STA630 1700 MCQS File Solved…

Question # 1 of 20 (Start time: 02:00:36 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 2 of 20 (Start time: 02:00:58 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 3 of 20 (Start time: 02:01:17 AM) Total Marks: 1
The findings from a study of decision making processes within a UK financial services company can be generalized to:
Select correct option:

Decision making processes in all financial services companies
Decision making processes in the all UK companies
Decision making processes in the researched companies
Companies all over the world

Question # 4 of 20 (Start time: 02:02:56 AM) Total Marks: 1
When accessing the internet, which of these steps is the most essential?
Select correct option:

Recording the full URL
Noting the access dates
Downloading material to be referenced
They are all equally important

Question # 5 of 20 (Start time: 02:03:17 AM) Total Marks: 1
Which of the following means that all the items in a scale or index fit together or measure a single construct?

Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 6 of 20 (Start time: 02:04:39 AM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good_____validity.
Select correct option:

Construct
Internal
External
Causal

Question # 7 of 20 (Start time: 02:05:45 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 8 of 20 (Start time: 02:06:07 AM) Total Marks: 1
When all participants receive all treatment conditions, the study is susceptible to:
Select correct option:

Order effects
Carryover effects
Analysis of covariance
Both A & B

Question # 9 of 20 (Start time: 02:07:23 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis

Co-relational hypothesis

Question # 10 of 20 (Start time: 02:07:48 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 11 of 20 (Start time: 02:08:05 AM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 12 of 20 (Start time: 02:08:24 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 13 of 20 (Start time: 02:08:39 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 14 of 20 (Start time: 02:08:44 AM) Total Marks: 1
Which of the following is true?
Select correct option:

A study can be internally valid but not externally valid
A study can be externally valid but not internally valid
A study must be both internally and externally valid
The internal and external validity of studies are not related in any way

Question # 15 of 20 (Start time: 02:10:09 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 16 of 20 (Start time: 02:10:29 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 17 of 20 (Start time: 02:10:43 AM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 18 of 20 (Start time: 02:10:57 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 19 of 20 (Start time: 02:11:25 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 20 of 20 (Start time: 02:11:43 AM) Total Marks: 1
Bar charts or graphs are used for:
Select correct option:

Categorical variables
Ordered variables
Discrete variables
Continuous variables

Question # 1 of 20 (Start time: 02:48:49 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 2 of 20 (Start time: 02:49:10 AM) Total Marks: 1
Procedures determining what two issues are rarely used in quantitative research?
Select correct option:

Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

Question # 3 of 20 (Start time: 02:49:28 AM) Total Marks: 1
What is the variable called, in an experiment, which is manipulated by the researcher?
Select correct option:

Stimulus

Control
Dependent
Independent

Question # 4 of 20 (Start time: 02:50:55 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 5 of 20 (Start time: 02:51:09 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 6 of 20 (Start time: 02:51:24 AM) Total Marks: 1
Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 7 of 20 (Start time: 02:52:39 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 8 of 20 (Start time: 02:52:54 AM) Total Marks: 1
Why is it important to change one variable at a time in single case designs?

Select correct option:

Changing one variable allows isolation of the cause of the change
Changing more than one variable at a time confounds those independent variables
Both a and b are true
None of the above

Question # 9 of 20 (Start time: 02:53:45 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 10 of 20 (Start time: 02:53:58 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 20 (Start time: 02:54:13 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 12 of 20 (Start time: 02:54:26 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 13 of 20 (Start time: 02:54:32 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 14 of 20 (Start time: 02:55:55 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 15 of 20 (Start time: 02:56:52 AM) Total Marks: 1
How many variables should be changed at a time when conducting a single-case design?
Select correct option:

4
3
2
1

Question # 16 of 20 (Start time: 02:58:00 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 17 of 20 (Start time: 02:58:14 AM) Total Marks: 1
When accessing the internet, which of these steps is the most essential?
Select correct option:

Recording the full URL
Noting the access dates

Downloading material to be referenced
They are all equally important

Question # 18 of 20 (Start time: 02:58:20 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 19 of 20 (Start time: 02:58:34 AM) Total Marks: 1
Which of the following control techniques available to the researcher controls for both known and unknown variables?
Select correct option:

Building the extraneous variable into the design
Matching
Random assignment
Analysis of covariance

Question # 20 of 20 (Start time: 02:59:43 AM) Total Marks: 1
What is a placebo?
Select correct option:

A rock band
An experiment done before the main study
An experiment involving lots of participants, who have been carefully chosen to avoid bias
A treatment which appears to be have the same effect as the 'real thing' but that only 'works' psychologically.

Question # 1 of 20 (Start time: 03:28:56 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 2 of 20 (Start time: 03:29:11 AM) Total Marks: 1

Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 3 of 20 (Start time: 03:29:18 AM) Total Marks: 1
Which of the following is not example of historical comparative research?
Select correct option:

Social Forms
Turnover
Civil Wars
Economic Forms

Question # 4 of 20 (Start time: 03:30:31 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 5 of 20 (Start time: 03:30:53 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 6 of 20 (Start time: 03:31:11 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used

Purpose of the research

Question # 7 of 20 (Start time: 03:31:17 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 8 of 20 (Start time: 03:32:31 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 9 of 20 (Start time: 03:32:46 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 10 of 20 (Start time: 03:33:00 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 11 of 20 (Start time: 03:33:16 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.

Select correct option:

Only when rival explanations have been shown to be plausible
Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 12 of 20 (Start time: 03:34:38 AM) Total Marks: 1
Which of the following is a research method that allows a researcher to get information about a large number of subjects relatively inexpensively and easily?
Select correct option:

Naturalistic observation
Case study
Laboratory observation
Survey

Question # 13 of 20 (Start time: 03:34:55 AM) Total Marks: 1
Which of the following refers to the partials replicate or reproduce the same relationship that existed in the bivariate table before considering the control variable?
Select correct option:

Replication pattern
Specification pattern
Suppressor variable pattern
Negative linear relationship

Question # 14 of 20 (Start time: 03:35:41 AM) Total Marks: 1
Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 15 of 20 (Start time: 03:36:52 AM) Total Marks: 1
The group that receives the experimental treatment condition is the_____.
Select correct option:

Experimental group
Control group

Participant group
Independent group

Question # 16 of 20 (Start time: 03:37:38 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 17 of 20 (Start time: 03:37:47 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 18 of 20 (Start time: 03:38:03 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 19 of 20 (Start time: 03:38:25 AM) Total Marks: 1
What is one way that distortions can be produced in self report data?
Select correct option:

Lying
Social desirability bias
Faulty memory
All of the given options

Question # 20 of 20 (Start time: 03:39:19 AM) Total Marks: 1
What technique would be useful in determining why a specific toddler is afraid to go to bed?

Select correct option:

Descriptive study
Case study
A placebo
Experiment

Question # 1 of 20 (Start time: 04:55:16 AM) Total Marks: 1
Which of the following would generally require the largest sample size?
Select correct option:

Cluster sampling
Simple random sampling
Systematic sampling
Proportional stratified sampling

Question # 2 of 20 (Start time: 04:56:20 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 3 of 20 (Start time: 04:56:51 AM) Total Marks: 1
Cover letter must include the following information, except:
Select correct option:

How was the respondent selected?
Data collecting tools
Motivation for the respondent
Importance of research topic which is going to be conducted

Question # 4 of 20 (Start time: 04:57:17 AM) Total Marks: 1
Measurement reliability refers to the:
Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 5 of 20 (Start time: 04:57:54 AM) Total Marks: 1
Which of the following describes the nature of qualitative data interpretation?
Select correct option:

Reflection
Integrative
Explanatory
Reflection, integrity, explanation

Question # 6 of 20 (Start time: 04:58:34 AM) Total Marks: 1
In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?
Select correct option:

Dependent variable
Extraneous variable
Independent variable
Confounding variable

Question # 7 of 20 (Start time: 04:59:26 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 8 of 20 (Start time: 04:59:41 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 9 of 20 (Start time: 04:59:47 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing

good writing
All of the given option

Question # 10 of 20 (Start time: 04:59:53 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 11 of 20 (Start time: 05:00:16 AM) Total Marks: 1
Which of the following is NOT a longitudinal study?
Select correct option:

Trend study
Census study
Panel study
Cohort study

Question # 12 of 20 (Start time: 05:00:46 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 13 of 20 (Start time: 05:01:01 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 14 of 20 (Start time: 05:01:08 AM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 15 of 20 (Start time: 05:02:36 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 16 of 20 (Start time: 05:03:00 AM) Total Marks: 1
Which of the following is not something a researcher will have to consider when thinking about their sample size?
Select correct option:

Time and cost.
Non-response.
Length of questionnaire.
Heterogeneity of population.

Question # 17 of 20 (Start time: 05:03:59 AM) Total Marks: 1
In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 18 of 20 (Start time: 05:04:53 AM) Total Marks: 1
_____is a measure of association tested for its genuineness by controlling the third variable.
Select correct option:

Trivariate tables.
Multiple regressions.
Statistical control.

None of the above.

Question # 19 of 20 (Start time: 05:06:18 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 20 of 20 (Start time: 05:06:33 AM) Total Marks: 1
Historians organize evidence usually in which of the following form?
Select correct option:

Comparative form
Critical form
Logical form
Narrative form

Question # 1 of 20 (Start time: 01:57:02 PM) Total Marks: 1
Which of the following is not example of historical comparative research?
Select correct option:

Social Forms
Turnover
Civil Wars
Economic Forms

Question # 2 of 20 (Start time: 01:58:24 PM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 3 of 20 (Start time: 01:59:57 PM) Total Marks: 1
Which of the following number of variables involved in Descriptive Statistics?
Select correct option:

Bivariate
Multivariate
Univariate
All of the given options

Question # 4 of 20 (Start time: 02:00:34 PM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 5 of 20 (Start time: 02:02:04 PM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 6 of 20 (Start time: 02:03:26 PM) Total Marks: 1
How can we determine if a test has good validity?
Select correct option:

It produces the same result when it is given at different times to the same group of people
It produces the same result no matter which version of the test is used
It measures what it is supposed to measure
All of the questions on it can be answered accurately by the subject

Question # 7 of 20 (Start time: 02:04:46 PM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 8 of 20 (Start time: 02:06:15 PM) Total Marks: 1

Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?
Select correct option:

Experimental control
Differential influence
Matching
Analysis of covariance

Question # 9 of 20 (Start time: 02:07:40 PM) Total Marks: 1
Which of the following would NOT NECESSARILY be an assigned variable?
Select correct option:

Self-concept
Participation in extracurricular activities
Attitude toward school
Father's level of education

Question # 10 of 20 (Start time: 02:08:57 PM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 11 of 20 (Start time: 02:09:59 PM) Total Marks: 1
When doing research involving deception with human subjects, researchers have an obligation to do which of the following?
Select correct option:

Tell subjects the truth about the study's purpose and methods after the study is completed
Prevent mental and physical harm to subjects
Let subjects withdraw from the study at any time if they don't want to keep participating
All of the given options

Question # 12 of 20 (Start time: 02:11:19 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories

Units of equal distance
Data where there is a true zero

Question # 13 of 20 (Start time: 02:12:44 PM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 14 of 20 (Start time: 02:13:33 PM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 15 of 20 (Start time: 02:15:01 PM) Total Marks: 1
The findings from a study of decision making processes within a UK financial services company can be generalized to:
Select correct option:

Decision making processes in all financial services companies
Decision making processes in the all UK companies
Decision making processes in the researched companies
Companies all over the world

Question # 16 of 20 (Start time: 02:16:31 PM) Total Marks: 1
Which of the following refers to the partials replicate or reproduce the same relationship that existed in the bivariate table before considering the control variable?
Select correct option:

Replication pattern
Specification pattern
Suppressor variable pattern
Negative linear relationship

Question # 17 of 20 (Start time: 02:17:36 PM) Total Marks: 1
Which of the following is a measure in which a researcher adds or combines several

distinct indicators of a construct into a single score?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 18 of 20 (Start time: 02:19:04 PM) Total Marks: 1
What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Question # 19 of 20 (Start time: 02:20:30 PM) Total Marks: 1
Why might qualitative researchers regard interviewing an attractive alternative to participant observation?
Select correct option:

It is easier to accommodate into the researchers personal life
It reduces the problem of reactivity
It is a considerably less time-consuming process
It gives a better insight into the day to day functioning of the research site

Question # 20 of 20 (Start time: 02:22:01 PM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 20 of 20 (Start time: 12:49:12 AM) Total Marks: 1
The logic of purposive sampling is:
Select correct option:

That a random sample can generalize to a population.
That a few information-rich participants studied in depth yield many insights about a topic.

To include all participants, even though they are not all relevant to the problem.
To use participants because the researcher has access to them.

Question # 19 of 20 (Start time: 12:48:45 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 18 of 20 (Start time: 12:48:22 AM) Total Marks: 1
Why does qualitative interviewing have an advantage over participant observation when it comes to longitudinal research?
Select correct option:

Repeat interviews are easier to organise.
It allows for a better exploration of key issues.
It is a more focused research method.
Participant observers are prone to 'go native' during longitudinal research.

Question # 17 of 20 (Start time: 12:48:01 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 16 of 20 (Start time: 12:47:41 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 15 of 20 (Start time: 12:46:33 AM) Total Marks: 1
Which type of research address major societal change?

Select correct option:

Experimental Research
Action Research
Social Research
Historical Comparative Research

Question # 14 of 20 (Start time: 12:45:56 AM) Total Marks: 1
Which term technically describes a situation in which an observer's work in a first-grade classroom disrupts the normal routines due to the curiosity of the students?
Select correct option:

Observer effect
Participant effect
Non participant bias
Observer bias

Question # 13 of 20 (Start time: 12:45:15 AM) Total Marks: 1
What is the variable called, in an experiment, which is manipulated by the researcher?
Select correct option:

Stimulus
Control
Dependent
Independent

Question # 12 of 20 (Start time: 12:44:52 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 11 of 20 (Start time: 12:44:32 AM) Total Marks: 1
Bias is defined as;
Select correct option:

The distortion of responses based on gender, ethnicity, race, or language
A lack of validity
A lack of reliability
A poor interpretation of a student's score

Question # 10 of 20 (Start time: 12:43:12 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 9 of 20 (Start time: 12:42:16 AM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 8 of 20 (Start time: 12:41:51 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 7 of 20 (Start time: 12:41:27 AM) Total Marks: 1
Which of the following is NOT an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
Seek approval for research

Question # 6 of 20 (Start time: 12:40:44 AM) Total Marks: 1
Which of the following is not something a researcher will have to consider when thinking about their sample size?
Select correct option:

Time and cost.

Non-response.
Length of questionnaire.
Heterogeneity of population.

Question # 5 of 20 (Start time: 12:40:20 AM) Total Marks: 1
A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal
Interval
Dichotomous

Question # 4 of 20 (Start time: 12:39:33 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 3 of 20 (Start time: 12:39:05 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 2 of 20 (Start time: 12:38:43 AM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 1 of 20 (Start time: 12:37:47 AM) Total Marks: 1
Which of the following terms best describes data that were originally collected at an earlier time by a different person for a different purpose?
Select correct option:

Primary data
Secondary data
Experimental data
Field notes

Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Which of the following is a measure in which the researcher captures the intensity, direction, level, or potency of a variable construct?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Which of the following is the process of marking segments of data with symbols, descriptive words or category?
Select correct option:

Concurring
Coding
Coloring
Segmenting

Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?
Select correct option:

Snowball
Intensity
Homogeneous
Purposive

What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Ms. Tania is thinking about changing her instructional approach to a more mastery-learning orientation. She is interested in knowing more about this topic as well as its effectiveness when working with elementary school students. On which source should she rely for such information?
Select correct option:

Tradition
Research
Intuition
Personal experience

What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

The extent to which we can generalize the results of a study to other participants is called:
Select correct option:

Sampling validity
External validity
Construct validity
Internal validity

What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Historians organize evidence usually in which of the following form?
Select correct option:

Comparative form
Critical form
Logical form
Narrative form

Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Which of the following control techniques available to the researcher controls for both known and unknown variables?
Select correct option:

Building the extraneous variable into the design
Matching
Random assignment
Analysis of covariance

Surveys are more impersonal than face-to-face interviews.
Select correct option:

Mail
Recorded Interview
Focus group
Telephone

Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?
Select correct option:

Scale
Index
Unidimensionality

Weighting

The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal
Interval
Dichotomous

Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables

Ensure the study comes out the way it was intended

An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Which term technically describes a situation in which an observer's work in a first-grade classroom disrupts the normal routines due to the curiosity of the students?
Select correct option:

Observer effect
Participant effect
Non participant bias
Observer bias

A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Which of the following is more operational with the help of coding system?
Select correct option:

External Appearance
Count Behaviors
Time Duration
Content analysis

Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.

All of the given options

Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Which of the following is NOT an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
Seek approval for research

When a variable is so closely associated with the independent variable that we do not know which one is producing the experimental effect, the variable is:
Select correct option:

Manipulated
Confounded
Unspecified
Uncontrolled

Which of the following is not an example of deception?
Select correct option:

A part of the truth is not communicated to the respondent
To observe code of ethics
To leak out information regarding any confidential matter
To create bias between respondents before the survey

Question # 1 of 20 (Start time: 06:26:13 AM) Total Marks: 1
Which of the following describes the situation in which the control variable intervenes between the original independent variable and the dependent variables?
Select correct option:

Replication pattern
Suppressor variable pattern
Negative linear relationship
Interpretation pattern

Question # 2 of 20 (Start time: 06:27:44 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 3 of 20 (Start time: 06:28:04 AM) Total Marks: 1
Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 4 of 20 (Start time: 06:28:21 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 5 of 20 (Start time: 06:28:29 AM) Total Marks: 1
Which of the following control techniques available to the researcher controls for both known and unknown variables?
Select correct option:

Building the extraneous variable into the design
Matching
Random assignment
Analysis of covariance

Question # 6 of 20 (Start time: 06:28:46 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 7 of 20 (Start time: 06:28:52 AM) Total Marks: 1
Which of the following links with an abstract model of underlying relations or causal mechanism?
Select correct option:

Historical comparative research
Experimental research
Action research
Social research

Question # 8 of 20 (Start time: 06:29:52 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 9 of 20 (Start time: 06:30:07 AM) Total Marks: 1
Which of the following is likely to reduce the validity of a test?
Select correct option:

Unclear test directions
Ambiguous test items
Untaught items
All of the given options

Question # 10 of 20 (Start time: 06:30:27 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 11 of 20 (Start time: 06:30:43 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 12 of 20 (Start time: 06:30:56 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 13 of 20 (Start time: 06:31:02 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 14 of 20 (Start time: 06:31:24 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha

Split-half reliability
Inter item ratio

Question # 15 of 20 (Start time: 06:31:41 AM) Total Marks: 1
A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles, gestures, gaze, and touch. This is an example of;
Select correct option:

Blind observation
Quasi-experimentation
Naturalistic observation
Field experimentation

Question # 16 of 20 (Start time: 06:33:03 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 17 of 20 (Start time: 06:33:24 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 18 of 20 (Start time: 06:33:37 AM) Total Marks: 1
Which of the following number of variables involved in Descriptive Statistics?
Select correct option:

Bivariate
Multivariate
Univariate
All of the given options

Question # 19 of 20 (Start time: 06:33:54 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?

Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 20 of 20 (Start time: 06:34:12 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 1 of 20 (Start time: 11:52:09 PM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline
Variance
Reverse

Question # 2 of 20 (Start time: 11:53:18 PM) Total Marks: 1
Procedures determining what two issues are rarely used in quantitative research?
Select correct option:

Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

Question # 3 of 20 (Start time: 11:53:36 PM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 4 of 20 (Start time: 11:53:54 PM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 5 of 20 (Start time: 11:54:10 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 6 of 20 (Start time: 11:54:19 PM) Total Marks: 1
What is the variable called, in an experiment, which is manipulated by the researcher?
Select correct option:

Stimulus
Control
Dependent
Independent

Question # 7 of 20 (Start time: 11:54:37 PM) Total Marks: 1
Which of the following can be referred as a Reputational sampling?
Select correct option:

Purposive Sampling
Quota Sampling
Convenience Sampling
Snowball Sampling

Question # 8 of 20 (Start time: 11:55:03 PM) Total Marks: 1
Critical decision area in questionnaire construction is_____.
Select correct option:

Question content
Question wording

Response strategy
All of the given options

Question # 9 of 20 (Start time: 11:55:22 PM) Total Marks: 1
What is one way that distortions can be produced in self report data?
Select correct option:

Lying
Social desirability bias
Faulty memory
All of the given options

Question # 10 of 20 (Start time: 11:55:29 PM) Total Marks: 1
Which of the following would NOT NECESSARILY be an assigned variable?
Select correct option:

Self-concept
Participation in extracurricular activities
Attitude toward school
Father's level of education

Question # 11 of 20 (Start time: 11:55:49 PM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Question # 12 of 20 (Start time: 11:56:13 PM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 13 of 20 (Start time: 11:56:29 PM) Total Marks: 1

What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 14 of 20 (Start time: 11:56:36 PM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 15 of 20 (Start time: 11:56:54 PM) Total Marks: 1
Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?
Select correct option:

What role to adopt when interviewing male managers?
How many female employees should be interviewed for a representative sample?
How to overcome the issue of false consciousness?
What data to use when publishing findings?

Question # 16 of 20 (Start time: 11:57:15 PM) Total Marks: 1
Which of the following number of variables involved in Descriptive Statistics?
Select correct option:

Bivariate
Multivariate
Univariate
All of the given options

Question # 17 of 20 (Start time: 11:57:20 PM) Total Marks: 1
Which of the following terms best describes data that were originally collected at an earlier time by a different person for a different purpose?
Select correct option:

Primary data

Secondary data
Experimental data
Field notes

Question # 18 of 20 (Start time: 11:57:36 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 19 of 20 (Start time: 11:57:53 PM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 20 of 20 (Start time: 11:58:00 PM) Total Marks: 1
Which of the following means that all the items in a scale or index fit together or measure a single construct?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 1 of 20 (Start time: 12:34:24 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 2 of 20 (Start time: 12:34:49 AM) Total Marks: 1
What is a placebo?

Select correct option:

A rock band
An experiment done before the main study
An experiment involving lots of participants, who have been carefully chosen to avoid bias
A treatment which appears to be have the same effect as the 'real thing' but that only 'works' psychologically.

Question # 3 of 20 (Start time: 12:34:55 AM) Total Marks: 1
Which of the following is the most damaging problem for the researcher with secondary data?
Select correct option:

It may not be accurate
It may be biased
It may not address the aims
It may only provide part of the answer

Question # 4 of 20 (Start time: 12:35:55 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 5 of 20 (Start time: 12:36:11 AM) Total Marks: 1
In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 6 of 20 (Start time: 12:36:35 AM) Total Marks: 1
The findings from a study of decision making processes within a UK financial services company can be generalized to:
Select correct option:

Decision making processes in all financial services companies
Decision making processes in the all UK companies
Decision making processes in the researched companies
Companies all over the world

Question # 7 of 20 (Start time: 12:36:53 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 8 of 20 (Start time: 12:37:11 AM) Total Marks: 1
When doing research involving deception with human subjects, researchers have an obligation to do which of the following?
Select correct option:

Tell subjects the truth about the study's purpose and methods after the study is completed
Prevent mental and physical harm to subjects
Let subjects withdraw from the study at any time if they don't want to keep participating
All of the given options

Question # 9 of 20 (Start time: 12:37:28 AM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline
Variance
Reverse

Question # 10 of 20 (Start time: 12:37:44 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings

Dictionary meanings

Question # 11 of 20 (Start time: 12:37:50 AM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 12 of 20 (Start time: 12:37:55 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 13 of 20 (Start time: 12:38:03 AM) Total Marks: 1
Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 14 of 20 (Start time: 12:38:19 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 15 of 20 (Start time: 12:38:27 AM) Total Marks: 1
Which of the following can be referred as semantic analysis?
Select correct option:

Latent Coding
Accretion
Count Behaviors
Intensity

Question # 16 of 20 (Start time: 12:39:22 AM) Total Marks: 1
The posttest-only design with nonequivalent groups is likely to control for which of the following threats to internal validity:
Select correct option:

History
Differential selection
Additive and interactive effects
Differential attrition

Question # 17 of 20 (Start time: 12:40:32 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 18 of 20 (Start time: 12:40:51 AM) Total Marks: 1
Which of the following is NOT a reason why it is preferable to tape record a focus group session?
Select correct option:

It is quicker and easier to make brief notes about what is said
It allows for analysis of how certain points are put forward
Without a tape recording it is difficult to keep an accurate record of who said what
It enables the researcher to identify which people are acting as opinion leaders

Question # 19 of 20 (Start time: 12:42:10 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 20 of 20 (Start time: 12:42:28 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 1 of 20 (Start time: 01:31:17 AM) Total Marks: 1
Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?
Select correct option:

Snowball
Intensity
Homogeneous
Purposive

Question # 2 of 20 (Start time: 01:32:35 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 3 of 20 (Start time: 01:32:45 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 4 of 20 (Start time: 01:33:05 AM) Total Marks: 1
What technique would be useful in determining why a specific toddler is afraid to go to bed?

Select correct option:

Descriptive study
Case study
A placebo
Experiment

Question # 5 of 20 (Start time: 01:33:24 AM) Total Marks: 1
Which type of observer is likely to get a reasonable insight into the participant's views and develop a good rapport with him?
Select correct option:

Non participant
Unstructured participant
Participant
Structured participant

Question # 6 of 20 (Start time: 01:34:49 AM) Total Marks: 1
What does it mean if two variables have a positive correlation?
Select correct option:

As one variable increases, so does the other
As one variable increases, the other decreases
The correlation between the two variables is 0
The correlation between the two variables is greater than 1.0

Question # 7 of 20 (Start time: 01:36:11 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 8 of 20 (Start time: 01:36:25 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing

None of the given options

Question # 9 of 20 (Start time: 01:36:51 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 10 of 20 (Start time: 01:37:09 AM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 11 of 20 (Start time: 01:37:26 AM) Total Marks: 1
Time consumed in mall intercept interview is ---------- --.
Select correct option:

High
Moderate
Low
Nil

Question # 12 of 20 (Start time: 01:37:48 AM) Total Marks: 1
The most frequently used quasi-experimental design is the_____design.
Select correct option:

Nonequivalent comparison-group
Interrupted time-series
Changing-criterion
Regression discontinuity

Question # 13 of 20 (Start time: 01:38:41 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 14 of 20 (Start time: 01:39:35 AM) Total Marks: 1
Critical decision area in questionnaire construction is_____.
Select correct option:

Question content
Question wording
Response strategy
All of the given options

Question # 15 of 20 (Start time: 01:39:42 AM) Total Marks: 1
In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 16 of 20 (Start time: 01:39:48 AM) Total Marks: 1
Which of the following is the most damaging problem for the researcher with secondary data?
Select correct option:

It may not be accurate
It may be biased
It may not address the aims
It may only provide part of the answer

Question # 17 of 20 (Start time: 01:40:06 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 18 of 20 (Start time: 01:41:21 AM) Total Marks: 1
Which of the following is not something a researcher will have to consider when thinking about their sample size?
Select correct option:

Time and cost.
Non-response.
Length of questionnaire.
Heterogeneity of population.

Question # 19 of 20 (Start time: 01:41:39 AM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good_____validity.
Select correct option:

Construct
Internal
External
Causal

Question # 20 of 20 (Start time: 01:42:13 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 1 of 20 (Start time: 01:52:32 AM) Total Marks: 1
Which method of sampling is least likely to produce bias?
Select correct option:

Opportunity Sampling
Random Sampling
Stratified Sampling
Quasi-random sampling

Question # 2 of 20 (Start time: 01:53:49 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.
Select correct option:

Only when rival explanations have been shown to be plausible

Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 3 of 20 (Start time: 01:54:05 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 4 of 20 (Start time: 01:54:21 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 5 of 20 (Start time: 01:54:27 AM) Total Marks: 1
Which of the following refers to Ecological validity?
Select correct option:

The participants to who results generalize
The instruments used to measure the independent and dependent variables
The internal validity of a study
The context to which results generalize

Question # 6 of 20 (Start time: 01:55:22 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 7 of 20 (Start time: 01:55:31 AM) Total Marks: 1
Which of the following can be referred as semantic analysis?

Select correct option:

Latent Coding
Accretion
Count Behaviors
Intensity

Question # 8 of 20 (Start time: 01:55:38 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 9 of 20 (Start time: 01:55:53 AM) Total Marks: 1
Which of the following is a measure in which the researcher captures the intensity, direction, level, or potency of a variable construct?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 10 of 20 (Start time: 01:56:11 AM) Total Marks: 1
Which of the following is a research method that allows a researcher to get information about a large number of subjects relatively inexpensively and easily?
Select correct option:

Naturalistic observation
Case study
Laboratory observation
Survey

Question # 11 of 20 (Start time: 01:57:07 AM) Total Marks: 1
Which of the following elements are NOT included in Observation in Non Reactive research?
Select correct option:

External Appearance
Accretion
Count Behaviors
Time Duration

Question # 12 of 20 (Start time: 01:58:32 AM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Question # 13 of 20 (Start time: 01:58:46 AM) Total Marks: 1
Bar charts or graphs are used for:
Select correct option:

Categorical variables
Ordered variables
Discrete variables
Continuous variables

Question # 14 of 20 (Start time: 01:59:07 AM) Total Marks: 1
Which of the following describes the nature of qualitative data interpretation?
Select correct option:

Explanatory
Reflection, integrity, explanation

Question # 15 of 20 (Start time: 01:59:17 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 16 of 20 (Start time: 01:59:33 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 17 of 20 (Start time: 01:59:40 AM) Total Marks: 1
Which of the following is an excellent way to enhance the validity of interview data collection?
Select correct option:

Spend an extended period of time in the field.
Obtain participant trust.
Recognize your own biases
Spend time in field,obtain participant trust, recognize biases.

Question # 18 of 20 (Start time: 02:00:02 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 19 of 20 (Start time: 02:00:30 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension.
It implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 20 of 20 (Start time: 02:00:54 AM) Total Marks: 1
A study that involves no researcher intervention is called_____.
Select correct option:

An experimental study
An observational study

A quasi-experimental study
A non involvement study

Question # 1 of 20 (Start time: 02:14:13 AM) Total Marks: 1
A study that involves no researcher intervention is called_____.
Select correct option:

An experimental study
An observational study
A quasi-experimental study
A non involvement study

Question # 2 of 20 (Start time: 02:14:19 AM) Total Marks: 1
Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 3 of 20 (Start time: 02:14:36 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 4 of 20 (Start time: 02:14:43 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 5 of 20 (Start time: 02:15:00 AM) Total Marks: 1
Time consumed in mall intercept interview is ---------- --.
Select correct option:

High
Moderate
Low
Nil

Question # 6 of 20 (Start time: 02:15:06 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 7 of 20 (Start time: 02:15:22 AM) Total Marks: 1
Which of the following is NOT a major method of data collection?
Select correct option:

Questionnaires
Focus groups
Correlation method
Secondary data

Question # 8 of 20 (Start time: 02:16:53 AM) Total Marks: 1
When all participants receive all treatment conditions, the study is susceptible to:
Select correct option:

Order effects
Carryover effects
Analysis of covariance
Both A & B

Question # 9 of 20 (Start time: 02:17:12 AM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 10 of 20 (Start time: 02:17:30 AM) Total Marks: 1
The logic of purposive sampling is:
Select correct option:

That a random sample can generalize to a population.
That a few information-rich participants studied in depth yield many insights about a topic.
To include all participants, even though they are not all relevant to the problem.
To use participants because the researcher has access to them.

Question # 11 of 20 (Start time: 02:17:48 AM) Total Marks: 1
What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Question # 12 of 20 (Start time: 02:18:07 AM) Total Marks: 1
Which of the following is a research method that allows a researcher to get information about a large number of subjects relatively inexpensively and easily?
Select correct option:

Naturalistic observation
Case study
Laboratory observation
Survey

Question # 13 of 20 (Start time: 02:18:25 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 14 of 20 (Start time: 02:18:39 AM) Total Marks: 1
In which of the following sampling methods People are available such as volunteer or can be easily recruited?

Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 15 of 20 (Start time: 02:18:48 AM) Total Marks: 1
Which of the following describes the situation in which the control variable intervenes between the original independent variable and the dependent variables?
Select correct option:

Replication pattern
Suppressor variable pattern
Negative linear relationship
Interpretation pattern

Question # 16 of 20 (Start time: 02:19:05 AM) Total Marks: 1
Which of the following is the most damaging problem for the researcher with secondary data?
Select correct option:

It may not be accurate
It may be biased
It may not address the aims
It may only provide part of the answer

Question # 17 of 20 (Start time: 02:19:23 AM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 18 of 20 (Start time: 02:19:30 AM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey

Telephone interviews
A mail survey
Focus groups

Question # 19 of 20 (Start time: 02:19:37 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 20 of 20 (Start time: 02:19:44 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 1 of 20 (Start time: 02:29:29 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 2 of 20 (Start time: 02:29:46 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 3 of 20 (Start time: 02:29:52 AM) Total Marks: 1
What type of sample involves some form of random selection so that every member of the sampling frame has an equal, non-zero chance of being included in the sample?

Select correct option:

Probability sample
Zero-bias sample
All-inclusive sample
Non-probability sample

Question # 4 of 20 (Start time: 02:30:20 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.
Select correct option:

Only when rival explanations have been shown to be plausible
Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 5 of 20 (Start time: 02:30:26 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 6 of 20 (Start time: 02:30:54 AM) Total Marks: 1
Graphical presentation of data lays more emphasis on:
Select correct option:

Visual representations.
Graphical techniques.
Summary statistics.
Both A& B

Question # 7 of 20 (Start time: 02:31:55 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 8 of 20 (Start time: 02:32:11 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 9 of 20 (Start time: 02:32:26 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 10 of 20 (Start time: 02:32:45 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 11 of 20 (Start time: 02:33:01 AM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 12 of 20 (Start time: 02:33:21 AM) Total Marks: 1
Which of the following group that does not receive the experimental treatment condition?
Select correct option:

Experimental group
Control group
Treatment group
Independent group

Question # 13 of 20 (Start time: 02:34:11 AM) Total Marks: 1
In single-case research, "baseline" refers to_____.
Select correct option:

The beginning point of the treatment condition
The end point of the treatment condition
The rate of response established prior to the experimental intervention
The time during which a treatment condition is administered

Question # 14 of 20 (Start time: 02:35:07 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 15 of 20 (Start time: 02:35:21 AM) Total Marks: 1
Which of the following is NOT a longitudinal study?
Select correct option:

Trend study
Census study
Panel study
Cohort study

Question # 16 of 20 (Start time: 02:35:35 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 17 of 20 (Start time: 02:36:00 AM) Total Marks: 1

Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 18 of 20 (Start time: 02:36:16 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 19 of 20 (Start time: 02:36:30 AM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 20 of 20 (Start time: 02:36:36 AM) Total Marks: 1
Quantitative data is?
Select correct option:

Expressed in numerical form
Concerned with how things are expressed
Big data
Small data

Question # 1 of 20 (Start time: 02:42:41 AM) Total Marks: 1
Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 2 of 20 (Start time: 02:42:47 AM) Total Marks: 1
When studying the simultaneous responses to two categorical questions we should set up a:
Select correct option:

Contingency table.
Frequency distribution table.
Cumulative percentage distribution table.
Histogram.

Question # 3 of 20 (Start time: 02:44:07 AM) Total Marks: 1
Which of the following is NOT a type of Non-random sampling?
Select correct option:

Cluster sampling
Convenience sampling
Quota sampling
Purposive sampling

Question # 4 of 20 (Start time: 02:45:23 AM) Total Marks: 1
Why might qualitative researchers regard interviewing an attractive alternative to participant observation?
Select correct option:

It is easier to accommodate into the researchers personal life
It reduces the problem of reactivity
It is a considerably less time-consuming process
It gives a better insight into the day to day functioning of the research site

Question # 5 of 20 (Start time: 02:45:49 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 6 of 20 (Start time: 02:46:07 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 7 of 20 (Start time: 02:46:22 AM) Total Marks: 1
Measurement reliability refers to the:
Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 8 of 20 (Start time: 02:46:54 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 9 of 20 (Start time: 02:47:15 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 10 of 20 (Start time: 02:47:37 AM) Total Marks: 1
A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal

Interval
Dichotomous

Question # 11 of 20 (Start time: 02:47:55 AM) Total Marks: 1
In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?
Select correct option:

Dependent variable
Extraneous variable
Independent variable
Confounding variable

Question # 12 of 20 (Start time: 02:48:12 AM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 13 of 20 (Start time: 02:48:19 AM) Total Marks: 1
When all participants receive all treatment conditions, the study is susceptible to:
Select correct option:

Order effects
Carryover effects
Analysis of covariance
Both A & B

Question # 14 of 20 (Start time: 02:48:37 AM) Total Marks: 1
Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 15 of 20 (Start time: 02:48:57 AM) Total Marks: 1
Procedures determining what two issues are rarely used in quantitative research?

Select correct option:

Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

Question # 16 of 20 (Start time: 02:49:14 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 17 of 20 (Start time: 02:49:37 AM) Total Marks: 1
Quantitative data is?
Select correct option:

Expressed in numerical form
Concerned with how things are expressed
Big data
Small data

Question # 18 of 20 (Start time: 02:49:44 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 19 of 20 (Start time: 02:50:01 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 20 of 20 (Start time: 02:50:08 AM) Total Marks: 1
Which one of these is not a way of measuring central tendency?
Select correct option:

Mean
Median
Mode
Regression analysis

Question # 1 of 20 (Start time: 03:01:18 AM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline
Variance
Reverse

Question # 2 of 20 (Start time: 03:01:37 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 3 of 20 (Start time: 03:01:47 AM) Total Marks: 1
Which of the following is not example of historical comparative research?
Select correct option:

Turnover
Civil Wars
Economic Forms

Question # 4 of 20 (Start time: 03:02:04 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment

A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 5 of 20 (Start time: 03:02:28 AM) Total Marks: 1
Which of the following links with an abstract model of underlying relations or causal mechanism?
Select correct option:

Historical comparative research
Experimental research
Action research
Social research

Question # 6 of 20 (Start time: 03:02:45 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 7 of 20 (Start time: 03:03:18 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 8 of 20 (Start time: 03:03:51 AM) Total Marks: 1
A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles, gestures, gaze, and touch. This is an example of;
Select correct option:

Blind observation
Quasi-experimentation
Naturalistic observation
Field experimentation

Question # 9 of 20 (Start time: 03:04:02 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 10 of 20 (Start time: 03:04:09 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 11 of 20 (Start time: 03:04:15 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.
Select correct option:

Only when rival explanations have been shown to be plausible
Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 12 of 20 (Start time: 03:04:21 AM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good_____validity.
Select correct option:

Construct
Internal
External
Causal

Question # 13 of 20 (Start time: 03:04:27 AM) Total Marks: 1
The posttest-only design with nonequivalent groups is likely to control for which of the following threats to internal validity:
Select correct option:

History
Differential selection
Additive and interactive effects
Differential attrition

Question # 14 of 20 (Start time: 03:04:43 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 15 of 20 (Start time: 03:05:00 AM) Total Marks: 1
What technique would be useful in determining why a specific toddler is afraid to go to bed?
Select correct option:

Descriptive study
Case study
A placebo
Experiment

Question # 16 of 20 (Start time: 03:05:07 AM) Total Marks: 1
_____is a measure of association tested for its genuineness by controlling the third variable.
Select correct option:

Trivariate tables.
Multiple regressions.
Statistical control.
None of the above.

Question # 17 of 20 (Start time: 03:05:25 AM) Total Marks: 1
Which of the following is a measure of inflation?
Select correct option:

Scale
Consumer price index
Weighting

Unidimensionality

Question # 18 of 20 (Start time: 03:06:42 AM) Total Marks: 1
The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 19 of 20 (Start time: 03:07:01 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 20 of 20 (Start time: 03:07:18 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 1 of 20 (Start time: 03:14:19 AM) Total Marks: 1
Easiest way to describe the numerical data of one variable is with a:
Select correct option:

Cumulative percentage distribution table.
Bar charts.
Pie chart.
Frequency distribution.

Question # 2 of 20 (Start time: 03:15:04 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation

The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 3 of 20 (Start time: 03:15:23 AM) Total Marks: 1
Which of the following is a measure of inflation?
Select correct option:

Scale
Consumer price index
Weighting
Unidimensionality

Question # 4 of 20 (Start time: 03:15:29 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 5 of 20 (Start time: 03:15:37 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 6 of 20 (Start time: 03:15:55 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 7 of 20 (Start time: 03:16:01 AM) Total Marks: 1
What is ordinal data?

Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 8 of 20 (Start time: 03:16:17 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 9 of 20 (Start time: 03:16:34 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 10 of 20 (Start time: 03:16:52 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 11 of 20 (Start time: 03:17:09 AM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline

Variance
Reverse

Question # 12 of 20 (Start time: 03:17:26 AM) Total Marks: 1
A researcher developed a measure of shyness and is now asking whether this measure does in fact measure a person's true state of shyness. This is a question of:
Select correct option:

Reactivity
Construct validity
Reliability
Content validity

Question # 13 of 20 (Start time: 03:17:50 AM) Total Marks: 1
The logic of purposive sampling is:
Select correct option:

That a random sample can generalize to a population.
That a few information-rich participants studied in depth yield many insights about a topic.
To include all participants, even though they are not all relevant to the problem.
To use participants because the researcher has access to them.

Question # 14 of 20 (Start time: 03:18:09 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 15 of 20 (Start time: 03:18:26 AM) Total Marks: 1
Which one of these is not a way of measuring central tendency?
Select correct option:

Mean
Median
Mode
Regression analysis

Question # 16 of 20 (Start time: 03:18:44 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need

Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others
All of the given options

Question # 17 of 20 (Start time: 03:19:06 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 18 of 20 (Start time: 03:19:24 AM) Total Marks: 1
How many variables should be changed at a time when conducting a single-case design?
Select correct option:

4
3
2
1

Question # 19 of 20 (Start time: 03:19:40 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 20 of 20 (Start time: 03:19:46 AM) Total Marks: 1
A study that involves no researcher intervention is called_____.
Select correct option:

An experimental study
An observational study
A quasi-experimental study
A non involvement study

Question # 1 of 20 (Start time: 03:25:56 AM) Total Marks: 1
The group that receives the experimental treatment condition is the_____.
Select correct option:

Experimental group
Control group
Participant group
Independent group

Question # 2 of 20 (Start time: 03:26:14 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 3 of 20 (Start time: 03:26:20 AM) Total Marks: 1
Setting quotas for hard-to-reach respondents is one way to minimize_____bias.
Select correct option:

Interviewer
Respondent
Instrument
Sampling

Question # 4 of 20 (Start time: 03:27:16 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 5 of 20 (Start time: 03:27:24 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.

Analyze the collected information.
State the results of the data analysis.

Question # 6 of 20 (Start time: 03:27:40 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Select correct option:

Tables
People
Books
Weight

Question # 12 of 20 (Start time: 03:30:36 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 13 of 20 (Start time: 03:30:42 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.
Select correct option:

Only when rival explanations have been shown to be plausible
Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 14 of 20 (Start time: 03:30:51 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 15 of 20 (Start time: 03:31:07 AM) Total Marks: 1
Under which of the following research method is not applicable?

Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 16 of 20 (Start time: 03:31:13 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 17 of 20 (Start time: 03:31:26 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 18 of 20 (Start time: 03:31:33 AM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:
Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 19 of 20 (Start time: 03:31:49 AM) Total Marks: 1
The findings from a study of decision making processes within a UK financial services company can be generalized to:
Select correct option:

Decision making processes in all financial services companies
Decision making processes in the all UK companies
Decision making processes in the researched companies

Companies all over the world

Question # 20 of 20 (Start time: 03:32:10 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 7 of 20 (Start time: 03:27:46 AM) Total Marks: 1
The most frequently used quasi-experimental design is the_____design.
Select correct option:

Nonequivalent comparison-group
Interrupted time-series
Changing-criterion
Regression discontinuity

Question # 8 of 20 (Start time: 03:28:03 AM) Total Marks: 1
Control for a third variable makes a:
Select correct option:

One variable table.
Bivariate table.
Trivariate table.
None of the above.

Question # 9 of 20 (Start time: 03:29:23 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 10 of 20 (Start time: 03:29:54 AM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 11 of 20 (Start time: 03:30:10 AM) Total Marks: 1
Which of the the following is not included in Objects?
Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 1 of 20 (Start time: 03:46:05 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 2 of 20 (Start time: 03:46:14 AM) Total Marks: 1
When does random assignment occur?
Select correct option:

When subjects have an equal chance to be assigned to any condition and/or group in a study
When a subject can choose its group and study
When a subject cannot choose its group and study
None of the given options

Question # 3 of 20 (Start time: 03:47:39 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 4 of 20 (Start time: 03:47:46 AM) Total Marks: 1
“Skepticism” is a norm of science. It is better explained by which of the following statement?

Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 5 of 20 (Start time: 03:48:00 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 6 of 20 (Start time: 03:48:07 AM) Total Marks: 1
Which of the following would NOT NECESSARILY be an assigned variable?
Select correct option:

Self-concept
Participation in extracurricular activities
Attitude toward school
Father's level of education

Question # 7 of 20 (Start time: 03:48:13 AM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 8 of 20 (Start time: 03:48:36 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 9 of 20 (Start time: 03:48:57 AM) Total Marks: 1
Sampling in qualitative research is similar to which type of sampling in quantitative research?
Select correct option:

Simple random sampling
Systematic sampling
Purposive sampling
Quota sampling

Question # 10 of 20 (Start time: 03:50:08 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 11 of 20 (Start time: 03:50:14 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 12 of 20 (Start time: 03:50:29 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 13 of 20 (Start time: 03:50:36 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative

Deterministic
Unethical
Rationalism

Question # 14 of 20 (Start time: 03:50:53 AM) Total Marks: 1
Which of the following elements of Observation in Non Reactive research?
Select correct option:

External Appearance
Count Behaviors
Time Duration
All of the given options

Question # 15 of 20 (Start time: 03:51:49 AM) Total Marks: 1
Why is it important to change one variable at a time in single case designs?
Select correct option:

Changing one variable allows isolation of the cause of the change
Changing more than one variable at a time confounds those independent variables
Both a and b are true
None of the above

Question # 16 of 20 (Start time: 03:52:34 AM) Total Marks: 1
How have focus groups been used in market research?
Select correct option:

To assess the popularity of various existing products
To allow for research into farmers opinions
To discuss reactions to new advertisements
To help plan new HR strategies

Question # 17 of 20 (Start time: 03:53:30 AM) Total Marks: 1
What is the purpose of a control group?
Select correct option:

Make the experiment easier to analyze
Show the value of the dependent variable when the independent variable is not being manipulated
To be able to better evaluate the effect of the independent variable
To control all variables

Question # 18 of 20 (Start time: 03:54:23 AM) Total Marks: 1
What is a cross-sectional research?

Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 19 of 20 (Start time: 03:55:32 AM) Total Marks: 1
Easiest way to describe the numerical data of one variable is with a:
Select correct option:

Cumulative percentage distribution table.
Bar charts.
Pie chart.
Frequency distribution.

Question # 20 of 20 (Start time: 03:55:38 AM) Total Marks: 1
Which of the following group that does not receive the experimental treatment condition?
Select correct option:

Experimental group
Control group
Treatment group
Independent group

Question # 1 of 20 (Start time: 04:19:41 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 2 of 20 (Start time: 04:20:12 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 3 of 20 (Start time: 04:20:20 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 4 of 20 (Start time: 04:20:38 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 5 of 20 (Start time: 04:20:59 AM) Total Marks: 1
Which of the following is the process of marking segments of data with symbols, descriptive words or category?
Select correct option:

Concurring
Coding
Coloring
Segmenting

Question # 6 of 20 (Start time: 04:21:15 AM) Total Marks: 1
Which measure of dispersion is easiest to calculate? Standard deviation?
Select correct option:

Mean
Range
Median
Mode

Question # 7 of 20 (Start time: 04:21:21 AM) Total Marks: 1
The group that receives the experimental treatment condition is the_____.
Select correct option:

Experimental group

Control group
Participant group
Independent group

Question # 8 of 20 (Start time: 04:21:38 AM) Total Marks: 1
Which of the following is a research method that allows a researcher to get information about a large number of subjects relatively inexpensively and easily?
Select correct option:

Naturalistic observation
Case study
Laboratory observation
Survey

Question # 9 of 20 (Start time: 04:22:02 AM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline
Variance
Reverse

Question # 10 of 20 (Start time: 04:22:16 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 11 of 20 (Start time: 04:22:31 AM) Total Marks: 1
Which of the following would NOT NECESSARILY be an assigned variable?
Select correct option:

Self-concept
Participation in extracurricular activities
Attitude toward school
Father's level of education

Question # 12 of 20 (Start time: 04:22:38 AM) Total Marks: 1

What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 13 of 20 (Start time: 04:23:01 AM) Total Marks: 1
Which of the following issues should NOT be mentioned in an introductory statement?
Select correct option:

The information will be kept confidential
What the findings of the research are?
Who is funding the research?
Why the respondent has been chosen?

Question # 14 of 20 (Start time: 04:24:30 AM) Total Marks: 1
Which method of sampling is least likely to produce bias?
Select correct option:

Opportunity Sampling
Random Sampling
Stratified Sampling
Quasi-random sampling

Question # 15 of 20 (Start time: 04:25:35 AM) Total Marks: 1
The extent to which we can generalize the results of a study to other participants is called:
Select correct option:

Sampling validity
External validity
Construct validity
Internal validity

Question # 16 of 20 (Start time: 04:25:52 AM) Total Marks: 1
Which of the following is NOT an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
Seek approval for research

Question # 17 of 20 (Start time: 04:26:00 AM) Total Marks: 1
Which of the following means that all the items in a scale or index fit together or measure a single construct?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 18 of 20 (Start time: 04:26:18 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 19 of 20 (Start time: 04:26:35 AM) Total Marks: 1
A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal
Interval
Dichotomous

Question # 20 of 20 (Start time: 04:26:53 AM) Total Marks: 1
Which of the following is NOT a type of Non-random sampling?
Select correct option:

Cluster sampling
Convenience sampling
Quota sampling
Purposive sampling

Question # 1 of 20 (Start time: 04:36:06 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 2 of 20 (Start time: 04:36:20 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 3 of 20 (Start time: 04:36:36 AM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 4 of 20 (Start time: 04:36:52 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 5 of 20 (Start time: 04:37:07 AM) Total Marks: 1
A form of the nonequivalent comparison-group design is recommended when:
Select correct option:

It is not possible to control for a basic history effect
It is not possible to randomly assign participants to groups
It is not possible to identify two groups

All of the above

Question # 6 of 20 (Start time: 04:38:14 AM) Total Marks: 1
What is a placebo?
Select correct option:

A rock band
An experiment done before the main study
An experiment involving lots of participants, who have been carefully chosen to avoid bias
A treatment which appears to be have the same effect as the 'real thing' but that only 'works' psychologically.

Question # 7 of 20 (Start time: 04:38:20 AM) Total Marks: 1
What is the purpose of a control group?
Select correct option:

Make the experiment easier to analyze
Show the value of the dependent variable when the independent variable is not being manipulated
To be able to better evaluate the effect of the independent variable
To control all variables

Question # 8 of 20 (Start time: 04:38:27 AM) Total Marks: 1
What technique would be useful in determining why a specific toddler is afraid to go to bed?
Select correct option:

Descriptive study
Case study
A placebo
Experiment

Question # 9 of 20 (Start time: 04:38:35 AM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 10 of 20 (Start time: 04:39:16 AM) Total Marks: 1

Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 20 (Start time: 04:39:22 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 12 of 20 (Start time: 04:39:47 AM) Total Marks: 1
How many variables should be changed at a time when conducting a single-case design?
Select correct option:

4
3
2
1

Question # 13 of 20 (Start time: 04:40:04 AM) Total Marks: 1
Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 14 of 20 (Start time: 04:40:12 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report

A systematic Enquiry
A procedure

Question # 15 of 20 (Start time: 04:40:18 AM) Total Marks: 1
Conditions favoring the use of a sample over a census include a:
Select correct option:

Long time frame
Small budget
High cost of sampling errors
Low cost of non-sampling errors

Question # 16 of 20 (Start time: 04:40:46 AM) Total Marks: 1
Which of the following is the most commonly used method for estimating the reliability of observations?
Select correct option:

Test-retest
Inter observer agreement
Internal consistency
Equivalent forms

Question # 17 of 20 (Start time: 04:41:52 AM) Total Marks: 1
Which of the following refers to the partials replicate or reproduce the same relationship that existed in the bivariate table before considering the control variable?
Select correct option:

Replication pattern
Specification pattern
Suppressor variable pattern
Negative linear relationship

Question # 18 of 20 (Start time: 04:42:09 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 19 of 20 (Start time: 04:42:25 AM) Total Marks: 1

In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 20 of 20 (Start time: 04:42:32 AM) Total Marks: 1
Bar charts or graphs are used for:
Select correct option:

Categorical variables
Ordered variables
Discrete variables
Continuous variables

Question # 1 of 20 (Start time: 04:51:36 AM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 2 of 20 (Start time: 04:51:55 AM) Total Marks: 1
You wish to make a precise estimate about the characteristics of a population of individuals. You should use:
Select correct option:

Quota sampling
Probability sampling
Accidental sampling
Snowball sampling

Question # 3 of 20 (Start time: 04:52:27 AM) Total Marks: 1
Which type of observer is likely to get a reasonable insight into the participant's views and develop a good rapport with him?
Select correct option:

Non participant

Unstructured participant
Participant
Structured participant

Question # 4 of 20 (Start time: 04:52:42 AM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Question # 5 of 20 (Start time: 04:52:47 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 6 of 20 (Start time: 04:53:04 AM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Definition
Construct
Variable
Operationalized variable

Question # 7 of 20 (Start time: 04:53:30 AM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias

Instrument bias

Question # 8 of 20 (Start time: 04:53:53 AM) Total Marks: 1
Which of the following best describes qualitative data coding?
Select correct option:

Numerically representing the concepts identified by the participants
Identify data segments that contain general episodes
Adding all of the scores together and describing them statistically
Dividing data in parts that represent single thoughts

Question # 9 of 20 (Start time: 04:55:07 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 10 of 20 (Start time: 04:55:23 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 11 of 20 (Start time: 04:55:40 AM) Total Marks: 1
Statistics is used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 12 of 20 (Start time: 04:55:46 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 13 of 20 (Start time: 04:56:07 AM) Total Marks: 1
Which of the following control techniques available to the researcher controls for both known and unknown variables?
Select correct option:

Building the extraneous variable into the design
Matching
Random assignment
Analysis of covariance

Question # 14 of 20 (Start time: 04:56:24 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 15 of 20 (Start time: 04:56:49 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 16 of 20 (Start time: 04:57:09 AM) Total Marks: 1
Which one of the following aspect to be evaluated during “Pilot Testing”?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 17 of 20 (Start time: 04:57:27 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 18 of 20 (Start time: 04:57:33 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 19 of 20 (Start time: 04:57:49 AM) Total Marks: 1
Procedures determining what two issues are rarely used in quantitative research?
Select correct option:

Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

Question # 20 of 20 (Start time: 04:57:55 AM) Total Marks: 1
Which of the following is NOT a type of Non-random sampling?
Select correct option:

Cluster sampling
Convenience sampling
Quota sampling
Purposive sampling

Question # 1 of 20 (Start time: 05:05:35 AM) Total Marks: 1
_____is a measure of association tested for its genuineness by controlling the third variable.
Select correct option:

Trivariate tables.
Multiple regressions.

Statistical control.
None of the above.

Question # 2 of 20 (Start time: 05:06:39 AM) Total Marks: 1
Critical decision area in questionnaire construction is_____.
Select correct option:

Question content
Question wording
Response strategy
All of the given options

Question # 3 of 20 (Start time: 05:06:46 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 4 of 20 (Start time: 05:07:03 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 5 of 20 (Start time: 05:07:19 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 6 of 20 (Start time: 05:07:27 AM) Total Marks: 1

A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal
Interval
Dichotomous

Question # 7 of 20 (Start time: 05:07:45 AM) Total Marks: 1
In single-case research, "baseline" refers to_____.
Select correct option:

The beginning point of the treatment condition
The end point of the treatment condition
The rate of response established prior to the experimental intervention
The time during which a treatment condition is administered

Question # 8 of 20 (Start time: 05:08:06 AM) Total Marks: 1
Which of the following elements are NOT included in Observation in Non Reactive research?
Select correct option:

External Appearance
Accretion
Count Behaviors
Time Duration

Question # 9 of 20 (Start time: 05:08:13 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 10 of 20 (Start time: 05:08:19 AM) Total Marks: 1
Which of the following best describes qualitative data coding?
Select correct option:

Numerically representing the concepts identified by the participants
Identify data segments that contain general episodes
Adding all of the scores together and describing them statistically
Dividing data in parts that represent single thoughts

Question # 11 of 20 (Start time: 05:08:35 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 12 of 20 (Start time: 05:08:42 AM) Total Marks: 1
Which of the following is a measure of inflation?
Select correct option:

Scale
Consumer price index
Weighting
Unidimensionality

Question # 13 of 20 (Start time: 05:08:48 AM) Total Marks: 1
An observation of a dependent variable response prior to any attempt to change this response is known as the_____.
Select correct option:

Flat line
Baseline
Variance
Reverse

Question # 14 of 20 (Start time: 05:09:07 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 15 of 20 (Start time: 05:09:14 AM) Total Marks: 1

Conditions favoring the use of a sample over a census include a:
Select correct option:

Long time frame
Small budget
High cost of sampling errors
Low cost of non-sampling errors

Question # 16 of 20 (Start time: 05:09:28 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 17 of 20 (Start time: 05:09:34 AM) Total Marks: 1
Which of the following is true?
Select correct option:

A study can be internally valid but not externally valid
A study can be externally valid but not internally valid
A study must be both internally and externally valid
The internal and external validity of studies are not related in any way

Question # 18 of 20 (Start time: 05:10:18 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 19 of 20 (Start time: 05:10:25 AM) Total Marks: 1
Researchers read percentaged tables to make:
Select correct option:

Differences
Relationships
Comparison
None of the above

Question # 20 of 20 (Start time: 05:11:10 AM) Total Marks: 1
Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 1 of 20 (Start time: 05:20:47 AM) Total Marks: 1
Which of the following is NOT an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
Seek approval for research

Question # 2 of 20 (Start time: 05:20:53 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 3 of 20 (Start time: 05:21:11 AM) Total Marks: 1
When studying the simultaneous responses to two categorical questions we should set up a:
Select correct option:

Contingency table.
Frequency distribution table.
Cumulative percentage distribution table.
Histogram.

Question # 4 of 20 (Start time: 05:21:28 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 5 of 20 (Start time: 05:21:34 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 6 of 20 (Start time: 05:21:41 AM) Total Marks: 1
A form of the nonequivalent comparison-group design is recommended when:
Select correct option:

It is not possible to control for a basic history effect
It is not possible to randomly assign participants to groups
It is not possible to identify two groups
All of the above

Question # 7 of 20 (Start time: 05:21:59 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 8 of 20 (Start time: 05:22:16 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 9 of 20 (Start time: 05:22:34 AM) Total Marks: 1
Which is most likely to yield qualitative data?
Select correct option:

Mail survey
Focus group
Telephone interview
None of the given options

Question # 10 of 20 (Start time: 05:23:54 AM) Total Marks: 1
The logic of purposive sampling is:
Select correct option:

That a random sample can generalize to a population.
That a few information-rich participants studied in depth yield many insights about a topic.
To include all participants, even though they are not all relevant to the problem.
To use participants because the researcher has access to them.

Question # 11 of 20 (Start time: 05:24:12 AM) Total Marks: 1
The group that receives the experimental treatment condition is the_____.
Select correct option:

Experimental group
Control group
Participant group
Independent group

Question # 12 of 20 (Start time: 05:24:28 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 13 of 20 (Start time: 05:24:43 AM) Total Marks: 1
In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?
Select correct option:

Dependent variable
Extraneous variable
Independent variable
Confounding variable

Question # 14 of 20 (Start time: 05:25:05 AM) Total Marks: 1
Which of the following elements are not included for structuring Observation in Non reactive research?
Select correct option:

Frequency
Intensity
Direction
Accretion

Question # 15 of 20 (Start time: 05:25:46 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 16 of 20 (Start time: 05:25:53 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 17 of 20 (Start time: 05:26:08 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 18 of 20 (Start time: 05:26:22 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 19 of 20 (Start time: 05:26:37 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 20 of 20 (Start time: 05:26:52 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 1 of 20 (Start time: 05:58:13 AM) Total Marks: 1
What type of sample involves some form of random selection so that every member of the sampling frame has an equal, non-zero chance of being included in the sample?
Select correct option:

Probability sample
Zero-bias sample
All-inclusive sample
Non-probability sample

Question # 2 of 20 (Start time: 05:58:36 AM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 3 of 20 (Start time: 05:58:45 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 4 of 20 (Start time: 05:58:51 AM) Total Marks: 1
When doing research involving deception with human subjects, researchers have an obligation to do which of the following?
Select correct option:

Tell subjects the truth about the study's purpose and methods after the study is completed
Prevent mental and physical harm to subjects
Let subjects withdraw from the study at any time if they don't want to keep participating
All of the given options

Question # 5 of 20 (Start time: 05:59:08 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 6 of 20 (Start time: 05:59:17 AM) Total Marks: 1
Statistics is used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 7 of 20 (Start time: 05:59:23 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 8 of 20 (Start time: 05:59:42 AM) Total Marks: 1
Cover letter must include the following information, except:
Select correct option:

How was the respondent selected?
Data collecting tools
Motivation for the respondent
Importance of research topic which is going to be conducted

Question # 9 of 20 (Start time: 05:59:57 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 10 of 20 (Start time: 06:00:14 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 11 of 20 (Start time: 06:00:39 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts

None of the given options

Question # 12 of 20 (Start time: 06:00:45 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 13 of 20 (Start time: 06:00:53 AM) Total Marks: 1
Which of the following is the process of marking segments of data with symbols, descriptive words or category?
Select correct option:

Concurring
Coding
Coloring
Segmenting

Question # 14 of 20 (Start time: 06:01:09 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 15 of 20 (Start time: 06:01:15 AM) Total Marks: 1
Which of the following would allow me to have the MOST control over environmental variables when conducting a research study?
Select correct option:

True experimental design
Quasi-experimental design
Survey
Case study

Question # 16 of 20 (Start time: 06:02:26 AM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 17 of 20 (Start time: 06:02:33 AM) Total Marks: 1
What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Question # 18 of 20 (Start time: 06:02:50 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 19 of 20 (Start time: 06:03:07 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 20 of 20 (Start time: 06:03:13 AM) Total Marks: 1
The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 1 of 20 (Start time: 06:08:37 AM) Total Marks: 1
Which term technically describes a situation in which an observer's work in a first-grade classroom disrupts the normal routines due to the curiosity of the students?
Select correct option:

Observer effect
Participant effect
Non participant bias
Observer bias

Question # 2 of 20 (Start time: 06:08:53 AM) Total Marks: 1
Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 3 of 20 (Start time: 06:09:11 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 4 of 20 (Start time: 06:09:29 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 5 of 20 (Start time: 06:09:36 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 6 of 20 (Start time: 06:09:58 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 7 of 20 (Start time: 06:10:05 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 8 of 20 (Start time: 06:10:22 AM) Total Marks: 1
How many variables should be changed at a time when conducting a single-case design?
Select correct option:

4
3
2
1

Question # 9 of 20 (Start time: 06:10:39 AM) Total Marks: 1
Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?
Select correct option:

Snowball
Intensity
Homogeneous
Purposive

Question # 10 of 20 (Start time: 06:10:59 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 11 of 20 (Start time: 06:11:16 AM) Total Marks: 1
A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles, gestures, gaze, and touch. This is an example of;
Select correct option:

Blind observation
Quasi-experimentation
Naturalistic observation
Field experimentation

Question # 12 of 20 (Start time: 06:11:26 AM) Total Marks: 1
Which of the following is NOT a longitudinal study?
Select correct option:

Trend study
Census study
Panel study
Cohort study

Question # 13 of 20 (Start time: 06:11:41 AM) Total Marks: 1
Which of the following is NOT a reason why it is preferable to tape record a focus group session?
Select correct option:

It is quicker and easier to make brief notes about what is said
It allows for analysis of how certain points are put forward
Without a tape recording it is difficult to keep an accurate record of who said what
It enables the researcher to identify which people are acting as opinion leaders

Question # 14 of 20 (Start time: 06:11:58 AM) Total Marks: 1
Which of the following best describes qualitative data analysis?
Select correct option:

It is begun after all data has been collected
It builds from abstraction to specific, concrete examples
It is an awkward, haphazard process
It is an ongoing, cyclic process integrated into all phases of research

Question # 15 of 20 (Start time: 06:12:56 AM) Total Marks: 1
Which of the following number of variables involved in Descriptive Statistics?
Select correct option:

Bivariate
Multivariate
Univariate
All of the given options

Question # 16 of 20 (Start time: 06:13:03 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 17 of 20 (Start time: 06:13:22 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 18 of 20 (Start time: 06:13:43 AM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 19 of 20 (Start time: 06:14:01 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 20 of 20 (Start time: 06:14:08 AM) Total Marks: 1
In quasi-experimental research designs, causal interpretations can be made_____.
Select correct option:

Only when rival explanations have been shown to be plausible
Only when rival explanations have been shown to be implausible
Only when the participants have been randomly selected
Only when there is a single participant in the experiment

Question # 1 of 20 (Start time: 06:19:55 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 2 of 20 (Start time: 06:20:00 AM) Total Marks: 1
Bias is defined as;
Select correct option:

The distortion of responses based on gender, ethnicity, race, or language
A lack of validity
A lack of reliability
A poor interpretation of a student's score

Question # 3 of 20 (Start time: 06:20:18 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client

Knowing as much as possible about the proposal recipients

Question # 4 of 20 (Start time: 06:20:39 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 5 of 20 (Start time: 06:20:54 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 6 of 20 (Start time: 06:21:00 AM) Total Marks: 1
Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 7 of 20 (Start time: 06:21:06 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 8 of 20 (Start time: 06:21:13 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 9 of 20 (Start time: 06:21:19 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 10 of 20 (Start time: 06:21:34 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 11 of 20 (Start time: 06:21:50 AM) Total Marks: 1
Which type of research address major societal change?
Select correct option:

Experimental Research
Action Research
Social Research
Historical Comparative Research

Question # 12 of 20 (Start time: 06:22:07 AM) Total Marks: 1
A census taker often collects data through which of the following?
Select correct option:

Standardized tests
Interviews
Secondary data
Observations

Question # 13 of 20 (Start time: 06:23:00 AM) Total Marks: 1

Which of the following is the process of marking segments of data with symbols, descriptive words or category?
Select correct option:

Concurring
Coding
Coloring
Segmenting

Question # 14 of 20 (Start time: 06:23:19 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 15 of 20 (Start time: 06:23:40 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 16 of 20 (Start time: 06:23:57 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 17 of 20 (Start time: 06:24:13 AM) Total Marks: 1
Control in experimental research is BEST described as an attempt to:
Select correct option:

Limit threats to external validity
Increase the generalize ability of findings

Equate the subjects on the treatment variable
Limit threats to internal validity

Question # 18 of 20 (Start time: 06:25:19 AM) Total Marks: 1
Which of the following group that does not receive the experimental treatment condition?
Select correct option:

Experimental group
Control group
Treatment group
Independent group

Question # 19 of 20 (Start time: 06:25:35 AM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 20 of 20 (Start time: 06:25:57 AM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 1 of 20 (Start time: 06:35:59 AM) Total Marks: 1
Which of the following is false with regard to the benefits of multiple-choice questions over open-ended questions?
Select correct option:

Multiple-choice questions are easier to design
Multiple-choice questions are less costly for coding and data processing
Multiple-choice questions are quicker to administer
The use of multiple-choice questions results in higher cooperation for self-administered surveys

Question # 2 of 20 (Start time: 06:36:17 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:

Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 3 of 20 (Start time: 06:36:24 AM) Total Marks: 1
Which of the following is a measure of inflation?
Select correct option:

Scale
Consumer price index
Weighting
Unidimensionality

Question # 4 of 20 (Start time: 06:36:31 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 5 of 20 (Start time: 06:36:37 AM) Total Marks: 1
Researchers read percentaged tables to make:
Select correct option:

Differences
Relationships
Comparison
None of the above

Question # 6 of 20 (Start time: 06:36:44 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 7 of 20 (Start time: 06:36:50 AM) Total Marks: 1
Statistics are used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 8 of 20 (Start time: 06:36:57 AM) Total Marks: 1
What is a placebo?
Select correct option:

A rock band
An experiment done before the main study
An experiment involving lots of participants, who have been carefully chosen to avoid bias
A treatment which appears to be have the same effect as the 'real thing' but that only 'works' psychologically.

Question # 9 of 20 (Start time: 06:37:03 AM) Total Marks: 1
You wish to make a precise estimate about the characteristics of a population of individuals. You should use:
Select correct option:

Quota sampling
Probability sampling
Accidental sampling
Snowball sampling

Question # 10 of 20 (Start time: 06:37:30 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others
All of the given options

Question # 11 of 20 (Start time: 06:37:54 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 12 of 20 (Start time: 06:38:24 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 13 of 20 (Start time: 06:38:44 AM) Total Marks: 1
The logic of qualitative data analysis is described as:
Select correct option:

Objective
Subjective
Inductive
Deductive

Question # 14 of 20 (Start time: 06:38:50 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 15 of 20 (Start time: 06:39:07 AM) Total Marks: 1
Bar charts or graphs are used for:
Select correct option:

Categorical variables
Ordered variables
Discrete variables
Continuous variables

Question # 16 of 20 (Start time: 06:39:13 AM) Total Marks: 1

What does it mean if two variables have a positive correlation?
Select correct option:

As one variable increases, so does the other
As one variable increases, the other decreases
The correlation between the two variables is 0
The correlation between the two variables is greater than 1.0

Question # 17 of 20 (Start time: 06:39:20 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 18 of 20 (Start time: 06:39:42 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 19 of 20 (Start time: 06:40:09 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 20 of 20 (Start time: 06:40:31 AM) Total Marks: 1
What is the purpose of a control group?
Select correct option:

Make the experiment easier to analyze
Show the value of the dependent variable when the independent variable is not being

manipulated
To be able to better evaluate the effect of the independent variable
To control all variables

Question # 1 of 20 (Start time: 06:46:06 AM) Total Marks: 1
Statistics is used by researchers to:
Select correct option:

Analyze the empirical data collected in a study
Make their findings sound better
Operationally define their variables
Ensure the study comes out the way it was intended

Question # 2 of 20 (Start time: 06:46:11 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 3 of 20 (Start time: 06:46:17 AM) Total Marks: 1
The most frequently used quasi-experimental design is the_____design.
Select correct option:

Nonequivalent comparison-group
Interrupted time-series
Changing-criterion
Regression discontinuity

Question # 4 of 20 (Start time: 06:46:38 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 5 of 20 (Start time: 06:46:44 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 6 of 20 (Start time: 06:47:09 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 7 of 20 (Start time: 06:47:21 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 8 of 20 (Start time: 06:47:28 AM) Total Marks: 1
Easiest way to describe the numerical data of one variable is with a:
Select correct option:

Cumulative percentage distribution table.
Bar charts.
Pie chart.
Frequency distribution.

Question # 9 of 20 (Start time: 06:47:36 AM) Total Marks: 1
Which of the following is the most damaging problem for the researcher with secondary data?
Select correct option:

It may not be accurate
It may be biased
It may not address the aims
It may only provide part of the answer

Question # 10 of 20 (Start time: 06:47:54 AM) Total Marks: 1
Which term technically describes a situation in which an observer's work in a first-grade classroom disrupts the normal routines due to the curiosity of the students?
Select correct option:

Observer effect
Participant effect
Non participant bias
Observer bias

Question # 11 of 20 (Start time: 06:48:08 AM) Total Marks: 1
Which of the following questions might invade the privacy of a research participant?
Select correct option:

How long have you worked for this organisation?
What is your home address?
What do you think about your direct line manager?
What happened during your last performance appraisal?

Question # 12 of 20 (Start time: 06:48:24 AM) Total Marks: 1
Bias is defined as;
Select correct option:

The distortion of responses based on gender, ethnicity, race, or language
A lack of validity
A lack of reliability
A poor interpretation of a student's score

Question # 13 of 20 (Start time: 06:48:32 AM) Total Marks: 1
Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?
Select correct option:

Experimental control
Differential influence
Matching
Analysis of covariance

Question # 14 of 20 (Start time: 06:49:15 AM) Total Marks: 1
Graphical presentation of data lays more emphasis on:
Select correct option:

Visual representations.

Graphical techniques.
Summary statistics.
Both A& B

Question # 15 of 20 (Start time: 06:49:33 AM) Total Marks: 1
On which component of his field notes was Mr. M focused when he expressed in his notes his thoughts and ideas about what he observed?
Select correct option:

Reflection
Protocol
Formal data
Analysis

Question # 16 of 20 (Start time: 06:50:26 AM) Total Marks: 1
Which of the following refers to Ecological validity?
Select correct option:

The participants to who results generalize
The instruments used to measure the independent and dependent variables
The internal validity of a study
The context to which results generalize

Question # 17 of 20 (Start time: 06:50:44 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 18 of 20 (Start time: 06:51:18 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 19 of 20 (Start time: 06:51:25 AM) Total Marks: 1

In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?
Select correct option:

Dependent variable
Extraneous variable
Independent variable
Confounding variable

Question # 20 of 20 (Start time: 06:51:43 AM) Total Marks: 1
Which of the following questions might be explored by using an employee focus group?
Select correct option:

What is the extent of employee theft in the workplace?
What links are there between salary level and personal productivity?
What are employee attitudes to corporate image?
Which manager is the least trusted by employees and why?

Question # 1 of 20 (Start time: 06:57:11 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 2 of 20 (Start time: 06:57:17 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 3 of 20 (Start time: 06:57:33 AM) Total Marks: 1
When a variable is so closely associated with the independent variable that we do not know which one is producing the experimental effect, the variable is:
Select correct option:

Manipulated
Confounded

Unspecified
Uncontrolled

Question # 4 of 20 (Start time: 06:57:50 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 5 of 20 (Start time: 06:58:15 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 20 (Start time: 06:58:34 AM) Total Marks: 1
What is the purpose of a control group?
Select correct option:

Make the experiment easier to analyze
Show the value of the dependent variable when the independent variable is not being manipulated
To be able to better evaluate the effect of the independent variable
To control all variables

Question # 7 of 20 (Start time: 06:58:41 AM) Total Marks: 1
Why is it important to change one variable at a time in single case designs?
Select correct option:

Changing one variable allows isolation of the cause of the change
Changing more than one variable at a time confounds those independent variables
Both a and b are true
None of the above

Question # 8 of 20 (Start time: 06:59:08 AM) Total Marks: 1
The validity of a measure refers to the:

Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 9 of 20 (Start time: 06:59:36 AM) Total Marks: 1
Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?
Select correct option:

Experimental control
Differential influence
Matching
Analysis of covariance

Question # 10 of 20 (Start time: 06:59:52 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 11 of 20 (Start time: 07:00:08 AM) Total Marks: 1
Which of the following is true?
Select correct option:

A study can be internally valid but not externally valid
A study can be externally valid but not internally valid
A study must be both internally and externally valid
The internal and external validity of studies are not related in any way

Question # 12 of 20 (Start time: 07:00:26 AM) Total Marks: 1
Which of the following is not example of historical comparative research?
Select correct option:

Social Forms
Turnover

Civil Wars
Economic Forms

Question # 13 of 20 (Start time: 07:00:46 AM) Total Marks: 1
Mr. Raheel is concerned about potential problems with the reliability of his observers, which strategy would you suggest he should follow?
Select correct option:

Specify the observational variables
Specification, training and monitoring
Monitor his observers in the field
Train his observers carefully

Question # 14 of 20 (Start time: 07:02:04 AM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 15 of 20 (Start time: 07:02:27 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 16 of 20 (Start time: 07:02:52 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 17 of 20 (Start time: 07:03:09 AM) Total Marks: 1
How many variables should be changed at a time when conducting a single-case design?
Select correct option:

4
3
2
1

Question # 18 of 20 (Start time: 07:03:15 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 19 of 20 (Start time: 07:03:33 AM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Definition
Construct
Variable
Operationalized variable

Question # 20 of 20 (Start time: 07:03:50 AM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 1 of 20 (Start time: 07:10:04 AM) Total Marks: 1
Which of the following is a measure in which the researcher captures the intensity, direction, level, or potency of a variable construct?
Select correct option:

Scale
Index
Unidimensionality

Weighting

Question # 2 of 20 (Start time: 07:10:24 AM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 3 of 20 (Start time: 07:10:38 AM) Total Marks: 1
Which of the following describes the situation in which the control variable intervenes between the original independent variable and the dependent variables?
Select correct option:

Replication pattern
Suppressor variable pattern
Negative linear relationship
Interpretation pattern

Question # 4 of 20 (Start time: 07:10:56 AM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 5 of 20 (Start time: 07:11:14 AM) Total Marks: 1
Which of the following is NOT a type of Non-random sampling?
Select correct option:

Cluster sampling
Convenience sampling
Quota sampling
Purposive sampling

Question # 6 of 20 (Start time: 07:11:21 AM) Total Marks: 1
A threat to internal validity in the nonequivalent comparison-group design includes:
Select correct option:

Selection-maturation effect
Selection-history effect
Selection-regression effect
All of the above

Question # 7 of 20 (Start time: 07:11:28 AM) Total Marks: 1
Which of the following questions might be explored by using an employee focus group?
Select correct option:

What is the extent of employee theft in the workplace?
What links are there between salary level and personal productivity?
What are employee attitudes to corporate image?
Which manager is the least trusted by employees and why?

Question # 8 of 20 (Start time: 07:11:43 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 9 of 20 (Start time: 07:11:59 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 10 of 20 (Start time: 07:12:16 AM) Total Marks: 1
Setting quotas for hard-to-reach respondents is one way to minimize_____bias.
Select correct option:

Interviewer
Respondent
Instrument
Sampling

Question # 11 of 20 (Start time: 07:12:34 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.

Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 12 of 20 (Start time: 07:12:51 AM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 13 of 20 (Start time: 07:12:57 AM) Total Marks: 1
The findings from a study of decision making processes within a UK financial services company can be generalized to:
Select correct option:

Decision making processes in all financial services companies
Decision making processes in the all UK companies
Decision making processes in the researched companies
Companies all over the world

Question # 14 of 20 (Start time: 07:13:03 AM) Total Marks: 1
Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?
Select correct option:

What role to adopt when interviewing male managers?
How many female employees should be interviewed for a representative sample?
How to overcome the issue of false consciousness?
What data to use when publishing findings?

Question # 15 of 20 (Start time: 07:13:19 AM) Total Marks: 1
Which type of observer is likely to get a reasonable insight into the participant's views and develop a good rapport with him?
Select correct option:

Non participant
Unstructured participant

Participant
Structured participant

Question # 16 of 20 (Start time: 07:13:36 AM) Total Marks: 1
Why does qualitative interviewing have an advantage over participant observation when it comes to longitudinal research?
Select correct option:

Repeat interviews are easier to organise.
It allows for a better exploration of key issues.
It is a more focused research method.
Participant observers are prone to 'go native' during longitudinal research.

Question # 17 of 20 (Start time: 07:14:02 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 18 of 20 (Start time: 07:14:20 AM) Total Marks: 1
Which of the following types of analysis can be done using secondary analysis?
Select correct option:

The analysis of specific subgroups
Longitudinal analysis
Cross-cultural analysis
All of the given options

Question # 19 of 20 (Start time: 07:15:30 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 20 of 20 (Start time: 07:15:47 AM) Total Marks: 1

What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 1 of 20 (Start time: 07:19:53 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 2 of 20 (Start time: 07:19:59 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 3 of 20 (Start time: 07:20:06 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 4 of 20 (Start time: 07:20:22 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews

Theoretical reviews
Self-study reviews
Historical reviews

Question # 5 of 20 (Start time: 07:20:38 AM) Total Marks: 1
Which of the following questions might be explored by using an employee focus group?
Select correct option:

What is the extent of employee theft in the workplace?
What links are there between salary level and personal productivity?
What are employee attitudes to corporate image?
Which manager is the least trusted by employees and why?

Question # 6 of 20 (Start time: 07:20:55 AM) Total Marks: 1
You wish to make a precise estimate about the characteristics of a population of individuals. You should use:
Select correct option:

Quota sampling
Probability sampling
Accidental sampling
Snowball sampling

Question # 7 of 20 (Start time: 07:21:13 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 8 of 20 (Start time: 07:21:31 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 9 of 20 (Start time: 07:21:48 AM) Total Marks: 1

Which of the table is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?
Select correct option:

Bivariate Tables
Frequency Distribution Table
SPSS Table
MINITAB Table

Question # 10 of 20 (Start time: 07:21:54 AM) Total Marks: 1
Which of the following means that all the items in a scale or index fit together or measure a single construct?
Select correct option:

Scale
Index
Unidimensionality
Weighting

Question # 11 of 20 (Start time: 07:22:13 AM) Total Marks: 1
In frequency tables total of columns and rows are called:
Select correct option:

Body of table
Cell of table
Area of table
Marginal

Question # 12 of 20 (Start time: 07:22:32 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 13 of 20 (Start time: 07:22:50 AM) Total Marks: 1
When all participants receive all treatment conditions, the study is susceptible to:
Select correct option:

Order effects
Carryover effects

Analysis of covariance
Both A & B

Question # 14 of 20 (Start time: 07:23:07 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 15 of 20 (Start time: 07:23:14 AM) Total Marks: 1
Which of the following is likely to reduce the validity of a test?
Select correct option:

Unclear test directions
Ambiguous test items
Untaught items
All of the given options

Question # 16 of 20 (Start time: 07:23:30 AM) Total Marks: 1
Which of the following is true?
Select correct option:

A study can be internally valid but not externally valid
A study can be externally valid but not internally valid
A study must be both internally and externally valid
The internal and external validity of studies are not related in any way

Question # 17 of 20 (Start time: 07:23:49 AM) Total Marks: 1
The extent to which we can generalize the results of a study to other participants is called:
Select correct option:

Sampling validity
External validity
Construct validity
Internal validity

Question # 18 of 20 (Start time: 07:24:05 AM) Total Marks: 1
The group that receives the experimental treatment condition is the_____.
Select correct option:

Experimental group
Control group
Participant group
Independent group

Question # 19 of 20 (Start time: 07:24:23 AM) Total Marks: 1
Which method of sampling is least likely to produce bias?
Select correct option:

Opportunity Sampling
Random Sampling
Stratified Sampling
Quasi-random sampling

Question # 20 of 20 (Start time: 07:24:39 AM) Total Marks: 1
Graphical presentation of data lays more emphasis on:
Select correct option:

Visual representations.
Graphical techniques.
Summary statistics.
Both A& B

Question # 1 of 20 (Start time: 07:37:20 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 2 of 20 (Start time: 07:37:36 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 3 of 20 (Start time: 07:37:51 AM) Total Marks: 1
In which of the following nonrandom sampling techniques does the researcher ask the research participants to identify other potential research participants?
Select correct option:

Snowball
Convenience
Purposive
Quota

Question # 4 of 20 (Start time: 07:38:37 AM) Total Marks: 1
Which of the following can be referred as a Reputational sampling?
Select correct option:

Purposive Sampling
Quota Sampling
Convenience Sampling
Snowball Sampling

Question # 5 of 20 (Start time: 07:39:05 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 6 of 20 (Start time: 07:39:12 AM) Total Marks: 1
Which of the following number of variables involved in Descriptive Statistics?
Select correct option:

Bivariate
Multivariate
Univariate
All of the given options

Question # 7 of 20 (Start time: 07:39:18 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable

Independent variable
Extraneous variable
None of the given options

Question # 8 of 20 (Start time: 07:39:35 AM) Total Marks: 1
Which of the following is the process of marking segments of data with symbols, descriptive words or category?
Select correct option:

Concurring
Coding
Coloring
Segmenting

Question # 9 of 20 (Start time: 07:39:51 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 10 of 20 (Start time: 07:39:58 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 11 of 20 (Start time: 07:40:04 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 12 of 20 (Start time: 07:40:12 AM) Total Marks: 1
Which is most likely to yield qualitative data?

Select correct option:

Mail survey
Focus group
Telephone interview
None of the given options

Question # 13 of 20 (Start time: 07:40:28 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 14 of 20 (Start time: 07:40:45 AM) Total Marks: 1
Which of the following terms represents the most general, broad concept?
Select correct option:

Test
Assessment
Measurement
Instrument

Question # 15 of 20 (Start time: 07:41:00 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 16 of 20 (Start time: 07:41:06 AM) Total Marks: 1
Which of the following group that does not receive the experimental treatment condition?
Select correct option:

Experimental group
Control group
Treatment group
Independent group

Question # 17 of 20 (Start time: 07:41:23 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension.
It implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 18 of 20 (Start time: 07:41:39 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 19 of 20 (Start time: 07:42:38 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 20 of 20 (Start time: 07:42:44 AM) Total Marks: 1
Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?
Select correct option:

What role to adopt when interviewing male managers?
How many female employees should be interviewed for a representative sample?
How to overcome the issue of false consciousness?
What data to use when publishing findings?

Question # 13 of 15 (Start time: 01:17:47 AM) Total Marks: 1
Which of the following terms represents the most general, broad concept?
Select correct option:

Test

Assessment
Measurement
Instrument

Question # 15 of 15 (Start time: 01:18:31 AM) Total Marks: 1
A_____scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Select correct option:

Ratio
Nominal
Interval
Dichotomous

Question # 14 of 15 (Start time: 01:34:29 AM) Total Marks: 1
You wish to make a precise estimate about the characteristics of a population of individuals. You should use:
Select correct option:

Quota sampling
Probability sampling
Accidental sampling
Snowball sampling

Question # 7 of 15 (Start time: 01:38:39 AM) Total Marks: 1
Which of the following is a research method that allows a researcher to get information about a large number of subjects relatively inexpensively and easily?
Select correct option:

Naturalistic observation
Case study
Laboratory observation
Survey

Question # 14 of 15 (Start time: 01:41:06 AM) Total Marks: 1
Setting quotas for hard-to-reach respondents is one way to minimize_____bias.
Select correct option:

Interviewer
Respondent
Instrument
Sampling

Question # 8 of 15 (Start time: 02:07:37 AM) Total Marks: 1
In which of the following nonrandom sampling techniques does the researcher ask the research participants to identify other potential research participants?
Select correct option:

Snowball
Convenience
Purposive
Quota

Question # 15 of 15 (Start time: 02:09:33 AM) Total Marks: 1
Conditions favoring the use of a sample over a census include a:
Select correct option:

Long time frame
Small budget
High cost of sampling errors
Low cost of non-sampling errors

Question # 13 of 15 (Start time: 02:24:20 AM) Total Marks: 1
Cover letter must include the following information, except:
Select correct option:

How was the respondent selected?
Data collecting tools
Motivation for the respondent
Importance of research topic which is going to be conducted

Question # 15 of 15 (Start time: 02:32:19 AM) Total Marks: 1
Procedures determining what two issues are rarely used in quantitative research?
Select correct option:

Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

Question # 2 of 15 (Start time: 02:37:32 AM) Total Marks: 1
What type of sample involves some form of random selection so that every member of the sampling frame has an equal, non-zero chance of being included in the sample?
Select correct option:

Probability sample
Zero-bias sample
All-inclusive sample
Non-probability sample

Question # 8 of 15 (Start time: 04:16:58 AM) Total Marks: 1
In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Select correct option:

Simple random sampling
Cluster sampling
Systematic sampling
Convenience sampling

Question # 5 of 15 (Start time: 04:28:25 AM) Total Marks: 1
Which of the following can be referred as a Reputational sampling?
Select correct option:

Purposive Sampling
Quota Sampling
Convenience Sampling
Snowball Sampling

Question # 7 of 15 (Start time: 04:29:14 AM) Total Marks: 1
Which of the following is not an example of deception?
Select correct option:

A part of the truth is not communicated to the respondent
To observe code of ethics
To leak out information regarding any confidential matter
To create bias between respondents before the survey

Question # 5 of 15 (Start time: 04:42:47 AM) Total Marks: 1
Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?
Select correct option:

Snowball
Intensity
Homogeneous
Purposive

Question # 13 of 15 (Start time: 04:49:34 AM) Total Marks: 1
Which of the following concerns is MOST likely to become a problem if Mr. Baber uses purposive sampling techniques?
Select correct option:

Generalizability from the sample to the population.
Statistically equal groups.
Subjects participating in the study.
Selection of participants who are thought to be informative, articulate, and experienced with the research topic and setting.

Question # 6 of 15 (Start time: 05:43:27 PM) Total Marks: 1
The extent to which we can generalize the results of a study to other participants is called:
Select correct option:

Sampling validity
External validity
Construct validity
Internal validity

Question # 5 of 15 (Start time: 05:49:14 PM) Total Marks: 1
Which of the following is NOT an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
Seek approval for research

Question # 11 of 15 (Start time: 05:50:51 PM) Total Marks: 1
Bias is defined as;
Select correct option:

The distortion of responses based on gender, ethnicity, race, or language
A lack of validity
A lack of reliability
A poor interpretation of a student's score

Question # 2 of 15 (Start time: 06:09:02 PM) Total Marks: 1
Sampling in qualitative research is similar to which type of sampling in quantitative research?
Select correct option:

Simple random sampling
Systematic sampling
Purposive sampling
Quota sampling

Question # 10 of 15 (Start time: 06:48:41 PM) Total Marks: 1
Increasing the size of the sample is likely to:
Select correct option:

Decrease sampling error but increase non-sampling error
Increase sampling error but decrease non-sampling error
Decrease both sampling error and non-sampling error
Increase both sampling error and non-sampling error

Question # 1 of 15 (Start time: 01:09:24 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:
Basic
Applied
Evaluation
Grounded theory

Question # 2 of 15 (Start time: 01:10:00 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 3 of 15 (Start time: 01:11:32 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 4 of 15 (Start time: 01:12:12 AM) Total Marks: 1

All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 01:13:02 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 6 of 15 (Start time: 01:14:12 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 01:15:12 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 8 of 15 (Start time: 01:15:54 AM) Total Marks: 1
----------surveys are more impersonal than face-to-face interviews.
Select correct option:

Mail
Recorded Interview
Focus group

Telephone

Question # 9 of 15 (Start time: 01:17:01 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 10 of 15 (Start time: 01:17:40 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 11 of 15 (Start time: 01:18:29 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 12 of 15 (Start time: 01:19:08 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 13 of 15 (Start time: 01:19:47 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.

Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 01:20:14 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 15 of 15 (Start time: 01:20:58 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 1 of 15 (Start time: 01:42:54 AM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 2 of 15 (Start time: 01:43:53 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 3 of 15 (Start time: 01:45:04 AM) Total Marks: 1

The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 4 of 15 (Start time: 01:46:11 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 5 of 15 (Start time: 01:47:32 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 6 of 15 (Start time: 01:48:41 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 7 of 15 (Start time: 01:49:16 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.

We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 8 of 15 (Start time: 01:49:47 AM) Total Marks: 1
The _____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 9 of 15 (Start time: 01:50:21 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 10 of 15 (Start time: 01:51:08 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 11 of 15 (Start time: 01:52:08 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text

Locating research reports in libraries

Question # 12 of 15 (Start time: 01:52:24 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 13 of 15 (Start time: 01:53:05 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 14 of 15 (Start time: 01:53:35 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 15 of 15 (Start time: 01:54:17 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 1 of 15 (Start time: 07:38:05 PM) Total Marks: 1

If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 2 of 15 (Start time: 07:39:22 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 3 of 15 (Start time: 07:39:53 PM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 4 of 15 (Start time: 07:41:01 PM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 5 of 15 (Start time: 07:42:29 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits

Free consent of respondents
All of the given options

Question # 6 of 15 (Start time: 07:43:51 PM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 7 of 15 (Start time: 07:44:58 PM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 8 of 15 (Start time: 07:46:15 PM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 9 of 15 (Start time: 07:46:47 PM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 10 of 15 (Start time: 07:47:20 PM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 11 of 15 (Start time: 07:48:51 PM) Total Marks: 1
Which of the following is NOT a longitudinal study?
Select correct option:

Trend study
Census study
Panel study
Cohort study

Question # 12 of 15 (Start time: 07:50:18 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 07:50:45 PM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 14 of 15 (Start time: 07:51:39 PM) Total Marks: 1
Which one of the following aspect to be evaluated during "Pilot Testing"?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 15 of 15 (Start time: 07:52:12 PM) Total Marks: 1

Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 1 of 15 (Start time: 08:21:00 PM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 2 of 15 (Start time: 08:22:29 PM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 3 of 15 (Start time: 08:23:26 PM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 4 of 15 (Start time: 08:23:54 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 5 of 15 (Start time: 08:25:23 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 6 of 15 (Start time: 08:26:40 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 7 of 15 (Start time: 08:27:09 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 8 of 15 (Start time: 08:27:49 PM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 9 of 15 (Start time: 08:28:14 PM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 10 of 15 (Start time: 08:28:44 PM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 11 of 15 (Start time: 08:29:01 PM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 12 of 15 (Start time: 08:29:48 PM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 13 of 15 (Start time: 08:30:19 PM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory

Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 14 of 15 (Start time: 08:31:05 PM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Definition
Construct
Variable
Operationalized variable

Question # 15 of 15 (Start time: 08:31:51 PM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 1 of 15 (Start time: 09:02:12 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 2 of 15 (Start time: 09:02:38 PM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 3 of 15 (Start time: 09:03:58 PM) Total Marks: 1

Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 4 of 15 (Start time: 09:04:20 PM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 5 of 15 (Start time: 09:04:50 PM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 6 of 15 (Start time: 09:05:12 PM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 7 of 15 (Start time: 09:05:41 PM) Total Marks: 1
Which of the following is false with regard to the benefits of multiple-choice questions over open-ended questions?
Select correct option:

Multiple-choice questions are easier to design
Multiple-choice questions are less costly for coding and data processing
Multiple-choice questions are quicker to administer

The use of multiple-choice questions results in higher cooperation for self-administered surveys

Question # 8 of 15 (Start time: 09:06:58 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 9 of 15 (Start time: 09:07:37 PM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 10 of 15 (Start time: 09:08:13 PM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 11 of 15 (Start time: 09:08:52 PM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 12 of 15 (Start time: 09:09:27 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 13 of 15 (Start time: 09:09:51 PM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 14 of 15 (Start time: 09:10:24 PM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 15 of 15 (Start time: 09:11:52 PM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 1 of 15 (Start time: 11:59:22 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.

Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 2 of 15 (Start time: 12:03:22 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 3 of 15 (Start time: 12:04:18 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 4 of 15 (Start time: 12:04:33 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 5 of 15 (Start time: 12:05:03 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 6 of 15 (Start time: 12:05:20 AM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."

Select correct option:

Applied
Interview
Basic
Stupid

Question # 7 of 15 (Start time: 12:06:05 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 8 of 15 (Start time: 12:06:19 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 9 of 15 (Start time: 12:07:07 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 10 of 15 (Start time: 12:08:20 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 11 of 15 (Start time: 12:09:47 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 12 of 15 (Start time: 12:09:59 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 13 of 15 (Start time: 12:10:28 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 14 of 15 (Start time: 12:11:05 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 15 of 15 (Start time: 12:11:36 AM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Definition
Construct
Variable
Operationalized variable

Question # 1 of 15 (Start time: 12:20:27 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 2 of 15 (Start time: 12:20:42 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 3 of 15 (Start time: 12:21:29 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 4 of 15 (Start time: 12:21:58 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 5 of 15 (Start time: 12:22:12 AM) Total Marks: 1

All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 6 of 15 (Start time: 12:23:14 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 12:23:31 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 8 of 15 (Start time: 12:24:05 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 12:24:21 AM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 10 of 15 (Start time: 12:25:46 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 12:26:01 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 12 of 15 (Start time: 12:26:23 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 13 of 15 (Start time: 12:26:42 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 14 of 15 (Start time: 12:26:54 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews

Theoretical reviews
Self-study reviews
Historical reviews

Question # 15 of 15 (Start time: 12:27:10 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 1 of 15 (Start time: 12:31:21 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 2 of 15 (Start time: 12:32:05 AM) Total Marks: 1
Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?
Select correct option:

What role to adopt when interviewing male managers?
How many female employees should be interviewed for a representative sample?
How to overcome the issue of false consciousness?
What data to use when publishing findings?

Question # 3 of 15 (Start time: 12:33:29 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 4 of 15 (Start time: 12:34:06 AM) Total Marks: 1
The validity of a measure refers to the:

Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 5 of 15 (Start time: 12:35:05 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 6 of 15 (Start time: 12:35:58 AM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 7 of 15 (Start time: 12:36:21 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 8 of 15 (Start time: 12:36:35 AM) Total Marks: 1
A researcher developed a measure of shyness and is now asking whether this measure does in fact measure a person's true state of shyness. This is a question of:
Select correct option:

Reactivity
Construct validity
Reliability

Content validity

Question # 9 of 15 (Start time: 12:38:07 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 10 of 15 (Start time: 12:38:49 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 11 of 15 (Start time: 12:39:32 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 12 of 15 (Start time: 12:39:47 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 13 of 15 (Start time: 12:40:48 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?

Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 14 of 15 (Start time: 12:42:09 AM) Total Marks: 1
Measurement reliability refers to the:
Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 15 of 15 (Start time: 12:43:26 AM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 1 of 15 (Start time: 12:51:15 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 2 of 15 (Start time: 12:51:32 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 3 of 15 (Start time: 12:52:12 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 4 of 15 (Start time: 12:52:57 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 5 of 15 (Start time: 12:53:34 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 6 of 15 (Start time: 12:54:04 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 7 of 15 (Start time: 12:54:31 AM) Total Marks: 1

"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 8 of 15 (Start time: 12:55:04 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 9 of 15 (Start time: 12:56:24 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 10 of 15 (Start time: 12:56:37 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 12:56:50 AM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 12 of 15 (Start time: 12:57:04 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 13 of 15 (Start time: 12:57:14 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 15 of 15 (Start time: 12:58:52 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 1 of 15 (Start time: 01:08:33 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 2 of 15 (Start time: 01:08:48 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts

All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 3 of 15 (Start time: 01:10:03 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 01:11:32 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 01:12:07 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 6 of 15 (Start time: 01:12:23 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 7 of 15 (Start time: 01:12:48 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?

Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 8 of 15 (Start time: 01:13:01 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 9 of 15 (Start time: 01:13:25 AM) Total Marks: 1
Mr. Haris is interested in studying the shared beliefs and practices of the teachers in a small rural school. He is likely to use which research design?
Select correct option:

Action research
Historical research
Ethnography
Grounded theory

Question # 10 of 15 (Start time: 01:14:34 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 11 of 15 (Start time: 01:14:48 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing

Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 12 of 15 (Start time: 01:16:12 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 13 of 15 (Start time: 01:16:29 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 14 of 15 (Start time: 01:16:42 AM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 15 of 15 (Start time: 01:16:56 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 1 of 15 (Start time: 01:35:05 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 2 of 15 (Start time: 01:35:26 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 3 of 15 (Start time: 01:35:38 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 01:35:51 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 5 of 15 (Start time: 01:36:23 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.

We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 6 of 15 (Start time: 01:36:55 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 7 of 15 (Start time: 01:37:09 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 8 of 15 (Start time: 01:37:41 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 9 of 15 (Start time: 01:37:56 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 10 of 15 (Start time: 01:38:13 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?

Should competitive games be banned from elementary schools?

What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?

What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 11 of 15 (Start time: 01:38:38 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 12 of 15 (Start time: 01:39:01 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 13 of 15 (Start time: 01:39:14 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 14 of 15 (Start time: 01:39:34 AM) Total Marks: 1
Which of the following questions might invade the privacy of a research participant?
Select correct option:

How long have you worked for this organisation?

What is your home address?
What do you think about your direct line manager?
What happened during your last performance appraisal?

Question # 15 of 15 (Start time: 01:40:16 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 1 of 15 (Start time: 01:44:11 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 2 of 15 (Start time: 01:44:37 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 3 of 15 (Start time: 01:45:21 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?

What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 4 of 15 (Start time: 01:45:38 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 5 of 15 (Start time: 01:46:23 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 6 of 15 (Start time: 01:46:41 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 8 of 15 (Start time: 01:48:40 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 9 of 15 (Start time: 01:49:06 AM) Total Marks: 1
How can we determine if a test has good validity?
Select correct option:

It produces the same result when it is given at different times to the same group of people

It produces the same result no matter which version of the test is used

It measures what it is supposed to measure

All of the questions on it can be answered accurately by the subject

Question # 10 of 15 (Start time: 01:49:59 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable

Independent variable

Extraneous variable

None of the given options

Question # 11 of 15 (Start time: 01:50:12 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.

They are tentative until the facts prove them true.

They provide possible explanations for the phenomenon under study.

They lead to testable hypotheses through the process of deduction.

Question # 12 of 15 (Start time: 01:50:34 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines

Propositions

Empirical Realities

None of the given options

Question # 13 of 15 (Start time: 01:50:59 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor

Sympathy for the loser

Unstructured interviewing

None of the given options

Question # 14 of 15 (Start time: 01:51:14 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 15 of 15 (Start time: 01:51:26 AM) Total Marks: 1
Which of the following is false with regard to the benefits of multiple-choice questions over open-ended questions?
Select correct option:

Multiple-choice questions are easier to design
Multiple-choice questions are less costly for coding and data processing
Multiple-choice questions are quicker to administer
The use of multiple-choice questions results in higher cooperation for self-administered surveys

Question # 1 of 15 (Start time: 02:19:40 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension.
It implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 2 of 15 (Start time: 02:21:06 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 3 of 15 (Start time: 02:21:22 AM) Total Marks: 1
Which of the following is a concept?

Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 4 of 15 (Start time: 02:21:33 AM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 5 of 15 (Start time: 02:22:17 AM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 6 of 15 (Start time: 02:22:39 AM) Total Marks: 1
The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 7 of 15 (Start time: 02:23:05 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship

Presenting findings
Making an inventory of propositions

Question # 8 of 15 (Start time: 02:23:18 AM) Total Marks: 1
Which of the following questions might invade the privacy of a research participant?
Select correct option:

How long have you worked for this organisation?
What is your home address?
What do you think about your direct line manager?
What happened during your last performance appraisal?

Question # 9 of 15 (Start time: 02:23:29 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 10 of 15 (Start time: 02:24:03 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 11 of 15 (Start time: 02:24:17 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 12 of 15 (Start time: 02:24:35 AM) Total Marks: 1
Rationalism is the application of:

Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 13 of 15 (Start time: 02:24:47 AM) Total Marks: 1
Quantitative data is?
Select correct option:

Expressed in numerical form
Concerned with how things are expressed
Big data
Small data

Question # 14 of 15 (Start time: 02:25:45 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 15 of 15 (Start time: 02:25:59 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 02:30:30 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 2 of 15 (Start time: 02:31:05 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 3 of 15 (Start time: 02:31:37 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 4 of 15 (Start time: 02:31:52 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 5 of 15 (Start time: 02:32:04 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 6 of 15 (Start time: 02:32:28 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 7 of 15 (Start time: 02:32:39 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 8 of 15 (Start time: 02:32:51 AM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 9 of 15 (Start time: 02:33:17 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 10 of 15 (Start time: 02:33:56 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 11 of 15 (Start time: 02:34:12 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 12 of 15 (Start time: 02:34:24 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension.
It implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 13 of 15 (Start time: 02:34:35 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 14 of 15 (Start time: 02:36:04 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 15 of 15 (Start time: 02:36:18 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition

Theoretical definition
None of the given options

Question # 1 of 15 (Start time: 02:51:21 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 2 of 15 (Start time: 02:51:41 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 3 of 15 (Start time: 02:51:49 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 4 of 15 (Start time: 02:51:58 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 5 of 15 (Start time: 02:52:06 AM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 6 of 15 (Start time: 02:52:15 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 7 of 15 (Start time: 02:52:21 AM) Total Marks: 1
Why does qualitative interviewing have an advantage over participant observation when it comes to longitudinal research?
Select correct option:

Repeat interviews are easier to organise.
It allows for a better exploration of key issues.
It is a more focused research method.
Participant observers are prone to 'go native' during longitudinal research.

Question # 8 of 15 (Start time: 02:53:16 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 9 of 15 (Start time: 02:53:23 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 10 of 15 (Start time: 02:53:30 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 02:53:38 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 12 of 15 (Start time: 02:53:58 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 02:54:06 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others
All of the given options

Question # 14 of 15 (Start time: 02:54:24 AM) Total Marks: 1
What is the final step of a scientific investigation?

Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 15 of 15 (Start time: 02:54:41 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 1 of 15 (Start time: 08:01:46 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 2 of 15 (Start time: 08:01:53 PM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 3 of 15 (Start time: 08:01:59 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.

The researcher failing to ask permission to interview someone.

Question # 4 of 15 (Start time: 08:02:51 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 5 of 15 (Start time: 08:03:11 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 6 of 15 (Start time: 08:03:18 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 7 of 15 (Start time: 08:04:43 PM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 8 of 15 (Start time: 08:05:10 PM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 9 of 15 (Start time: 08:05:17 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 10 of 15 (Start time: 08:05:23 PM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 11 of 15 (Start time: 08:05:30 PM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 12 of 15 (Start time: 08:05:37 PM) Total Marks: 1
The small scale trial run of a particular item is called_____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 13 of 15 (Start time: 08:05:45 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 14 of 15 (Start time: 08:05:53 PM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 15 of 15 (Start time: 08:05:59 PM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 1 of 15 (Start time: 08:14:44 PM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 2 of 15 (Start time: 08:16:07 PM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview

Unstructured interview
Structured interview

Question # 3 of 15 (Start time: 08:17:16 PM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 4 of 15 (Start time: 08:17:36 PM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 5 of 15 (Start time: 08:17:53 PM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 6 of 15 (Start time: 08:18:00 PM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 7 of 15 (Start time: 08:18:18 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 08:18:37 PM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 08:18:55 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 10 of 15 (Start time: 08:19:02 PM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 11 of 15 (Start time: 08:19:19 PM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 12 of 15 (Start time: 08:19:36 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 13 of 15 (Start time: 08:19:43 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 14 of 15 (Start time: 08:19:50 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 15 of 15 (Start time: 08:21:01 PM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 1 of 15 (Start time: 08:41:52 PM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 2 of 15 (Start time: 08:42:33 PM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 08:42:46 PM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 4 of 15 (Start time: 08:43:08 PM) Total Marks: 1
When doing research involving deception with human subjects, researchers have an obligation to do which of the following?
Select correct option:

Tell subjects the truth about the study's purpose and methods after the study is completed
Prevent mental and physical harm to subjects
Let subjects withdraw from the study at any time if they don't want to keep participating
All of the given options

Question # 5 of 15 (Start time: 08:44:30 PM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 6 of 15 (Start time: 08:44:53 PM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 7 of 15 (Start time: 08:45:09 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 8 of 15 (Start time: 08:45:21 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 9 of 15 (Start time: 08:45:53 PM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 10 of 15 (Start time: 08:46:09 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.

Prevent you from thinking about research strategies.

Question # 11 of 15 (Start time: 08:46:41 PM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 12 of 15 (Start time: 08:47:03 PM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 13 of 15 (Start time: 08:47:26 PM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 14 of 15 (Start time: 08:47:59 PM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 15 of 15 (Start time: 08:49:25 PM) Total Marks: 1
“The extensive use of chocolate causes pimples”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 1 of 15 (Start time: 08:57:01 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 2 of 15 (Start time: 08:57:15 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 3 of 15 (Start time: 08:57:28 PM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 4 of 15 (Start time: 08:58:03 PM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities

None of the given options

Question # 5 of 15 (Start time: 08:58:28 PM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 6 of 15 (Start time: 08:58:44 PM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 7 of 15 (Start time: 08:58:59 PM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 8 of 15 (Start time: 08:59:13 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 9 of 15 (Start time: 08:59:42 PM) Total Marks: 1
Which one of the following aspect to be evaluated during “Pilot Testing”?

Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 10 of 15 (Start time: 09:00:24 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 11 of 15 (Start time: 09:00:36 PM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 12 of 15 (Start time: 09:00:51 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 13 of 15 (Start time: 09:01:16 PM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable

Causal variable

Question # 14 of 15 (Start time: 09:01:54 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 15 of 15 (Start time: 09:02:22 PM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 1 of 15 (Start time: 09:06:55 PM) Total Marks: 1
Which of the following is an excellent way to enhance the validity of interview data collection?
Select correct option:

Spend an extended period of time in the field.
Obtain participant trust.
Recognize your own biases
Spend time in field,obtain participant trust, recognize biases.

Question # 2 of 15 (Start time: 09:08:22 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 3 of 15 (Start time: 09:08:34 PM) Total Marks: 1
Which of the following is a discrete variable?

Select correct option:

Age
Nationality
Test score
Income

Question # 4 of 15 (Start time: 09:08:58 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 5 of 15 (Start time: 09:09:12 PM) Total Marks: 1
Which of the following is not an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
None of the given options

Question # 6 of 15 (Start time: 09:10:16 PM) Total Marks: 1
“Skepticism” is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 09:10:29 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings

Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 09:10:45 PM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 9 of 15 (Start time: 09:10:57 PM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 10 of 15 (Start time: 09:11:43 PM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 11 of 15 (Start time: 09:12:14 PM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good_____validity.
Select correct option:

Construct
Internal
External
Causal

Question # 12 of 15 (Start time: 09:13:39 PM) Total Marks: 1
Which of the following is a concept?

Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 13 of 15 (Start time: 09:14:09 PM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 14 of 15 (Start time: 09:14:27 PM) Total Marks: 1
The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 15 of 15 (Start time: 09:14:50 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 1 of 15 (Start time: 09:25:20 PM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended

Structured
Semi structured

Question # 2 of 15 (Start time: 09:26:42 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 3 of 15 (Start time: 09:26:56 PM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 4 of 15 (Start time: 09:27:28 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 09:27:42 PM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 6 of 15 (Start time: 09:28:03 PM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 7 of 15 (Start time: 09:28:25 PM) Total Marks: 1
The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 8 of 15 (Start time: 09:28:37 PM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 9 of 15 (Start time: 09:29:02 PM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 10 of 15 (Start time: 09:30:18 PM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning

Previous findings

Question # 11 of 15 (Start time: 09:30:41 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 12 of 15 (Start time: 09:31:15 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 13 of 15 (Start time: 09:31:25 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 14 of 15 (Start time: 09:31:41 PM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 15 of 15 (Start time: 09:31:54 PM) Total Marks: 1

Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 1 of 15 (Start time: 09:39:21 PM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 2 of 15 (Start time: 09:39:35 PM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 3 of 15 (Start time: 09:39:58 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 4 of 15 (Start time: 09:40:13 PM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 5 of 15 (Start time: 09:40:39 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 6 of 15 (Start time: 09:40:57 PM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 7 of 15 (Start time: 09:41:11 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 8 of 15 (Start time: 09:41:23 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 9 of 15 (Start time: 09:41:54 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 10 of 15 (Start time: 09:42:24 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 11 of 15 (Start time: 09:42:43 PM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 12 of 15 (Start time: 09:42:59 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 13 of 15 (Start time: 09:43:12 PM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 14 of 15 (Start time: 09:43:29 PM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 15 of 15 (Start time: 09:44:01 PM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Question # 1 of 15 (Start time: 09:53:55 PM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 2 of 15 (Start time: 09:54:08 PM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 09:54:20 PM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 09:54:32 PM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 5 of 15 (Start time: 09:54:46 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 6 of 15 (Start time: 09:54:59 PM) Total Marks: 1
What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Question # 7 of 15 (Start time: 09:56:20 PM) Total Marks: 1
Measurement reliability refers to the:
Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 8 of 15 (Start time: 09:56:52 PM) Total Marks: 1

Which of the following is an excellent way to enhance the validity of interview data collection?
Select correct option:

Spend an extended period of time in the field.
Obtain participant trust.
Recognize your own biases
Spend time in field,obtain participant trust, recognize biases.

Question # 9 of 15 (Start time: 09:57:07 PM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 10 of 15 (Start time: 09:57:21 PM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 11 of 15 (Start time: 09:57:33 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 12 of 15 (Start time: 09:57:43 PM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias

Non-response bias
Instrument bias

Question # 13 of 15 (Start time: 09:58:06 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 14 of 15 (Start time: 09:58:31 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 15 of 15 (Start time: 09:58:43 PM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 1 of 15 (Start time: 11:18:44 PM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 2 of 15 (Start time: 11:19:16 PM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 3 of 15 (Start time: 11:19:34 PM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 4 of 15 (Start time: 11:20:02 PM) Total Marks: 1
Which one of the following aspect to be evaluated during "Pilot Testing"?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 5 of 15 (Start time: 11:20:21 PM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 6 of 15 (Start time: 11:20:38 PM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 7 of 15 (Start time: 11:20:52 PM) Total Marks: 1

All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 8 of 15 (Start time: 11:21:06 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 9 of 15 (Start time: 11:21:19 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 10 of 15 (Start time: 11:21:36 PM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 11 of 15 (Start time: 11:21:48 PM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.

They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 11:22:07 PM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 13 of 15 (Start time: 11:22:29 PM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 14 of 15 (Start time: 11:22:42 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 15 of 15 (Start time: 11:22:55 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 1 of 15 (Start time: 01:04:59 AM) Total Marks: 1
A one tailed hypothesis predicts----------

Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 2 of 15 (Start time: 01:05:06 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 3 of 15 (Start time: 01:05:12 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others
All of the given options

Question # 4 of 15 (Start time: 01:05:29 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 5 of 15 (Start time: 01:05:45 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 6 of 15 (Start time: 01:05:55 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 7 of 15 (Start time: 01:06:03 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 01:06:10 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 9 of 15 (Start time: 01:06:17 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 10 of 15 (Start time: 01:06:23 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.

Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 11 of 15 (Start time: 01:06:42 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 12 of 15 (Start time: 01:06:50 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 13 of 15 (Start time: 01:07:00 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 14 of 15 (Start time: 01:07:06 AM) Total Marks: 1
----------surveys are more impersonal than face-to-face interviews.
Select correct option:

Mail
Recorded Interview
Focus group
Telephone

Question # 15 of 15 (Start time: 01:07:23 AM) Total Marks: 1
A concept is a generalized idea about------ .

Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 1 of 15 (Start time: 02:14:11 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 2 of 15 (Start time: 02:14:18 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 3 of 15 (Start time: 02:14:24 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 4 of 15 (Start time: 02:14:44 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 5 of 15 (Start time: 02:14:51 AM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 6 of 15 (Start time: 02:14:57 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 7 of 15 (Start time: 02:15:03 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 8 of 15 (Start time: 02:15:10 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 9 of 15 (Start time: 02:15:25 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data

Ranked data
Numbers

Question # 10 of 15 (Start time: 02:15:31 AM) Total Marks: 1
The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 11 of 15 (Start time: 02:15:52 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 12 of 15 (Start time: 02:16:07 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 13 of 15 (Start time: 02:16:22 AM) Total Marks: 1
Time consumed in mall intercept interview is ---------- --.
Select correct option:

High
Moderate
Low
Nil

Question # 14 of 15 (Start time: 02:16:45 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 02:16:51 AM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 1 of 15 (Start time: 02:18:36 AM) Total Marks: 1
Which of the following is likely to reduce the validity of a test?
Select correct option:

Unclear test directions
Ambiguous test items
Untaught items
All of the given options

Question # 2 of 15 (Start time: 02:19:21 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 3 of 15 (Start time: 02:19:40 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 4 of 15 (Start time: 02:19:55 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 5 of 15 (Start time: 02:20:01 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 6 of 15 (Start time: 02:20:07 AM) Total Marks: 1
Which of the following is not an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
None of the given options

Question # 7 of 15 (Start time: 02:20:13 AM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 8 of 15 (Start time: 02:20:20 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.

Disclosure of data subsets.
Restricting access to respondent identification.

Question # 9 of 15 (Start time: 02:20:27 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 10 of 15 (Start time: 02:20:42 AM) Total Marks: 1
How can we determine if a test has good validity?
Select correct option:

It produces the same result when it is given at different times to the same group of people
It produces the same result no matter which version of the test is used
It measures what it is supposed to measure
All of the questions on it can be answered accurately by the subject

Question # 11 of 15 (Start time: 02:20:57 AM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good_____validity.
Select correct option:

Construct
Internal
External
Causal

Question # 12 of 15 (Start time: 02:21:13 AM) Total Marks: 1
Critical decision area in questionnaire construction is_____.
Select correct option:

Question content
Question wording
Response strategy
All of the given options

Question # 13 of 15 (Start time: 02:21:39 AM) Total Marks: 1

What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 14 of 15 (Start time: 02:21:45 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 15 of 15 (Start time: 02:22:01 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 1 of 15 (Start time: 04:11:02 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 2 of 15 (Start time: 04:11:15 AM) Total Marks: 1
What is one way that distortions can be produced in self report data?
Select correct option:

Lying
Social desirability bias
Faulty memory
All of the given options

Question # 3 of 15 (Start time: 04:12:18 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 4 of 15 (Start time: 04:12:53 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 5 of 15 (Start time: 04:13:22 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 6 of 15 (Start time: 04:13:47 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 04:14:07 AM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 8 of 15 (Start time: 04:14:20 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 9 of 15 (Start time: 04:14:33 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 10 of 15 (Start time: 04:14:47 AM) Total Marks: 1
When accessing the internet, which of these steps is the most essential?
Select correct option:

Recording the full URL
Noting the access dates
Downloading material to be referenced
They are all equally important

Question # 11 of 15 (Start time: 04:15:50 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 12 of 15 (Start time: 04:16:21 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 13 of 15 (Start time: 04:16:47 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 14 of 15 (Start time: 04:16:58 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 15 of 15 (Start time: 04:17:13 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 01:38:42 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

Select correct option:
Perceptions
Theory
Sensory experience
Logics and arguments

Question # 2 of 15 (Start time: 01:40:02 PM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:
One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 3 of 15 (Start time: 01:41:06 PM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:
Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 4 of 15 (Start time: 01:42:22 PM) Total Marks: 1
Which of the following is not a concept?
Select correct option:
Leadership
Total Quality Management
Human Resource Management
IQ

Question # 5 of 15 (Start time: 01:43:28 PM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:
There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 6 of 15 (Start time: 01:44:39 PM) Total Marks: 1
What research is?
Select correct option:
A lab experiment

A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 01:45:22 PM) Total Marks: 1
The independent variable is;
Select correct option:
The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 8 of 15 (Start time: 01:46:07 PM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:
Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 9 of 15 (Start time: 01:47:26 PM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:
Tradition
Inductive logic
Deductive logic
The scientific method

Question # 10 of 15 (Start time: 01:48:21 PM) Total Marks: 1
A variable is:
Select correct option:
Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 11 of 15 (Start time: 01:49:48 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:
Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.

Science accurately describes a wide range of behavior.

Question # 12 of 15 (Start time: 01:50:45 PM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:
Basic
Applied
Evaluation
Experimental

Question # 13 of 15 (Start time: 01:51:32 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:
It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 14 of 15 (Start time: 01:52:05 PM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:
Applied
Interview
Basic
Stupid

Question # 15 of 15 (Start time: 01:53:29 PM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:
They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 1 of 15 (Start time: 04:21:02 PM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.

Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 2 of 15 (Start time: 04:22:32 PM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 3 of 15 (Start time: 04:23:17 PM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 4 of 15 (Start time: 04:24:39 PM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 5 of 15 (Start time: 04:25:21 PM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 7 of 15 (Start time: 04:27:21 PM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 8 of 15 (Start time: 04:28:33 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 9 of 15 (Start time: 04:29:32 PM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 10 of 15 (Start time: 04:30:17 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 11 of 15 (Start time: 04:31:03 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"

Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 12 of 15 (Start time: 04:31:40 PM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 13 of 15 (Start time: 04:32:07 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 14 of 15 (Start time: 04:32:43 PM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 15 of 15 (Start time: 04:33:21 PM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care

Business
Government offices
Imaginary worlds

Question # 1 of 15 (Start time: 08:51:23 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 2 of 15 (Start time: 08:51:59 PM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 3 of 15 (Start time: 08:52:49 PM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 4 of 15 (Start time: 08:53:26 PM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management

IQ

Question # 5 of 15 (Start time: 08:53:46 PM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 6 of 15 (Start time: 08:54:40 PM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 7 of 15 (Start time: 08:55:15 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 8 of 15 (Start time: 08:56:29 PM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 08:57:12 PM) Total Marks: 1

The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 10 of 15 (Start time: 08:58:03 PM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 11 of 15 (Start time: 08:59:18 PM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 12 of 15 (Start time: 09:00:05 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 13 of 15 (Start time: 09:00:55 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 14 of 15 (Start time: 09:01:44 PM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 15 of 15 (Start time: 09:02:58 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 1 of 15 (Start time: 01:38:28 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 2 of 15 (Start time: 01:39:40 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 01:40:30 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 4 of 15 (Start time: 01:41:50 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 5 of 15 (Start time: 01:42:35 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 6 of 15 (Start time: 01:44:02 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 7 of 15 (Start time: 01:45:06 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction

Figures
References

Question # 8 of 15 (Start time: 01:45:35 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 9 of 15 (Start time: 01:46:10 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 10 of 15 (Start time: 01:47:19 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 11 of 15 (Start time: 01:48:49 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 12 of 15 (Start time: 01:50:18 AM) Total Marks: 1
What is a cross-sectional research?

Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 01:51:43 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 14 of 15 (Start time: 01:52:48 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 15 of 15 (Start time: 01:54:06 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 1 of 15 (Start time: 02:13:44 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 2 of 15 (Start time: 02:14:08 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 3 of 15 (Start time: 02:14:23 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 4 of 15 (Start time: 02:14:54 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 02:15:13 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 6 of 15 (Start time: 02:16:37 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist

How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 7 of 15 (Start time: 02:17:35 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 8 of 15 (Start time: 02:18:33 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 02:18:46 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 10 of 15 (Start time: 02:19:13 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 11 of 15 (Start time: 02:20:01 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On

which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 12 of 15 (Start time: 02:21:25 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 13 of 15 (Start time: 02:22:45 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 14 of 15 (Start time: 02:23:54 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 15 of 15 (Start time: 02:25:23 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 1 of 15 (Start time: 03:03:37 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 2 of 15 (Start time: 03:04:12 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 3 of 15 (Start time: 03:05:18 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 4 of 15 (Start time: 03:06:27 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 5 of 15 (Start time: 03:07:01 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our

concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 6 of 15 (Start time: 03:07:30 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 7 of 15 (Start time: 03:08:53 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 8 of 15 (Start time: 03:10:16 AM) Total Marks: 1
The following journal article would be an example of_____research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 9 of 15 (Start time: 03:10:53 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others

All of the given options

Question # 10 of 15 (Start time: 03:12:07 AM) Total Marks: 1
Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 11 of 15 (Start time: 03:13:34 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 12 of 15 (Start time: 03:14:41 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 03:15:29 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 14 of 15 (Start time: 03:16:26 AM) Total Marks: 1
Which of the following is included in research proposal?

Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 15 of 15 (Start time: 03:17:54 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 1 of 15 (Start time: 03:46:37 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 2 of 15 (Start time: 03:47:15 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 3 of 15 (Start time: 03:47:36 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?

What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 4 of 15 (Start time: 03:48:24 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 5 of 15 (Start time: 03:49:29 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 6 of 15 (Start time: 03:50:06 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 7 of 15 (Start time: 03:50:44 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 8 of 15 (Start time: 03:51:49 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?

Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 9 of 15 (Start time: 03:52:44 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 10 of 15 (Start time: 03:53:53 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 11 of 15 (Start time: 03:55:16 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 12 of 15 (Start time: 03:56:41 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 13 of 15 (Start time: 03:58:05 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 14 of 15 (Start time: 03:59:33 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 15 of 15 (Start time: 04:00:46 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 1 of 15 (Start time: 04:12:05 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 2 of 15 (Start time: 04:13:32 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition

Theoretical framework
Define broad problem area

Question # 3 of 15 (Start time: 04:14:55 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 4 of 15 (Start time: 04:16:04 AM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 5 of 15 (Start time: 04:17:11 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 04:18:28 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 7 of 15 (Start time: 04:19:45 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):

Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 8 of 15 (Start time: 04:21:13 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 9 of 15 (Start time: 04:21:35 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 10 of 15 (Start time: 04:22:58 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 11 of 15 (Start time: 04:23:26 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 12 of 15 (Start time: 04:24:54 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 13 of 15 (Start time: 04:26:16 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 14 of 15 (Start time: 04:27:15 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 15 of 15 (Start time: 04:28:41 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 1 of 15 (Start time: 01:41:55 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 2 of 15 (Start time: 01:42:31 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 3 of 15 (Start time: 01:43:47 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 4 of 15 (Start time: 01:44:45 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 01:46:16 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.

Continuous measures do not allow for scores that fall between two number values.

Question # 6 of 15 (Start time: 01:46:50 AM) Total Marks: 1
Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 01:47:44 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 8 of 15 (Start time: 01:48:16 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 9 of 15 (Start time: 01:48:49 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 10 of 15 (Start time: 01:49:38 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 11 of 15 (Start time: 01:51:00 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 12 of 15 (Start time: 01:52:19 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 13 of 15 (Start time: 01:52:56 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 14 of 15 (Start time: 01:53:51 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions

that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 15 of 15 (Start time: 01:54:27 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 1 of 15 (Start time: 02:13:07 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 2 of 15 (Start time: 02:13:36 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 3 of 15 (Start time: 02:15:04 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 4 of 15 (Start time: 02:15:44 AM) Total Marks: 1
A variable is:

Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 5 of 15 (Start time: 02:16:49 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 6 of 15 (Start time: 02:17:38 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 7 of 15 (Start time: 02:18:11 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 8 of 15 (Start time: 02:19:04 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 02:19:50 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 10 of 15 (Start time: 02:20:24 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 11 of 15 (Start time: 02:20:48 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 12 of 15 (Start time: 02:21:43 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 13 of 15 (Start time: 02:22:48 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.

We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 14 of 15 (Start time: 02:24:15 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 15 of 15 (Start time: 02:25:40 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 02:44:40 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 2 of 15 (Start time: 02:45:32 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 3 of 15 (Start time: 02:47:01 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?

Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 4 of 15 (Start time: 02:48:03 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 5 of 15 (Start time: 02:48:30 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 6 of 15 (Start time: 02:49:33 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 02:50:47 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts

None of the given options

Question # 8 of 15 (Start time: 02:51:04 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 9 of 15 (Start time: 02:51:21 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 10 of 15 (Start time: 02:52:21 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 11 of 15 (Start time: 02:52:39 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 12 of 15 (Start time: 02:53:25 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 02:54:12 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 14 of 15 (Start time: 02:55:25 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 15 of 15 (Start time: 02:56:01 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 1 of 15 (Start time: 03:03:28 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 2 of 15 (Start time: 03:03:55 AM) Total Marks: 1
Which of the following statements is true?

Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 3 of 15 (Start time: 03:05:26 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 4 of 15 (Start time: 03:06:16 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 5 of 15 (Start time: 03:06:51 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 6 of 15 (Start time: 03:07:16 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 7 of 15 (Start time: 03:08:03 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 8 of 15 (Start time: 03:09:30 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 9 of 15 (Start time: 03:10:03 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 03:10:20 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 11 of 15 (Start time: 03:10:40 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory

Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 12 of 15 (Start time: 03:10:55 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 13 of 15 (Start time: 03:12:22 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 14 of 15 (Start time: 03:13:48 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 15 of 15 (Start time: 03:14:21 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 1 of 15 (Start time: 03:38:54 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 2 of 15 (Start time: 03:39:12 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 3 of 15 (Start time: 03:39:24 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 4 of 15 (Start time: 03:40:25 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 5 of 15 (Start time: 03:40:39 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment

A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 6 of 15 (Start time: 03:42:04 AM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 7 of 15 (Start time: 03:42:28 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 8 of 15 (Start time: 03:42:53 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 9 of 15 (Start time: 03:43:25 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 10 of 15 (Start time: 03:43:51 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 11 of 15 (Start time: 03:45:05 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 12 of 15 (Start time: 03:46:28 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 03:46:46 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 03:47:50 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 1 of 15 (Start time: 03:54:59 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 2 of 15 (Start time: 03:55:58 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 3 of 15 (Start time: 03:56:06 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 4 of 15 (Start time: 03:57:31 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 5 of 15 (Start time: 03:58:25 AM) Total Marks: 1

Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 03:59:52 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.
It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 7 of 15 (Start time: 04:00:35 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 8 of 15 (Start time: 04:00:56 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 9 of 15 (Start time: 04:01:20 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study

Data processing and analysis

Question # 10 of 15 (Start time: 04:01:41 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 11 of 15 (Start time: 04:01:55 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 12 of 15 (Start time: 04:02:05 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 13 of 15 (Start time: 04:02:28 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 14 of 15 (Start time: 04:03:39 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 15 of 15 (Start time: 04:03:59 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 1 of 15 (Start time: 04:21:03 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 2 of 15 (Start time: 04:21:53 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 3 of 15 (Start time: 04:22:15 AM) Total Marks: 1
A theory is a coherent set of_____used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 4 of 15 (Start time: 04:22:41 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 5 of 15 (Start time: 04:22:56 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 04:23:47 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 04:24:35 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 8 of 15 (Start time: 04:26:02 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge

Theory predicts facts
None of the given options

Question # 9 of 15 (Start time: 04:26:13 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 10 of 15 (Start time: 04:26:29 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 11 of 15 (Start time: 04:26:49 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 04:27:09 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 13 of 15 (Start time: 04:27:23 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:

Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 14 of 15 (Start time: 04:27:49 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 04:28:08 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 1 of 15 (Start time: 04:37:09 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 2 of 15 (Start time: 04:38:33 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 3 of 15 (Start time: 04:39:08 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 5 of 15 (Start time: 04:41:04 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 6 of 15 (Start time: 04:41:50 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 7 of 15 (Start time: 04:42:09 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 8 of 15 (Start time: 04:42:23 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings

Clear meanings
Dictionary meanings

Question # 9 of 15 (Start time: 04:43:01 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 10 of 15 (Start time: 04:43:17 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 11 of 15 (Start time: 04:43:29 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 12 of 15 (Start time: 04:43:43 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 13 of 15 (Start time: 04:43:55 AM) Total Marks: 1
Which of the following is a concept?

Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 04:44:07 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 15 of 15 (Start time: 04:44:18 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 1 of 15 (Start time: 04:55:00 AM) Total Marks: 1
In_____we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 2 of 15 (Start time: 04:55:27 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis

Co-relational hypothesis

Question # 3 of 15 (Start time: 04:55:42 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 4 of 15 (Start time: 04:55:57 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 5 of 15 (Start time: 04:56:07 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 6 of 15 (Start time: 04:57:14 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 7 of 15 (Start time: 04:57:30 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 8 of 15 (Start time: 04:57:54 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 9 of 15 (Start time: 04:58:05 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 10 of 15 (Start time: 04:59:31 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 11 of 15 (Start time: 05:00:03 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 12 of 15 (Start time: 05:00:30 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 13 of 15 (Start time: 05:00:44 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 14 of 15 (Start time: 05:00:56 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 15 of 15 (Start time: 05:01:41 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 1 of 15 (Start time: 05:08:52 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review

Experiment
Referencing

Question # 2 of 15 (Start time: 05:09:06 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 3 of 15 (Start time: 05:09:59 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 4 of 15 (Start time: 05:10:17 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 5 of 15 (Start time: 05:10:43 AM) Total Marks: 1
The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 6 of 15 (Start time: 05:11:23 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 7 of 15 (Start time: 05:11:36 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 8 of 15 (Start time: 05:11:55 AM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 9 of 15 (Start time: 05:12:07 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 10 of 15 (Start time: 05:12:19 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.

We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 11 of 15 (Start time: 05:12:33 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 12 of 15 (Start time: 05:12:52 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 13 of 15 (Start time: 05:13:06 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 14 of 15 (Start time: 05:13:20 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 15 of 15 (Start time: 05:13:32 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 1 of 15 (Start time: 05:21:43 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 2 of 15 (Start time: 05:21:54 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 3 of 15 (Start time: 05:22:05 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 4 of 15 (Start time: 05:22:55 AM) Total Marks: 1
“Skepticism” is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 5 of 15 (Start time: 05:23:09 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 6 of 15 (Start time: 05:23:21 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 7 of 15 (Start time: 05:23:49 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 8 of 15 (Start time: 05:24:04 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 9 of 15 (Start time: 05:24:29 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 10 of 15 (Start time: 05:24:50 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 11 of 15 (Start time: 05:25:03 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 12 of 15 (Start time: 05:25:23 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 13 of 15 (Start time: 05:25:35 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 14 of 15 (Start time: 05:26:02 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 05:26:12 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 1 of 15 (Start time: 05:29:10 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 2 of 15 (Start time: 05:29:20 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 3 of 15 (Start time: 05:29:33 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction

Abstract
Limitations

Question # 4 of 15 (Start time: 05:29:46 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 5 of 15 (Start time: 05:30:04 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 6 of 15 (Start time: 05:30:14 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 05:30:26 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 8 of 15 (Start time: 05:30:38 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?

Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 9 of 15 (Start time: 05:30:58 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 10 of 15 (Start time: 05:31:18 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 05:31:35 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 12 of 15 (Start time: 05:31:44 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 13 of 15 (Start time: 05:32:11 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 14 of 15 (Start time: 05:32:22 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 15 of 15 (Start time: 05:32:37 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary
Question # 1 of 15 (Start time: 05:36:36 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 2 of 15 (Start time: 05:37:00 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 3 of 15 (Start time: 05:37:14 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 4 of 15 (Start time: 05:37:25 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 5 of 15 (Start time: 05:37:47 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 6 of 15 (Start time: 05:38:20 AM) Total Marks: 1
“Skepticism” is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 05:38:35 AM) Total Marks: 1

Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 8 of 15 (Start time: 05:38:47 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 9 of 15 (Start time: 05:39:04 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 10 of 15 (Start time: 05:39:22 AM) Total Marks: 1
The_____is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 11 of 15 (Start time: 05:39:40 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time

The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 12 of 15 (Start time: 05:39:53 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ---------- --.
Select correct option:

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 13 of 15 (Start time: 05:40:10 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 14 of 15 (Start time: 05:40:24 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others
All of the given options

Question # 15 of 15 (Start time: 05:40:47 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 1 of 15 (Start time: 05:44:23 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 2 of 15 (Start time: 05:44:36 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 3 of 15 (Start time: 05:45:02 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 4 of 15 (Start time: 05:45:25 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 5 of 15 (Start time: 05:45:42 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 6 of 15 (Start time: 05:45:55 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is

part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 7 of 15 (Start time: 05:46:24 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 8 of 15 (Start time: 05:46:37 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 9 of 15 (Start time: 05:46:51 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 10 of 15 (Start time: 05:47:15 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data.

It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 11 of 15 (Start time: 05:47:30 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 12 of 15 (Start time: 05:47:52 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 13 of 15 (Start time: 05:48:05 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 14 of 15 (Start time: 05:48:26 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 15 of 15 (Start time: 05:48:59 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 1 of 15 (Start time: 05:52:17 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 2 of 15 (Start time: 05:52:37 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 3 of 15 (Start time: 05:53:19 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 4 of 15 (Start time: 05:53:30 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 5 of 15 (Start time: 05:54:03 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 6 of 15 (Start time: 05:54:17 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 7 of 15 (Start time: 05:54:31 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 8 of 15 (Start time: 05:54:42 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 9 of 15 (Start time: 05:54:53 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes

Occurrences
All of the given options

Question # 10 of 15 (Start time: 05:55:07 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 11 of 15 (Start time: 05:55:26 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 12 of 15 (Start time: 05:55:39 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 13 of 15 (Start time: 05:55:54 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 05:56:12 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 15 of 15 (Start time: 05:56:33 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 1 of 15 (Start time: 06:00:41 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 2 of 15 (Start time: 06:00:56 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 3 of 15 (Start time: 06:01:10 AM) Total Marks: 1
Theoretical framework is trying to develop a_____model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 4 of 15 (Start time: 06:01:23 AM) Total Marks: 1

Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 5 of 15 (Start time: 06:02:15 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 6 of 15 (Start time: 06:02:27 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 06:02:55 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 8 of 15 (Start time: 06:03:07 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.

They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 9 of 15 (Start time: 06:03:23 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 10 of 15 (Start time: 06:03:49 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 11 of 15 (Start time: 06:04:04 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 06:04:21 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 13 of 15 (Start time: 06:04:33 AM) Total Marks: 1
What is an hypothesis?

Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 14 of 15 (Start time: 06:04:46 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 15 of 15 (Start time: 06:04:59 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 1 of 15 (Start time: 06:14:33 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 2 of 15 (Start time: 06:14:42 AM) Total Marks: 1
In_____definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition

None of the given options

Question # 3 of 15 (Start time: 06:15:01 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 4 of 15 (Start time: 06:15:19 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 5 of 15 (Start time: 06:15:29 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 6 of 15 (Start time: 06:15:43 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 7 of 15 (Start time: 06:15:59 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 8 of 15 (Start time: 06:16:10 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 9 of 15 (Start time: 06:16:23 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 06:16:34 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 11 of 15 (Start time: 06:16:47 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 12 of 15 (Start time: 06:16:57 AM) Total Marks: 1

What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 13 of 15 (Start time: 06:17:08 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 14 of 15 (Start time: 06:17:29 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 15 of 15 (Start time: 06:17:42 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 1 of 15 (Start time: 06:24:39 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 2 of 15 (Start time: 06:25:03 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 3 of 15 (Start time: 06:25:24 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 4 of 15 (Start time: 06:25:45 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 5 of 15 (Start time: 06:26:13 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 6 of 15 (Start time: 06:26:31 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple

intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 7 of 15 (Start time: 06:26:48 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 8 of 15 (Start time: 06:27:08 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 06:27:24 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 10 of 15 (Start time: 06:27:39 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 11 of 15 (Start time: 06:27:56 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 12 of 15 (Start time: 06:28:13 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 13 of 15 (Start time: 06:28:26 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 14 of 15 (Start time: 06:28:40 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 15 of 15 (Start time: 06:29:15 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment

A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 1 of 15 (Start time: 06:36:44 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 2 of 15 (Start time: 06:37:19 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 3 of 15 (Start time: 06:37:30 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 4 of 15 (Start time: 06:37:40 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 5 of 15 (Start time: 06:37:50 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 6 of 15 (Start time: 06:37:59 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 7 of 15 (Start time: 06:38:17 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 8 of 15 (Start time: 06:38:28 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 9 of 15 (Start time: 06:38:38 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 10 of 15 (Start time: 06:39:02 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 11 of 15 (Start time: 06:39:14 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 12 of 15 (Start time: 06:39:24 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 13 of 15 (Start time: 06:39:34 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 14 of 15 (Start time: 06:40:09 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.

Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 15 of 15 (Start time: 06:40:26 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 1 of 15 (Start time: 06:42:06 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 2 of 15 (Start time: 06:42:17 AM) Total Marks: 1
_____meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 3 of 15 (Start time: 06:42:28 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 4 of 15 (Start time: 06:42:37 AM) Total Marks: 1

What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 5 of 15 (Start time: 06:42:49 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 6 of 15 (Start time: 06:43:06 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 7 of 15 (Start time: 06:43:14 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 8 of 15 (Start time: 06:43:25 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 9 of 15 (Start time: 06:43:40 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 10 of 15 (Start time: 06:43:55 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 11 of 15 (Start time: 06:44:05 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 12 of 15 (Start time: 06:44:27 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 13 of 15 (Start time: 06:44:37 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth

A process to invent the machines
A process to make new medicines
A process to create theories

Question # 14 of 15 (Start time: 06:44:47 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 06:44:59 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 1 of 15 (Start time: 06:24:20 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 2 of 15 (Start time: 06:24:37 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 3 of 15 (Start time: 06:24:53 AM) Total Marks: 1
Which of the following is Not a part of research design?

Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 4 of 15 (Start time: 06:25:02 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 5 of 15 (Start time: 06:25:09 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 6 of 15 (Start time: 06:25:18 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 7 of 15 (Start time: 06:25:26 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 8 of 15 (Start time: 06:25:33 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 9 of 15 (Start time: 06:25:39 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 06:25:46 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 11 of 15 (Start time: 06:26:03 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 12 of 15 (Start time: 06:26:10 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines

A process to make new medicines
A process to create theories

Question # 13 of 15 (Start time: 06:26:16 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 14 of 15 (Start time: 06:26:33 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 06:26:40 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 1 of 15 (Start time: 06:28:51 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 2 of 15 (Start time: 06:28:58 AM) Total Marks: 1

Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 3 of 15 (Start time: 06:29:07 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 4 of 15 (Start time: 06:29:14 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 5 of 15 (Start time: 06:29:21 AM) Total Marks: 1
The term “Extrapolation” is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 6 of 15 (Start time: 06:29:30 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 7 of 15 (Start time: 06:29:36 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 8 of 15 (Start time: 06:29:43 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 9 of 15 (Start time: 06:29:59 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 10 of 15 (Start time: 06:30:06 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 11 of 15 (Start time: 06:30:15 AM) Total Marks: 1
“The extensive use of chocolate causes pimples”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis

Non-Directional hypothesis
Co-relational hypothesis

Question # 12 of 15 (Start time: 06:30:22 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 13 of 15 (Start time: 06:30:38 AM) Total Marks: 1
Hypothesis refers to_____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 14 of 15 (Start time: 06:30:46 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 15 of 15 (Start time: 06:31:07 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 1 of 15 (Start time: 06:32:01 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?

Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 2 of 15 (Start time: 06:32:24 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 3 of 15 (Start time: 06:32:30 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 4 of 15 (Start time: 06:32:37 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 06:32:44 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 6 of 15 (Start time: 06:32:50 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 7 of 15 (Start time: 06:32:56 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 8 of 15 (Start time: 06:33:13 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 9 of 15 (Start time: 06:33:21 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 10 of 15 (Start time: 06:33:28 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.

Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 11 of 15 (Start time: 06:33:34 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 12 of 15 (Start time: 06:33:41 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 13 of 15 (Start time: 06:33:47 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 14 of 15 (Start time: 06:33:55 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 15 of 15 (Start time: 06:34:02 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?

Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 1 of 15 (Start time: 06:40:44 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 2 of 15 (Start time: 06:40:54 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 3 of 15 (Start time: 06:41:01 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 4 of 15 (Start time: 06:41:11 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction

An operational definition

Question # 5 of 15 (Start time: 06:41:17 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 6 of 15 (Start time: 06:41:24 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 06:41:30 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 8 of 15 (Start time: 06:41:38 AM) Total Marks: 1
“High productivity is positively associated with Job commitment”. The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 9 of 15 (Start time: 06:41:44 AM) Total Marks: 1
Hypothesis refers to_____:

Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 10 of 15 (Start time: 06:41:50 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 11 of 15 (Start time: 06:41:57 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 12 of 15 (Start time: 06:42:04 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 13 of 15 (Start time: 06:42:11 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 14 of 15 (Start time: 06:42:18 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution Logic and arguments Reasoning
Previous findings

Question # 15 of 15 (Start time: 06:42:25 AM) Total Marks: 1 A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect The direction of the effect
