Who, among the following, wrote the book "Research Methods for Business"?
► Zikmund, W.
► **Sekaran, U.**
► Dessler, G.
► Neuman, W.C.

Question No: 2 (Marks: 1) - Please choose one
What does an empiricist believe?
► All the knowledge that we have of life after death can be used in research.
► **Knowledge in the form of 'facts' should be gained through sensory experience.**
► Research conducted within the British Empire was biased and unreliable.
► Research should not always necessarily rely on the scientific methods.

Question No: 3 (Marks: 1) - Please choose one
Action research usually takes place in a single school because;
► **It is designed to answer questions about improving practice in a particular setting.**
► It is difficult to secure permission to study students in multiple schools.
► Teachers do not have the necessary skills to conduct research across multiple settings.
► Data collection methods used in action research are designed for single settings.

Question No: 4 (Marks: 1) - Please choose one
Which of the following is characteristic of action research?
► Variables are tightly controlled.
► Results are generalizable.
► Results demonstrate cause-and-effect relationships.
► **Data are usually qualitative.**

Question No: 5 (Marks: 1) - Please choose one

YUSA SHAMI

Sta630 260 mcqz

i

Which of the following statements is TRUE for qualitative research question?

► **It asks a question about some process, or phenomenon to be explored**.
► It is generally an open-ended question.
► It asks a question which may be open ended.
► It asks a closed ended question.

Question No: 6 (Marks: 1) - Please choose one

Which of the following is NOT an example of quantitative variable?

► Age
► Grade point average
► Gender
► **Motivation**

Question No: 7 (Marks: 1) - Please choose one

In research, something that does not "vary" is known as:

► Variable
► Method
► **Constant**
► Control group

Question No: 8 (Marks: 1) - Please choose one

The cause variable or the one that identifies forces or conditions that act on something else is known as:

► Moderating variable
► **Independent variable**
► Categorical variable
► Dependent variable

Question No: 9 (Marks: 1) - Please choose one

Which of the following statements best defines hypothesis?

► A quantitative study.
► **A tentative prediction of the results of the research.**

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i
► A qualitative research design.
► The operational definition of the study.

Question No: 10 (Marks: 1) - Please choose one
Which of the following is the characteristic/s of Hypotheses in qualitative research studies?
► Hypotheses are very specific and stated prior to beginning the study.
► Hypotheses are never used.
► **Hypotheses are often generated as the data are collected, interpreted, and analyzed.**
► Hypotheses are always stated after the research study has been completed.

Question No: 11 (Marks: 1) - Please choose one
Hypothesis test may also be called as:
► Informal test
► Moderating test
► **Significance test**
► t-test

Question No: 12 (Marks: 1) - Please choose one
Which of the following refers to "A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review"?
► Integrative review
► Theoretical review
► Self-study review
► **Historical review**

Question No: 13 (Marks: 1) - Please choose one
Which one of the following tasks is NOT accomplished by theoretical framework?
► Elaborate the relationship among the variables
► Explain the logic underlying the relationship between the variables.

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i
► Describe the nature, and direction of the relationships among the variables.
► **Relates the previous studies.**

Question No: 14 (Marks: 1) - Please choose one
Which of the following strategies is useful when defining a particular research question?
► **To clearly articulate the research question, to provide operational, definitions and ensuring its testability.**
► To clearly articulate the research question, outlining the conditions in which the phenomena of interest are to be investigated.
► To provide operational definitions of the ideas or concepts involved in the research.
► Ensuring that their research question is empirically testable.

Question No: 15 (Marks: 1) - Please choose one
What should the business researcher be aware of when signing a confidentiality agreement?
► Any clause which limits the length of a questionnaire.
► **Any clause which allows the company to comment on findings that will be published.**
► Any clause which increases the level of access for the researcher.
► Any clause which guarantees the anonymity of research participants.

Question No: 16 (Marks: 1) - Please choose one
In a study of concept learning in first-graders, all of the following should happen, except;
► **To help make the experience enjoyable, children should be given substantial incentives to participate**.
► The children should be asked if they want to participate.
► Teachers of the children in their classes should give informed consent.
► Parents must give consent.

Question No: 17 (Marks: 1) - Please choose one
Which of the following is least likely to occur as an ethical problem with electronic research?

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i
► Privacy could be invaded.
► **People are not likely to be able to stop once they have begun participating.**
► Debriefing could be avoided.
► Informed consent cannot be completely monitored.

Question No: 18 (Marks: 1) - Please choose one
Quantitative research has been criticised because:
► The reliance on instruments and procedures makes it high in ecological validity.
► **The measurement process suggests a spurious and artificial sense of accuracy.**
► It underestimates the similarities between objects in the natural and social worlds.
► It has no validity.

Question No: 19 (Marks: 1) - Please choose one
Which of the following is a characteristic of a standardized test?
► The administration of the test is controlled carefully to ensure that all examinees experience the same conditions.
► The test is developed by experts to ensure it is technically sound.
► The scores are interpreted in standard ways.
► **All of the given options**

Question No: 20 (Marks: 1) - Please choose one
Mr. Latif is measuring students' attitudes on a controversial topic. Which of the following would you recommend he use to control for the potential problem of students feeling the need to respond with socially acceptable responses?
► Ensure construct validity
► **Allow anonymous responses**
► Ensure reliability
► Ensure confidentiality

Question No: 21 (Marks: 1) - Please choose one
Which of the following scales can measure the Temperature?
► Nominal scale

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i
► Ordinal scale
► Interval scale
► **All of the given options**

Question No: 22 (Marks: 1) - Please choose one
Following are the properties of nominal scale, except;
► Least powerful
► **Suggest no order**
► Provide categorical information
► Provide magnitude of object

Question No: 23 (Marks: 1) - Please choose one
Which of the following is NOT the implication of Ordinal scale?
► Characteristics of nominal scale
► **Rank the object**
► Does not provide magnitude of object
► Provide rate

Question No: 24 (Marks: 1) - Please choose one
Which of the following statements is correct about validity and reliability?
► When internal validity is high, external validity is low
► When internal validity is high, there is no change in external validity
► When internal validity is high, external validity is also high
► **All of the given options**

Question No: 25 (Marks: 1) - Please choose one
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.
► Internal
► External
► **Causal**
► Construct

YUSA SHAMI

i

Question No: 26 (Marks: 1) - Please choose one
Mr. Ali has conducted an extensive review of the literature and has deductively reasoned a hypothesis about his problem on the basis of this review. Which type of a research plan is Mr. Ali likely proposing?

► **Qualitative**
► Ethical
► Both quantitative and qualitative
► Quantitative

Question No: 27 (Marks: 1) - Please choose one
Which of the following is a legitimate purpose of a research plan?
► It forces you to think through every aspect of a study.
► It provides detailed procedures to guide the conduct of the study.
► It provides clear roadmap of the study.
► **Writing a plan facilitates the evaluation of it.**

Question No: 28 (Marks: 1) - Please choose one
In the statement 'Smoke badly destroys health of people' what is the unit of analysis?

► Transportation
► Individuals
► Pollutants
► **Drugs**

Question No: 29 (Marks: 1) - Please choose one
While studying supervisor-subordinate relationship in an organization, what is the unit of analysis?
► Individual
► Dyad
► Employer-employee

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i

► **Organization**

Question No: 30 (Marks: 1) - Please choose one
Which of the following types of survey research is often used for program evaluation or accreditation purposes?

► Developmental surveys
► Followup studies
► Public opinion polls
► **No survey research is appropriate**

Question No: 31 (Marks: 1) - Please choose one
Which of the following is NOT an example of a problem with using survey research to investigate behaviour?

► Respondents tend to answer by giving the most socially desirable answer.
► Respondents may inadvertently omit key terms in the question.
► Respondents may not give an honest reply to what they see as a threatening question.
► **Respondents may be unwilling to reveal information as they believe they are likely to be identified**.

Question No: 32 (Marks: 1) - Please choose one
What should the researcher do if they have achieved a low response rate?

► Copy responses and paste them again.
► Abandon the research project entirely.
► **Recognize and accept the possible limitations of a low response rate.**
► Fill in some more questionnaires themselves.

Question No: 33 (Marks: 1) - Please choose one
Which of the following statements is correct about questionnaire?

► A questionnaire should run to at least twenty pages.
► The questions should have no spaces between them so that the whole questionnaire

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i
looks small.
► Only questionnaires that are A3 size achieve high response rates.
► **Clear presentation is more important than overall size.**

Question No: 34 (Marks: 1) - Please choose one
Critical decision area in questionnaire construction is which of the following?
► Question content
► Question wording
► Response strategy
► **All of the given options**

Question No: 35 (Marks: 1) - Please choose one
The most critical area of an article to read is;
► Introduction
► **Abstract**
► Results section
► Limitations

Question No: 36 (Marks: 1) - Please choose one
Which of the following is/are advantage(s) of the self-completed questionnaire?
► Inability to confirm who completed the questionnaire
► Its unsuitability for some kinds of respondents
► Inability to ask many questions that are not directly relevant to the respondent
► **Easy to justify the answer**

Question No: 37 (Marks: 1) - Please choose one
Time consumed in mall intercept interview is representing which of the following type?

► High
► **Moderate**
► Low
► Nill

YUSA SHAMI

i

Question No: 38 (Marks: 1) - Please choose one
Which of the following similarity is found in Qualitative research and Survey research?

► Examine topics primarily from the participants' perspectives.
► They are guided by predetermined variables to study.
► **They are descriptive research methods.**
► Have large sample sizes.

Question No: 39 (Marks: 1) - Please choose one
Which of the following represent a good qualitative problem statement?

► Defines the independent and dependent variables.
► **conveys a sense of emerging design.**
► Specifies a research hypothesis to be tested.
► Specifies the relationship between variables that the researcher expects to find.

Question No: 40 (Marks: 1) - Please choose one
Which of the following makes research questions very crucial?

► **Guide your decisions about what data to collect and from where.**
► Help you decide which research area interests you.
► Ensure that your findings have external validity.
► Prevent you from thinking about research strategies.

Question No: 41 (Marks: 10)
How would you explain "Research Proposal" and its different sections?

1. When a extraneous variable systematically varies with the independent variable and influences the dependent variable, it is called:
   a. Another dependent variable

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i

b. A confounding variable
c. A moderating variable
d. An unreliable variable
2. Which of the following statements is true?
a. A statistical relationship is sufficient evidence to infer causality
b. Temporal order of the cause and effect is not important in inferring causality
c. A statistical relation of X and Y is insufficient evidence for inferring causality
d. Temporal order of cause and effect variables and statistical relation are all that are
needed to infer causality
3. A school district examines a program that uses mentors to help very poor readers improve their reading performance. The children in the program are at the 4th percentile at pretest. At posttest they are around the 20th percentile. While it is possible that the program made the difference, another reason for the change in scores could be:
a. History
b. Regression artifact
c. Multiple-treatment interference
d. Differential selection
4. A group of researchers do a study where children from particular classrooms are assigned to treatment or control conditions. After the study, the researcher finds out that the students in the control group are higher achievers than those in the experimental group. He found no treatment effect. The failure to find an effect may be due to:
a. A treatment effect
b. A testing effect
c. A differential selection effect
d. A maturation effect
5. A researcher examines a program looking at the effects of mentoring on poor readers' reading achievement. He looks at two different schools. One serves as the control and the other the experimental group. Both schools had reading

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i

achievement that was around the 50th percentile. During the time that the mentoring program is in place in the experimental group, a statewide reading initiative is started in randomly selected schools. The experimental, but not the control school is involved in the initiative. At the end of the year, the experimental group does better than the control. From the information presented above, a likely threat to the internal validity of the study is:

a. Selection by mortality interaction
b. Mortality
c. Selection-history effect
d. Selection-maturation effect

6. Which type of validity refers to the degree to which you can infer that the relationship between two variables is causal?

a. Internal validity
b. Population validity
c. Ecological validity
d. Statistical conclusion validity

7. Which type of validity refers to the ability to infer that the independent and dependent variables are related ant that the measured strength of the relationship is accurate?

a. Internal validity
b. Population validity
c. Ecological validity
d. Statistical conclusion validity

8. An extraneous variable that systematically varies with the independent variable and also influences the dependent variable is known as a _____.

a Confounding variable
b. Third variable
c. Second variable
d. Both a and b are correct

9. The use of multiple observers to allow cross-checking of observations to make sure that the investigators agree with what took place is known as _____.

a. Interpretive validity

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i

b. Researcher bias
c. Multiple operationalism
d. Investigator triangulation
10. _____ is the lowest inference descriptor of all because it uses the participant's own words.
a. Participant feedback
b. A verbatim
c. Data triangulation
d. Investigator triangulation
11. _____ refers to physical or mental changes that may occur within individuals over time, such as aging, learning, boredom, hunger, and fatigue.
a. Instrumentation
b. History
c. Maturation
d. Testing
12. What type of validity refers to the extent to which the results of a study can be generalized across time?
a. Ecological validity
b. External validity
c. Internal validity
d. Temporal validity
13. Which of the following best describes interpretive validity?
a. Factual accuracy of an account as reported by the researcher
b. Accurately portraying the meanings given by the participants to what is being studied
c. Degree to which a theoretical explanation fits the data
d. Ability to generalize the study results across settings
14. Which of the following terms is a strategy where the researcher actively engages in critical self-reflection about his or her potential biases and predispositions.
a. Experimenter effect
b. Reactivity

YUSA SHAMI
Cell No_

i

c. Investigator triangulation
d. Reflexivity
15. Which of the following is not considered one of the criteria for inferring causality?
a. Evidence that the independent and dependent variables are related
b. Evidence that the relationship between the variables being investigated is not due to a
confounding extraneous variable
c. Evidence that changes in variable A occur before changes in variable B
d. The temporal ordering of the variables being investigated does not matter because a
relationship is all that is really needed
16. The use of multiple data sources to help understand a phenomenon is one strategy that is used to promote qualitative research validity. Which of the following terms describes this strategy?
a. Data matching
b. Pattern matching
c. Data triangulation
d. Data feedback
17. What may happen when different comparison groups experience a different history event?
a. History effect
b. Selection-history effect
c. Selection effect
d. Group effect
18. What is another term that refers to a confounding extraneous variable?
a. Last variable
b. First variable
c. Third variable
d. Fourth variable
19. Which of the following refers to any systematic change that occurs over time in the way in which the dependent variable is assessed?

YUSA SHAMI

i

a. Instrumentation
b. Maturation
c. Testing
d. Selection
20. Which of the following terms describes the ability to generalize from the sample of individuals on which a study was conducted to the larger target population of individuals and across different subpopulations within the larger target population?
a. External validity
b. Population validity
c. Ecological validity
d. Temporal validity
21. Which of the following is not a strategy used to promote qualitative research validity?
a. Peer review
b. Theory triangulation
c. Extended fieldwork
d. Random assignment
22. The use of several measures of a construct is called:
a. Multiple operationalism
b. Multiple construct measurement
c. Operationalism
d. Methods triangulation
23. A physical or mental change that occurs in participants over time that affects their performance on the dependent variable is called _____.
a. Instrumentation
b. Maturation
c. Regression
d. None of above
24. Attrition generally occurs in research where ____.
a. You do demographic research
b. The study fails

YUSA SHAMI

i

c. Some participants do not complete the study
d. The study is very brief
25. Differential attrition occurs when the people dropping out from one group are different from the others in their group or from the people in the comparison group.
a. True
b. False
26. Internal validity refers to which of the following?
a. The ability to infer that a casual relationship exists between 2 variables
b. The extent to which study results can be generalized to and across populations of persons,
settings, and times
c. The use of effective measurement instruments in the study
d. The ability to generalize the study results to individuals not included in the study
27. Which strategy used to promote qualitative research validity uses multiple research methods to study a phenomenon?
a. Data triangulation
b. Methods triangulation
c. Theory triangulation
d. Member checking
28. Which type of validity refers to the factual accuracy of an account as reported by the researcher?
a. Ecological validity
b. Temporal validity
c. Descriptive validity
d. None of the above
29. Which of the following in not one of the key threats to internal validity?
a. Maturation
b. Instrumentation
c. Temporal change
d. History

30. This type of validity refers to the ability to generalize the results of a study across settings.
a. Temporal validity
b. Internal validity
c. Ecological validity
d. External validity
31. Which is not a direct threat to the internal validity of a research design?
a. History
b. Testing
c. Sampling error
d. Differential selection
32. Alteration in performance due to being aware that one is participating in a study is known as _____.
a. Operationalism
b. Reactivity
c. Temporal validity
d. Mortality
33. The idea that the more times a research finding is shown with different sets of people, the more confidence we can place in the finding and in generalizing beyond the original participants is known as _____.
a. Naturalistic generalization
b. Methods generalization
c. Data triangulation
d. Replication logic

The scientific method is preferred over other ways of knowing because it is more;
Reliable
Systematic
Accurate

All of the given options

An operational definition is:
One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Basic
Applied
Evaluation
Experimental

What is the basis of the Scientific Method?
To test hypotheses in conditions those are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Which of the following is a concept?
Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Meanings attached to a concept create problems of measurements.
Unambiguous
Vague
Clear

Q1. All the persons involved in the collection of data and supervision of data collection process are called

i. Fieldworkers
ii. Researchers
iii. Research assistants
iv. None of the given options

Q2. While terminating the interview, the fieldworker should **not** do one of the following:

i. He should record all the responses made by the interviewee before leaving.
ii. He should thank the interviewee.
iii. He should close the interview hastily.
iv. He should answer all the questions the respondent asks concerning the nature and purpose of the study.

Q3. Which one of these is a type of Interviewee bias?

i. The respondent does not tell his true income, age, or contact information.
ii. The fieldworker fails to probe the interviewee properly.
iii. The fieldworker contacted the wrong person for interview.
iv. The fieldworker asks the questions in wrong order.

Q4. A magazine conducts a survey and asks its readers to cut the questionnaire from the magazine, fill it and send it via mail. It is a type of

i. Purposive sampling
ii. Snowball sampling
iii. Sequential sampling
iv. Convenience sampling

Q5. The height distribution of a few students in a school is an example of

i. Statistic
ii. Population
iii. Parameter
iv. Element

Q6. A researcher wants to conduct a survey of the drug users. Which type of sampling technique will be most appropriate here?

i. Sequential sampling

YUSA SHAMI

Sta630 260 mcqz

i

ii. Snowball sampling
iii. Quota sampling
iv. Convenience sampling

Q7. When there is a need to apply different data collection methods to different parts of the population, the best sampling method would be
i. Double sampling
ii. Cluster sampling
iii. Stratified random sampling
iv. Systematic random sampling

Q8. The sampling technique in which every element of the population has an equal, non-zero probability of being selected in a sample, is called
i. Probability sampling
ii. Convenience sampling
iii. Purposive sampling
iv. Quota sampling

Q9. Target population is also called
i. Population
ii. Survey population
iii. Population element
iv. Population frame

Q10. Which one of them is the method for probing the respondent?
i. Repeat the question
ii. Give an expectant pause
iii. Repeat the respondent's reply
iv. All of the given options

1. Which one of the following sets is the measure of central tendency?
a. Mean, standard deviation, mode
b. Mean, median, standard deviation

YUSA SHAMI
Cell No_
+92-301-3335005
Sta630 260 mcqz

i

c. Arithmetic mean, median, mode
d. Standard deviation, internal validity, mode

2. In lab experiment the effect of _____Variables is controlled to evaluate the causal relationship.
a. Extraneous
b. Moderate
c. Intervening
d. All of the above

3. Internal validity refers to_____.
a. Researcher's degree of confidence.
b. Generalizability
c. Operationalization
d. All of the above

4. Which of the following is the weakest experimental design?
a. One group pretest-posttest design
b. Quasi- experimental design
c. Two group posttest only design
d. Ex post facto design

5. How many times the students appear in the research class is the example of _____.
a. Intensity
b. Space
c. Frequency
d. Direction

6. Disadvantage of content analysis is_____.
a. Researcher can increase the sample size
b. Provides access on the subjects to which researcher does have physical access.

YUSA SHAMI

Sta630 260 mcqz

i

c. Sometime documents provide incomplete account to the researcher
d. Spontaneous feelings can be recorded when they occurred

7. Which of the following statement is incorrect with respect to "An experimental design is a set of procedures specifying:"
a. How the test units (subjects) are to be divided into homogenous sub samples.
b. What independent variables or treatments are to be measured?
c. What dependent variables are to be measured?
d. How the extraneous variables are to be controlled?

8. Time consumed in mall intercept interview is _____.
a. High
b. Moderate
c. Low
d. Nil

9. "Teacher should create a friendly environment in the classroom" this is the type of _____.
a. Leading question
b. Loaded question
c. Double Barreled
d. Burdensome question

10. Departmental stores selected to test a new merchandising display system is the example of _____.
a. Quota sampling
b. Convenience sampling
c. Judgmental sampling
d. Purposive sampling

1. Which is not a source of existing statistics?
   A. Government
   B. International agencies
   C. Personal interviews
   D. Private sources

2. Followings are the advantages of secondary data except
   A. Non-Reactivity
   B. Selective survival
   C. Low cost
   D. Spontaneity

3. Following are the disadvantages of secondary data except
   A. Longitudinal analysis
   B. Sampling bias
   C. Coding difficult
   D. Incompleteness

4. The coding of the secondary data may be difficult because of
   A. Differences in content or subject matter
   B. Lack of standardization
   C. Differences in length and format
   D. All of these

5. The researcher must be concerned about the following problems while using secondary data in research.
   A. Validity
   B. Reliability
   C. Both of these
   D. None of these

1. **Discrete variable is also called…….**

5. The numerical description that describe sample may be expected to differ from those that describe population because of random fluctuations inherent in sampling process.

1. Sampling design
2. Non-probability sampling
3. **Sampling error**
4. Probability sampling

6. In _____ , each population element has a known and equal chance of selection.

1. Purposive sampling
2. Quota sampling
3. Stratified sampling
4. **Simple random sampling**

7. _____ is the evidence that the instrument, techniques, or process used to measure concept does indeed measure the intended concepts.

1. Reliability
2. Replicability
3. Scaling
4. **Validity**

8. A researcher is interested in studying why the "new math" of the 1960s failed. She interviews several teachers who used the new math during the 1960s. These teachers are considered as:

1. **Primary sources**
2. Secondary Sources
3. External critics
4. Internal critics

9. Which of the following is NOT true about stratified random sampling?

1. It involves a random selection process from identified subgroups
2. **Proportions of groups in the sample must always match their population proportions**
3. Disproportional stratified random sampling is especially helpful for getting large enough subgroup samples when subgroup comparisons are to be done
4. Proportional stratified random sampling yields a representative sample

10. Experimental design is the only appropriate design where_____ relationship can be established.
