Past Papers for Mids./Finals are also Available

Question 1:

Reactivity of Halogens.....

- ☐ I do not know
 - ☒ Decreases down the group
 - ☐ Does not change in group
 - ☐ Increases down the group
-

Question 2:

Momentum can be defined as:

- ☐ force multiplied with time
 - ☐ force divided by time
 - ☐ force divided with displacement
 - ☒ force multiplied with displacement
-

Question 3:

The pair of homologous chromosomes is classified as _____.

- ☒ Bivalent
 - ☐ Trivalent
 - ☐ Tetravalent
 - ☐ Covalent
-

Question 4:

The Component which is present in smaller quantity in solution is known as:

- ☐ Colloids
 - ☐ Solvent
 - ☒ Solute
 - ☐ Mixture
-

Question 5:

Which of the metal exists in Liquid state at room temperature?

- ☒ Hg (Mercury)
 - ☐ Fe (Iron)
 - ☐ Cu (Copper)
 - ☐ Al (Aluminum)
-

Question 6:

Which of the following is NOT a scalar quantity:

- ☒ velocity
 - ☐ time
 - ☐ distance
 - ☐ mass
-

Question 7:

The notochord is most closely associated with the:

- ☐ spinal cord
 - ☐ skin system
 - ☐ nervous system and spinal cord only
 - ☒ skeletal system
-

Question 8:

The reading on the Fahrenheit scale will be double the reading on the centigrade scale when the temperature on the centigrade scale is?

- ☐ 280° C
- ☒ 160° C
- ☐ 460° C
- ☐ 360° C

Question 9:

White light separates into different colors after passing through a -----:

- ☐ Mirror
- ☒ Prism
- ☐ Hammer
- ☐ Camera

gsc101

Which line correctly identifies average speed?

- ✗ distance covered in unit time
- ✗ displacement in unit time
- ✗ distance covered in constant time intervals
- ✓ total distance covered divided by time taken

2. The rate of change of velocity is known as:

- ✓ acceleration
- ✗ average velocity
- ✗ variable velocity
- ✗ uniform velocity

3. If pressure of gas increases 2 times at constant temperature, the final volume of gas would be:

- ✗ 2 V
- ✓ $\frac{1}{2} V$

☐ $\frac{1}{4}$ V

☐ 3 V

4. The shortest distance between two points is also known as:

☐ speed

☒ displacement

☐ distance

☐ acceleration

5. From what source do cells get their food?

☐ Carbon dioxide

☐ Oxygen

☒ Blood

☐ Other cells

6. Valencies of Nobel gases in general are:

☒ zero

☐ two

☐ one

☐ three

7. The study of motion of objects without reference to mass and force is called:

☐ mechanics

☒ kinematics

☐ general relativity

☐ dynamics

8. For diverging lens, which of the following is true?

☐ The lens is thinner in the center than on the edges.

☐ The lens must be flat on one side.

☒ The lens is thicker in the center than on the edges.

☐ Light must enter it parallel to the principal axis.

9. A man carrying a weight on his head walking on road from one place to another. But total work done is zero in this example because _____:

☒ Force is perpendicular to displacement

☐ Force is zero

☐ All of the above

☐ Displacement is zero

10. The gas which is found 78% by volume in air is:

☐ Cl_2

☐ H_2

☒ N_2

☐ O_2

Question #1:

A labourer pushes a box up for a distance of 20 m. If the force the labourer applies is 10 N, the amount of work done shall be:

20 J ☒

2.00 J

200 J

10 J

Question #2:

Inverse of focal length is known as the _____ of a lens:

Far point

Focus

Power ✓

Power of accommodation

Question #3:

Image that can be obtained on a screen:

Converging

Real ✓

Virtual

Diverging

Question #4:

An engineer designs different machines. Which is the least efficient?

450 J 248 J 202 J

255 J 153 J 102 J

731 J 468 J 263 J ✓

510 J 357 J 153 J

Question #5:

In mitosis, the S phase checkpoint ensures that _____.

Cell is ready for division

Everything is ready to enter the M phase

DNA is ready for synthesis

Synthesis of DNA is correctly done or not ✓

Question #6:

_____ Bond is formed by the complete transfer of electrons.

All of these

Ionic ✓

Covalent

Co-ordinate covalent

Question #7:

Rusting of iron is an example of _____ reaction.

Neutralization

Oxidation ✓

Hydrogenation

Reduction

Question #8:

A mass is projected vertically downwards. Which line could represent the correct energy conversions?

K.E. increases, Gravitational PE decreases, Total Energy does not change ✓

K.E. decreases, Gravitational PE decreases, Total Energy decreases

K.E. increases, Gravitational PE increases, Total Energy increases

K.E. decreases, Gravitational PE increases, Total Energy does not change

Question #9:

Work done depends upon (i) force (ii) distance moved in direction of force applied and (iii) angle between direction of force and displacement. Which line is always correct if work done is not zero?

(ii) and (iii) are not zero

(i) is not zero

(i) and (iii) are not zero

(i) and (ii) are not zero ✓

Question #10:

Which contains oxygenated blood?

Venules

Right ventricle

Pulmonary artery

Left Ventricle ✓

gc101

Question 1: The post house of a cell is known as _____.

Lysosomes

Centrioles

Golgi apparatus

Nucleus ✓

Question 2: Valence electrons of Nickel in general are _____.

One

Two

Three

Zero ✓

Question 3: From what source do cells get their food?

Blood

Carbon dioxide

Other cells ✓

Oxygen

Question 4: Which line correctly identifies average speed?

Total distance covered divided by time taken ✓

Distance covered in constant time intervals

Distance covered in unit time

Displacement in unit time

Question 5: During Anaphase of mitosis the chromosomes are _____.

Reached at the poles

Replicating themselves

Arranging themselves at the equator

Moving towards the poles ✓

Question 6: Which type of rays produced due to ionizations of atoms or molecules of gas in discharge tube?

Neutral

no rays produced due to ionization

Positive ✓

Negative

Question 7: Solar cell technology is an example of _____.

Renewable energy ✓

Nuclear energy

Non-renewable energy

Thermal energy

Question 8: If the pressure of a given gas is held constant its density is inversely proportional to its absolute temperature. We can also refer this statement as _____.

1.

exammcq.onlinemcqs.com

exammcq.onlinemcqs.com

Boyle's law

Avogadro's law

Charles law ✓

Ideal gas law

Question 9: Liquid and gases expand on heating produce _____.

Heat transfer by conduction

Convection currents in fluids due to changing densities ✓

Convection currents in fluids due to constant temperatures

Convection currents in fluids due to changing masses

Question 10: An object of mass 'm' is moving under a constant force 'F' causing an acceleration 'a'. If the mass of the object is doubled and the force reduced to 'F/2', the new acceleration will be _____.

2a

a

0.25a

0.5a ✓

1. Name the phase in meiosis during which genetic recombination occurs?

Options:

A) Prophase I

B) Anaphase I

C) Metaphase II

D) Telophase II

Correct Answer: A) Prophase I

2. The mixture of liquid and solid, where solid does not dissolve is known as _____.

Options:

A) Colloid

B) Solution

C) Suspension

D) Alloy

Correct Answer: C) Suspension

3. Which one has no nucleus?

Options:

- A) Arteries
- B) White blood cells
- C) Red blood cells
- D) Capillaries

Correct Answer: C) Red blood cells

4. _____ gas is used as a bleaching agent.

Options:

- A) Chlorine
- B) Oxygen
- C) Nitrogen
- D) Hydrogen

Correct Answer: A) Chlorine

5. Protein making machine of a cell is known as _____.

Options:

- A) Mitochondria
- B) Endoplasmic Reticulum
- C) Nucleus
- D) Ribosomes

Correct Answer: D) Ribosomes

6. The organizational level which includes all of the other levels is known as _____.

Options:

- A) Cell
- B) Organism
- C) Biosphere

D) Ecosystem

Correct Answer: C) Biosphere

7. The main function of cell membrane is_____.

Options:

A) Giving protection, strength, and support

B) Helping in the movement of organelles

C) Transporting materials in and out from the cell

D) Providing space for metabolic reactions

Correct Answer: C) Transporting materials in and out from the cell

8. Example of Super oxide is_____.

Options:

A) KO_2

B) H_2O

C) H_2O_2

D) CO_2

Correct Answer: A) KO_2

9. Reactivity of Halogens.....

Options:

A) Does not change in group

B) Increases down the group

C) I do not know

D) Decreases down the group

Correct Answer: B) Increases down the group

10. During which stage of Mitosis does the nucleus envelope begin to disappear?

Options:

A) Anaphase

B) Telophase

C) Metaphase

D) Prophase

Correct Answer: D) Prophase
