FINALTERM EXAMINATION
Spring 2010
AFAAQ_TARIQ@YAHOO.COM
STA630- Research Methods (Session - 4)

Ref No: 1518507
Time: 90 min
Marks: 69

AFAAQ

Question No: 1 (Marks: 1) - Please choose one

An inductive logic is one that:

- ► Involves testing as explicitly defined hypothesis
- ► Does not allow for findings to feed back into the body of knowledge.
- ► Uses quantitative methods whenever possible.
- ► Allows theory to emerge out of the data.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch01/

MCQ # 03

Question No: 2 (Marks: 1) - Please choose one

Which of the following research questions is BEST answered using action research?

► How can I improve the interaction of students of different ethnicity in my class?

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 3

► What factors influence student interaction in multiethnic classes?

► Is there a difference between male and female acceptance of others in multiethnic classes?

► How do students from Asian countries adjust to classroom practices in U.S. schools?

Question No: 3 (Marks: 1) - Please choose one

Which of the following is characteristic of action research?

► Variables are tightly controlled.

► Results are generalizable.

► Results demonstrate cause-and-effect relationships.

► Data are usually qualitative.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 05

Question No: 4 (Marks: 1) - Please choose one

Research may differ along a series of dimensions. Which of the following may be applied to this statement?

► The level of manipulation used to elicit data collection.

► The data-collection technique.

► The type of data collected.

► Type, technique and manipulation of data collection.

http://www.uk.sagepub.com/breakwell/downloads/mcq/mcq_01/mcq_01.htm
MCQ # 06

Question No: 5 (Marks: 1) - Please choose one

Which of the following is NOT a drawback to free response items?

► Results from free response items take longer to analyze.

► Many participants tend not to answer free response items.

► Free response items allow participants to add information that was not directly requested.

► Many participants tend to be less truthful in free response items.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 15

AFAQ

Question No: 6 (Marks: 1) - Please choose one

After you locate a source, you should write down all details of the reference, except**;**

► Volumes
► Full names of the authors
► Titles
► Price

After you locate a source, you should write down all details of the reference (full names of the authors, titles, volumes, issue, pages)
PAGE # 29

Question No: 7 (Marks: 1) - Please choose one

Which of the following is an example of a question about normative standards and values?

► How many workers are employed at this plant?
► What is your attitude towards the management at this plant?
► Do you always cast your vote in trade union elections?

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch10/
MCQ # 03

► Are you aware of the main features of the European Union Directive for informing and consulting employees?

Question No: 8 (Marks: 1) - Please choose one

Which of the following is NOT an example of a problem with using social survey research to investigate behaviour?

► Respondents tend to answer by giving the most socially desirable answer.
► Respondents may inadvertently omit key terms in the question.
► Respondents may not give an honest reply to what they see as a threatening question.
► Respondents may be unwilling to reveal information as they believe they are likely to be identified.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch11/
MCQ # 01

Question No: 9 (Marks: 1) - Please choose one

Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?

► What role to adopt while interviewing male managers?
► How many female employees should be interviewed for a representative sample?
► How to overcome the issue of false consciousness?

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch18/
MCQ # 09

AIAQ

► What data to use while publishing findings?

Question No: 10 (Marks: 1) - Please choose one

Which of the following is NOT characteristic of qualitative data?

► Rich descriptions
► Concise

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9871/2527149.cw/content/index#topofquiz1
MCQ # 02

► Voluminous
► Unorganized

Question No: 11 (Marks: 1) - Please choose one

Why is describing the context equally, as important aspect of qualitative data analysis as is describing the participants?

► Descriptions of context are more objective than descriptions of participants.
► Descriptions of context are based on facts, not perceptions.
► Participants' behavior cannot be separated from the context in which it occurs.

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9871/2527206.cw/index.html
MCQ # 04

► Participants are the context.

Question No: 12 (Marks: 1) - Please choose one

Which one is not the part of non reactive research?

► Physical traces
► Archives
► Observations
► Interviews

Varieties of Non-Reactive Observations
Physical Traces:
Archives:
Observations:
PAGE 124

Question No: 13 (Marks: 1) - Please choose one

The information gained by someone other than researcher conducting the study is called _____.

► Primary data
► Reliable data
► Valid data
► Secondary data

AFAIQ

Secondary data refer to information gathered by someone other than the researcher conducting the present study.
PAGE # 131

Question No: 14 (Marks: 1) - Please choose one

Which of the following is **not** an example of historical comparative research?

► Social Forms
► Economic Forms
► Civil Wars
► Turnover

PAGE # 142,143

Question No: 15 (Marks: 1) - Please choose one

Which of the following would you recommend to a graduate student to ensure the quality of his research report?

► Write a detailed explanation of the methods used to investigate the problem.
► Explicitly state underlying assumptions related to the topic.
► Acknowledge the limitations of generalizability while assisting the reader in understanding the transferability of the findings.
► Detailed method, assumptions and limitation.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381491.cw/index.html
MCQ # 02

Question No: 16 (Marks: 1) - Please choose one

In which of the following Tests, we usually go for personal interviewing to test the questionnaire?

► Test Run
► Pilot Test

Pilot testing also called pre-testing means small scale trial run of a particular component; here we are referring to pilot testing of the questionnaire.
PAGE # 80

► Post Hoc Test
► T- Test

Question No: 17 (Marks: 1) - Please choose one

In which of the following Tests, we should come to know, does a questionnaire look like an integrated unit?

► Test Run
► Pilot Test

AFAQ

PAGE # 80, 81
A pilot plant would be a way of testing the integrated unit, studying its operational problems, testing design

- ► Post Hoc Test
- ► T- Test

Question No: 18 (Marks: 1) - Please choose one

Which of the following is that element or set of elements considered for selection in some stage of sampling?

- ► Parameter
- ► Sampling Unit

A sampling unit is that element or set of elements considered for selection in some stage of sampling.
PAGE 89

- ► Observation Unit
- ► Statistic

Question No: 19 (Marks: 1) - Please choose one

If you are going on the street and suddenly a TV reporter starts taking your interview regarding any issue, which of the following sampling technique is used by the TV reporter?

- ► Purposive Sampling
- ► Snowball Sampling
- ► Convenience Sampling

Convenience Sampling
Convenience sampling (also called *haphazard or accidental sampling*) refers to sampling by obtaining units or people who are most conveniently available. For example, it may be convenient and economical to sample employees in companies in a nearby area, sample from a pool of friends and neighbors. The person-on-the street interview conducted by TV programs is another example. TV interviewers go on the street with camera and microphone to talk to few people who are convenient to interview. The people walking past a TV studio in thee middle of the day do not represent everyone (homemakers, people in the rural areas). Likewise, TV interviewers select people who look "normal" to them and avoid people who are unattractive, poor, very old, or inarticulate.
PAGE # 90

- ► Quota Sampling

Question No: 20 (Marks: 1) - Please choose one

Sampling in qualitative research is similar to which type of sampling in quantitative research?

VUFAQ

► Simple random sampling
► Systematic sampling
► Quota sampling
► Purposive sampling

Sampling in qualitative research is similar to which type of sampling in quantitative research?
It is similar to purposive sampling
http://www.google.com.pk/#sclient=psy&hl=en&biw=800&bih=411&q=Sampling+in+qualitative+research+is+similar+to+Purposive+sampling&aq=&aqi=&aql=&oq=&pbx=1&fp=791244bbdd532714
AFTER OPEN DA LINK CLICK ON 1ST [DOC] *Sampling* in Quantitative, *Qualitative*, and Mixed - Chapter 9 ...

Question No: 21 (Marks: 1) - Please choose one

Which of the following **is NOT** a type of Non-random sampling?

► Cluster sampling

PAGE # 90, 91, AND 93
► Convenience sampling
► Quota sampling
► Purposive sampling

Question No: 22 (Marks: 1) - Please choose one

Historical-Comparative researchers sometimes use;

► Time-series data
► Primary data
► Secondary data

Historical-comparative researchers often use secondary sources or different data types in combination
PAGE # 151
► Analyzed data

Question No: 23 (Marks: 1) - Please choose one

Which of the following refers to the partials replicate or reproduce the same relationship that existed in the bivariate table before considering the control variable?

► Replication pattern

The replication pattern is the easiest to understand. It is when the partials replicate or reproduce the same relationship that existed in the bivariate table before considering the control variable.

AFAQ

PAGE # 110

- ► Specification pattern
- ► Suppressor variable pattern
- ► Negative linear relationship

Question No: 24 (Marks: 1) - Please choose one

As a researcher you need **Not** to;

- ► Master the literature
- ► Take numerous detailed notes
- ► Create a bibliography list
- ► Learn your findings

As the researcher masters the literature and takes numerous detailed notes, he or she completes many specific tasks: creating a bibliography list
PAGE # 147

Question No: 25 (Marks: 1) - Please choose one

Which of the following relates with an abstract model of underlying relations or causal mechanism?

- ► Analysis
- ► Synthesis

Synthesis links specific evidence with an abstract model of underlying relations or causal mechanism.
PAGE # 148

- ► Results
- ► Findings

Question No: 26 (Marks: 1) - Please choose one

Which of the following control techniques available to the researcher, controls both known and unknown variables?

- ► Building the extraneous variable into the design
- ► Matching
- ► Random assignment

Random assignment is the most important technique that can be used to control confounding variables because it has the ability to control for both known and unknown confounding extraneous variables.
http://www.southalabama.edu/coe/bset/johnson/lectures/lec9.htm

VUAAQ

► Analysis of covariance

Question No: 27 (Marks: 1) - Please choose one

Which of the following is more operational with the help of coding system?

► External Appearance
► Count Behaviors
► Content analysis

Constructs in content analysis are operationalizing with a *coding system,* a set of instructions or rules on how to systematically observe and record content from text.
Page # 126

► Time Duration

Question No: 28 (Marks: 1) - Please choose one

What is the particular advantage of secondary analysis to business students?

► It is less challenging intellectually
► It guarantees positive results
► It is less expensive and less time consuming than primary analysis

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch13/

AFAAQ

MCQ # 02

► It enables students to gain experience of the workplace

Question No: 29 (Marks: 1) - Please choose one

Which of the following similarity is found in Qualitative research and Survey research?

► Examine topics primarily from the participants' perspectives
► They are guided by predetermined variables to study.
► They are descriptive research methods.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 03

► Have large sample sizes.

Question No: 30 (Marks: 1) - Please choose one

A single element or group of elements that is eligible for selection via the sampling process is called a:

► Sampling panel
► Sampling unit

A sampling unit is that element or set of elements considered for selection in some stage of sampling.
PAGE # 89

► Sampling error
► Sampling quota

Question No: 31 (Marks: 1) - Please choose one

Codes are rules for _____ data.

► Classifying
► Interpreting
► Recording
► All of the given options

ALTHOUGH CODES ARE GENERALLY CONSIDERED TO BE NUMERICAL SYMBOLS, THEY ARE MORE BROADLY DEFINED AS THE RULES FOR INTERPRETING, CLASSIFYING, AND RECORDING DATA.
PAGE # 99

Question No: 32 (Marks: 1) - Please choose one

Which of the following contain the captions for the rows of a table?

► Boxheads
► Footnotes
► Source notes

AFAQ

► None of the given options

A table may contain a caption, row groups, and column groups. A row group contains rows, while a column group contains columns. Rows and columns contain cells. Tables are rendered as layers in a specified order from the bottom up: table, column groups, columns, row groups, rows, and cells.
http://reference.sitepoint.com/css/tableformatting

Question No: 33 (Marks: 1) - Please choose one

The experimental design that uses one-group, a treatment, and a posttest is called _____.

► One-shot case study design

One-shot Case Study Design: Also called the one-group posttest-only design, the one-shot case study design has only one group, a treatment, and a posttest
PAGE #117

► Pretest posttest control group design
► Solomon four-group design
► One-group pretest posttest design

Question No: 34 (Marks: 1) - Please choose one

When a researcher tries to say that the results of a test market in Karachi will hold in a national rollout of the new product, this researcher is concerned with:

► Internal validity
► The repeated measures effect
► Constant error
► External validity

External validity is the ability to generalize experimental findings to real life situations.
PAGE 122

Question No: 35 (Marks: 1) - Please choose one

Obtaining secondary data is typically _____ and _____ expensive than obtaining primary data.

► Faster; more
► Slower; more
► Faster; less

Page # 131
► Slower; less

AFAAQ

Question No: 36 (Marks: 1) - Please choose one

Which of the following is a disadvantage of secondary data?

- ► User has no control over their reliability and validity
- ► Inability to convert the data
- ► Typically require additional access to research respondents
- ► All of the given options

Question No: 37 (Marks: 1) - Please choose one

The study of documents used by writers is a method of _____.

- ► In-depth analysis
- ► Time series analysis
- ► Regression analysis
- ► None of the given options

Content analysis is also the study of documents through which the writers try to communicate, though some of the documents (like population census) may simply contain figures.
Page # 129

Question No: 38 (Marks: 1) - Please choose one

Historical-Comparative research focuses on:

- ► Its broad historical processes
- ► Comparing forms
- ► Tracing the development of social forms
- ► All of the given options

Historical-Comparative research focuses on:
• Tracing the development of social forms (patterns) overtime as well as its broad its broad historical processes, and
• Comparing those forms and its developmental processes across cultures (countries/nations).
Page # 142

Question No: 39 (Marks: 1) - Please choose one

When a manufacturer studies his most successful retailer in depth in order to determine some better ideas for displaying bicycles in its retail stores, this is an example of:

- ► An experiment
- ► A test market
- ► A case study

Case study: It is an in-depth analysis of a unit which could be an individual person, a couple, a group, or an organization
PAGE # 38

VUAO

► Causal research

Question No: 40 (Marks: 1) - Please choose one

An interview conducted by a trained moderator among a small group of respondents in an unstructured and natural manner is a _____.

► Depth interview
► Focus group

Focus group an interview conducted by a trained moderator among a small group of respondents in an unstructured and natural manner

http://books.google.com.pk/books?id=TKb8iORscegC&pg=PA145&lpg=PA145&dq=An+interview+conducted+by+a+trained+moderator+among+a+small+group+of+respondents+in+an+unstructured+and+natural+manner+is+a+Focus+group&source=bl&ots=xSwXM_YgdX&sig=vsawE2ctZCs4EW_ajLWVzulC8yY&hl=en&ei=aaVOTZqoKtOChQed3Jm-Dg&sa=X&oi=book_result&ct=result&resnum=2&ved=0CBwQ6AEwAQ#v=onepage&q=An%20interview%20conducted%20by%20a%20trained%20moderator%20among%20a%20small%20group%20of%20respondents%20in%20an%20unstructured%20and%20natural%20manner%20is%20a%20Focus%20group&f=false

► Case study
► None of the given options

Question No: 41 (Marks: 1) - Please choose one

Which of the following represents this reference: **Riley, T., & Brecht, M. L. (1998). *The success in mentoring process.* In R. Williams (Ed.) *Mentoring and career success.* pp. 129-150. New York: Wilson Press.**

► Edited book

► Book by a single author
► Book by more than one author
► Chapter in an edited book

Chapter in an edited book
This is an article written by single or multiple authors and is printed in the edited book.
Riley, T., & Brecht, M. L. (1998). The success in mentoring process. In R. Williams (Ed.) *Mentoring and career success.* pp. 129-150. New York: Wilson Press.
Page # 165

Question No: 42 (Marks: 1) - Please choose one

Following are the characteristics of the research **EXCEPT:**

► Systematic

AIOU

► Data based
► Subjective approach

Research may be considered as an organized, systematic, data based, critical, objective, scientific inquiry
Page # 02

► Scientific inquiry

Question No: 43 (Marks: 1) - Please choose one

A variable that is likely to develop with the passage of time between the independent and dependent variable is called:

► Moderating Variable
► Intervening Variable

Intervening Variables
A basic causal relationship requires only independent and dependent variable.
Page # 20

► Confounding Variable
► Predictor Variable

Question No: 44 (Marks: 1) - Please choose one

Which type of research is involved in preliminary data collection stage?

► Descriptive
► Exploratory

Preliminary Data Collection
This step may be considered as part of the exploratory research.
Page # 36

► Explanatory
► Cannot be determined at this stage of research

Question No: 45 (Marks: 1) - Please choose one

Which one of the following is **NOT** a type of scales used in measurement of concepts?

► Normal Scale

It is traditional to classify scales of measurement on the basis of the mathematical comparisons that are allowable with these scales. Four types of scales are nominal, ordinal, interval, and ratio.
Page # 53

► Ordinal Scale
► Interval scale
► Ratio Scale

Question No: 46 (Marks: 1) - Please choose one

A measure is reliable if it provides consistent _____.

AIAQ

► Hypothesis
► Results

A measure is reliable if it provides consistent results

http://books.google.com.pk/books?id=Cf1D0DvWXI8C&pg=PA364&lpg=PA364&dq=A+measure+is+reliable+if+it+provides+consistent+results&source=bl&ots=lbSOKx-1DA&sig=boaxoP-O26BcJezqkZ-0El29dOs&hl=en&ei=uKlOTeO9HaOShAeI5ZGBBg&sa=X&oi=book_result&ct=result&resnum=3&ved=0CCUQ6AEwAg#v=onepage&q=A%20measure%20is%20reliable%20if%20it%20provides%20consistent%20results&f=false

► Procedure
► Sensitivity

Question No: 47 (Marks: 1) - Please choose one

Which of the following typically does NOT apply to observers in survey research studies?

► They observe predetermined activities.
► They are participant observers.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 09

► They obtain information by watching rather than asking.
► They must be careful not to influence the activities they observe.

Question No: 48 (Marks: 1) - Please choose one

Which of the following is NOT a longitudinal study?

► Panel study
► Trend study
► Cohort study
► Census study

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 12

Question No: 49 (Marks: 3)

Do you think that case studies are empirical? Explain.

Question No: 50 (Marks: 3)

How would you differentiate between **History Effect** and **Mechanical Loss** in Experimental research?

Question No: 51 (Marks: 5)

Write a note on any three varieties of non reactive observations.

AIAAO

Question No: 52 (Marks: 5)

In research process, once you collect the data, how would you perform the scoring index activity? Explain it with the help of example.

Question No: 53 (Marks: 5)

You want to explore females' cosmetic preferences. How would you prepare focus group study for this topic?

Question No: 1 (Marks: 1) - Please choose one

The part of the action research spiral that differentiates this research methodology from other kinds of research is;

► Looking at multiple sources of data.
► Taking action based on results.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381555.cw/index.html
MCQ # 6

► Thinking about or analyzing data in more than one way.
► The kinds of data that are collected.

Question No: 2 (Marks: 1) - Please choose one

If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which of the following type of research?

► Basic
► Evaluation
► Applied

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9865/2525631.cw/index.html#topofquiz1
MCQ # 1

► Grounded theory

Question No: 3 (Marks: 1) - Please choose one

Which type of review compares how different theories address an issue?

► Context review
► Integrated review
► Methodological review
► Theoretical review

Theoretical reviews compare how different theories address an issue.
Page # 27

Question No: 4 (Marks: 1) - Please choose one

Which of the following functions is performed by theoretical framework?

► Elaborates the relationship among the variables.
► Explains the logic underlying these relationships.
► Describes the nature, and direction of the relationships.
► All of the given options.

AFAAQ

Specifically a theoretical framework:
Elaborates the relationship among the variables
Explains the logic underlying these relationships
Describes the nature, and direction of the relationships

Page # 30

Question No: 5 (Marks: 1) - Please choose one

Panel and cohort designs differ in that:

► Cohort studies involve quantitative research, whereas panel studies are qualitative.

► A panel study does not need rules to handle new entrants to households.

► Only a cohort study will suffer from sample attrition.

► A panel study can distinguish between age effects and cohort effects, but a cohort design cannot.

Handouts page # 10

ii. *The panel study* is a powerful type of longitudinal research. In panel study, the researcher observes exactly the same people, group, or organization across time periods. It is a difficult to carry out such study. Tracking people over time is often difficult because some people die or cannot be located. Nevertheless, the results of a well-designed panel study are very valuable.

iii. A cohort analysis is similar to the panel study, but rather than observing the exact same people, a category of people who share a similar life experience in a specified time period is studied. The focus is on the cohort, or category, not on specific individuals. Commonly used cohorts include all people born in the same year (called birth cohorts), all people hired at the same time, all people retire on one or two year time frame, and all people who graduate in a given year. Unlike panel studies, researchers do not have to locate the exact same people for cohort studies. The only need to identify those who experienced a common life event.

MCQ # 9

Question No: 6 (Marks: 1) - Please choose one

Which of the following would LEAST likely be a data source for an action research study of "teachers' questioning techniques in social studies classes"?

► Classroom observation

► Student questionnaires

► Videotaping of classes

► Students' standardized test scores

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html

MCQ # 9

Question No: 7 (Marks: 1) - Please choose one

Which of the following represents excellent advice for conducting an interview?

- ► Listen more and talk less
- ► Don't interrupt
- ► Don't be judgmental about the interviewee's beliefs or views
- ► All of the given options

[PPT]
Qualitative Research Methods

Question No: 8 (Marks: 1) - Please choose one

Why should a business researcher record and transcribe interviews?

- ► It overcomes all possible ethical considerations.
- ► The response of participants can be more readily shared with senior management.
- ► It allows a more thorough examination of what the interviewee has said.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch18/
MCQ # 7

- ► It allows the researcher to demonstrate his/her technical proficiency.

Question No: 9 (Marks: 1) - Please choose one

The Pearson product moment correlation is used to demonstrate the relationship between;

- ► Two continuous variables

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381655.cw/index.html
MCQ # 11

- ► Two rank-ordered variables
- ► Variables that are expected to be curvilinearly related
- ► Dichotomous variables

Question No: 10 (Marks: 1) - Please choose one

The statistic used to determine the relationship between two variables is:

- ► Analysis of covariance
- ► Chi square
- ► Standard deviation
- ► Pearson "*r*"

MCQ # 17

Question No: 11 (Marks: 1) http://vustudents.ning.com - Please choose one

Researchers organize data into all of the following, EXCEPT:

- ► Field
- ► Table

APAQ

Page # 99
Researchers organize data into fields, records, and files.

- ► Record
- ► File

Question No: 12 (Marks: 1) - Please choose one

Which of the following is NOT a necessary step in conducting experimental research?

- ► Manipulation of an independent variable
- ► Selection of measuring instruments
- ► Creating a hypothesis stating a causal relationship between variables
- ► Dividing the sample into subgroups to control for extraneous variables

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381867.cw/index.html
MCQ # 02

Question No: 13 (Marks: 1) - Please choose one

Testing most likely, negatively affect internal validity when:

- ► The information tested is attitudinal in nature
- ► The time between pre- and posttest is short

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381876.cw/index.html
MCQ # 2

- ► The instrument is unreliable
- ► The participants are very low scorers

Question No: 14 (Marks: 1) - Please choose one

Which of the following questions can be answered using content analysis?

- ► How do managers behave in the face of employment insecurity?
- ► How do the media report corporate re-branding exercises?

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch12/
MCQ # 01

- ► What effect does organizational size have on marketing strategy?
- ► What are the most popular leisure activities amongst the over-50s?

Question No: 15 (Marks: 1) - Please choose one

Which one is not the part of non reactive research?

- ► Physical traces
- ► Archives
- ► Observations
- ► Interviews

PAGE # 124
Varieties of Non-Reactive Observations
Physical Traces:

Observations:

Question No: 16 (Marks: 1) - Please choose one

On which component of his field notes did Mr. Majid focused when he expressed in his notes his thoughts and ideas about what he observed?

► Description
► Reflection

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1489/381392.cw/index.html
MCQ # 01

► Protocol
► Formal data

Question No: 17 (Marks: 1) http://vustudents.ning.com - Please choose one

Which of the following is linked with an abstract model of underlying relations or causal mechanism?

► Historical comparative research

PAGE # 148
Synthesis links specific evidence with an abstract model of underlying relations or causal mechanism.

► Social research
► Action research
► Experimental research

Question No: 18 (Marks: 1) - Please choose one

Historians organize evidence usually in:

► Comparative form
► Narrative form

PAGE # 152
Historians organize evidence as they write works of history. They often write *narrative history*.

► Logical form
► Critical form

Question No: 19 (Marks: 1) - Please choose one

What is the difference between a focus group and a group interview?

► A focus group is used to analyse group interaction, whereas a group interview is used as a straight forward data collection tool.

MCQ # 1
http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch19/

► A focus group is used only for political research, whereas group interviews are more widely used in the social sciences.
► A focus group is used at the planning stage of a research project, whereas a group interview is part of the actual data collection.

AFAQ

► **A focus group is used to discuss a wide range of issues, whereas a group interview looks at one specific topic.**

Question No: 20 (Marks: 1) - Please choose one

In which component of the method section would you find a discussion of validity and reliability?

► Participants
► Instruments
http://wps.prenhall.com/chet_airasian_edresearch_7/5/1487/380850.cw/site_search_frame/index.html
► Design
► Procedures

Question No: 21 (Marks: 1) - Please choose one

Which of the following sampling is least reliable but normally the cheapest and easiest to conduct?

► Purposive Sampling
► Snowball Sampling
► Convenience Sampling

Convenience samples are least reliable but normally the cheapest and easiest to conduct
P # 90

► Quota Sampling

Question No: 22 (Marks: 1) - Please choose one

Which of the following sampling is most often used during the exploratory phase of a research project and is perhaps the best way of getting some basic information quickly and efficiently?

► Convenience Sampling

Convenience sampling is most often used during the exploratory phase of a research project and is perhaps the best way of getting some basic information quickly and efficiently.
P # 90

► Quota Sampling
► Snowball Sampling
► Purposive Sampling

Question No: 23 (Marks: 1) http://vustudents.ning.com- Please choose one

Which of the following is a form of Non-random sampling?

► Snowball sampling
► Convenience sampling
► Quota sampling

AFAQ

► All of the given option

PAGE # 90
OR
Nonrandom Sampling Techniques
The other major type of sampling used in quantitative research is nonrandom sampling (i.e., when you do not use one of the ransom sampling techniques). There are four main types of nonrandom sampling:
The first type of nonrandom sampling is called convenience sampling
The second type of nonrandom sampling is called quota sampling
The third type of nonrandom sampling is called purposive sampling
The fourth type of nonrandom sampling is called snowball sampling
http://www.southalabama.edu/coe/bset/johnson/lectures/lec7.htm
OR
http://en.wikipedia.org/wiki/Nonprobability_sampling

Question No: 24 (Marks: 1) - Please choose one

Sampling in qualitative research is similar to which type of sampling in quantitative research?

► Simple random sampling
► Systematic sampling
► Quota sampling
► Purposive sampling

PAGE # 90

Question No: 25 (Marks: 1) - Please choose one

Which of the following relates with an abstract model of underlying relations or causal mechanism?

► Analysis
► Synthesis

Synthesis links specific evidence with an abstract model of underlying relations or causal mechanism.
PAGE # 148

► Results
► Findings

Question No: 26 (Marks: 1) - Please choose one

The easiest way to describe the numerical data of one variable is;

► Frequency distribution

The easiest way to describe the numerical data of one variable is with a frequency distribution.
PAGE # 104

AHAQ

► Normal distribution
► Poisson distribution
► Probability distribution

Question No: 27 (Marks: 1) - Please choose one

All of the following are ways to show a table in percentages, EXCEPT;

► By margins

There are three ways to percentage a table: by row, by column, and for the total.
Page # 107

► By row
► By column
► For the total

Question No: 28 (Marks: 1) - Please choose one

Which of the following is **True** for survey research?

► Survey research is a subset of experimental research.
► Survey research is often used in experimental research.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 2

► Survey research is never used in experimental research.
► Survey research is always used in experimental research.

Question No: 29 (Marks: 1) - Please choose one

When an interviewer unintentionally and mistakenly checks the wrong response on a checklist during an interview, this is an example of:

► Social desirability bias
► Interviewer error

A type of non-sampling error caused by mistakes made by the interviewer These may include influencing the respondent in some way, asking questions in the wrong order, or sing slightly different phrasing (or tone of voice) than other interviewers.

► Interviewer cheating
► Sponsorship bias

Question No: 30 (Marks: 1) - Please choose one

When an interviewer asks a respondent: "Why do you shop at Liberty's department store?" this is an example of a:

► Unstructured question
► Structured question
► Disguised question
► Social desirability question

AIAAQ

Question No: 31 (Marks: 1) - Please choose one

All of the following are stages in the selection of a sample **EXCEPT**:

- ► Determine sample size
- ► Analyze data

Stages in the Selection of a Sample
Step 1: Define the target population
Step 2: Select The Sampling Frame
Step 3: Probability OR Non-probability?
Step 4: Plan Selection of sampling units
Step 5: Determine Sample Size
Step 6: Select Sampling units
Step 7: Conduct Fieldwork

- ► Conduct fieldwork
- ► Select a sampling frame

Question No: 32 (Marks: 1) - Please choose one

Codes are rules for _____ data.

- ► Classifying
- ► Interpreting
- ► Recording
- ► All of the given options

Although codes are generally considered to be numerical symbols, they are more broadly defined as the rules for interpreting, classifying, and recording data
PAGE # 99

Question No: 33 (Marks: 1) - Please choose one

When a competitor introduces a 25% price cut in order to blunt the effect of a test marketing study, this is an example of a:

- ► Maturation effect

PAGE 120
Maturation Effect: Cause and effect relationship can also be contaminated by the effects of the passage of time – another uncontrollable variable. Such contamination is called Maturation effect.

- ► Testing effect
- ► History effect
- ► Cohort effect

Question No: 34 (Marks: 1) - Please choose one

All of the following elements of Observation is/are included in Non Reactive research **EXCEPT**:

AIAAQ

► Count Behaviors
► Time Duration
► **External Appearance**
► Other Records

PAGE # 124
Observations:
• ***External Appearance****:* How people appear may indicate social factors. For example, researcher watches students to see whether they are more likely to wear their college's colors and symbols after the college team won or lost.
• ***Count Behaviors****:* Counting how many people do something can be informative. For example researcher may count the number of men and women who come to a full stop and those who come to a rolling stop at a traffic stop sign. This suggests gender difference in driving behavior.
• ***Time Duration****:* How long people take to do things may indicate their intention. For example
a researcher may measure how long men and women pause in front of a particular painting.
Time taken may indicate their interest in the painting.

Question No: 35 (Marks: 1) - Please choose one
Which of the following element is not included for behavioral observation?

► Space
► **Direction**
► Frequency
► Accretion

PAGE # 126

Question No: 36 (Marks: 1) - Please choose one
The study of documents used by writers is a method of _____.

► In-depth analysis
► Time series analysis
► Regression analysis
► None of the given options

Content analysis is also the study of documents through which the writers try to communicate, though some of the documents (like population census) may simply contain figures.
Page # 129

Question No: 37 (Marks: 1) - Please choose one

AFAAC

When a manufacturer studies his most successful retailer in depth in order to determine some better ideas for displaying bicycles in its retail stores, this is an example of:

► An experiment
► A test market
► A case study

Case study: It is an in-depth analysis of a unit which could be an individual person, a couple, a group, or an organization
PAGE # 38

► Causal research

Question No: 38 (Marks: 1) - Please choose one

The written set of guidelines that describes an outline of topics to be covered by a focus group moderator is called a:

► Discussion guide
PAGE 155
OR
A detailed written outline of topics the moderator will cover during a focus group discussion.
► Concept test
► Case study
► All of the given options

Question No: 39 (Marks: 1) - Please choose one

Which of the following is a disadvantage of focus groups?

► Requires objective, sensitive, and effective moderators
► May not be useful for discussing sensitive topics
► High cost
► All of the given options

Disadvantages of Focus Groups
Require objective, sensitive, and effective moderators.
May have unique sampling problems.
May not be useful for discussing sensitive topics in face-to-face situations.
Cost a considerable amount of money, particularly when they are not conducted by someone employed by the company desiring the focus group.
Higher cost

Question No: 40 (Marks: 1) - Please choose one

Which section of a report gives a summary of the contents, including the purpose, description of the participants, the results, and any conclusions being offered?

AFAQ

► Methodology
► **Introduction**
► Abstract

An *abstract* is a summary of a body of information. Sometimes, abstracts are in fact called summaries—sometimes, executive summaries or executive abstracts. There are different kinds of abstracts—your technical report uses two types: the descriptive abstract and the informative abstract.
OR HANDOUTS PAGE 161

► Letter of transmittal

Question No: 41 (Marks: 1) - Please choose one

Which of the following characteristic of the scientific method is defined as the confirmation or refutation of the observation through the scientific method by using sensory experience?

► **Empirical**
► Verifiable

Verifiable
Observations made through scientific method are to be verified again by using the senses to confirm or refute the previous findings
PAGE # 04

► Observable
► Cumulative

Question No: 42 (Marks: 1) - Please choose one

Basic research can also be called as

► Practical research
► Fundamental Research

Basic research (also called academic research or pure research or fundamental research).
PAGE # 08

► Action research
► Assessment research

Question No: 43 (Marks: 1) - Please choose one

Which of the following statement is true about the peer review?

► Name of the article's author is not mentioned to avoid biases
► It should be accepted
► It should be published in a well known journal
► **Name of the author should be mentioned for the further correspondence**

Question No: 44 (Marks: 1) - Please choose one

After making the inventory of the relevant variables the next step is to:

AIAQ

► Provide logic for the relationship
► Make inventory of the propositions
► Identify the relationships between the variables

In the discussions the relevant variables are identified, and relationships are postulated. Once the variables are identified, the same focus group discussions help in the formulation of questions, along with the response categories, for the measurement of variables.
PAGE # 156

► Deduce hypothesis

Question No: 45 (Marks: 1) - Please choose one

Theoretical framework helps to:

► Deduce the hypothesis
► Reject the hypothesis
► Test the hypothesis

From the theoretical framework, then, testable hypotheses can be developed to examine whether theory formulated is valid or not. The hypothesized relationships can thereafter be tested through appropriate statistical analysis.
PAGE # 30

► Accept the hypothesis

Question No: 46 (Marks: 1) - Please choose one

Which of the following is NOT a method of narrowing a topic?

► Literature review
► Specifying the context
► Talk to the experts
► Pilot testing

Techniques for Narrowing a Topic into a Research Question
1. Examine the literature.
2. Talk over ideas with others.
3. Apply to a specific context.
4. Define the aim or desired outcome of the study.
PAGE # 33

Question No: 47 (Marks: 1) - Please choose one

The working definition of the variables is called:

► Theoretical definition
► Dictionary definition
► Operational definition

AIAQ

Operational definition is also called a *working definition* stated in terms of specific testing or measurement criteria.
PAGE # 18

► Fundamental definition

Question No: 48 (Marks: 1) - Please choose one

Which of the following characteristic is reflected by an interval scale?

► The distance between each participant's individual scores.
► Arithematic operations can be performed after data collection
► Classify the data into exclusive categories
► All of the given options

http://books.google.com/books?id=eNsVUGTMcDoC&pg=PA138&dq=characteristic+is+reflected+by+an+interval+scale&hl=en&ei=pD5mTJH9MojRcfiPva0P&sa=X&oi=book_result&ct=result&resnum=1&ved=0CCkQ6AEwAA#v=onepage&q=characteristic%20is%20reflected%20by%20an%20interval%20scale&f=false

Question No: 49 (Marks: 3)

What is the logic of field research? How does a field researcher work?

Question No: 50 (Marks: 3)

Historical-Comparative research focuses on some factors, list down those factors?

Question No: 51 (Marks: 5)

Briefly describe the type of observation you would use, the field notes you would develop, and some general principles you would follow to ensure successful data collection.

Question No: 52 (Marks: 5)

What are the functions of a recorder? http://vustudents.ning.com

Question No: 53 (Marks: 5)

Briefly discuss the importance of Data Transformation in Research with the help of example?

Question No: 1 (Marks: 1) - Please choose one
Which of the following is NOT an assumption of action research?

Action researchers have basic research skills to collect and analyze data.
All professionals need and want feedback on their performance.
Results enable the researchers to evaluate the performance of others.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 06
Teachers are capable of assuming responsibility for their own professional growth.

Question No: 2 (Marks: 1) - Please choose one
Which of the following statements it TRUE for operational definition?

It is one that bears no relation to the underlying concept.
It is an abstract, theoretical definition of a concept
A definition of a concept in terms of specific and empirical measures

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch06/
MCQ # 01
HANDOUTS PAGE # 18 & 50

It is one that refers to opera singers and their work.

Question No: 3 (Marks: 1) - Please choose one
Which of the following statements best defines hypothesis?

A quantitative study
A tentative prediction of the results of the research

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9865/2525651.cw/content/index
MCQ @ 24
A qualitative research design
The operational definition of the study

Question No: 4 (Marks: 1) - Please choose one
When the research starts from the effects and tracing the reasons back in time, what does it called?

Case study

AFAAQ

It is more like a clinical analysis in retrospect; starting from the effect and tracing the reasons back in time. The researcher takes the history of the situation and makes use of any other relevant information about the case to identify the factors leading to the present situation

Page # 38

Experiment
Observation studies
Historical comparitive research

Question No: 5 (Marks: 1) - Please choose one

The extent to which a test provides scores that are meaningful, appropriate, or useful is referred to as;

Reliability
Accuracy
Internal validity
Validity

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9866/2525945.cw/content/index
MCQ # 18

Question No: 6 (Marks: 1) - Please choose one

Mr. Hasan s son has applied to a high school in Florida, but the application was denied solely on his low score on the Iowa Test of Basic Skills (ITBS). His son wants to attend this school and contends his current grades and other standardized test scores speak well to both his past work and future academic capability. Which of the following characteristics of the ITBS is being questioned by this student?

Construct validity
Content validity
Predictive validity

Predictive validity:
Criterion validity whereby an indicator predicts future events that are logically related to a construct is called a predictive validity.
PAGE # 56
Concurrent validity

Question No: 7 (Marks: 1) - Please choose one

Internal consistency estimates of reliability such as the KR-20 or Cronbach's alpha are used more frequently than other estimates such as test-retest or parallel forms because internal consistency estimates;

Are easily calculated
Require only one administration of a test

AIAAQ

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1489/381232.cw/index.html
MCQ # 05
Are more accurate than all other types of estimates
Are usually higher

Question No: 8 (Marks: 1) - Please choose one
Which of the following functions is performed by the Odinal scale?

Categorize
Distance
Order

Ordinal Scale
Ordinal scales include the characteristics of the nominal scale plus an indicator of order.
PAGE # 53
Unique origin

Question No: 9 (Marks: 1) - Please choose one
Which of the following is measured by the Interval scale?

Order of the object
Magnitude of the object
Categorize the object
All of the given options

On interval measurement scales, one unit on the scale represents the same magnitude on the trait or characteristic being measured across the whole range of the scale.
OR HANDOUTS PAGE # 53

Question No: 10 (Marks: 1) - Please choose one
Following are the properties of nominal scale, except;

Least powerful
Suggest no order
Provide categorical information
Provide magnitude of object

Nominal Scale
A nominal scale is the one in which the numbers or letters assigned to objects serve as labels for identification or classification. This measurement scale is the simplest type. With nominal data, we are collecting information on a variable that naturally or by design can be grouped into two or more categories that are mutually exclusive, and collectively exhaustive.

ALAAQ

Nominal scales are the least powerful of the four scales. They suggest no order or distance relationship and have no arithmetic origin. Nevertheless, if no other scale can be used, one can almost always one set of properties into a set of equivalent classes.
PAGE # 53

Question No: 11 (Marks: 1) - Please choose one
What is the difference between interval/ratio and ordinal variables?

Ordinal data can be rank ordered, but interval/ratio data cannot.
The distance between categories is equal across the range of interval/ration data.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch14/
MCQ # 01
Interval/ratio variables contain only two categories.
Ordinal variables have a fixed zero point, whereas interval/ratio variables do not.

Question No: 12 (Marks: 1) - Please choose one
A study design in which the researcher might create_____ to establish cause-and-effect relationship is called Experimental Design.

An artificial setting, control some variables and manipulates the independent variable
A natural setting, control some variables and manipulates the dependent variables
An artificial setting, control some variables and manipulates the dependent variable
All of the given options

Question No: 13 (Marks: 1) - Please choose one
Which of the following would LEAST likely be a data source for an action research study of "teachers' questioning techniques in social studies classes"?

Student questionnaires
Videotaping of classes
Students' standardized test scores

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 09
Classroom observation

Question No: 14 (Marks: 1) - Please choose one
Teachers are advised to predict the results of student attitudinal questionnaires, because;

It will help them decide if students answered truthfully.
It gives them a point of comparison against which to judge actual responses.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 10
It will allow them to apply statistical procedures in analyzing results.

AIAO

It helps them familiarize themselves with the questionnaires.

Question No: 15 (Marks: 1) - Please choose one
Which of the following is an example of a question about normative standards and values?

How many workers are employed at this plant?
What is your attitude towards the management at this plant?
Do you always cast your vote in trade union elections?

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch10/
MCQ # 03
Are you aware of the main features of the European Union Directive for informing and consulting employees?

Question No: 16 (Marks: 1) - Please choose one
Questions that include negatives should be avoided because:

The respondent may miss out the negative word.
The respondent may be unsure how to answer if the question includes a double negative.
The respondent may be led by the question.
All of the given options.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/
OR
When using a Likert scale it can be difficult to avoid asking a question with a negative, however the researcher should attempt to avoid them if possible.

Question No: 17 (Marks: 1) - Please choose one
Random assignment to treatment groups is characteristic of which kind of research?

Causal-comparative
Correlational
Experimental

MCQ # 07

Question No: 33 (Marks: 1) - Please choose one
Determining the sample interval (represented by K), randomly selecting a number between 1 to K, and including each K element in your sample are the steps for which form of sampling?

Simple Random Sampling
Stratified Random Sampling
Systematic Sampling

Systematic sampling
Simple or stratified in nature
Systematic in the "picking-up" of element. E.g. every 5th. visitor, every 10th. House, every 15th. minute
Steps:
* Number the population (1,…,N)
* Decide on the sample size, n
* Decide on the interval size, k = N/n
* Select an integer between 1 and k
* Take case for every kth. unit
Cluster sampling

Question No: 34 (Marks: 1) - Please choose one
A focus group session is ideally for;

1 hour
1 and half hour

Duration, a focus group session typically lasts up to an hour and a half.
PAGE # 155
2 hours
More than 2 hours

Question No: 35 (Marks: 1) - Please choose one
In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?

Dependent variable
Extraneous variable
Independent variable

AFAAQ

MCQ # 02
It enables students to gain experience of the workplace

Question No: 41 (Marks: 5)
Defend the use of the term inductive to describe qualitative data analysis and interpretation.

Question No: 42 (Marks: 5)
What are the main parts of a research report?

Question No: 43 (Marks: 10)
Many universities do not allow their students to conduct experimental research to fulfil thesis or dissertation requirements. Provide a rationale for changing this practice, acknowledging the limitations of experimental research, but also citing at least three reasons that action research should be accepted.

Question No: 44 (Marks: 10)
A multination company ABC has launched a new tooth paste Cleanex in Pakistan. After eight months the company wants to analyze the consumer satisfaction about their tooth paste. For research purpose, develop questions for the following scenarios that can be used in questionnaire.
See the consumer preference for tooth paste or tooth powder by using nominal scale.
i. See the consumer preference for Cleanex Tooth Paste by using ordinal scale.
ii. See the important characteristics of the Cleanex Tooth Paste by using interval scale so that the company can modify its strengths and improve its weaknesses.
iii. Check the monthly consumption of the tooth paste by using the ratio scale.

Question No: 19 (Marks: 1) - Please choose one
When multiple questions are asked in one question, it leads to ambiguous answers provided by the respondents.

True

http://en.wikipedia.org/wiki/Multiple_choice
OR
Page # 78
Avoid Double-Barreled Questions
Make each question about one and only one. A double barreled question consists of two or more questions joined together. It makes the respondent's answer ambiguous. For example, if asked, "Does this company have pension and health insurance benefits?" a respondent at the company with health insurance benefits only might answer either yes or no. The response has an ambiguous meaning and the researcher cannot be certain of the respondent's intentions. When multiple questions are asked in one question, thee results may be exceedingly difficult to interpret.

False

Question No: 20 (Marks: 1) - Please choose one
An advantage of communication analysis is that it provides access to the inaccessible subjects.

True

False

Question No: 21 (Marks: 1)
Pretest is the phase when the _____variable is measured prior to the introduction of treatment.

Question No: 22 (Marks: 1)
If the percentages are calculated column wise in a table, then we will make comparison between the variables in a_**frequency**_.

Question No: 23 (Marks: 1)
In order to make two identical groups for experiment, the procedures to be undertaken are randomization and **matching.**

Question No: 24 (Marks: 1)

AFAQ

The main advantage of _**mail** _questionnaire is that a wide geographical area can be covered in the survey.

Question No: 25 (Marks: 1)
A type of bias in questions occurs when they are phrased in an emotionally charged manner, they are described as __**Loaded**__ questions.
Page No.78

Question No: 26 (Marks: 5)
Make one hypothesis for each of the following types of hypotheses. (1 mark each)
i. If-then hypothesis
ii. Directional hypothesis
iii. Non directional hypothesis
iv. Null hypothesis
v. Alternative hypothesis
Answer:

i- If-then hypothesis:

If there is increase in cost there is decrease in profit.

ii. Directional hypothesis:

Increase in absentieesm causes a decrease in productivity level of employees.

iii. Non directional hypothesis:

Productivity level of employees is associated with rate of absenteeism.

iv. Null hypothesis:

There is no association between level of productivity and absenteeism.

v. Alternative hypothesis :

There is a relationship between level of job commitment of officers and their level of efficiency.

Question No: 27 (Marks: 5)
Which is the most powerful scale among Nominal, Ordinal, Interval and Ratio scale, and why?
Answer:
The highest level of measurement is a ratio scale. This has the properties of an interval scale together with a fixed origin or zero point. Examples of variables which are ratio scaled include weights, lengths and times. Ratio scales permit the researcher to compare both differences in scores and the relative magnitude of scores. For instance the difference between 5 and 10 minutes is the same as that between 10 and 15 minutes, and

AFAAQ

10 minutes is twice as long as 5 minutes. Suffice it to say that virtually all statistical operations can be performed on ratio scales.

Question No: 28 (Marks: 5)
A manager finds that off-the-job classroom training has a great impact on the productivity of the employees in her department. However, she also observes that employees over 60 years of age do not seem to derive much benefit and do not improve with such training.

i. Identify the independent, dependent and moderating variables in the given scenario. (3)

Answer:
Inependent Variable: Off-the-job classroom training
Dependent Variable: Employees performance
Moedrating Variable: Employees age over 60 years

ii. How the moderating variable you identified in part (i) is affecting the independent-dependent variable relationship in the scenario? (2)
Answer:
The moderating variable is one that has a strong contingent effect on the independent variable and dependent variable relationship. That is the presence of a third variable modifies the original relationship between the independent and the dependent variable In the scenario above employees age over 60 years is acting as moderating variable because it is the variable which affects the relationship of employees performance (dependent variable) and off-the-job classrom training (independent variable).which was positive in above case but age over 60 years reduces the positivity .

Question No: 29 (Marks: 5)
The accounts executive has established a new accounting system that utilizes maximum computer technology. Before making further changes, he would like to get a feel for how the accounting clerks react to the new system by acting as if he has no doubts about their acceptability of the new system. He may then casually talk to the first five accounting personnel that walk into his office, trying to gauge their reactions.

i. Describe the type of sampling the director should use in the given scenario, probability or non probability? (1)

Answer:
Director should use probability sampling as probability sampling is the technique in which some known elements of population participated in order to provide useful descriptions.

ii. What type of sampling technique is being used and why? Explain. (2)

Answer:
Director should use probability sampling as probability sampling is the technique in which some known elements of population participated in order to provide useful descriptions.

AIAAO

iii. Give two characteristics of the type of sampling technique that you selected in part (ii).

Answer:

Two characteristics of probability sampling:

1- Random sampling lets a researcher statistically calculate the relationship between the sample and the population – that is the size of *sampling error*

2- All possible samples have a known and specified probability of being drawn.

Question No: 30 (Marks: 5)
You are doing research on "how to increase the efficiency level of labor". For the research purpose you have conducted an interview with the supervisor.
Give two structured and two unstructured questions that you may ask related to your research. (2.5+2.5)

Question No: 31 (Marks: 10)
What is meant by validity and reliability? Describe the situations in which validity and reliability problems occur.

MCQ # 05
Intervening variable

Question No: 8 (Marks: 1) - Please choose one
Which of the following is the difference between measures and indicators?
Measures are unambiguous quantities, whereas indicators are devised from common sense understandings.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch06/
MCQ # 03
OR
Measures include things like demographics (of age, income and so on), which can be counted. In fact, usually we think of measures as raw numbers. Often though, what we want to research does not lend itself immediately to straightforward calculation on numbers of things and how they vary but on slightly vaguer concepts. Like job satisfaction, for example. In this case we need a number of attitude statements, which, taken together, can be argued to represent the concept. These separate statements are indicators and often represent our 'common sense' understanding of a concept. Later, these can be coded to turn them into numbers for statistical analysis.
Indicators have a more direct relationship to the underlying concept than measures.
Measures are intuitively devised and then applied as if they were direct indicators of a concept.
Indicators are unambiguous quantities, whereas measures are subjective and value laden.

Question No: 9 (Marks: 1) - Please choose one
Which of the following is NOT the implication of Ordinal scale?

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate
PAGE # 53

Question No: 10 (Marks: 1) - Please choose one
Measurement reliability refers to which of the following?

Accuracy of the scores
Dependency of the scores

Which of the following sampling is least reliable but normally the cheapest and easiest to conduct?
Purposive Sampling
Snowball Sampling
Convenience Sampling

Convenience samples are least reliable but normally the cheapest and easiest to conduct.
PAGE # 90
Quota Sampling

Question No: 32 (Marks: 1) - Please choose one
Which of the following is a form of Non-random sampling?

Snowball sampling
Convenience sampling
Quota sampling
All of the given option

AIAQ

PAGE # 90
OR
Nonrandom Sampling Techniques
The other major type of sampling used in quantitative research is nonrandom sampling (i.e., when you do not use one of the ransom sampling techniques). There are four main types of nonrandom sampling:
The first type of nonrandom sampling is called convenience sampling
The second type of nonrandom sampling is called quota sampling
The third type of nonrandom sampling is called purposive sampling
The fourth type of nonrandom sampling is called snowball sampling

Question No: 33 (Marks: 1) - Please choose one
Which of the following has greatly facilitated the researcher to conduct tabulation and statistical analysis?

SPSS
MINITAB
SYSTAT
All of the given options

The proliferation of computer technology in business and universities has greatly facilitated tabulation and statistical analysis. Commercial packages eliminate the need to write a new program every time you want to tabulate and analyze data with a computer. SAS, Statistical Package for the Social Sciences (SPSS), SYSTAT, Epi. Info. And MINITAB is commonly used statistical packages.
Page # 104

Question No: 34 (Marks: 1) - Please choose one
What is the place of quotations in referencing?

Quotations should be given at the end.
Quotations should be given exactly as they appear in the source.

http://www.latrobe.edu.au/linguistics/resources_hons/Brochure/Para10.pdf
Quotations should be given in left margins only.
Quotations should not be given at all.

Question No: 35 (Marks: 1) - Please choose one
Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?

Experimental control

A.A.Q

Differential influence
Matching
Analysis of covariance

http://www.southalabama.edu/coe/bset/johnson/mcq/mc9.htm
MCQ # 07

Question No: 36 (Marks: 1) - Please choose one
Which of the following could be used for randomly assigning participants to groups in an experimental study?

Split-half
Even versus Odd numbers
Use a list of random numbers or a computer randomization program

http://www.southalabama.edu/coe/bset/johnson/mcq/mc9.htm
MCQ#15
Let the researcher decide which group will be the best

Question No: 37 (Marks: 1) - Please choose one
The design in which one group of research participants is administered a treatment and is then compared, on the dependent variable, with another group of research participants who did not receive the experimental treatment is known as:

One-group posttest-only design
One-group pretest-posttest design
Posttest-only design with non-equivalent groups

http://www.southalabama.edu/coe/bset/johnson/mcq/mc9.htm
MCQ # 26
Time series design

Question No: 38 (Marks: 1) - Please choose one
Which of the following is referred to as the influence of a single independent variable?

Interaction effect
Reactive effect
Main effect

http://www.southalabama.edu/coe/bset/johnson/mcq/mc9.htm
MCQ # 27
Proactive effect

Question No: 39 (Marks: 1) - Please choose one
Which of the following types of analysis can be done using secondary analysis?

AFAQ

The analysis of specific subgroups
Longitudinal analysis
Cross-cultural analysis
All of the given options

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch13/
MCQ # 04

Question No: 40 (Marks: 1) - Please choose one
Which of the following is/are advantage(s) of the self-completed questionnaire?

Inability to confirm who completed the questionnaire
Its unsuitability for some kinds of respondents
Inability to ask many questions that are not directly relevant to the respondent
Easy to justify the answer

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch09/
MCQ # 02 U WILL SE THE REMANING IS DISADVANTAGE of the self-completed questionnaire

Question No: 41 (Marks: 5)
Defend the use of the term inductive to describe qualitative data analysis and interpretation.

Question No: 42 (Marks: 5)
Briefly discuss the Solomon s Four Group Design in experimental research with the help of example?

Question No: 43 (Marks: 10)
A multination company ABC has launched a new tooth paste Cleanex in Pakistan.

After eight months the company wants to analyze the consumer satisfaction about their tooth paste. For research purpose, develop questions for the following scenarios that can be used in questionnaire.
See the consumer preference for tooth paste or tooth powder by using nominal scale.
i. See the consumer preference for Cleanex Tooth Paste by using ordinal scale.
ii. See the important characteristics of the Cleanex Tooth Paste by using interval scale so that the company can modify its strengths and improve its weaknesses.
iii. Check the monthly consumption of the tooth paste by using the ratio scale.

Question No: 44 (Marks: 10)
What are different types of probability sampling? Explain any two with detail.

Question No: 45 (Marks: 10)
What are different advantages and disadvantages of using secondary data?

AFAQ

FINALTERM EXAMINATION
Fall 2009
AFAAQ_TARIQ@YAHOO.COM
STA630- Research Methods

Question No: 1 (Marks: 1) - Please choose one

The part of the action research spiral that differentiates this research methodology from other kinds of research is;

► Looking at multiple sources of data.
► Taking action based on results.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381555.cw/index.html
MCQ # 06

► Thinking about or analyzing data in more than one way.
► The kinds of data that are collected.

Question No: 2 (Marks: 1) - Please choose one

Individuals who engage in action research are most concerned with:

► Supporting the way things are being done.
► Publishing results
► Proving a hypothesis
► Improvement

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 20

Question No: 3 (Marks: 1) - Please choose one

Research may differ along a series of dimensions. Which of the following may be applied to this statement?

► The level of manipulation used to elicit data collection.
► The data-collection technique.
► The type of data collected.
► Type, technique and manipulation of data collection

Question No: 4 (Marks: 1) - Please choose one

Which of the following statements best defines hypothesis?

► A quantitative study.
► A tentative prediction of the results of the research.

AFAAQ

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9865/2525651.cw/content/index
MCQ # 24

- ► A qualitative research design.
- ► The operational definition of the study.

Question No: 5 (Marks: 1) - Please choose one

What is the first step in the research process?

- ► Problem definition
- ► Define broad problem area

The research process consists of a number of steps. The first step in any research is selecting the topic, which could start from the broad area of interest
Page # 33

- ► Theoretical framework
- ► Preliminary data collection

Question No: 6 (Marks: 1) - Please choose one

When there is a need of generating new ideas for hypotheses or to interpret the results of some research, which one is the best research deign?

- ► Experiment
- ► Surveys
- ► Focus group discussion

Focus group discussions: It is a discussion of an issue by 6-12 persons with a moderator for 1-2 hours. The issue can be a public concern, a product, a television program, a political candidate, or a policy. Focus groups are useful in exploratory research or to generate new ideas for hypotheses, and the interpenetration of results.
PAGE # 38

- ► Communication analysis

Question No: 7 (Marks: 1) - Please choose one

Which of the following is an example of deception in business research?

- ► The obtaining of company material without permission.
- ► The researcher wearing a disguise during an observation.
- ► The researcher representing their research as being about a different topic.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch05/
MCQ # 09

- ► The researcher failing to ask permission to interview someone.

Question No: 8 (Marks: 1) - Please choose one

Which of the following is least likely to occur as an ethical problem with electronic research?

AIAQ

► Privacy could be invaded.
► People are not likely to be able to stop once they have begun participating.
► Debriefing could be avoided.
► Informed consent cannot be completely monitored.

Question No: 9 (Marks: 1) - Please choose one

All of the following are unethical issues, EXCEPT;

► Invoicing irregularities
► Avoiding legal liability
► Misrepresenting results
► Seeking permission for entry

Unethical activities
• Violating nondisclosure agreements.
• Breaking respondent confidentiality.
• Misrepresenting results.
• Deceiving people.
• Invoicing irregularities.
• Avoiding legal liability.
Page # 41

Question No: 10 (Marks: 1) - Please choose one

Which of the following is the difference between measures and indicators?

► Measures are unambiguous quantities, whereas indicators are devised from common sense understandings.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch06/
MCQ # 03

► Indicators have a more direct relationship to the underlying concept than measures.
► Measures are intuitively devised and then applied as if they were direct indicators of a concept.
► Indicators are unambiguous quantities, whereas measures are subjective and value-laden.

Question No: 11 (Marks: 1) - Please choose one

The extent to which a test provides scores that are meaningful, appropriate, or useful is referred to as;

► Reliability
► Accuracy
► Internal validity
► Validity

AIAAQ

MCQ # 18

Question No: 12 (Marks: 1) - Please choose one

Which of the following functions is performed by the Ordinal scale?

► Categorize
► Distance
► Order

Ordinal scales include the characteristics of the nominal scale plus an indicator of order.
PAGE # 53

► Unique origin

Question No: 13 (Marks: 1) - Please choose one

What is the difference between interval/ratio and ordinal variables?

► Ordinal data can be rank ordered, but interval/ratio data cannot.
► The distance between categories is equal across the range of interval/ration data.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch14/
MCQ # 01

► Interval/ratio variables contain only two categories.
► Ordinal variables have a fixed zero point, whereas interval/ratio variables do not.

Question No: 14 (Marks: 1) - Please choose one

Which of the following statement refers to cross-sectional design?

► A comparison of two or more variables over a long period of time
► The collection of data from more than one case at one moment in time

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch02/
MCQ # 05

► One that is devised when the researcher is in a bad mood
► A study of one particular section of society, e.g. the middle classes

Question No: 15 (Marks: 1) - Please choose one

Which of the following is TRUE for research plan?

► It should be detailed.
► It should be given to others for review and comments.
► It sets out the rationale for a research study.
► All of the given options

http://www.scribd.com/doc/22683412/Lecture-Notes-Research-Chaper-1-9

Question No: 16 (Marks: 1) - Please choose one

Which of the following typically does NOT apply to observers in survey research studies?

AIAO

► They observe predetermined activities.
► They are participant observers.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 09

► They obtain information by watching rather than asking
► They must be careful not to influence the activities they observe.

Question No: 17 (Marks: 1) - Please choose one

Which of the following is **not** an advantage of the self-completion questionnaire over the structured interview?

► It is cheaper to administer.
► It is quicker to administer.
► It is easier to prompt the interviewee.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch09/
MCQ # 01

► It is easier to remove interviewer effects.

Question No: 18 (Marks: 1) - Please choose one

Mr. X has coded his observations to hide the identity of each of the three participants in his study. He is ensuring;

► protection from harm
► confidentiality

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1489/381347.cw/index.html
MCQ # 01

► informed consent
► anonymity

Question No: 19 (Marks: 1) - Please choose one

The cover letter to a questionnaire study should contain all of the following, EXCEPT;

► A list of participants

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381582.cw/index.html
MCQ # 17

► A self-addressed, stamped envelope
► Purpose of the study
► Reasons to respond

Question No: 20 (Marks: 1) - Please choose one

Teachers are advised to predict the results of student attitudinal questionnaires, because;

AIAAO

► It will help them decide if students answered truthfully.
► It gives them a point of comparison against which to judge actual responses.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 10
► It will allow them to apply statistical procedures in analyzing results.
► It helps them familiarize themselves with the questionnaires.

Question No: 21 (Marks: 1) - Please choose one

In conducting an action research study of "student's organizational skills during class in a particular school", which of the following would NOT likely to provide useful data?

► Interviews with teachers
► Classroom observations
► Parent surveys

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381508.cw/index.html
MCQ # 16
► Teacher's journal entries

Question No: 22 (Marks: 1) - Please choose one

Why it is helpful to keep a research diary or log book while you are conducting your project?

► To give you something to do in the early stages of your research when nothing is happening.
► Because funding councils generally demand to see written evidence that you were working every day during the period of the research.
► To keep a record of what you did and what happened throughout the research process.

http://www.oup.com/uk/orc/bin/9780199202959/01student/cqs/ch03/
MCQ # 08
► It can be added to your dissertation to ensure that you reach the required word limit.

Question No: 23 (Marks: 1) - Please choose one

Which of the following is likely to happen if clear instructions are not given as to how the respondent should answer the question?

► Respondents may delete inappropriate answers rather than select appropriate ones.
► Respondents may choose only one answer when they need to choose as many as apply.
► Respondents may complete questions that are not relevant to them.
► All of the given options

AIAO

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch09/
MCQ # 07

Question No: 24 (Marks: 1) - Please choose one

Which of the following is NOT a suitable topic for research using a diary?

► The amount of time managers spend on particular activities.
► The frequency with which managers undertake particular tasks.
► The locations in which a trade union representative has discussions with individual members. **Correct**
► The volume of female managers in the retail industry.

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch09/
MCQ # 09

Question No: 25 (Marks: 1) - Please choose one

Which of the following represents excellent advice for conducting an interview?

► Listen more and talk less
► Don't interrupt
► Don't be judgmental about the interviewee's beliefs or views
► All of the given options

Question No: 26 (Marks: 1) - Please choose one

Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?

► What role to adopt while interviewing male managers?
► How many female employees should be interviewed for a representative sample? **Correct**
► How to overcome the issue of false consciousness?

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch18/
MCQ # 09
► What data to use while publishing findings?

Question No: 27 (Marks: 1) - Please choose one

Which of the following sampling strategies was used when the three students with the highest GPAs were selected?

► Extreme case

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1489/381384.cw/index.html
MCQ # 02
► Snowball
► Maximum variation

AHAO

► Normal case

Question No: 28 (Marks: 1) - Please choose one

Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?

► Snowball
► Intensity

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9866/2525932.cw/index.html
MCQ # 03

► Homogeneous
► Purposive

Question No: 29 (Marks: 1) - Please choose one

The logic of purposive sampling is:

► To use participants because the researcher has access to them.
► That a random sample can generalize to a population.
► That a few information-rich participants studied in depth yield many insights about a topic.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1488/381150.cw/index.html
MCQ # 02
OR
PAGE # 90

► To include all participants, even though they are not all relevant to the problem.

Question No: 30 (Marks: 1) - Please choose one

Using a sample of 30 participants, a researcher finds a correlation of 0.30 between two variables. The relationship is not statistically significant. If the researcher were to triple her sample size, which of the following is most likely?

► The correlation would be statistically significant.

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381655.cw/index.html
MCQ # 09

► The correlation would be larger.
► The correlation would be smaller.
► Nothing is likely to change.

Question No: 31 (Marks: 1) - Please choose one

Which of the following steps begins the analysis of qualitative data?

► Reading and memoing
► Describing the content and participants **Correct**
► Classifying and interpreting

AFAIQ

► Data management

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381473.cw/index.html
MCQ # 06

Question No: 32 (Marks: 1) - Please choose one

Which of the following represents the most general conceptualization in qualitative data analysis?

► Word
► Topic **Correct**
► Category
► Pattern

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381483.cw/index.html
MCQ # 01

Question No: 33 (Marks: 1) - Please choose one

Which of the following BEST differentiates data analysis from interpretation?

► Interpretation requires more conceptual and integrative thinking than data analysis.

http://wps.prenhall.com/chet_airasian_edresearch_8/38/9871/2527149.cw/content/index
MCQ # 11

► Interpretation involves computerized analysis of data.
► Data analysis is explanatory and interpretation is conceptual. **Correct**
► Data analysis involves conceptualization but interpretation does not.

Question No: 34 (Marks: 1) - Please choose one

The statistic used to determine the relationship between two variables is:

► Analysis of covariance
► Chi square
► Standard deviation **Correct**
► Pearson "*r*"

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381743.cw/index.htmlQuestionNo:35
MCQ # 17

Question No: 35 (Marks: 1) - Please choose one

Which of the following is NOT a control procedure used in causal-comparative research?

► Matching
► Subgroups
► Chi square

AIAO

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381743.cw/index.html
MCQ # 18

► Analysis of covariance

Question No: 36 (Marks: 1) - Please choose one

Which of the following best describes qualitative data coding?

► Adding all of the scores together and describing them statistically
► Identify data segments that contain general episodes
► Numerically representing the concepts identified by the participants **Correct**
► Dividing data in parts that represent single thoughts

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1490/381473.cw/index.html
MCQ # 04

Question No: 37 (Marks: 1) - Please choose one

The bivariate tables derived from trivariate table are called;

► Sub table
► Bivariates
► Partials

A trivariate table has a bivariate table of the independent and dependent variable for each category of the control variable. These new tables are called *partials*.
PAGE # 110

► Correlational tables **Correct**

Question No: 38 (Marks: 1) - Please choose one

Quasi-experimental research is used because:

► Random selection is not possible
► Neither random selection nor random assignment is possible
► Random assignment is not possible

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381820.cw/index.html
MVQ # 16

► There are no comparison groups available

Question No: 39 (Marks: 1) - Please choose one

A researcher believes that the effects of a treatment will be different for males and females. Which one is the best method to test this possible interaction?

► Single-subject design
► Factorial design

http://wps.prenhall.com/chet_airasian_edresearch_7/5/1491/381820.cw/index.html

Question No: 49 (Marks: 1) - Please choose one

Which of the following advantage differentiates personal interview from mail, internet and telephonic survey?

► Cheaper
► Expensive

► Easier
► Inexpensive

Question No: 50 (Marks: 1) - Please choose one

Which one of the following methods offers the lowest degree of geographic flexibility?

► Mail survey

Mail questionnaires can reach a geographically dispersed sample simultaneously and at a relatively low cost because interviewers are not required.
PAGE # 70

► Telephone interview

ALAAO

► Door-to-door personal interview
► Internet survey

Question No: 51 (Marks: 1) - Please choose one

Which of the following survey research methods is the most expensive?

► Telephone interview
► Mail survey
► Door-to-door personal interview

As the cost of personal interviews continues to increase
PAGE # 69

► Mall intercept personal interview

Question No: 52 (Marks: 1) - Please choose one

When a respondent tells the interviewer that he reads "Best Selling English News Paper" on a daily basis so that he can impress the interviewer, this is an example of:

► Administrative bias
► Interviewer bias

Interviewer Bias
Interviewer's personal likings and dis-likings, the environment, and cultural biases can affect the understanding of the responses, its recording, and its interpretation.
PAGE # 66

► Submission bias
► Response bias **Correct**

Question No: 53 (Marks: 1) - Please choose one

All of the following are stages in the selection of a sample **EXCEPT**:

► Determine sample size
► Analyze data
► Conduct fieldwork
► Select a sampling frame

Question No: 54 (Marks: 1) - Please choose one

A stratified sample in which the number of sampling units drawn from each stratum is in proportion to the population size of that stratum is called a:

► Balanced stratified sample **Correct**
► Proportional stratified sample

The number of sampling units drawn from each stratum is in proportion to the relative population size of the stratum, the sample is proportionate stratified sampling.
Page # 94

AFAQ

► Cluster sampling
► Convenience sample

Question No: 55 (Marks: 1) - Please choose one

Assigning males the value of zero and females the value of one in a database to record the gender of the respondents is an example of:

► Coding

Coding
Entering the answer to survey questions into a computer in abbreviated form. For example, M for male, F for female. Coding in qualitative research uses the same principle, on a larger scale.
http://www.audiencedialogue.net/gloss-data.html
Or
Page # 99
For example, a researchers codes males as 1 and females as 2. Each category of variable and missing information needs a code. A **codebook** is a document (i.e. one or more pages) describing the coding procedure and the location of data for variables in a format that computers can use.

► Editing
► Verification
► Test tabulation

Question No: 56 (Marks: 1) - Please choose one

Arranging data into a table is called:

► Analysis
► Frequency
► Interpretation
► Tabulation

The classification or placing of data into tabular form is called as tabulation
http://www.tutorvista.com/math/tabulation-of-data-tutoring

Question No: 57 (Marks: 1) - Please choose one

A researcher interested in a data matrix that displays the frequency of some combination of possible responses to multiple variables should construct a:

► Contingency table

A contingency table is formed by cross-tabulating the two or more variables. It is contingent because the cases in each category of a variable get distributed into each category of a second variable. The table distributes cases into categories of multiple variables at the same time and shows how the cases, by the category of one variable, are "contingent upon" the categories of the other variables

- ► Marginal table
- ► None of the given options

Question No: 58 (Marks: 1) - Please choose one

When initial subjects are selected randomly and additional subjects are obtained from recommendations of names from the initial subjects, this sampling technique is called:

- ► Judgment sample
- ► Snowball

Snowball sampling is a special nonprobability method used when the desired sample characteristic is rare. It may be extremely difficult or cost prohibitive to locate respondents in these situations. Snowball sampling relies on referrals from initial subjects to generate additional subjects. While this technique can dramatically lower search costs, it comes at the expense of introducing bias because the technique itself reduces the likelihood that the sample will represent a good cross section from the population.
http://www.statpac.com/surveys/sampling.htm

- ► Convenience sample
- ► Cluster sample **Correct**

Question No: 59 (Marks: 1) - Please choose one

When different interviewers are used in a pretest from those used in the posttest and this produces different results in the study, this is an example of a:

- ► History effect
- ► Mortality effect
- ► Instrumentation effect

Instrumentation Effects: Instrumentation effects are yet another source of threat to internal validity. These might arise because of a change in the measuring instrument between pretest and posttest, and not because of the instrument's differential impact at the end. For example, in a weightloss experiment, the springs on the scale weaken during the experiment, giving lower readings in the posttest.
A change in the wording of questions (may be done to avoid testing effects), change in interviewers, or change in other procedures to measure the dependent variable can cause instrumentation effect.
Performance of the subjects measured by the units of output in the pretest, but when measuring the out put in posttest the researcher measures it by "the number of units rejected, and the amount of resources expended to produce the units.
Page # 121

- ► Cohort effect

Question No: 60 (Marks: 1) - Please choose one

Which of the following is a threat to the internal validity of experiment using a repeated measures design?

► Instrumentation effect

Factors Affecting Internal Validity

1. **History Effect:**
2. **Maturation Effect:**
3. **Testing Effects:**
4. **Instrumentation Effects: (Page # 121)**
5. **Selection Bias Effect:**
6. **Statistical Regression:**
7. **Mortality:**
8. **Mechanical Loss:**
9. **Experimenter Expectancy:**

► Cohort effect
► Attrition effect
► All of the given options

Question No: 61 (Marks: 1) - Please choose one

Most threats to _____ are taken care of by the experiment's design, while most threats to _____ need to be taken care of by the designer of the experiment.

► Internal validity, external validity

http://www.coe.iup.edu/grbieger/Classes/LTCY698/Module 6/Validity.ppt#263,6

► External validity, internal validity
► Randomization, reliability
► Reliability, randomization

Question No: 62 (Marks: 1) - Please choose one

In which of the following, the beginning and end are not clear. The interview can be picked up later?

► Survey Interview
► Field Interview

Field Interview
The beginning and end are not clear. The interview can be picked up later.

► Deception
► None of the given options

Question No: 63 (Marks: 1) - Please choose one

The written set of guidelines that describes an outline of topics to be covered by a focus group moderator is called a:

AIAQ

► Discussion guide

The basic idea is to lay out a set of issues for the group to discuss. It is important to bear in mind that the moderator will mostly be improvising comments and questions within the framework set by the guidelines.
Page # 153

► Concept test
► Case study
► All of the given options

Question No: 64 (Marks: 1) - Please choose one

Which of the following is a disadvantage of focus groups?

► Requires objective, sensitive, and effective moderators
► May not be useful for discussing sensitive topics
► High cost
► All of the given options

Disadvantages of Focus Groups
Require objective, sensitive, and effective moderators.
May have unique sampling problems
May not be useful for discussing sensitive topics in face-to-face situations
Cost a considerable amount of money, particularly when they are not conducted by someone employed by the company desiring the focus group.
Higher cost

Question No: 65 (Marks: 3)

What do we write in executive summary of a research report?

Executive Summary of Research Report:

It is very important part of the report. And it is observed that mostly managers read summary report normally and rest members read whole report.

Executive summary write in four elements:
1. First objective of the report is mentioned and then most important part and specific reason of the project.

2. Main results are presented including purpose.
3. The conclusions of the report based on results.
4. The suggestions on the basis of conclusions that action will be taken
.

Question No: 66 (Marks: 5)

AHAQ

What is different Ethical dilemma of Field research?

Ans

Ethical Dilemmas of Field research

The dilemmas are made when the researchers are alone in fields and have very much little time to make decision. The ethical dilemmas raises when a field researcher get involve into lives of other people.
These dilemmas arise suddenly when some one interacting in the field with others.
Some of these dilemmas:

Confidentiality:

In field some learns a lot and some not very much, similarly some one has some confidential data and don't want to share with anyone which creates it.

Deception:

Deception may arise because of false role, name or identity, some agreed with some one and some one not some time. So because of these things this occurs.

The powerful:

Field researchers are normally those who are without power in society e.g., street people, the poor, and powerful people block their way and criticized them

Involvement with deviations:

Some researchers conduct research on deviants who engage in illegal behavior. This type of things create dilemma due to involvement in illeal activities.

Last field reports:

At the end of research, the knowledge, a researcher gains and his final report or thesis can make a dilemma between the right of privacy and the right to know. In last report if researcher hides some fact or not give the true picture of research then it creates a dilemma.

AFAQ

Question No: 67 (Marks: 10)

By using Likert scale, how would you score a positive and negative statement? Give one example to explain your answer.

Ans:

Likert scale is bused on 5 responses therefore lets take an example and constructed number of statements for each element with five responses.

- Strongly Agree
- Agree
- Undecided
- Disagree
- Strongly Disagree

These statements could be of both positive and negative.

For positive statements

We score from 5 to 1 i.e. strongly agree to strongly disagree

For negative statement

Score will be reversed i.e 1 to 5

1 for strongly agree
2 for agree
3 for undecided
4 for disagree
5 for strongly disagree

AFAAQ

Question No: 68 (Marks: 10)

How observations can be structured in non-reactive research?

Ans

In non reactive research, the people or the things that are being studied are not aware of that.

Non reactive research is structured as follow:

PHYSICAL TRACES:

• Erosion:

In erosion wear and tear has a greater use. For example, a researcher examines that children like those toys which are worn out and children have more interest in them.

ARCHIVES:

• Running Records:

In these records many researches can be done.
For example, a record of thieves in jail record of daily marriages. Etc.

• Other Records:

Irregular records can give a lot
. For example, look into the number of reams of paper purchased by a college principal's office for the last 10 years and compare it with students' enrollment.

OBSERVATIONS:

• Time Duration:

By this type of research, researcher can check the interest of people indifferent things. Like time spending in seeing the signboards on the road.

• External Appearance:

It shows the behavior of people in social factor that how they want to look.
How people appear may indicate social factors. For example, a
researcher can examine that in university how much percentage of student's wear casual dressing and how much formal.

FINALTERM EXAMINATION
Spring 2009
AFAAQ_TARIQ@YAHOO.COM
STA630- Research Methods (Session - 2)

SOLVED By Muhammad Afaaq

Marks: 80

Question No: 1 (Marks: 1) - Please choose one
Which of the following is the basis of the Scientific Method?

To test hypothesis in conditions that is conducive to its success.
To formulate a research problem and disprove the hypothesis
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.

http://www.uk.sagepub.com/breakwell/downloads/mcq/mcq_01/mcq_01.htm
Mcq # 01
To test hypothesis and if they are disproved, they should be abandoned completely.

Question No: 2 (Marks: 1) - Please choose one
An inductive logic is one that:

Involves testing as explicitly defined hypothesis
Does not allow for findings to feed back into the body of knowledge
Uses quantitative methods whenever possible
Allows theory to emerge out of the data

http://www.oup.com/uk/ orc/bin/9780199202959/01student/cqs/ch01/
MCQ # 03
OR
The usual application of inductive theory, however, is to allow theory to emerge from our findings. We find an interesting question, we gather data on it and we 'theories' from our findings. It may be that these 'theories' are, in reality, simply 'interesting insights' rather than 'grand theories' but they can be valuable for all that.

Question No: 3 (Marks: 1) - Please choose one
Which of the following is not a concept?

Leadership
Total Quality Management
Human Resource Management
Intelligence Quotient (IQ).

http://www.oup.com/uk/orc/bin/9780199284986/01student/cqs/ch06/
MCQ # 01
OR
Concepts are the building blocks of theory, each of which represents a label given to a common element of the social world. IQ is a measure of the concept of intelligence; it is not a concept in itself.

AFAAQ

Question No: 4 (Marks: 1) - Please choose one
Which of the following is the definition of an independent variable?

A variable that is manipulated or controlled by the experimenter

An independent variable is a factor that can be varied or manipulated in an experiment
http://www.everythingbio.com/glos/definition.php?word=independent+variable
A response variable
The behavioral measure made by the experimenter
A dependent variable that is controlled by the experimenter

Question No: 5 (Marks: 1) - Please choose one
The cause variable or the one that identifies forces or conditions that act on something else is known as:

Moderating variable
Independent variable

The cause variable, or the one that identifies forces or conditions that act on something else, is the independent variable.

Question No: 10 (Marks: 1) - Please choose one
When constructing a questionnaire, there are few principles to which you should adhere. Which of the following is NOT one of those principles?

Avoid using "leading" or "loaded" questions
Avoid double-barreled questions
Avoid ambiguity and confusion
Avoid arranging questions in a sequence

PAGE # 77, 78
Guidelines for Questionnaire Design

1. Questionnaire Relevancy
2. Questionnaire Accuracy
3. Avoid Ambiguity, Confusion, and Vagueness.
4. Avoid Double-Barreled Questions
5. Avoid Leading Questions
6. Avoid Loaded Questions

AFAQ

7. Avoid Burdensome Questions that may Tax the Respondent's Memory
8. Arrange Questions in a Proper Sequence
9. Use Filter Question, if Needed
10. Layout of the questionnaire

Question No: 11 (Marks: 1) - Please choose one
Which of the following statements is true about closed ended questions and open ended questions?

A closed ended question means that the chances of unreliable post-coding is small, whereas an open ended question means that there is a possibility of data processing error.
A closed ended question allows for the researchers terminology to be used, whereas an open ended question allows the respondant to use terms they are familiar with.
A closed ended question allows for easy processing, whereas coding an open-ended question can be very time consuming.
A closed ended question has many advantages over open ended question.

If you are going on the street and suddenly a TV reporter starts taking your interview regarding any issue, which of the following sampling technique is used by the TV reporter?

AFAAQ

Purposive Sampling
Snowball Sampling
Convenience Sampling

Convenience Sampling
Convenience sampling (also called *haphazard or accidental sampling*)refers to sampling by obtaining units or people who are most conveniently available. For example, it may be convenient and economical to sample employees in companies in a nearby area, sample from a pool of friends and neighbors. The person-on-the street interview conducted by TV programs is another example. TV interviewers go on the street with camera and microphone to talk to few people who are convenient to interview. The people walking past a
TV studio in thee middle of the day do not represent everyone homemakers, people in the rural areas). Likewise, TV interviewers select people who look "normal" to them and avoid people who are unattractive, poor, very old, or inarticulate.
