracted minds, information overload, and fragmentation. **True**
- 22) **21st-century** skills are essential to be successful in this day and age.
- 23) **Criterion** (<http://www.ets.org/criterion/>) is a web based commercial writing evaluation and feedback tool developed by **Educational Testing Service**.
- 24) Interactive whiteboards have brought **significant** improvements in the education sector by simplifying the learning processes.
- 25) Education isn't just about **memorizing facts and vocabulary** words; it's about solving complex problems and collaborating with others in the workforce.
- 26) Student essays produced on W-Pal can be scored automatically with **automated** formative feedback.
- 27) **Ed-tech** in the classroom prepares students for their **future** and sets them up for this increasing digital economy.
- 28) **Non-academic** factors such as time pressure.
- 29) **Photos to teach** is a website of -----? **Eltpics**
- 30) **Empirical studies** of corpus use for **data-driven** learning have yielded positive findings.
- 31) **Pixton** is an online comic maker to **add sound, upload pictures and images**.
- 32) In recent years, language-learning software such as Rosetta Stone or **Tell Me More** has gained prominence.

ENG529 Finals

- 33) Cardenas-Claros and Gruba (2013) categorize both electronic glossaries and electronic dictionaries as **explanatory** help options.
- 34) Information processing theories all share the belief that human cognitive architecture is made up of **representations and access**.
- 35) Thus, the term 'blended' is used to mean **combining different** learning environments in an integrated way and appropriately.
- 36) Romeo and Hubbard (2010) report on a **pervasive learner** training model employed in an advanced ESL listening course that incorporated a three-hour independent listening project.
- 37) The use of language for communication, rather than for practice alone, is a **core goal** of most language instruction.
- 38) **Sociocultural Theory** Fundamental to all modern language instruction—face-to-face in the classroom or virtually through CALL—is **Vygotsky's (1962)** notion of the Zone of Proximal Development.
- 39) Choosing the right blend is a key part of the **teacher's role**.
- 40) **Blogger** (<http://www.blogger.com>): It is a free blog publishing tool **from Google** for easily sharing your thoughts with the world.
- 41) Smith and Renaud's (2013) study employed **eye-tracking** technology as a measure of what learners attended to in the **corrective feedback**.
- 42) **Blogger** makes it simple to **post text, photos and video**.
- 43) One of the most compelling aspects of the ZPD is that rather than measuring the level of development a **learner** has already attained
- 44) SCMC began to include the exchange of voice-over IP sound (VoIP), giving speakers two channels in which to communicate. **True**
- 45) Dialogflow, a platform supported by Google, can **train** chatbot without any coding skill; even students of humanities have modified and built new chatbots from scratch.
- 46) The interaction approach (IA) grew out of **Long's** Interaction Hypothesis, which was first developed in the **early 1980s**.

ENG529 Finals

- 47) **Smith and Renaud** (2013) used eye-tracking technology to explore the relationship between L2 recasts, noticing, and learning of the recast targets. **True**
- 48) it should be noted that the online environment must be **learner**-driven and not technology-driven
- 49) Seedhouse and Almutairi (2009) employed **Transana3** software to align video, audio, and tabletop computer screen records with the transcripts of the interaction onto a single screen
- 50) **Yovant Tools** is a web-based reading and **analysis** environment for digital texts.
- 51) Mapping and Timeline Tool for Omeka Projects. **(Neatline)**
- 52) **E-Assessment** covers a wide range of **activities** so can have a wide range of benefits.
- 53) Open or Hosted resource for archiving and displaying images and content. **(Omeka).**
- 54) The first Apple computer, the Apple I, was released in **1977**.
- 55) The first IBM PC was released in **1981**.
- 56) The use of **electronic dictionaries**, text-based glosses, as well as annotations and multimedia glosses has been extensively researched since they appeared in the late 1990s
- 57) Using Java and a Google Sheets template, you can quickly create interactive timelines with images, videos and other content. **(Timeline)**
- 58) We also select how and what we are becoming. In this **context**, L2 reading may be shaped by three trends in technology of learning.
- 59) **JavaScript** (officially ECMAScript) is a **scripting** language that is incorporated into the source of the webpage, along with HTML and CSS.
- 60) In recent years, Digital Affordances and New Listening Contexts have become increasingly common to speak about technology tools and applications in terms of their **affordances**.
- 61) Self-assessment means the process of having the learners critically reflect upon, record the **progress** of and perhaps suggest grades for, their learning.

ENG529 Finals

- 62) Isaac Asimov's _____ laws of robotics as introduced in the short story. **(three)**
- 63) Working on different projects by collaborating with others on forums or by sharing documents in their **virtual** learning environments.
- 64) University of Minnesota ArcGISonline Server access. **(ArcGIS Online)**
- 65) Strategic readers are capable of reflecting on their level of **understanding** and know what to do when reading difficulties occur
- 66) All in One, scalable web based story editor **(We Video)**
- 67) Self-developed courseware is usually not designed by collaborative teams not to create language learning tools to suit a specific group of learners. **(False)** because its created or design by collaborative teams)
- 68) Freemium graphic design tool with infographic templates. **(Canva)**
- 69) Language instructions can be used in class for easy planning or a peer feedback activity or out of **class** for students to submit and revise based on the feedback
- 70) Examples of data visualizations from Census Data. **(Census Data Viz)**
- 71) **Walrus** is a tool for interactively **visualizing** large directed graphs in three-dimensional space.
- 72) Google Docs, another important example, is a **free online word processor**.
- 73) **Web 2.0 tools** include a variety of social media sites, such as Facebook and Twitter, as well as blogs.
- 74) Blended learning can support _____ number of learners. **(variety)**
- 75) The COCA interface **"Word and phrase"** (<http://www.wordandphrase.info/>) permit users to interact with the tool differently.
- 76) Second language acquisition (SLA) is the study of the human capacity to learn languages other than the **first**.
- 77) Provide digital feedback files e.g. standard feedback forms in **Word format**.

ENG529 Finals

- 78) Computers enable students to assemble and **create new information**.
- 79) Teaching cannot be defined separately from learning. 'It is guiding and facilitating learning, enabling the learner to learn' **(Brown, 2000)**.
- 80) **COCA** can be used for different purposes in second language **writing instruction**.
- 81) Pixton- an online **comic** maker to add sound uploads pictures and images.
- 82) **Juxta** is a cross-platform tool for collating, comparing, and analyzing any kind or number of textual **objects**.
- 83) **Lang-8** (<http://lang-8.com/>) is a good example of a **social networking** site designed to encourage L2 communication.
- 84) Student essays produced on W-Pal can be scored **automatically** with automated formative feedback, using Coh-Metrix.
- 85) **The teacher** is involved at all stages as a guide.
- 86) Access for students in different geographical locations and at different **times**.
- 87) Wordpress (<http://www.wordpress.com>): It is **web** software you can use to create a beautiful website or blog.
- 88) According to this view, **reading** is primarily a matter of decoding a series of **written symbols** into their aural equivalents in the quest to make sense of the text.
- 89) Blogger (<http://www.blogger.com>): It is a **free blog** publishing tool from **Google** for easily sharing your thoughts with the world.
- 90) Choosing the right blend is a key part of **the teacher's** role.
- 91) (<http://www.edhelper.com/>) for _____. **(lesson plan)**
- 92) Join over **98,000** other subscribers and learn English with captioned news reports read at a slower speed.
- 93) PBSlearningmedia.org **3,000** free lesson plans.

ENG529 Finals

- 94)** With over **153,000** subscribers, Jennifer's best videos are her lessons on idioms (kitchen idioms, driving idioms, colour idioms).
- 95)** COCA (<http://corpus.byu.edu/coca/>) is a **freely** available online corpus of English, Created by **Mark Davies** at Brigham Young University.
- 96)** **BBC Learning English**: Another popular site, with over **64,000** followers.
- 97)** The corpus has over **450 million** words of text that covers spoken, fiction, popular magazines, newspapers, and academic text genres.
- 98)** Sociocultural theory (SCT) has its **origins** in the work of **Russian psychologist Lev Vygotsky** in the early part of the **20th** century.
- 99)** **Criterion** (<http://www.ets.org/criterion/>) is a web based **commercial writing evaluation** and **feedback tool** developed by **Educational Testing Service**.
- 100)** [WWW.duolingo.co](http://www.duolingo.co) is a great source to learn any **foreign** language.
- 101)** www.spiderscribe.net is used for mainly **Exam time mind maps**.
- 102)** (<http://lang-8.com/>) is a good example of a **social** networking site designed to encourage L2 communication.
- 103)** **Voyant Tools** is a web-based reading and analysis environment for **digital texts**.
- 104)** Blog (<http://www.blog.com>): It provides a **fully-featured** publishing platform for free.
- 105)** Canva is a Premium **graphic design** tool with info graphic templates.
- 106)** Criterion is a webbased commercial **writing** evaluation and feedback tool developed by _____. (**Educational Testing Service**)
- 107)** Annotate work directly in Blackboard or **Turnitin**.
- 108)** There are any providers of commercially available CALL systems that use **technology**, including Rosetta Stone Tell Me More.

ENG529 Finals

- 109)** Turnitin (was initially launched as an online plagiarism prevention service by **iParadigms**, LLC, in **1997**).
- 110)** Learn English Elementary by _____ (**British Council**)
- 111)** **Prezi**- cloud-based presentation software that can zoom in and out.
- 112)** Reading in the technological age is making a **tremendous** impact on how we see and interact with the world.
- 113)** The interaction approach (IA) grew out of **Long's Interaction Hypothesis**, which was first developed in the early **(1980s)**.
- 114)** **eComma**, an **open-source Web application** for **textual annotation** developed by the Center for Open Education Resources and Language Learning.
- 115)** Rosetta stone has also incorporated an ASR feature into its exercises, available in **25 languages**, and based on the TeLL me More algorithm originally developed by **Auralog.com**.
- 116)** Autonomous learning means that students take responsibility for their learning process, which should not be confused with self-instruction. **True**.
- 117)** Writing Pal or W-Pal is an **automated intelligent tutoring system (ITS)** developed by the Science of Learning and Educational Technology (**SoLET**) Lab at Arizona State University.
- 118)** **Self-assessment** means the process of having the learners critically reflect upon, record the progress of and perhaps suggest grades for, **their learning**.
- 119)** Human mental functioning is a **mediated** process.
- 120)** Criterion targets the writing instruction both in **K-12 programs** and higher education.
- 121)** Turnitin services in _____. **(1997)**
- 122)** The term **peer-assessment** refers to the process of having the learners critically reflect upon, and perhaps suggest grades for, the learning of **their peers**.
- 123)** Google Drive, an office suite developed by **Google Inc.**

ENG529 Finals

- 124)** **Animoto** Creates videos with photos, music and text.
- 125)** SCT posits that everything is learned on **two levels**—first on the social level (between people) and only later on the individual level.
- 126)** The concept of L2 fluency depends on a series of relative time measures such as the delivery speed and length of the utterances, the number of pauses, repetitions, lexical lapses, or discontinuities/ interruptions in spontaneous speech. **TRUE**
- 127)** Automated writing evaluation (AWE) systems have been developed to assist **both native speakers and L2 learners** to write more accurately.
- 128)** W-Pal provides **eight** animated learning modules
- 129)** Synchronous speaking tasks now do not form part of most hybrid or fully online language courses (Blake, 2011). **(False)** {Synchronous speaking tasks now form part of most hybrid or fully online language courses}
- 130)** Voki, created by **Oddcast**, allows users to create their **talking avatar, speaking different accents**.
- 131)** Information processing theories all share the belief that human cognitive architecture is made up of representations and **access**.
- 132)** Blended learning is a **transformational** force in education.
- 133)** VoiceThread can be used to conduct both tutorial CALL **for speaking or asynchronous CMC**.
- 134)** **Mental processing** is comprised of automatic (unconscious) operations and voluntary or controlled (conscious) operations.
- 135)** Supporters of the **metacognitive** view regard reading as a process of active meaning construction during which readers make use of both linguistic information from the external printed text (Langer et al. 1990) as well as their internal background knowledge.
- 136)** Social media **mining** can be done for prediction of election results, detecting hate crimes etc.

ENG529 Finals

- 137)** Learners can also compare their use of phrases to the phrases in the **corpus**.
- 138)** These sites provide unprecedented opportunities to experiment with **their language**.
- 139)** Teachers should strive for **two goals** when integrating technology.
- 140)** The first goal is to become a **computer-using teacher/**
- 141)** Teachers may be the producing materials to use in the classroom such as handouts, banners or **newsletters**.
- 142)** The second goal is to make the computer a **teaching partner** rather than an object of study.
- 143)** This definition embraces a wide range of student **activities** ranging from the use of a word processor to on-screen testing.
- 144)** Reading is regarded as a **psycholinguistic** guessing game.
- 145)** **TurningPoint** is a leading commercial student **response** system.
- 146)** Internet provides far-reaching and instantaneous interactivity; researchers and educators increasingly rely on **sociocultural** approachess.
- 147)** **e-marking** is the process by which staff provide marks and feedback to students online, which can include online annotations. **Correct**
- 148)** Continued training in the use of CALL applications to promote L2 **speaking**, or any other aspect of language proficiency, should be part of everyone's agenda.
- 149)** The increasing availability of electronic **corpora** and online technology has facilitated the creation of tools that aim to support L2 reading
- 150)** OER stands for _____. (**Open educational resource**)
- 151)** SCMC began to include the exchange of voice-over **IP sound (VoIP)**, giving speakers two channels in which to communicate. **True.**
- 152)** Structural perspectives are also referred to by researchers as the "**bottom-up**" (Chun and Plass 1997; Nunan 1991) or the "**outside-in**" (McCarthy 1999) views.

ENG529 Finals

- 153)** How many best video sites for English? **(100)**
- 154)** By using technology in the classroom, both teachers and students can develop skills essential for the **21st century**.
- 155)** Digital environments add visual and **auditory features** to a text and require the reader to integrate the information afforded by these modes into the processes of comprehension..
- 156)** Drawing on the work of Chapelle (2003) among others, they divide help options **into four** categories: **operational, regulatory, compensatory, and explanatory**.
- 157)** Gorjian, Hayati, and Pourkhoni (2013) have extolled the virtues of having students study L2 pronunciation and intonation using the **PRAAT** acoustic analysis software.
- 158)** **Present. Me** A video presenting platform
- 159)** **Blabberize** Animates any image with a moving mouth and audio.
- 160)** **wordle.net, wordclouds.com** creates beautiful word clouds.
- 161)** **Infogram** Creates interactive info graphics.
- 162)** StudyBlue is an online tool for making **flashcards** with video and audio.
- 163)** Fundamental to all modern language instruction—face-to-face in the classroom or virtually through CALL is **Sociocultural Theory**.
- 164)** Storybird is a collaborative **storytelling** tool. Students can create short art inspired stories.
- 165)** Google, can train **chatbot** without any coding skill, even students of humanities have modified and built new chatbots from scratch.
- 166)** One free tool for video annotation is **ANVILL**, which allows the importation of data from a variety of sources, including phonetics tools, such as the widely used **PRAAT**.
- 167)** **Animoto** Creates videos with photos, music and text.
- 168)** **Piktochart** Creates quick and impressive infographics

ENG529 Finals

- 169)** Learning **analytics** is defined as the educational instruments designed to collect, measure, and analyze students' learning data with the goal of better understanding learning processes and predicting learning outcomes in educational contexts.
- 170)** Dialogflow, a platform supported by **Google**.
- 171)** **Google Books NGram Viewer** : Analyzes historical word occurrence, usage and changes over time and allows users to download data for more intensive research.
- 172)** _____ Theories all share the belief that human cognitive architecture is made up of representations and access. **(Information processing)**
- 173)** **Culturomics - Google Ngrams Addon** : An add-on for Google Ngrams to download data sets.
- 174)** The three-year observation made by **Stockwell** (2010) of EFL students in **Japan**.
- 175)** **Time Magazine Corpus** : Offers access to American Mainstream Cultural Text Analysis via the complete text of the Time Magazine Archive.
- 176)** **SCMC** can help improve learners' L2 oral proficiency by developing the same cognitive mechanisms that underlie spontaneous conversational speech.
- 177)** _____ are considered one of the original English teachers on YouTube.
(MisterDuncan)
- 178)** Self-developed courseware is usually designed by **collaborative teams** to create language learning tools to suit a specific group of learners. **Correct**
- 179)** **Wordle** is a ____ word cloud generator with extensive shape, color and font options.
(robust)
- 180)** Using eye fixation data as a measure of "**noticing events**" learners were found to attend about **60%** of the intensive recasts they received by a **native speaker** interlocutor.
- 181)** **Voyant Tools** is a web-based reading and **analysis** environment for digital texts.
- 182)** Although SLA approaches of the different stages provide distinct implications for **CALL**.

ENG529 Finals

- 183)** Mapping and Timeline Tool for Omeka Projects. **(Neatline)**
- 184)** Simultaneously, many **Web 2.0 tools** and technologies are being designed and used for all levels of L2 learners to build certain skills for effective L2 reading.
- 185)** **Instant and detailed** feedback may (or may not) be enabled.
- 186)** Fundamental to all modern language instruction—face-to-face in the classroom or virtually through CALL is _____. **(Vygotsky)**
- 187)** Now, technology is used for the distribution of text as well as _____. **(idea)**
- 188)** Vygotsky asserted that language, **first** or second, is always learned and used in a social setting.
- 189)** The use of language for **communication**, rather than for practice alone, is a core goal of most language instruction.
- 190)** One factor encouraging motivation in blended learning is **reliance** on discovery learning and self-directed learning.
- 191)** PBS learning media _____ free lesson plan. **3,000**
- 192)** Web 2.0 applications like Google Docs provide the tools for **collaborative writing**.
- 193)** Text-to-Speech (TTS) is the process of synthesizing natural-sounding speech from text via **computer** programs.
- 194)** Students undertake online tests many times to assess and **re-assess** their knowledge
- 195)** With countless online resources, technology can help improve **teaching**.
- 196)** Which of the following is developed by eComma? **(Open Education Resources and Language Learning)**
- 197)** **Sophisticated** reporting, allowing you to **refine** the exercise or identify areas in which more instruction is needed.
- 198)** Cognitive science is also concerned with functional and **neurobiological** descriptions of the learning processes.

ENG529 Finals

- 199)** Reading instruction is increasingly informed by **sociocultural** and learner-centered constructive perspectives.
- 200)** Digital books or e-books are an **effective** technological tool for curriculum.
- 201)** three general cognitive science principles (i.e., the dual-channel assumption, the **limited capacity assumption**, and the active processing assumption)
- 202)** Curriculum integration with the use of **technology** involves the infusion of technology as a tool to enhance learning in a content area or multidisciplinary setting.
- 203)** Writing Pal is developed by _____. **(SoLET)**
- 204)** Sociocultural Theory was developed in _____. **(1962)**
- 205)** **Cognitive science** is also concerned with functional and neurobiological descriptions of the learning processes.
- 206)** The success of any blended learning course is **largely** in the blend.
- 207)** The most widely used variant of technology in language learning is **CALL (computer assisted language learning)**.
- 208)** Chapelle (2003) links technology to **SLA theories** by showing how several theories can be adapted to explore the role of the computer as a stand-in for a human interlocutor.
- 209)** Corpus-based **pedagogies**, data-driven learning, are based on the idea that students need to have access to examples of language
- 210)** Quizzes are a tool of _____. **(Exam Time)**
- 211)** Different forms of technology can be used to experiment with and decide what works best for students in terms of **retaining** their knowledge.
- 212)** Turnitin is a _____ tool. **(Originated and checking)**
- 213)** From the SCT perspective of SLA, language learning is facilitated by **social interaction**.
- 214)** Photos to teach is a website of _____. **(elptics)**

ENG529 Finals

- 215)** Hampel (2009) identifies a key challenge in online distance synchronous settings as addressing the tendency for tutors to assume a more directive or **teaching-centered** approach than is congruent with the espoused benefits of learner-centered language teaching.
- 216)** Listening is a key part of teaching and that listening happens best in the **classroom** environment.
- 217)** Learning with the help of technology helps to develop _____. **(Higher Order Thinking skills)**
- 218)** Lyceum defines **affordances** as possibilities as well as **limitations**” having “an impact on its [Lyceum’s] use”.
- 219)** In **December 2004**, Google partnered with prominent libraries in launching the Google Print Library Project
- 220)** The term blended learning refers to every time a teacher’s mixes differences _____ for classroom interaction. **(media)**
- 221)** In distance language learning teachers and learners are separated _____. **(physically)**
- 222)** Fill in an online feedback form (rubric), available in both Blackboard and **Turnitin**.
- 223)** In distance teaching-learning processes, _____ mediates. **(technology)**
- 224)** **In 1978, Roy Trubshaw** created a new game that was patterned on one of the variations of Zork that he called MUD. It first ran on the network **of Essex University** only, but in **1987**.
- 225)** In distance language education communication has become a _____ process. **(social)**
- 226)** Language instructors can use it in class for essay planning or a **peer-feedback activity**, or out-of-**class** for students to submit and revise based on the feedback.
- 227)** Roy Trubshaw created a new game that was patterned on one of the variations of Zork that he called **(MUD)**

ENG529 Finals

228) Teachers worldwide are using (more or less successfully) the **Communicative Approach** to teach English.

229) The creation of the first text-based computer games, beginning with **Colossal Cave Adventure** (CCA) by Will Crowther in 1975–1976.

230) VWs have almost entirely been published after **2000**.

231) The evolution of MUDs led to the creation of MOOs (MUDs, Object-Oriented), with the first created by **Stephen White in 1990**.

232) Virtual text-based environment was based on the **real-life** Mammoth Cave system in Kentucky.

Subjective

Three types of Classroom?

- ✚ Traditional Classroom
- ✚ Virtual (Online) Classroom
- ✚ Blended (Hybrid) Classroom
- ✚ Technology-Changed (Technology-Enhanced) English Classroom

Why are consider of CMC in distance language teaching?

CMC is important in distance language teaching not only as a learning tool but as a gateway to target language communities. CMC is important in distance language teaching because it:

- 1)** Enables communication between teachers and students even when they are in different locations.
- 2)** Provides real-time and delayed interaction through chat, email, discussion forums, and video calls.
- 3)** Improves language skills, especially reading, writing, listening, and speaking.
- 4)** Encourages collaboration through group discussions and peer feedback.
- 5)** Offers flexibility, allowing learners to study anytime and from anywhere.

Define MUD? OR MUD gaming program?

MUD (Multi-User Dungeon) is a text-based **online gaming program** where multiple players connect at the same time to explore virtual worlds, complete tasks, and communicate with one another using typed commands. It first ran on the network of Essex University only. The evolution of MUDs led to the creation of MOOs (MUDs, Object-Oriented), with the first created by Stephen White in 1990.

How technology development student autonomy? OR How does a technology-embedded classroom develop student autonomy?

Technology develops student autonomy by:

- ✚ Allowing students to learn at their own pace.
- ✚ Giving access to online learning resources anytime.
- ✚ Encouraging independent research.
- ✚ Helping students monitor their own progress.
- ✚ Increasing responsibility for their own learning.
- ✚ encourages students to solve problems
- ✚ also increases confidence, responsibility, and self-directed learning skills.

Define Web2.0 or explain any two types?

Web 2.0 is the **second generation** of the World Wide Web that allows users to create, share, update, and interact with content collaboratively over the internet. In distance language learning, they help learners communicate and work together online.

1) Blogs

- ✚ Online journals or websites where users publish articles and readers can comment.
- ✚ Example: WordPress, Blogger.

2) Wikis

- ✚ Websites that allow multiple users to create and edit content collaboratively.
- ✚ Example: Wikipedia.

3) Social Networking Sites

- ✚ Platforms where users communicate, share information, photos, and videos.
- ✚ Example: Facebook, Instagram, X (Twitter).

What are Goals of technology?

The main goals are:

- 1) Improve teaching and learning.
- 2) Increase student engagement and motivation.
- 3) Support personalized learning.

ENG529 Finals

- 4) Develop digital literacy skills.
- 5) Promote collaboration and communication.
- 6) Prepare students for future careers.
- 7) Improve learning outcomes.

Which technologies are used for language learning? OR Two technologies you use for Language learning?

- ❖ LMS
- ❖ Video conferencing tools
- ❖ Language learning apps
- ❖ CMC tools (email/chat/forums)
- ❖ Web 2.0 tools (blogs, wikis, social media)
- ❖ Online dictionaries

Three Video conferencing tools?

- 1) Adobe Connect
- 2) Blackboard Collaborate
- 3) Breeze
- 4) FlashMeeting
- 5) NetMeeting

True/False

- 1) Avatars are virtual/world representations of the real people who control them. **True**
- 2) In virtual worlds, only a few users can be online at the same time. **False** (Correct: In most virtual worlds, many users (sometimes hundreds of thousands) can be online at the same time)
- 3) Most virtual worlds allow users to customize their avatar's appearance. **False** (Correct: In many—though not all—virtual worlds, users can customize/appear their avatar's appearance)
- 4) Users cannot change their avatar's gender or clothing in virtual worlds. **False** (Correct: In many virtual worlds, users can change their avatar's gender, clothing, appearance, and even species)
- 5) Every virtual world gives users complete control over their environment. **False** (Correct: Many, but not all, virtual worlds allow users some control over their environment)
- 6) Users in many virtual worlds can even choose their avatar's species. **True**

Write any 3 reasons for using peer assessment?

- ❖ Develops critical thinking.
- ❖ Encourages collaborative learning.
- ❖ Improves feedback and learning.
- ❖ Promotes responsibility and self-reflection.

ENG529 Finals

- ❖ Helps students identify strengths and weaknesses.

Fill in the blanks

- ✚ Virtual worlds have grown from their _____ infancy of the 1970s to the _____ immersive environments of today. **text-based, 3D**
- ✚ These environments and their associated technologies continue to advance, they promise to change the ways that we understand both human-to-human _____ and what it means to be a student of language. **Interaction**
- ✚ Avatars are the in-_____ representations of _____ people who control them. **World, real**

Five effective technological tools for integrating curriculum?

- 1) Digital Books
- 2) Classroom Clickers
- 3) Interactive Whiteboards
- 4) Tablets
- 5) E-instruction and Distance Learning
- 6) Learning Management Systems (LMS)
- 7) Multimedia Tools

Virtual world judgment levels? OR Virtual world's levels?

- i. Age level
- ii. Game level (low, mid, or high)
- iii. Socialization level (low, mid, or high)
- iv. Education focus (low, mid, or high)
- v. Technical requirements (low, mid, or high)

How Does the Socialization Level Differ Among Virtual Worlds?

The socialization level differs because each virtual world provides a different amount of interaction among users.

- Some virtual worlds have **high socialization**, where users can chat, make friends, join groups, attend events, and work together.
- Others have **low socialization**, where users mainly play alone or have only limited interaction.

Virtual world True/False

See Lesson 5

Fill in the blanks from virtual world

See Lesson 5

What are Virtual worlds and its characteristics?

Virtual Worlds (VWs) are virtual environments that exist primarily for socializing, where people interact and build relationships through online spaces.

Characteristics:

- 1) Online 3D environment
- 2) Avatars
- 3) Real-time interactivity
- 4) 24-hour accessibility
- 5) Persistence
- 6) Social space
- 7) Large numbers of users online simultaneously

What are the Examples of Synchronous Technology? OR Give three examples of synchronous tools for distance language learning.

Synchronous = Learning happens at the same time (real-time).

Examples:

- ✚ Zoom
- ✚ Google Meet
- ✚ Microsoft Teams
- ✚ Skype
- ✚ Live webinars
- ✚ Live chat
- ✚ Virtual classrooms

E- Assessment tools? And its examples.....

E-Assessment tools are digital tools used to create, deliver, and grade tests or assignments online.

Examples:

- Google Forms
- Kahoot!
- Quizizz
- Moodle Quiz
- Microsoft Forms

True/false from CMC.....

ENG529 Finals

- 1) Computer-Mediated Communication (CMC) opened new opportunities in distance language teaching. **T**
- 2) CMC limits students to pre-determined curricula and materials. **False** (Correct: CMC frees students from the limitations of pre-determined curricula and materials.)
- 3) CMC allows learners to become more active participants in their learning. **T**
- 4) Students can ask questions and participate in collaborative learning through CMC. **T**
- 5) CMC increases learners' isolation in distance education. **False** (Correct: CMC reduces isolation and helps learners connect with peers.)
- 6) CMC helps learners develop a sense of affiliation and community. **T**
- 7) According to Blake (2005), CMC is the essential "glue" that holds distance language learners together. **T**
- 8) CMC decreases learners' motivation. **False** (Correct: CMC helps maintain learners' motivation.)
- 9) CMC allows learners to use the language they have learned. **T**
- 10) White (2003) distinguished between static and fluid course content. **T**
- 11) CMC is available only in text format. **False** (Correct: CMC can be synchronous or asynchronous in text, oral, and visual formats.)
- 12) Chat has played an important role in providing interaction in distance language courses. **T**
- 13) Asynchronous forums were among the earliest forms of CMC in distance language teaching. **T**
- 14) Email and chat can be used together in online distance language courses. **T**
- 15) Time zones are an important consideration in online distance learning. **T**
- 16) Vicarious interaction refers to learners who prefer to read rather than contribute to online discussions. **T**

ENG529 Finals

17) Social presence is not important in online learning. **False** (**Correct:** Social presence is important in online learning.)

18) CMC should be integrated into the course curriculum and assessment. **T**

19) Both synchronous and asynchronous CMC support distance language learning. **T**

20) CMC is only a learning tool and not a gateway to target language communities. **False**
(**Correct:** CMC is both a learning tool and a gateway to target language)

How does technology develop learners order thinking?

Technology develops higher-order thinking by:

- a) Encouraging critical thinking through problem-solving activities.
- b) Improving creativity using digital tools (videos, presentations, and blogs).
- c) Promoting analysis and evaluation of information from different sources.
- d) Supporting decision-making through simulations and virtual learning.
- e) Encouraging collaboration and discussion with others online.

Benefits of technology used in classroom? OR Thee uses of technology in classroom?

- 1) Makes learning more interactive and engaging.
- 2) Increases student motivation.
- 3) Improves communication between teachers and students.
- 4) Supports collaboration through online tools.
- 5) Provides easy access to information and learning materials.
- 6) Saves time with digital resources.
- 7) Helps students learn at their own pace.
- 8) Improves academic performance and achievement.

Name tools of distance learning? OR Name four technologies of distance learning?

- CMC-based Environments
- Audio graphic and Videoconferencing Environments
- Learning Management Systems (LMS)
- Telecollaboration
- Web 2.0 Tools
- LMS

What are advantages and disadvantages of the application of computer technology for teachers and learners as per Bransford, Brown, and Cocking (2000)?

Advantages:

ENG529 Finals

- 1) Increases student engagement and motivation.
- 2) Supports active and interactive learning.
- 3) Provides quick access to information and learning resources.
- 4) Allows personalized/self-paced learning.
- 5) Improves communication and collaboration between teachers and students.
- 6) Gives immediate feedback through digital tools.
- 7) Makes teaching and assessment more efficient.

Disadvantages:

- i. Technical problems (internet/computer failure).
- ii. High cost of devices and maintenance.
- iii. Teachers require training to use technology effectively.
- iv. Students may become distracted by games or social media.
- v. Unequal access to technology (digital divide).
- vi. Overdependence on technology may reduce critical thinking or face-to-face interaction.

What is CCA program?

Colossal Cave Adventure (CCA) is an early **text-based computer game** in which players explore a cave, solve puzzles, and make decisions by typing commands such as "go north," "take lamp," or "open door." It is created in **1976** by Will Crowther and later expanded by Don Woods.

What are the key features of interactive whiteboard?

- ✚ Touch-sensitive interactive screen.
- ✚ Displays multimedia (images, audio, video).
- ✚ Allows writing, drawing, and annotation.
- ✚ Saves and shares lesson notes.
- ✚ Supports internet access and educational software.

True false from VWs

- 1) VWs include only playing and do not include educational applications. **False (Correct:** Virtual Worlds (VWs) are used for both entertainment and educational applications.)
- 2) VWs have limited access and do not available 24/7. **False (Correct:** Virtual Worlds are available 24/7 and can be accessed from anywhere with an internet connection)
- 3) Users can not make any changings in their characters and environments. **False (Correct:** Users can customize their avatars (characters) and, in many virtual worlds, modify the environment.)

Usage of technology improves language teaching and learning process? 4 example discuss

1) Multimedia Learning:

- ✓ Teachers use videos, audio, images, and animations to explain concepts.
- ✓ It improves students' listening, speaking, and understanding skills.

2) Interactive Classroom Tools:

- ✚ Interactive whiteboards quizzes (Kahoot), and educational games make lessons interesting.
- ✚ They increase student participation and motivation.

3) Online Communication:

- ❖ Tools like Zoom, Google Meet, and discussion forums allow students to communicate with teachers and classmates.
- ❖ They improve speaking, listening, and collaboration skills.

4) Language Learning Apps

- Apps like Duolingo and Babbel help learners practice vocabulary, grammar, and pronunciation anytime.
- They provide instant feedback and self-paced learning.

Computer technology for teacher and learners? OR Three benefits of technology?

Computer technology benefits both teachers and learners by making education easier, faster, and more effective.

- 1)** Easy access to information
- 2)** Better communication
- 3)** Interactive learning
- 4)** Personalized learning
- 5)** Assessment and feedback

What is Student Response System? And its benefits.

A Student Response System (SRS) is a technology that allows students to answer questions electronically during class using clickers, smartphones, tablets, or computers.

Benefits:

- ✚ Instant feedback.
- ✚ Increases classroom participation.
- ✚ Measures student understanding.
- ✚ Makes learning interactive.

ENG529 Finals

Three name categories to use technology for Learning?

- ❖ Learning from technology
- ❖ Learning with technology
- ❖ Learning by technology
- ❖ Learning about technology

What is Text based CMC?

Text-based CMC is communication that takes place through written text using computers or the internet.

Examples:

- Email
- SMS/Text messages
- Chat rooms
- WhatsApp messages
- Discussion forums

What are the characteristics of blended learning?

Blended learning combines face-to-face classroom teaching with online learning.

Characteristic:

- 1) Combines traditional and online learning.
- 2) Offers flexibility in time and place.
- 3) Encourages active student participation.
- 4) Uses digital tools and multimedia resources.
- 5) Supports self-paced and personalized learning.

Write three classroom types in which teacher give lectures to student by using blackboard and whiteboard?

- ❖ Traditional classroom
- ❖ Teacher-centered classroom
- ❖ Face-to-face classroom
- ❖ Conventional classroom

True / False.....

- ✚ Digital books are hard to carry as compared to printed books. **False** (Correct: Digital books are easier to carry and more portable than printed books.)

ENG529 Finals

- ✚ Technology integration prepares students for future digital careers. **True**
- ✚ Curriculum design focuses only on improving learning. **False** (Correct: Curriculum design improves student learning and also aligns learning goals across different educational stages.)

True false from audiographic and videoconferencing.....

- 1) Videoconferencing was originally designed for social communication. **True**
- 2) Videoconferencing was created only for language teaching. **False** (Correct: It was originally designed for social communication and later used for pedagogical purposes.)
- 3) Audiographic and videoconferencing are important components of distance language courses. **T**
- 4) Videoconferencing provides face-to-face communication at a distance. **T**
- 5) Videoconferencing reduces opportunities for interaction and collaboration. **False** (Correct: It increases interaction and collaboration.)
- 6) Videoconferencing complements written online environments (both synchronous and asynchronous). **T**
- 7) Only asynchronous communication is supported by videoconferencing. **False** (Correct: It complements both synchronous and asynchronous written environments.)
- 8) Skype is an example of a technology used for pedagogical purposes. **T**
- 9) Early studies showed that videoconferencing improved learners' motivation and confidence. **T**
- 10) Early studies found no motivational benefits of videoconferencing. **False** (Correct: Early studies found that videoconferencing improved learners' motivation and confidence.)
- 11) Effective task design should match the affordances of the technology. **T**
- 12) Participants in online language learning need multimodal literacy. **T**
- 13) Task design is not important in videoconferencing. **False** (Correct: Task design is important and should be well supported by the affordances of the technology.)

ENG529 Finals

- 14)** Multimodal literacy means using only one communication mode at a time. **False** (Correct: It involves understanding and using more than one mode together.)
- 15)** Teachers need socioaffective, pedagogical, and multimedia skills for synchronous online teaching. **T**
- 16)** Guichon (2009) emphasized the importance of socioaffective skills for teachers. **T**
- 17)** Only technical skills are required for synchronous distance language teaching. **False** (Correct: Teachers need socioaffective, pedagogical, and multimedia skills for synchronous distance language teaching.)
- 18)** Teachers in synchronous online teaching often manage several tasks and channels simultaneously. **T**
- 19)** Managing multiple tasks at the same time is easy for all online teachers. **False** (Correct: Teachers face cognitive limitations while handling multiple tasks and channels.)
- 20)** Planning online sessions and keeping track of learner language help teachers provide better feedback. **T**
- 21)** Videoconferencing combines spoken language, written language, and visual/graphic modes. **T**
- 22)** Videoconferencing uses only spoken language. **False** (Correct: Videoconferencing combines spoken language, written language, and graphic/visual modes.)
- 23)** Making meaning in multimodal virtual learning spaces is a challenge for teachers and learners. **T**
- 24)** The telephone, Skype, and blogs have also been adapted for educational purposes. **T**

What is Human-Computer interaction (HCI) and Human-human interaction (HHI) also its example?

Human-Computer Interaction (HCI):

HCI is the interaction between a **person and a computer/device** through interfaces like screens, keyboards, touch, voice, or gestures.

Example: 01) a learner independently using multimedia or a web-based language learning program such as an e-tutor for learning German. **02)** Using a smartphone

ENG529 Finals

Human-Human Interaction (HHI):

(HHI) refers to the communication and exchange of information between **two or more human beings** using language, gestures, facial expressions, or other social behaviors.

Example: 01) Using a synchronous chat program to complete some language learning tasks with another learner. **02)** Face-to-face conversation

What are types of e-assessment?

- + multiple-choice
- + online/electronic submission
- + a peer-assessment exercise

Different Forms of E-assessment?

- a)** online tests, quizzes, and exams
- b)** e-submission and e-marking
- c)** self- and peer-assessment
- d)** student response systems

TWO main learning environments in blended learning?

- ❖ (Synchronous) face to face classroom environment
- ❖ (asynchronous): online learning environment

Which university develop COCA corpus?

Corpus of contemporary English (COCA) is a freely available online corpus of English created by Mark Davies at Brigham Young University. The corpus has over **450 million** words of text that covers spoken, fiction, popular magazines, newspapers, and academic text genres.

What is CAPT and its usage in language learning?

CAPT stands for Computer-Assisted Pronunciation Training. It refers to the use of computer technology and software tools to help language learners improve their pronunciation and speaking skills.

Uses in language learning:

- 1) CAPT helps learners improve their pronunciation by providing computer-based practice.
- 2) It gives instant feedback on learners' pronunciation mistakes.
- 3) It helps students develop better speaking skills and fluency.
- 4) It supports learners in improving their accent and speech clarity.
- 5) It allows students to practice pronunciation independently anytime and anywhere.

ENG529 Finals

- 6) It improves listening skills by helping learners identify different sounds.
- 7) It increases learners' confidence in speaking a foreign language.

Write approaches for Providing Feedback in E-assessment?

- a) Provide digital feedback files e.g. standard feedback forms in Word format.
- b) Fill in an online feedback form (rubric), available in both Blackboard and Turnitin
- c) Create audio or video/screencast feedback, and make this available to students via Blackboard.
- d) Annotate work directly in Blackboard or Turnitin.

Functions of Juxta, Wordle, and Walrus?

- ❖ **Juxta:** Compares different versions of texts and highlights differences.
- ❖ **Wordle:** Generates word clouds to show the most frequent words.
- ❖ **Walrus:** Visualizes and analyzes textual data to identify patterns and relationships.

What challenges that evolving technologies pose to educator's in teaching L2 reading?

- 1) Keeping up with rapidly changing technologies
- 2) Selecting appropriate technologies for instruction
- 3) Lack of connection between technology and pedagogy
- 4) Complexity of new technologies
- 5) Technologies becoming outdated quickly
- 6) Teachers' knowledge becoming obsolete
- 7) Need for continuous teacher learning and training

What is CoDs? And Enlist categories of CoDs framework?

CoDe framework is a framework developed by Cardenas-Claros and Gruba (2013) that explains how to **conceptualize (Co) and designing (De)** help options to support second language (L2) listening through technology.

Categories:

- 1) **Operational Help** – Helps learners understand how to use technology and software tools.
- 2) **Regulatory Help** – Guides learners before and after listening tasks by providing strategies and reflection support.
- 3) **Compensatory Help** – Makes listening input easier through subtitles, transcripts, playback controls, and other digital features.
- 4) **Explanatory Help** – Provides extra information through definitions, grammar explanations, cultural notes, and electronic dictionaries.

What are the functions of Turnitin?

ENG529 Finals

- 1)** Plagiarism detection and prevention
- 2)** Online automated grading
- 3)** Peer review support
- 4)** Grammar checking and assessment
- 5)** Providing teacher feedback through comments and rubrics
- 6)** Voice commenting tool for feedback
- 7)** Integration with Learning Management Systems (LMS)
- 8)** Providing online tutorials and training for teachers and students

Write about Google Books & NGram viewers?

Analyzes historical word occurrence, usage and changes over time and allows users to download data for more intensive research. Google Books is useful for finding authentic language examples, vocabulary usage, and historical changes in language.

Five Important Considerations before Adopting a Blended Approach? OR What considerations teacher should keep in mind while blended learning?

Easy Trick: TRCMP

- 1)** Teacher Training
- 2)** Choosing an Appropriate Blend
- 3)** Costs
- 4)** Attrition and Motivation
- 5)** Peer Support

What are the technologies used in teaching and learning L2 reading?

- (1)** Self-developed course and commercial courseware
- (2)** online activities with individual tools and mobile devices
- (3)** CMC

Technologies used in teaching and learning L2 writing? OR Three major categories of technology?

-  Web 2.0 Applications
-  automated writing evaluation (AWE) systems
-  corpus-based tools

Skehan's four salient features of best tasks?

Skehan (2003) suggests that the best tasks are those that

- (1)** are carefully structured with both a pre-planning and a post-task phase
- (2)** are organized around familiar information
- (3)** require analysis or justification

ENG529 Finals

(4) are interactive or dialogic in nature by virtue of asking the participants to work together.

What are the outcomes of integrating technology into the curriculum?

- a)** More engaged students
- b)** Simplified materials
- c)** Increased motivation and better-developed collaboration skills
- d)** Overall increased student achievement due to increased involvement and learning at their own pace

Use of clickers in classroom?

Clickers are handheld electronic devices (student response systems) that allow students to answer questions during class.

Uses:

- ✚ Instant feedback from students.
- ✚ Increase student participation and engagement.
- ✚ Conduct quizzes and polls during lectures.
- ✚ Check students' understanding of the lesson immediately.
- ✚ Promote active learning and classroom interaction.

Writing Pal?

Writing Pal or W-Pal is an automated intelligent tutoring system (ITS) that helps students improve their **writing skills** by providing personalized guidance and feedback. It is developed by the Science of Learning and Educational Technology (SoLET) Lab at Arizona State University. W- Page 120 of 191 Pal's intended users are native English-speaking students in high schools. It also promotes self-directed learning and enhances the overall quality of students' writing. It guides students through the writing process, including planning, drafting, revising, and editing.
