13 Edtech Tools Every Teacher and Student Should Know About, 7 ways to Use Technology To Improve Your Writing Skill

13 Edtech Tools Every Teacher and Student Should Know About

Today the importance of educational technology goes beyond the use of instructional aids because of the ubiquity and usefulness of technology in everyday life. Now more than ever, there is a need to for learners to be proficient at using technology in order to adapt to this rapidly digitizing world.

Students have to learn how to properly use technology at an early age for it to be eloquent in its language. Educators and the school are in prime position to teach young learners this. Teachers must also learn to fully integrate technology in their pedagogy and use it not just as visual aids but also as tools to engage learners.

From interactive whiteboards to educational applications, here are 13 edtech tools that every teacher and student to aid and enhance teaching and learning.

Question # 2 of 10 (Start time: 07:58:03 PM, 17 January 2024)

Ongoing professional development helps to accelerate the learning curve for the_____to focus on using these to

ngoing professional

and evaluate software; that computer and software training was inconveniently timed or was too generic and not specific to the needs of teachers; and that most teachers were using the technology without fundamentally changing their instructional strategies to take full advantage of it. In addition, the most recent federal survey of teachers' use of technology found that although many use it for record-keeping, relatively few use it for instruction. Generally speaking, teachers in schools serving large numbers of low-income students use technology less for instruction than do teachers in schools serving fewer such students, except to teach or provide practice in basic skills. Most important, two-thirds of teachers reported little to no technology-related professional development in the preceding year. For teachers to see e-reading technology as useful, they need help adjusting to and capitalizing on the changing technological landscape. They need not only to see the potential benefits for themselves and their students, but also to be able to build the knowledge and skills to realize these benefits and to have opportunities to collaborate and innovate with colleagues to develop and integrate best practices. The extent to which an individual teacher uses technology depends on how long it takes to learn to use it, how convenient it is to interact with it, and how well the technology interacts with other devices. If technology is to be used in the schools, it must offer user-friendly and intuitive interfaces, portability of content between devices, and timely, skilled response to technical challenges both by developers and by schools. Ongoing professional development, including training and testing of new technology as it becomes available, helps accelerate the learning curve for teachers, so that they can focus on using these tools to improve instruction. Evidence on the best approaches to and efficacy of professional development in support of e-reading technology use, however, is in short supply. Teachers most commonly report that what prepared them to make effective use of technology for instruction was not training, but independent learning. Indeed, some have argued for a coaching or mentoring approach to professional development in using educational technology effectively, with development focused on problems of practice.⁶⁶ But, again, evidence about how effective coaching models are in professional development of that sort is minimal, although some research does suggest that coaching models in literacy instruction more broadly improve literacy outcomes for students.

5 Technology Tools Used for Developing Reading Skills

Technology is helping teachers do more and more every day, including building a love of reading

Question # 4 of 10 (Start time: 07:59:44 PM, 17 January 2024)

In the _____period of history, the main focus of foreign language learning was on grammar.

Select the correct option

☐	Medieval
☐	Renaissance
☐	Classical
☐	Middle ages

Correct

was on grammar

Reading skill refers to the ability to understand written text. When students comprehend or understand written text, and combine their understanding with prior knowledge, they are able to perform the following three reading-comprehension skills.

1. Identify simple facts presented in written text (literal comprehension)

2. Make judgments about the written text's content (evaluative comprehension)

3. Connect the text to other written passages and situations (inferential comprehension)

The development of these reading skills is vital to learner's development, and a sheer volume of studies has demonstrated a link between competency in reading and overall attainment in school (literacy attainment and other outcomes).

Theories and Approaches to Reading Skills

The division of language skills into speaking, listening, reading and writing has been known for centuries. What has been changing throughout centuries, however, was the emphasis on particular language skill in a particular period. During the Middle Ages, for example, speaking was of paramount importance, as monks needed to have a good command of spoken language, Latin at that time, to conduct masses. After the classical period, Renaissance, the main focus of foreign language learning was on grammar. With the development of printing in the middle of the 15th century and the dissemination of books on which both teachers and students had to rely, the need to develop reading and writing skills came to light. Though throughout the centuries a lot of emphasis was put on the development of reading skills in schools, nowadays it is unfortunately neglected, which leads to hindering the development of other language skills, writing particularly. H.E. Palmer was probably the first person to distinguish, in 1964, between the two types of reading: Reading may be intensive or extensive. Until the beginning of the twentieth century not many teachers applied, or even heard of, silent reading. Learners used to read aloud to the teacher and the reading behaviour the teacher could observe might be helpful in improving strategies for teaching L2 reading (Wallace, 1987:165). A similar division is also suggested by David Harding who writes that "The natural order in which language activities should be taught is:

☐	read-to-text

Correct

Click to Save Answer & M

human or computer

Today educators are in the precarious position of having to respond to the many new e-reading options for curriculum and teaching practices with virtually no empirical guidance on how to do so in a way that supports learning. Most research as yet is small-scale in nature, focusing on feasibility and efficacy in tightly controlled contexts rather than on wide-scale use. We review a variety of small scale research studies on e-reading technology as a tool for improving literacy outcomes, and then look at two large-scale studies and offer a final cautionary note about the overall lack of a consistent or large-scale body of evidence on e-reading technology. Tools for Compensation and Instruction in Basic Skills E-reading technology has shown promise in developing early reading skills and in giving readers with visual impairments or language based disabilities access to texts. One of its most widely used features is text-to-speech, in which either a human or computer generated voice reads digital text aloud for users. Sometimes synchronized highlighting of the text draws readers' attention to the word or words being read aloud. The research is relatively robust on the benefits of text-to-speech for readers with impairments that might otherwise preclude equal access to text and for young readers still acquiring basic skills like phonological awareness or decoding. Also promising are recent innovations in text-to-speech involving the translation of visual information other than text, such as pictures or tables. Ofra Korat has been conducting experimental studies with e-reading tools that can build both procedural skills (such as phonological awareness and word reading) and conceptual skills and knowledge (such as vocabulary) that foster learning to read. She has found that presenting children's books as digital text with dictionaries or activities can lead to improvements in phonological awareness, word reading skills, and vocabulary knowledge for kindergarten and first-grade readers. Other studies

reading programs can improve oral reading fluency skills in second- through fifth-grade readers. Finally, a synthesis of the research on e-books, defined as digital texts that mimicked print texts (for example, having pages that turn), has found small positive effects for prekindergarten to fifth-grade students' comprehension-related outcomes.

Tools for Supporting Strategic Readers

Innovative technology applications also show promise for supporting the development of advanced reading skills that students need to master discipline-specific knowledge areas and that may be particularly challenging for students from low socioeconomic backgrounds and non-English-speaking homes. Self-paced tutorials have led to gains in self-questioning, error detection, inference, summarization, and concept-mapping skills and strategies to enhance readers' use of reading strategies and comprehension of texts. Two online interventions, Computer Assisted Strategy Teaching and Learning Environment and Improving Comprehension Online, have both shown positive effects in these skill areas in quasi-experimental studies. Sixth graders using Computer Assisted Strategy Teaching and Learning Environment outperform controls in application of the targeted strategies. Benefits can depend on genre, with treatment students outperforming on expository versus narrative texts or vice versa depending on the strategy under

multitude of

**Web-Based Exercises**

The Web is so rich in potential learning materials that traditional instructors would be depriving their students of valuable educational resources if they ignored it altogether. No matter what subject you teach, be it molecular biology or cultural anthropology, a multitude of sites can provide you and your students with information, simulations, or resources to consider, critique, analyze, or discuss.

Aside from visiting informational web sites, students can participate in global science experiments, perform experiments in online labs, collaborate and communicate with students from another school, state, or nation, analyze and critique articles published online and post reactions to them in a discussion board, and meet and discuss relevant issues with a "guest host" in a discussion board or chat room.

Here are some pointers for incorporating Web resources into your face-to-face on-site class:

ENG517 - Computer Assisted Language Learning (Quiz No 4)

Question # 8 of 10 (Start time: 09:09:15 AM, 18 January 2024)

Students can be informed through _____ emails for continuing online activities in blended courses.

Select the correct option

☐	annually
☐	daily
☒	weekly
☐	yearly

Correct

Click t

weekly emai

meeting dates and the required online activities.

- **Provide weekly announcements in the online classroom every week** to highlight the week's activities ahead and guide the "handoff" from the face-to-face meeting week to the purely online ones and vice versa.
- **Send weekly emails to students** to remind students of continuing online activities during weeks in which the class does not meet face-to-face. Sometimes students in a blended class tend to think of the weeks in which they do not meet on campus as "weeks off."
- **Send a personal email to provide a friendly reminder to students** who at any time are not participating in the online portion of the class or the opposite—to encourage students to come to face-to-face meetings.
- **Use an online gradebook to allow students to follow their progress in the class.** By grading students on their online activities on a weekly or biweekly basis, it is easier for you to keep track of student learning and for the students themselves to be reminded of an ongoing class in which they may seldom meet face-to-face.

Question # 10 of 10 (Start time: 09:11:37 AM, 18 January 2024)

Choose the correct option.

The tool developed for authors, writers, journalists, and other professionals to increase their daily productivity and word count is

Select the correct option

☐	Smart board
☐	Smart disc
☐	Smart computer
☒	Smart typewriter

Correct

Click to Save Answer & Move to Ne

oductivity and word

2. Smart Typewriter

The smart typewriter was developed as a tool for authors, writers, journalists, and other professionals to increase their daily productivity and word count. With its straightforward design and focused functionality, the tool eliminates some distractions that may hamper your writing progress, especially those offered by the internet.

Nonprofessionals, particularly students, can benefit from the use of smart typewriters. More than any age group, the young demographic is more vulnerable to the distractions provided by the internet because many aspects of their lives—entertainment and social life—are centered on it. Students tend to lose focus easily and procrastinate when working school activities because other, more entertaining things are just a few clicks away.

ENG517 – Computer Assisted Language Learning (Quiz No 4)

Question # 2 of 10 (Start time: 09:14:13 AM, 18 January 2024)

One of the advantage of on-line texts is their -----.

Select the correct option

☐	comprehension
☐	language
☐	application
☒	authenticity

Correct

line tex

can benefit from this unlimited source of texts and increase their reading proficiency. The readers can choose Web sites with on-line newspapers offering up-to-date and interesting information, or other Web sites providing various articles on particular topics. Some of these Web sites are glossed, which encourages learners and makes reading easier, more fluent, and less time consuming. Another advantage of on-line texts is their authenticity, they are not artificially designed for the purposes of teaching, but their authors focus on the topic rather than on the form.

L.Q Reading Strategies:

1. Metacognitive

- ☒ Deciding whether text relevant to one's purpose
- ☒ Evaluating text quality
- ☒ Assessing comprehension

2. Cognitive

- ☒ Reading closely and quickly

Many instructors found that scheduling the first small-group meeting for a 'face-to-face meeting week' greatly facilitates the rate at which groups form and establish_____.

Select the correct option

confusion as distinguishing features become vague or obsolete. This slippery terminology can be perplexing for educators, parents, and policy makers who need to make well-informed decisions about these technologies. Although we focus on the digital text, we note, as Goldman indicates in her article in this volume, that it is often augmented by other digital media and so is increasingly difficult to isolate from other media. In this article, we use e-reading technology to refer to the hardware and software used to display and interface with digital text. Hardware includes devices, such as e-readers and tablets, as well as smartphones, laptops, and even desktop computers that display digital text. Software includes a range of applications and programs that allow readers to interact with the text, either locally on the device or over a network; it may or may not include instructional features. Although many forms of e-reading technology may be used for more than reading, we focus on the technology's role in literacy instruction. And although many technologies, including audio players, video players, interactive whiteboards, and clickers, are used for literacy instruction, they cannot store and display digital text.¹⁸ We confine the term e-reading technology to those that can. Nascent research on these other technologies, although promising, is thus beyond the scope of this article.¹⁹ Using such a broad term makes it hard to draw generalized conclusions from research, because each device and application has specific features and limitations. Thus, claims made about one form of e-reading technology with specific

apart from

graphics, photographs, animation and moving video, direct links and references to dictionaries, and glossary.

Advantages of CALL and its Benefits for the Learners Developing Reading Skills

One of the most significant advantages of using CALL in the development of reading comprehension skills, often mentioned by many CALL specialists and teachers like Dangerfield, Kenning, Kitao, and Warschauer, is individualized instruction offered by the computer. It is widely known that learners learning styles, pace of learning can vary significantly even if the students are assigned to the same language learning group. Learners can also vary as far as the level to which they can develop particular language skills is concerned. Thus, in one class, there can be students good at speaking, but having problems with reading comprehension and students having their reading skill well developed, but being unable to speak fluently.

Computers can present the text in a variety of ways apart from a plain printed one. The text can be accompanied by animation and sound which make both the text and reading more interesting. It

can also be accompanied by direct references to a dictionary. By clicking a word with a mouse, the student receives the definition of the word, or its native language equivalent. In the case of so-called glosses, which are also very often applied in reading comprehension tests, it is enough to

If the reader needs to search out statements then the definitions _____ is very helpful technique.

Select the correct option

☐	understanding
☐	skimming
☐	schemata
☒	scanning

Correct

Click to Save Answer & M

definitions

a text is relevant for particular reader's purposes, as the reader can quickly estimate the relevance of the text by skimming it. Since this technique provides the reader with the main ideas of the text, it affords a logical framework for details to be fitted into it during more intensive reading. What is significant to add, during skimming the reader does not pay attention to details and can skip new words providing the text can still be understood.

If the reader's task, however, is to quickly look for specific facts or key words and phrases, scanning should be applied. During scanning the reader runs his eyes down the page in search for particular information. If unfamiliar words are encountered, the reader should look them up in a dictionary, as they can be key words in the text. **Scanning is also very helpful if the reader needs to search out statements, definitions etc.** To sum up, the use of both skimming and scanning improves retention of important details contained in a reading passage, as well as the speed of completing a reading task.

The Advantages of CALL and the Significance of Reading Skills

The significance of the incorporation of CALL into language learning and teaching was not 1983, during one of the annual TESOL conferences held in Toronto where more than ten of presentations concerned CALL and also some software was demonstrated. Unquestionably, idea of the application of a computer in foreign language learning and teaching was brought about by the rapid advent of overwhelming computerization. Though the use of computers was, until recently, restricted only to specialists, nowadays it is more and more common and accessible for ordinary people, and more and more often incorporated into language instruction curricula.

207

The computer focuses on its user's progress, his mistakes and problems and guides the student through the learning process adapting its pace to the student's abilities and learning results he has achieved. The advantage of the computer is, moreover, visible in the way in which the text is presented. The computer offers combination of a large range of multimedia aids like sound.

collegia

Spelling is a cornerstone of strong writing. But how can students locate a new word in the dictionary if they don't already know how to spell it? American Wordspeller is an app that can solve this problem by helping students to "find a word by the way it sounds!" Students can type the first two to three letters that they think the word starts with, and American Wordspeller will use a predictive function based on the letters' sounds to generate a list of suggested words and help the student identify the word he or she is looking for! This app builds agency and confidence in proper spelling.

The Interactive Grammar of English

Written by a team of linguists from the University College of London, the grammar in this app is based on the most current research and reflects real situations and real sentences, not just the repetition of archaic rules. The app is progressive, spanning concepts from basic level understanding to complex, collegiate-level pieces of writing.

No Red Ink

Technically, No Red Ink is an interactive website, but it is so functional and easy to navigate, that it has earned its place on a list alongside self-contained apps! No Red Ink is a personalized

Question # 9 of 10 (Start time: 09:27:31 AM, 18 January 2024)

Choose the correct option.

The interactive whiteboard (IWB) was invented in 1990 by _____.

Select the correct option

☐	Palo Alto Discussion Center
☒	Palo Alto Research Center
☐	Palo Alto Recreation Center
☐	Palo Ando Research Center

Correct

1990

to for learners to be proficient at using technology in order to adapt to this rapidly digitizing world.

Students have to learn how to properly use technology at an early age for it to be eloquent in its language. Educators and the school are in prime position to teach young learners this. Teachers must also learn to fully integrate technology in their pedagogy and use it not just as visual aids but also as tools to engage learners.

From interactive whiteboards to educational applications, here are 13 edtech tools that every teacher and student to aid and enhance teaching and learning.

1. Interactive Whiteboard

The interactive whiteboard (IWB) was invented by Palo Alto Research Center (PARC) around 1990 as a tool to be used in the office for round-table discussions and small group meetings. Now the IWB has found its way in many modern classrooms as a powerful tool for enriching lessons and engaging learners.

More than just a glorified projector, IWBs work as standalone computers or as large connectable touch pads to control other computers. They can be used to display images, play multimedia files, make interactive presentations, and manipulate elements on the screen.

Using an IWB, teachers can involve students in the teaching-learning process. For example, a lesson on how to tell time, an IWB can be used as a clock that students can adjust and manipulate to gain an experiential-based understanding of how time is measured. Students then cease to be passive receptors of knowledge and instead become active collaborators who take charge of their own learning.

Word processor is a common kind of software and Microsoft word is a word processing application designed to help you create professional-looking documents such as newsletters, reports, brochures and letters. Most computers are now sold with some version of word processing already installed and such programmes are widely used in the composition process. Before using any type of word-processing software, there are certain terminology that one needs to become familiar with in order to create documents. In Microsoft Word, some terminologies are used to articulate certain features of the software programme, its function/navigation methods and common word-processing terms. Arrow keys, close, save, save as, border, click, double click and many more. Regarding writing skills editing is all important. By editing – deleting, moving or adding characters, changing font styles, inserting bulleted items, and altering the color of text can modify a document.

English writing is one of the most important forms of communication today, it is necessary to maintain it correct and professional. The students have to develop communicative skills especially writing skills effectively for those who wish to begin professional life in higher studies. As Riemer (2002) says, "Communication skills are essential for a professional who aspires to carry out his/her professional practice in the global arena. Engineering communication skills basically constitute several core elements such as the fluency in the English language and the fundamentals of visual communication."

MS Word offers some handy tools under its Tools menu which can be used for developing /

approach to drilling grammar skills. The site uses the students' self-reported interests to build sentences that pretest, practice, and evaluate students' grammar knowledge and acquired learning. Teachers can set the topic for a class, monitor student progress, and peruse the data provided by the site reflecting students' achievement. It's an easy and effective grammar skill tool.

Writing Challenge App

The Writing Challenge App allows students to enjoy writing in the guide of a fun, interactive game. The app provides a prompt to get student writing started...then, every minute, the app supplies another prompt to add new ideas, words, characters, sentences, places or actions to the plot. Students who have a hard time getting started with creative writing assignments will enjoy the fast-paced, game-like setup of this app. And in the end, they'll have been inspired to write an entire story!

Writing Prompts

This app generates fiction, and nonfiction writing prompts, helping students master the skill of short write. The app uses current events, scene elements, words, pictures, colors, and even random tidbits from fiction works to inspire students to write both short and long pieces. The 600 creative writing prompts are available both on- and offline to encourage student writing wherever they may be.

**Writing Prompts**

This app generates fiction, and nonfiction writing prompts, helping students master the skill of the short write. The app uses current events, scene elements, words, pictures, colors, and even random tidbits from fiction works to inspire students to write both short and long pieces. The 600 creative writing prompts are available both on- and offline to encourage student writing wherever they may be.

Story Builder

Story Builder is an app from the same company that produces Sentence Builder. Story Builder was Huffington Post's 2011 winner of Best Reading App. The app is designed to help students improve paragraph formation, integration of idea, inference, and abstract thinking and expression. The app's use of audio clips promotes access to writing skills, even for students with special needs. The app offers a talk-to-text function, which allows students to narrate their thoughts and see them transformed into paragraphs; this is an essential scaffold for struggling writers.

Write About This

Write About This is an app that addresses all genres of writing throughout elementary. It engages students and making them feel excited about writing! Educators report that struggling writers are engaged and motivated by the game-like feel of this writing app; by the end of its integration, many couldn't get their students to turn it off! This app is worth investigating for teachers of reluctant writers.

If the reader needs to search out statements then the definitions _____ is very helpful technique.

Select the correct option

- ☐ skimming
- ☐ schemata
- ☐ understanding
- ☐ scanning

Correct

Click to See

definitions

Computer Assisted Language Learning (ENG517)

a text is relevant for particular reader's purposes, as the reader can quickly estimate the relevance of the text by skimming it. Since this technique provides the reader with the main ideas of the text, it affords a logical framework for details to be fitted into it during more intensive reading. What is significant to add, during skimming the reader does not pay attention to details and can skip words providing the text can still be understood.

If the reader's task, however, is to quickly look for specific facts or key words and phrases, scanning should be applied. During scanning the reader runs his eyes down the page in search of particular information. If unfamiliar words are encountered, the reader should look them up in a dictionary, as they can be key words in the text. **Scanning is also very helpful if the reader needs to search out statements, definitions etc.** To sum up, the use of both skimming and scanning improves retention of important details contained in a reading passage, as well as the speed of completing a reading task.

The Advantages of CALL and the Significance of Reading Skills

The significance of the incorporation of CALL into language learning and teaching was highlighted in 1983, during one of the annual TESOL conferences held in Toronto where more than 100 presentations concerned CALL and also some software was demonstrated. Unquestionably, the idea of the application of a computer in foreign language learning and teaching was brought about by the rapid advent of overwhelming computerization. Though the use of computers was, until recently, restricted only to specialists, nowadays it is more and more common and accessible to ordinary people, and more and more often incorporated into language instruction curricula.

The computer focuses on its user's progress, his mistakes and problems and guides the student

Developing Reading Skills

Defining E-Reading Technology

In both popular media and research, terms such as e-book, e-reader, e-text, and tablet are not always clearly and consistently differentiated and are often used interchangeably. The lack of clarity in part reflects the rapid advance of technology, with newly released options almost immediately being modified or merged together with other options. Such change contributes to confusion as distinguishing features become vague or obsolete. This slippery terminology can be perplexing for educators, parents, and policy makers who need to make well-informed decisions about these technologies. Although we focus on the digital text, we note, as Goldman indicates in her article in this volume, that it is often augmented by other digital media and so is increasingly difficult to isolate from other media. In this article, we use e-reading technology to refer to the hardware and software used to display and interface with digital text. Hardware includes devices, such as e-readers and tablets, as well as smartphones, laptops, and even desktop computers that display digital text. Software includes a range of applications and programs that allow readers to interact with the text, either locally on the device or over a network; it may or may not include instructional features. Although many forms of e-reading technology may be used for more than reading, we focus on the technology's role in literacy instruction. And although many other technologies, including audio players, video players, interactive whiteboards, and clickers, may be used for literacy instruction, they cannot store and display digital text.¹⁸ We confine the term e-reading technology to those that can. Nascent research on these other technologies promising, is thus beyond the scope of this article.¹⁹ Using such a broad term makes draw generalized conclusions from research, because each device and application has features and limitations. Thus, claims made about one form of e-reading technology with specific features may not apply to another form. For example, when researchers conduct an efficacy study using tablets with a specific instructional application, it may not be possible to generalize their findings to smartphones or laptops, even with the same application, not least because of the vast differences in screen size.

Research on E-reading Technology as a Tool

☐	uses
☐	strategies
☐	applications

Correct

novative technology

Computer Assisted Language Learning (ENG517)

VU

reading programs can improve oral reading fluency skills in second- through fifth-grade readers. Finally, a synthesis of the research on e-books, defined as digital texts that mimicked print texts (for example, having pages that turn), has found small positive effects for prekindergarten to fifth-grade students' comprehension-related outcomes.

Tools for Supporting Strategic Readers

Innovative technology applications also show promise for supporting the development of advanced reading skills that students need to master discipline-specific knowledge areas and that may be particularly challenging for students from low socioeconomic backgrounds and non-English-speaking homes. Self-paced tutorials have led to gains in self-questioning, error detection, inference, summarization, and concept-mapping skills and strategies to enhance readers' use of reading strategies and comprehension of texts. Two online interventions, Computer Assisted Strategy Teaching and Learning Environment and Improving Comprehension Online, have both shown positive effects in these skill areas in quasi-experimental studies. Sixth grade Computer Assisted Strategy Teaching and Learning Environment outperform 212 application of the targeted strategies. Benefits can depend on genre, with treatment outperforming on expository versus narrative texts or vice versa depending on the strategy under consideration. Monolingual and bilingual fifth-graders using Improving Comprehension Online have shown improvement relative to control students on norm referenced and research-developed measures of vocabulary. Students in grades six through twelve have largely endorsed online tutors and self-paced tutorials as desirable features of e-books. Experimental evaluation of instructional agents—generally, animated avatars that respond to student input in digital text or human or computerized voices—has demonstrated particular benefit for boosting vocabulary, identifying

them to measure in their video. Since students will view and assess their own videos, they can be brutally honest, and you should encourage them to be so. And if you want them to be even more honest, assure them that you won't take their own assessment into consideration if and when you grade them on the speaking project.

Recordings and Transcripts

How well does your students' pronunciation approach that of a native speaker?

They may find out for themselves when you have recordings and transcripts available them to practice with. **Many websites for ESL students have videos and corresponding transcripts free for classroom use.** Try making the materials available in your own classroom for your students during independent work time. Have students listen to a line of the video and then repeat it, reading off the transcript. As students work their way through the video and the transcript, they will find their speaking skills approaching that of the speaker on the recording.

Native Speakers

Of course your students listen to you all of the time (though like any good ESL teacher you limit your talk time and increase your students' talk time).

language and con

- Training students in skills such as recognizing NS prosody, identifying specific information or making inferences, regardless of whether the focus is on grammar, reading, culture, or any other area of language study. Inferring, or deducing the meanings of novel or unfamiliar words based on contextual and pragmatic cues is especially important for both reading and listening comprehension (Lee & Van

Patten: 1995:62).As is true of essentially all aspects of language pedagogy, the best approach to the teaching of listening comprehension consists of three steps: preparation for new material, interaction with the new material, and recycling/reuse of new material. For aural comprehension, these steps are a pre-listening/viewing activity, the listening or viewing activity itself, and a post-listening/viewing activity.

Pre-listening/viewing

The pre-listening activity should familiarize students with the language and content they will hear in the listening activity. This can be done through in-class or homework activities based on an introductory text, visuals, or oral/aural tasks that activate general world knowledge, schemas and previously learned vocabulary. Focusing student attention on advance organizers, such as titles or related images, appears to improve comprehension and retention (Herron: 1994; and Herron et al.: 1995). Another approach is to have students listen to and then produce sentences, phrases, or words before listening to a video segment that uses them. Students should be made aware of the redundancy of much oral input and have practice listening to audio/visual documents to identify information they hear more than once. According to Mendelsohn

(1994:12), the pre-listening phase should include activities involving all elements of listening allowing students to predict and guess. If the listening task requires students to form inferences the clues should be included in the pre-listening activities.

Pre-listening/viewing activities should also foster the development of metacognitive skills. Along with information about content and practice in language, students should be given hints about how to structure the information so that it informs their listening and makes it more efficient. During

← participation mean × < >

interrelated. The online work following directly upon the face-to-face meeting helps bridge the topics and activities of the two successive weeks, and can serve as preparation for the entirely online week. The opposite is also true—a carefully planned activity in the online-only week may be designed to provide essential back- ground for the upcoming face-to-face meeting.

- Consider the pacing and time needed to complete each week’s activities, both online and face to face—calculate the total time expected for students to be on task—whether that means reading, researching, discussing, or completing other “homework.” The total time should be comparable to that expected for a purely face-to-face class. This avoids the problem of “a class and one-half.”
- In devising a participation grade, be sure to define what **participation means** in the context of a face-to-face class meeting and an online discussion. Keep in mind that there generally isn’t time for every student to participate in a 1–3- hour face-to-face classroom meeting. You may want to give students an opportunity within a face-to-face meeting week for participating in either format. In other words, if you give ten points for participation, you can stipulate that the ten points can be distributed over both the face-to-face and online meetings or confined to just the online. Or

facts present

CALL AND THE SIGNIFICANCE OF READING SKILLS

Topic No: 47

What are Reading Skills? Theories and Approaches to Reading Skills; Reading Types & Strategies; Advantages of CALL and the Significance of Reading skills

What are Reading Skills?

Reading skill refers to the ability to understand written text. When students comprehend understand written text, and combine their understanding with prior knowledge, they are able to perform the following three reading-comprehension skills.

1. Identify simple facts presented in written text (literal comprehension)

2. Make judgments about the written text's content (evaluative comprehension)

3. Connect the text to other written passages and situations (inferential comprehension)

The development of these reading skills is vital to learner's development, and a sheer volume of studies has demonstrated a link between competency in reading and overall attainment (literacy attainment and other outcomes).

Theories and Approaches to Reading Skills

The division of language skills into speaking, listening, reading and writing has been known for centuries. What has been changing throughout centuries, however, was the emphasis on particular language skill in a particular period. During the Middle Ages, for example, speaking was of paramount importance, as most people needed to have a good command of spoken language, Latin at that time, to communicate with masses. After the classical period, Renaissance, the main focus of foreign language

2. Smart Typewriter

The smart typewriter was developed as a tool for authors, writers, journalists, and other professionals to increase their daily productivity and word count. With its straightforward design and focused functionality, the tool eliminates some distractions that may hamper your writing progress, especially those offered by the internet.

Nonprofessionals, particularly students, can benefit from the use of smart typewriters. More than any age group, the young demographic is more vulnerable to the distractions provided by the internet because many aspects of their lives—entertainment and social life—are centered on it. Students tend to lose focus easily and procrastinate when working school activities because other, more entertaining things are just a few clicks away.

Using a portable smart typewriter can address this problem. The tool was made for one function and that's writing. It can connect to the internet, but there's no browser, and the screen is gray.

This typewriter only connects to Wi-Fi to save files in a cloud drive. Files are saved to the smart typewriter's internal memory when there's no Wi-Fi and automatically backed up in a cloud drive when it connects again.

Students can take the device wherever they go and write their homework outdoors since the smart

13 Edtech Tools Every Teacher and Student Should Know About; 7 Ways To Use Technology To Improve Your Writing Skill

13 Edtech Tools Every Teacher and Student Should Know About

Today the importance of educational technology goes beyond the use of instructional aids because of the ubiquity and usefulness of technology in everyday life. Now more than ever, there is a need to for learners to be proficient at using technology in order to adapt to this rapidly digitizing world.

Students have to learn how to properly use technology at an early age for it to be eloquent in its language. Educators and the school are in prime position to teach young learners this. Teachers must also learn to fully integrate technology in their pedagogy and use it not just as visual aids but also as tools to engage learners.

From interactive whiteboards to educational applications, here are 13 edtech tools that every teacher and student to aid and enhance teaching and learning.

1. Interactive Whiteboard

The interactive whiteboard (IWB) was invented by Palo Alto Research Center (PARC) in 1990 as a tool to be used in the office for round-table discussions and small group meetings. Now the IWB has found its way in many modern classrooms as a powerful tool for enriching lessons and engaging learners.

More than just a glorified projector, IWBs work as standalone computers or as large connectable touch pads to control other computers. They can be used to display images, play multimedia files,

QUIZ

vulms.vu.edu.pk

Choose the correct option.

There is no better app than _____ for traditional essay writing in classrooms.

Select the correct option

☒	Google Docs
☐	Reading Docs
☐	Writing Docs
☐	Essay Docs

Correct

Click to Save

no better app

**Storyrobe**

Storyrobe allows writers to write, share their work, and receive feedback from others. This is a great way to integrate student editing and revision as well as teaching how to incorporate positive feedback to writers. With this app, you can easily save and upload your story to social media platforms as well!

Google Docs

For traditional essay writing in classrooms, there is no better app than Google Docs! Google Docs has all the traditional functionality of Microsoft Word but allows for collaboration between students and for easy-to-give and easy-to-receive feedback from teachers through the commenting and suggesting functions. When paired with Google Classroom, Google Docs makes the assigning, collecting, and grading of essays a breeze for teachers and students.

It's time to harness technology's strengths, instead of dwelling on their weaknesses. While written communication can, at times, be undercut by social media, teachers can also use it to n students to write more and write better. By tapping into these writing apps, teachers can students invested in improving their writing skills!

Question # 10 of 10 (Start time: 08:55:15 AM, 10 January 2024)

The 'reading_-----' affect the process of reading in the most significant fashion.

Select the correct option

☐	books
☐	criteria
☐	skills
☐	purposes

Correct

significant fas

of the remaining three. The third metaphor, the interactive processing, can be interpreted as en the general interaction between the reader and a text or the interaction of many component sk that work together simultaneously in the process of reading. In the former interpretation, the rea makes use of his background knowledge to reconstruct the information conveyed by the text. The latter interpretation of the interactive model takes into account the influence of both lower-le (decoding) and higher-level processing (comprehension and interpretation of the text). "Sim stated, reading involves an array of lower-level rapid, automatic identification skills and an ar of higher-level comprehension/interpretation skills" as Grabe puts it (Chun & Plass, 1997:62)

Reading Strategies.

As far as the reader is concerned, his reading skills are vital, as well as his interest in the topic. Such factors as sleepiness or hunger play a significant role as well. All these factors influence success in reading. Also the type of the text has an impact on the reading process, as there is a certain degree of difference in difficulty between various types, e.g. between a novel and a scientific text. The most important factor, however, are reading strategies, as they affect reading in the most significant fashion. Unsuccessful language learners can either use too few reading strategies, or they can apply them in a chaotic way, which obviously impairs reading effectiveness. Also the reader's purpose for reading is vital, as various purposes condition the of particular strategies. If the reader only needs to gather general information, he will employ strategies appropriate for this goal, e.g. skimming. If, for example, he looks for more specific information, the best strategy to apply would be scanning.

206

There are many different reading strategies, but they are all based on basic assumptions. First, before reading, the reader should think about the purpose for which he is going to digest the text. Second, the reader should look at the title, headings, pictures, or any other visual cues accompanying the text. Third, the reader is advised to read the introduction and conclusion, or to read the first line in every paragraph, and only then the whole text. Fourth, the entire reading should be scanned to look for the most important parts to focus on during detailed reading. Fifth, the reader should take notes as he reads. Sixth, when the reader has problems with

Question # 1 of 10 (start time: 09:50:49 AM, 18 January 2024)

Computers can present the text in a variety of ways apart from a plain _____ one form

select the correct option

☐	inscribed
☒	printed
☐	engraved
☐	hand written

Correct

Question # 3 of 10 (Start time: 09:52:17 AM, 18 January 2024)

Innovative technology _____show promise for supporting the development of advanced reading skills.

Select the correct option

☒	applications
☐	uses
☐	considerations
☐	strategies

Correct
