21/08/2020

Umar Farooq
(Edu CS 302)

#Lockdown
#Quarantine
#Days

Lec#1.

(1) Defination of Growth?

Answer. The term growth denotes a net increase in the size, or mass of the tissue.

(i)- Hurlock on Growth.

"Growth is change in size, in proportion, dissapperance of old features and acquistion of new ones."

(ii)- Crow on Growth.

"Growth refers to structural and physiological changes.

(2) Defination of Development?

Answer. Development specify maturation of functions. It is related to maturation and indicates acquistion of a variety of skills of the individual.

(i)- Hurlock on Development.

Development means a progressive series of changes that occur in an orderly predictable pattern as a result of maturation and experience.

Scanned with CamScanner

(ii) According to J.E Anderson
"Development is concerned with growth as well as those changes in behavior which results from environmental situations.

(iii)- According to Liebert, Paulos and Marmor.
Development refers to process of change in growth and capability over time.

(3) Difference between Growth and development?
Answer.

Growth.	Development
(i)- Used in purely physicly sense. It generaly refers to increase in size length,	overall changes in shape, form of structure resulting in improved working or functioning.
(ii) Changes in the Quantitave aspects come into the domain of Growth.	Changes in Quality or character.
(iii) It is part of development process	It is comprehensive and wider term refers to overall changes.

Scanned with CamScanner

(iv) Growth involves body changes.	Development involves changes of an orderly, coherent type of tending towards the goal of maturity.
(v) Growth may or may not bring development	Development is Also Possible without Growth.

4- General principles of Development?

Answer.

1. Development is continuous process-
2. Development follows a pattern.
3. Development proceeds from General to specific responces.
4. Development involve changes.
5. Development is a product of interaction of the heredity and environment.
6. Principle of uniqueness.
7. The principle of interaction of Maturation and learning.

5 Factors influencing Human development ?

Scanned with CamScanner

Answer.

(i)- Environmental factors-

(ii)- Biological factors.

(iii)- A child relationships are important.

(iv) Early sensory experiences affect development.

6- Main phases of Development?

Answer. There are two main phases of development.

(i) Stage or phase before birth -

(ii)- Stage or phase after birth.

There are four stages

(i)-infancy (ii) childhood (iii) Adolsence.

(iv) Adulthood.

infancy = 0 to 5 years

childhood = 6 to 12.

Adolsence = 12 to 18/19 years.

Scanned with CamScanner

Lecture #2-

1- Human Growth and Maturation?

Answer. Growth is increase in overall body size with overall changes in muscles, bone and fat and this afects motor skills. Growth is complicated at different rates -(i) different parts of body grow at different rates.
(ii) Periods of Growth starts and stops at different times-

Maturation refers to changes that occur naturally and automatically.

2- What is intelligence?

Answer. intelligence is the Ability to learn from experiences, solve problems, and use our knowledge to adapt to new situations.

3- Man's behavior is influenced by?

Answer. Two forces. (i)- Heredity
(ii)- environment

Scanned with CamScanner

4- What is Heredity?

Answer. The biological or psychological characteristics which are transmited by the parents to their off-springs are known as heredity. They present at birth.

5 Nature, Nurture issue?

Answer.

The Nature, Nurture issue involves the debate about whether development is primarily influenced by nature or by Nurture.

(i)- Some Nature proponents claims that the most important influence on development is biological inheritance.

(ii)- Some Nurture propents claims that environment experiences are the most important influence.

6- Aspects of Human development?

Answer. ① Physical development.
② Social development.
③ Emotional development.
④ intellectual development.

Scanned with CamScanner

7. What is Meta cognition?

Answer. Meta cognition refers to awareness of one's own knowledge..
one's Ability to understand, control etc -
Simply defined as "thinking about thinking is Meta cognition.

8. Theories of Forgetting?

Answer. The loss of information Short term Memory explains why we forgets using the theories of "Trace Decay" and "Displacement". Long term Memory can explained using the theories of "interference and lack of Association".

9- What is Retrieval cue?

Answer. Any stimulus that Assists the process of locating and recovering information stored in memory.
e.g Questions, smells, photos, music
who was your first teacher?

Scanned with CamScanner

10- Tip of the Tongue phenomena

Answer. The tip of the tongue phenomenon is the term for the temporary inability to remember something you know, ~~accomplish~~ accompanied by a feeling that it just out of reach.

11. What is Forgetting?

Answer. The inability to retrieve previously stored information.

12. According to retrieval failure theory, why do we sometimes forget?

Answer. Because we fail to use the right retrieval cues to retriere information stored in memory.

13- What is Another Name for retrieval failure theory?

Answer. cue-dependent theory.

Scanned with CamScanner

14- Strengths and Limitations of Retrieval failure theory?

① Answer. There is research evidence to support it.

② Amount of forgetting can be greatly reduced.

③ Tip of tongue phenomenon is frequent reminder.

Limitations.

This theory dosent explain why there is failure to retrieve some memories.

15 Motivated Forgetting?

Answer. This theory describes forgetting as a defence mechanism in which people are motivated or desire to forget unwanted or disturbing Memories.

16- intelligence Attributes?

Answer. Made up of three Attributes ① verbal Ability ② Practical problem Solving ③ Social competence.

Scanned with CamScanner

17 MCQs

(i)- Distinct clusters are called factors.

(ii)- British psychologist charlas Spearman was 1st influential factor Analyst.

18 Crystalized intelligence?

Answer. It refers to skills that depend on accumulated knowledge and experience, good judgement they are valued in individual culture.

19- Fluid intelligence?

Answer. Fluid intelligence is assumed to be influenced more by conditions in the brain and less by culture.

20 Three Startum theory of intelligence?

Answer. In this theory using improved factor-analytic methods. Caroll represented the structure of intelligence having three tiers.

(i) "g" at top (ii) 2nd tier there is

Scanned with CamScanner

an Array of broad attributes which Caroll considered to be the basic biological components of intelligence.

(iii) In third tier are narrow abbilities - specific behaviors through which people display 2nd tier factors.

21- **What is Caroll Model?**

Answer. Factor - Analytic classification of Mental abilities. It provides useful framework for researchers seeking to understand Mental test performance in cognitive processing terms.

22- **Sternberg Triarchic theory of intelligence**

Answer. (1) Analytical intelligence.
(2) creative intelligence.
(3) Practical intelligence.

23 **Creative intelligence?**

Answer. Relates to the way a person approaches new info or new task.

Scanned with CamScanner

edu 302.

Lecture #3.

1- Gardner theory of intelligence?

Answer. HOWard Gardner says there are actually multiple types of intelligence.

(i) Logical Mathmatical intelligence.

(i) Solving Math and logic problems
(ii) Ability to make and read graphs.
(iii) organization of things.

(ii)- verbal Linguistic.

People with high verbal linguistic intelligence probably they are good at - ① Poems ② Rhyming words-
③ Reading and writting.
④ Story teller.

(iii)- interpersonal intelligence.

(i)- Understanding other people's emotion.
(ii)- Understanding social etiquettes and norms are of different situations

v- Body Kinesthetic intelligence.

(i) Ability to use body purposefully.
(ii) Dancer. (iii) Actors (iv)- Soldiers-
(v) Sports Athelets.

Scanned with CamScanner

(v)- Musical intelligence -

(i)- Associated with rythmatic and harmonic music.

(ii)- Being Able to interpret sounds, rythms and tones and pitches

(vi)- Visual Spatial.

(i) It is basically is how well you visualize something in your mind's eye.

(ii)- How you read Map ?

(iii) How will you get through a maze.

(vii) intrapersonal intelligence.

(i)- Different from interpersonal intelligence.

(ii)- This is more about how you understan yourself.

(iii)- Are you self Aware or not ?

(iv) You know your strengths and weakness.

(ix)- Naturalistic intelligence -

(i)- You can classify all types of animals, plants and minerals.

(ii) Hunters and fisherman are pretty intelligent.

Scanned with CamScanner

2- Measurement of intelligence?

(i) **Answer.** intelligence is measured through intelligence testes that are individual tests. as well as Group tests.

(ii) Testing began in early 1900 when Alferd Binet and Simon developed first individual intelligence test.

(iii) This test After four devisions is still used to measure the intelligence.

formula is $IQ = \frac{\text{Mental Age}}{\text{Chronological Age}} \times 100.$

is known as Ration IQ.

3- Defination of personality?

Answer. Shaffer defines personality as broad collection of attributes and distinctive patterns of behavior.

1. Temprament.
2. Trait, interests, Attitudes
3. values.

Scanned with CamScanner

Personality is individual's characteristics pattern of perceiving, thinking, feeling and continuing over time.

4- Theories of personality?

Answer. ① Type theories.
② Trait theories-
③ Psychodynamic theories.
④ learning theories
⑤ Humanistic theories
⑥ Cognitive theories.
⑦ Erikson theory of personality development.

5- Type theory.

① Greek physician Hippocrates -
② Simplest ways of describing individual differences by classifying people into types on major characteristics.
③ Type theory hold that personality differences are due to imbalance of four humors or body fluids.
blood - phlegm - yellow bile, black bile.
blood = optimistic, phlegm = slow, uncon cerned
yellow bile = Angry. black bile = sad, depress

6- Trait theory ?

Answer.

① Trait refer to small bit of personality.

Gordon Allport, a Havard psychologist identified three kind of traits.

(i) Cardinal trait (Single trait)-

(ii)- Central traits-

(iii)- Secondary traits-

7- Extraversion ?

Answer. High score extraversion indicates that the individual is oriented towards the external world of people and experiences. Low scores show him to be more and more concerned with his inner state of mind.

8 Neuroticism ?

Answer. High score on Neuroticism indicates that the person is more inclined to anxiety and fear. Low score indicates that good psychological balance-

Scanned with CamScanner

9- Psychoticism?

Answer. High psychoticism score indicates an individual is independent, tough-minded aggressive and cold-

Low score go with dependency and tender mindedness.

10- Psychodynamic theories?

Answer. Sigmund Freud is founding father of psychodynamic theories.

The individual is presently unaware of these traumatic, anxiety creating experiences because these have been pushed back into the unconcious part of human mind.

11- Personality Assesment techniques?

Answer. ① Subjective Method.
② objective Method.
③ Projective Method.
④ Psyo-Analytical Methods.
⑤ Physical test Methods.

Scanned with CamScanner

12- Miniature Life situations.

Answer. In Miniature life situations, artificial situations resembling real life situations are created and the subject reactions are observed and evaluated.

13- The Thematic Apperception Test -

Answer. TAT developed by Murray and Morgan consist of series of 20 pictures. The person is asked to tell the story that each one suggests to him. Pictures are arranged in appropriate groups for Male and female adults and for children

14- Children Apreciation test)

Answer. This test was conducted Ballack in 1948. It is used to Access the personality of children upto 12 yrs. Young children are interested in listening stories

Scanned with CamScanner

15- The psycho-Analytic Method.

Answer. Method was propounded by Sigmund Freud.

Two type of tests.

① Free-Association test.

② Dream Analysis Method.

16 Physical test Methods?

Answer.

① Pneumograph-
It is used for measuring the rate of respiratory activity of the individual.

② Plenthysmograph
It is used for measuring the individual Blood pressure.

③ Thymograph.
It is used for measuring the Activity of heart.

④ Electrocardigraphy.
Measures the Activity of heart.

⑤ Electro-encephalograph.
Measures electrical Activity in Human brain.

⑥ Graphology. ⇒ Study of his handwriting

⑦ Electro Myogram ⇒ Measuring Muscular Activity.

Scanned with CamScanner

edu 302

Lecture #4.

1- Developmental task theory?

Answer.

Although many theorists are responsible for contributing to the developmental task theory.
Havighurst elaborated this theory.
He says that development is continuos throughout the entire life span, occuring in stages, where the individual moves from one stage to next by means of successfull resolution of problems.

These tasks are those that are typically encountered by most people in the culture where the individual belongs.
When someone accomplish these tasks he feels pride and satisfication.

① infancy (0 to 5 yrs.)
② Middle childhood. (6 to 12 yrs)
③ Adolscene. (13 to 18 yrs)
④ Early Adulthood (19 to 29 yrs)
⑤ Middle Adulthood. (30 to 60)
⑥ Later Maturity (60 >)

Scanned with CamScanner

2- Developmental theory tasks?

Answer: ① Tasks that Arise from physical maturation. ② Task that Arise from personal sources ③ Tasks that have their source in the pressure of society.

3- Stages.

(i)	infancy (0 to 5)	learning to take solid food, walk, talk learning to control the elimination of body wa Getting ready to read, learn Gender diffe
(ii)-	Middle Childhood (6 to 12)	learn Physical skills, learn to get along with age mates, Achieving personal independence, Developing Attitude towards social groups.
(iii)-	Adolescence. 13 to 18	Achieving Mature relations. Achieving emotional independence. Desiring and achieving socialy responsible behavior.
(iv)-	Early adulthood (19 to 29)	selecting a Mate, learning to live with marriage partner, Managing home. starting family.
(v)-	Middle (30 to 60) adulthood.	Maintain economic standard of living. Performing civic and social responsibility. Adjusting to psychological changes.
(vi)-	Later (60?) Maturity	Adjusting to Retirement. Meeting social and civil obligations Adjusting to death or loss of spouse

Scanned with CamScanner

4- Contributions of ERIKSON?

Answer.

① Personality develops throughout the life time.

② identity crisis in addsence.

③ impact of social, cultural, personal and situational forces in forming personality.

5 Criticism on ERIKSON?

① Answer. Uses Ambigious terms and concepts-

② lack of percision.

③ Stages are not mutually exclusive

④ order of the stages may not same.

Lecture #5.

1- What is learning?

(i) Answer. Change in human behavior performance as a result of the learner's interaction with the environment.

(ii) Permanent change in person's knowledge or behavior due to experience.

Scanned with CamScanner

- How do people learn?

Answer. Nobody really knows but there are three main theories.

① Behaviorism

② Social learning theory.

③ Cognitivism

Behaviorism originates with the work of the American psychologist John B Watson. This psychology is concerned with the study of human mind. A behaviorist learning theory in which individuals learn by association, pairing automatic responses to new stimuli.

Classical conditioning.

A stimulus presentation of two events. A stimulus is presented in order to get a response.

3- Social learning theory?

Answer. People learn from one another via observation, intuition and modeling. People learn through observing other behavior, attitudes and outcome of that behavior. (Bandura).

Scanned with CamScanner

4- learning comes through?

Answer. ① Attention
② Retention
③ Motor reproduction.
④ Motivation.

5 Factors that may influence learning?

Answer. ① Consistency -
② identification -
③ Reward / punishment.
④ Liking.

6 Strengths of theory?

Answer. ① Empirical support.
② Application -
③ To understand learning, Aggression, depression to perdict behavior.

7 Piaget theory of cognitive development?

Answer. Jean piaget theory of cognitive development suggests that children move four different stages. His theory focuses on not

Scanned with CamScanner

only on understanding how children acquire knowledge.
Piaget believed that children took at Active role in learning.
Piaget was born in Swizerland.

8 The Sensorimotor Stage. 0 to 2 Yrs.
(i). Answer - The infants knows the world through their movements and sensation.
(ii)- children learns through sucking, grasping looking, and listening.

9- The pre-operational Stage. 2 to 7.
① Answer- Children began to thinking symbolically and learn to use words and pictures.
② They think in concrete way.

10- Concrete operational Stage 7 to 11-
Answer① Children think logically.
② They understand the concept of conservations
③ Children using inductive logic.

11- Formal operational Stage 12 And up.
Answer. ① Abstract thought emerges.
② Teen thinks more about Moral, ethical social and political issues.

Scanned with CamScanner

12 What is schemas?

Answer. A Schema describes the both mental and physical actions involved in understanding and knowing.

13- What is Assimilation?

Answer. The process of taking in new information into our already existing schemas is known as assimilation.

14- What is Accomodation?

Answer. Another part of adaption involves changing or altering our existing schemas in light of new information. A process known as Accomodation.

15 Equilibrium?

Answer. Piaget believes that all children try to strike a balance between assimilation and accomodation which is achieved through a mechanism piaget called equilibrium.

Final Term Edu 302 UMAR-

Lecture # 6.

Q#1- What is constructivism?

Answer. It is an aproach to teaching and learning based on the idea that cognition is the result of mental construction.
In other words students may learn new information together with what they already know.
It is afected by students beliefs and attitudes.

MCQs-

(i) Vygotsky was called the Mozart of ~~Physcology~~ Psychology.

(ii) Born in Russia town Orsha.

Q#2. Socioculture theory?

Answer. It is an emerging theory in psychology that looks at the important

Scanned with CamScanner

contributions that society makes to individual development. This theory focuses on the interaction between developing people and the culture in which they live.

Theory principles are -

(i)- Children construct their knowledge.
(ii)- The learning is mediated.
(iii)- Language plays a central role in mental develop.
(iv)- Learning Appears twice.
(v)- Development cannot be seperated from its social context

Q#3. Zone of proximal development with context of this theory ?

Answer. Difference between what a child can do independent and what the child needs help from a more knowledgeable person. It is the difference between Actual and potential knowledge.

Scanned with CamScanner

Q#4- What is Scaffolding?

Answer. It is an instructional structure where teacher models the desired learning strategy that shifts responsibility to the students.
It can provides support extends the range of what learner can do.

Q#5. Humanistic Approach?

Answer. Humanistic psychology Also known as third force. It focuses on individual the creativity, the centrality of human values and the active nature of human beings.

Q#6 Maslow Hierarchical of Needs-

Answer. (1) Self Actualization.
(2) Esteem
(3) Love Belonging.
(4) Safety-
(5) Physiological.

Scanned with CamScanner

Lecture # 7.

Q#1 What is Moral development

Answer. Moral development is the gradual development of an individuals concept of right or wrong.

Q#2. Kohlberg theory?

Answer. This theory is a stage theory. In other words everyone goes through the stages sequentially without skiping any stage.

Stages are-

(i) Pre Conventional (ob & rus) - Stage 1. Stage 2.
(ii) Conventional Moral development (lotois
Stage 3, Stage 4.
(iii) Post Conventional-
Stage 5, Stage 6.

Stage 1- obedience and punishment.
Stage 2- Naively egobistical -
Stage 3- Good boy, Good Girl orientat
Stage 4- Law and Social order.
Stage 5- legalistic social contract
Stage 6- Universal ethical principles.

Scanned with CamScanner

Q4 - 3

Gilligans theory of Moral development?

Answer.

Gilligan is pioneer of Gender studies.
Student of Kohelberg.
Worked with Erikson.
First professor of gender studies in Harvard -

Morality	Gender -
(i) - Male Approach is that individuals have basic rights and one must respect the rights of others.	Female Approach is that peoples have responsibilities towards others.
(ii) Morality imposes restrictions on what one can do -	Morality is imperative to care for others.
Justice orientation.	Responsibility orientation.

Scanned with CamScanner

Q#4. Stages of Moral Development?

Answer.

1. Selfish Stage
2. Belief in conventional Morality
3. Post Conventional Stage

Q#5- Criticism of Gilligans Theory?

Answer-

Only based on Moral decisions.
Not Apply in All Situations.
Data was collected on woman only

Scanned with CamScanner

Lecture # 8.

Q# Stages of Developmental?

Answer.

(i) - Pre-School and Kindergarten. (3-6 Yrs).
(ii) - Primary grades 1, 2, 3 (6, 9 Yrs).
(iii) - Elementry grades - 4 5 and 6 (9 to 12 Yrs)
(iv) - Junior High School - 7, 8, and 9 - (12 to 14)
(v) - Senior High School. 10, 11, 12 (15 to 18 Yrs).

Lecture # 9 -

Lecture # 10 -

Q#1 - Concrete Abstract thinking ?

Answer.

People thinks diferent Some may think in concrete terms and some in abstract terms. Concrete thinking refers to the thinking on the surface. Abstract thinking is related to thinking in depth

Scanned with CamScanner

Lecture # 11-

Q#1. Transfer of learning?

Answer.

Transfer of learning has been defined by Mayer and Wittrock as "whenever something previously learnt influences current learning or when solving an earlier problem affects how you solve a new problem.

Q#2. Theories of transfer of learning

Answer.

(i) The doctorine of formal discipline

These enhanced abilities were then expected to facilitates learning less difficult subjects.

The concept behind this practice is that human mind could be made stronger with mental exercise.

Scanned with CamScanner

(ii) The theory of identical elements-

This theory argued that the degree to which knowledge and skills acquired in learning one task can help depends on how similar the two tasks are.

if the learner recogonize the similarties between task stimulus and responce elements as in riding a bicycle and a motorcycle the greater will be the Amount of transfer. This idea is known as theory of identical elements-

Q#3-

Types of Transfer of learning?

Answer. Thorndike and other psychologists have also identified different types of transfer- Useful distinction is made between positive, negative transfer and zero tranfer.

Scanned with CamScanner

Q#4. Cognitive view of transfer.

Answer.

Cognitive view emphasizes the role of comprehension and memory in transfer of learning and is based on information processing theory of learning.

Lecture # 12.

Q#1- Forms of thinking?

Answer. ① Critical thinking.
② Creative thinking
③ Problem solving.

(i)- Critical thinking requires skills at Analyzing the reliability and validiting of information. as well as the Attitude or temprament to do so-

(ii) Creative thinking is the Ability to make or do something that is also useful or valued by others.

Scanned with CamScanner

(iii) Problem solving.
It is the Analysis and solution of tasks or situations that are complex. that pose difficulties.

Q#2. Measurement of Creativity?

Answer.

Tolerance has developed two types of creativity.

① Verbal

② Graphic.

Lecture #13.

Q#1- Creativity in Classroom?

Answer. Creativity is function of social environment.
Teacher can promote creative thinking in their students by creating classroom environment for creative thinking.

① Accept and encourage divergent thinking.
② Tolerate disagrement.
③ Ask students to support their option.

Scanned with CamScanner

(3)- Encourage Students to trust their judgement.

Q#2. instructional Strategies that Stimulate complex thinking?

Answer.

(i)- Teacher directed instruction.
(ii)- Lectures and Readings-
(iii)- Advance organizers.
(iv)- Recalling and Relating Prior knowledge.
(v)-

Q#3 Elaborating information?

Answer. Elaborating new information means asking Questions about the new material, inferring ideas and relationships among the new concepts.

Q#4. Benefits of Concept Maps?

Answer. ① Helps in creating presentation.
② Allows for Quick interpretation.
③ illustrate the hierarchy of ideas
④ Helps in visualizing outcomes.

Scanned with CamScanner

Lecture # 14.

Q#1- What is individual differences ?

Answer.

individual differences stands for the variation among individuals in regard to single characteristic or number of characteristics. It is totality distinguish one individual from another.

Q#2. Types of individual differences?

Answer.

1. Difference in interest.
2. Difference in Attitude.
3. Difference in values.
4. Study Habbits.
5. Difference in psychomotor skills.
6. Difference in self concept.

Scanned with CamScanner

Q#3 Causes of individual differences?

Answer.

1. Nature.
2. Nurture.

Q#4 Types of Exceptional children?

Answer.

1. Deafiness.
2. Hardness of Hearing.
3. Blindness.
4. Visual impairment.
5. Speech impairment.
6. physical and Health impairment.
7. Mental Retardation.
8. learning disabilities.
9. Emotional disturbance.

Scanned with CamScanner

Lecture #15.

Q#1. Classification of emotionaly disturbed children?

Answer.

① Agressive behavior.
② Withdraw behavior.

Q#2. Techniques of teaching?

Answer.

① Teaching the Agressive student
② Teaching the withdraw students

Q#3. Causes of learning Disability?

Answer.

① Attention Deficits
② Perceptual deficits
③ Rehersal and Metacognitive deficits.

Scanned with CamScanner

UMAR- 21/8/20

Edu302 Final Term

Q#1. Age of junior High Schol?

Answer. (12 to 14 yeavs).

2- Vertical transfer of learning?

Answer.

Vertical transfer is that positive transfer which ocaurs when previously learnt capability helps in learning more complex material in the same area.

3- Advance organizer?

Answer. It is the strategy for making lectures and readings effective.

A teacher can be especially careful about organizing information for students.

Advance organizers organize the material on behalf of the students. so they learn in more detail.

Scanned with CamScanner

4- **Developmental task theory?**

Answer. This theory elaborated by Robert J Havighurst. He says that development is continous throughout the entire lifespan occuring in stages, where the individual moves from one stage to next by means of successful resolution of problems or performance of developmental tasks.

He says that learning is basic and it continues throughout lifespan - occurs in six stages.

5 **Emotional Empairments ?**

Answer. Children with emotional disturbance are also termed as children with social maladjustment and children with behavior disorders.

inability to learn is not due to mental retardation, visual and speech impairments and health problems.

Scanned with CamScanner

6- Physical characteristics of primary stage?

Answer.

① Children remain active.

② Energy of children is often released in the form of nervous habbits such as pencil chewing finger Nail bitting etc.

③ Children in these grades still need rest periods after physical and mental exertion.

④ Children are extreme in their physical Activities.

7- intellectual characteristics of primary stage?

Answer. ① Very eager to learn.

② Like to talk who have more facility in speech.

③ Primary grade children telling the teacher, that someone has broken class rule.

Scanned with CamScanner

Q# Positive transfer of learning?

Answer. Positive transfer is defined as a situation in which previous learning helps subsquent learning.

Q# Types of individual differences?

Answer.

(1)- Difference in interest.
(2)- Difference in Attitude.
(3)- Differende in values.
(4) Difference in self Concept

Q# Social Characteristics of at Elementry Stage?

Answer.

① More selective in choosing more or less permanent friends.
② Children in this stage are more eager to impress their friends.
③ interpersonal reasoning develops leading to greater understanding of feelings of others.

Scanned with CamScanner

Q#. intellectual characteristics at ~~prior~~ Senior High School?

Answer.

(1) Abstract thinking
(2) Understands ideas and Relationships.

Q#- Difference between Growth and Development?

Answer. Growth denotes a net increase in size, or mass of the tissue.

Growth is change in size, in proportion, disappearance of old features and acquistion of new ones.

Development specify maturation of functions. It is related to maturation of nervous system.

Development means of progressive series of changes that occurs in an orderly predictable pattern as a result of Maturation and experience.

Scanned with CamScanner

Q. Note on problem solving?

Answer.

Creative thinking is problem solving. the Analysis and solution of tasks that are complex.

Problem solving is the Act of defining a problem finding the solutions to difficult or complex issues.

Q. Teacher strategies for those students who have cultural difference?

Answer. ① Learn about your Students.

② interview Students.

③ Bring in Guest speakers.

④ Call on Each Student.

⑤ Avoid Labelling the child.

Scanned with CamScanner
