AN.K Compilation

1. is the purpose of explanatory research.
   Ans : The desire to know “why”
2. A statement concerned with the logical relationships among concepts is called
   Ans : Proposition
3. The scientific researcher operates at two levels: on the abstract level of concepts and on the other one is the of variables
   Ans : Empirical level
4. The Research that is done to examine the findings of someone else by using the “same variables but with different respondents” comes under which of following
   Ans : Replication
5. meanings attached to a concept create problems of measurement.
   Ans : Vague
6. Concepts represent various degree of
   Ans : Abstraction
7. What research is?
   Ans : Systematic inquiry
8. Realities that are observable through sensory experiences are said to be:
   Ans : Empirical
9. What is Cross-Sectional research
   Ans: The collection of data from more than one case at one moment in time
10. An operational definition is
    Ans : A definition of a concept in terms of specific, empirical measures.
11. In we collect same type of information from different respondents in different times.
    Ans: Time series Research
12. In definition, a concept is explained in terms of other concepts.
    Ans: Theoretical
13. Research improves the decision-making process by following all important stages EXCEPT:
    Ans: Only relying on personal assumptions
14. Concepts, created and developed for conducting any research study, are:
    Ans: The building blocks of theory
15. Logical Process in which we arrive at a reasoned conclusion by logical generalization of known facts is called.
    Ans: Deduction
16. Which of following is a type of applied research?
    Ans: Impact Assessment Research
17. A research study, in which the unit of analysis remains same at specific intervals, over a longer period of time, is known as
    Ans: Panel study
18. If a researcher was studying the use of various instructional approaches to the . Which type of research
    And: Applied
19. An Elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as
    Ans: Exploratory study

20. Social research helps.
    Ans: Improve Public health
21. Which of following best describes an Operational definition ?
    Ans: all of the give above
22. Which of following best describes a Concept?
    Ans: A key idea/ a key word
23. Which of following is true about a concept ?
    Ans: All of the given options
24. Every Research Project Should Begin with:
    Ans: A Statement of the Research?
25. All of the following are the type of Applied Research EXCEPT:
    Ans: Formulative Research
26. The "Deterministic" Characteristic of Scientific research deals with:
    Ans: All of the given options
27. Operational definition is also Known as
    Ans: working definition
28. Which of following is a concept?
    Ans: All of the given options
29. A study conducted by Lever brothers to find out impact of job satisfaction on employees' performance is studied at:
    Ans: Micro Level
30. Which of the following is a procedure agreed upon for translation of a concept into measurement of some kind?
    Ans: Operational definition
31. The "Verifiable" characteristic of scientific research deals with:
    Ans: All of the given options
32. Which of the following statement is true?
    Ans: Theory and research are interrelated
33. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
    Ans: Sensory experience
34. The application of scientific method to the study of business problems is called
    Ans: Businesses Research
35. One of the major hallmarks of scientific research is
    Ans: Objectivity
36. All of the following are true about theories, except.
    Ans: They are tentative until the fact prove them true
37. Rationalism is the application of
    Ans: Logic and arguments
38. Which of following refers to abstract concept?
    Ans: Racism
39. The "Verifiable" characteristic of scientific research deals with all of the following EXCEPT
    Ans: The result interpretation

40. If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth; he is likely conducting .... type of research
    Ans: Evaluation Research
41. If a researcher is going to explore a new topic, he is conducting which of following research?
    Ans: Formulative
42. Which of following is at the highest level of abstraction?
    Ans: Theory
43. Descriptive Research can be either
    Ans : Both Quantitative and Qualitative
44. The Organization of concept in sequence from the most concrete and individual to the most general indicates:
    Ans: the degree of abstraction
45. A Researcher is conducting study to find out the reasons why students are not cooperating with teacher is an example of
    Ans: Explanatory Study
46. What is the Basis of the Scientific Method?
    Ans: To formulate a Research Problem, test the hypotheses in carefully controlled conditions
47. Which of the following statement does best represent the purpose of research?
    Ans: All of the Given Options
48. To explain, predict and control phenomena are the goals of
    Ans: The Scientific Method
49. a theory is a coherent set of_____ used as principles of explanation of the apparent relationship of the certain observed phenomena
    Ans: propositions
50. The Scientific method is preferred over other ways of knowing it is more.
    Ans: All of the given options
51. Descriptive and Explanatory Are the classifications of research on the basis of
    Ans: Purpose of Research
52. Concept is
    Ans: Key idea about any object
53. Qualitative and Quantitative Research are the classification of the research on the basis of
    Ans: Techniques Used
54. The term “Extrapolation” is better explained by the statement
    Ans: Theory Predicts Facts
55. Which of the following is not a function of clearly identified research Questions?
    Ans: They make scope of your research as wide as possible?????
56. A study conducted by Pepsi To find out impact of salary On employees turnover is studied at what level?
    Ans: micro
57. Basic research can also be called as-------
    Ans: Fundamental Research
58. Research methods Are applicable to all of following domains Except
    Ans: Imaginary world

59. Which of the following statement is not true?

Ans: A research proposal is an unorganized and unplanned project

60. A Concept is generalized idea about _____

Ans: All of the given options

61. According to scientific method, which of the following is Not an empirical reality?

Ans: None of the given options

62. All of the following are the purposes of descriptive research EXCEPT

Ans: The desire to know "why"

C

CURRENTLY QUIZ 1 2021 BY AN.K

1. Population and sample of the study is the part of which of the following options? **Research Design**
2. Which of the following must e considered while conducting o literature review for a research study? **All of the given option**
3. Literature review provides a solid foundation for developing **Theoretical framework**
4. A researcher conducting study to find out the reason why students are not cooperating with teachers is an example of **Descriptive study**
5. A research that seeks to determine the answer to who, what, where and how comes under the domain of ------ research. **Descriptive**
6. All of the following options are the part of research proposal except: **Discussion**
7. Identify the option that explains the idea that (2times) knowledge is verifiable by experience or observation. **Empiricism**
8. ------- method use more general information to arrive at a specific conclusion **Deduction**
9. The extensive use of chocolate causes pimples. The given hypothesis is a (an) **Co-relation hypothesis**
10. How different theories address on issue comes under **Theoretical review**
11. The increase in sales promotion is positively associated with the customer satisfaction is an example of which type of hypothesis **Relational hypothesis 2-None of the given option 3-Descriptive hypothesis**
12. Which of the following is included in research proposal L**iterature review**
13. Higher the level of job satisfaction higher will be the employees **Positive relationship**
14. Which of the following is not a part of research design? **Objectives of the study**
15. 15-Which of the following research approaches is least concerned with the generalizability of finding **Qualitative approach**
16. Theories are supposed to be ------ and they could be applicable to different situation **Generic**
17. The reviewed literature must be **Relevant to the research project**
18. What is cross-sectional research **The collection of data from more one case at one moment in time**
19.
20.

Solved By Hafiz Salman Majeed & Maha Shah & Imran Ali & Aysha Mirza

Question # 1 of 15 (Start time: 01:09:24 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:
Basic
Applied
Evaluation
Grounded theory

Question # 2 of 15 (Start time: 01:10:00 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 3 of 15 (Start time: 01:11:32 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 4 of 15 (Start time: 01:12:12 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 01:13:02 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:

Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 6 of 15 (Start time: 01:14:12 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 01:15:12 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 8 of 15 (Start time: 01:15:54 AM) Total Marks: 1
----------surveys are more impersonal than face-to-face interviews.
Select correct option:

Mail
Recorded Interview
Focus group
Telephone

Question # 9 of 15 (Start time: 01:17:01 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Note: Solve these papers by yourself

www.vuaskari.com

Question # 10 of 15 (Start time: 01:17:40 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 11 of 15 (Start time: 01:18:29 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 12 of 15 (Start time: 01:19:08 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data. It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 13 of 15 (Start time: 01:19:47 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 01:20:14 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Abstract
Limitations

Question # 15 of 15 (Start time: 01:20:58 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 1 of 15 (Start time: 01:42:54 AM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 2 of 15 (Start time: 01:43:53 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 3 of 15 (Start time: 01:45:04 AM) Total Marks: 1
The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 4 of 15 (Start time: 01:46:11 AM) Total Marks: 1

Note: Solve these papers by yourself

An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability
Inter item ratio

Question # 5 of 15 (Start time: 01:47:32 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 6 of 15 (Start time: 01:48:41 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 7 of 15 (Start time: 01:49:16 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 8 of 15 (Start time: 01:49:47 AM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Dependent Variable
Experimental Method
Scientific Method

Question # 9 of 15 (Start time: 01:50:21 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 10 of 15 (Start time: 01:51:08 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 11 of 15 (Start time: 01:52:08 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 12 of 15 (Start time: 01:52:24 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Purpose of the research

Question # 13 of 15 (Start time: 01:53:05 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 14 of 15 (Start time: 01:53:35 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 15 of 15 (Start time: 01:54:17 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 1 of 15 (Start time: 07:38:05 PM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 2 of 15 (Start time: 07:39:22 PM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 3 of 15 (Start time: 07:39:53 PM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 4 of 15 (Start time: 07:41:01 PM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 5 of 15 (Start time: 07:42:29 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 6 of 15 (Start time: 07:43:51 PM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Grounded theory

Question # 7 of 15 (Start time: 07:44:58 PM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 8 of 15 (Start time: 07:46:15 PM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data. It
focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 9 of 15 (Start time: 07:46:47 PM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 10 of 15 (Start time: 07:47:20 PM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 11 of 15 (Start time: 07:48:51 PM) Total Marks: 1
Which of the following is NOT a longitudinal study?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Trend study
Census study
Panel study
Cohort study

Question # 12 of 15 (Start time: 07:50:18 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 07:50:45 PM) Total Marks: 1
The small scale trial run of a particular item is called _____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 14 of 15 (Start time: 07:51:39 PM) Total Marks: 1
Which one of the following aspect to be evaluated during "Pilot Testing"?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 15 of 15 (Start time: 07:52:12 PM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 1 of 15 (Start time: 08:21:00 PM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 2 of 15 (Start time: 08:22:29 PM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 3 of 15 (Start time: 08:23:26 PM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 4 of 15 (Start time: 08:23:54 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 5 of 15 (Start time: 08:25:23 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Response set
Response rate
Response bias
Respondents

Question # 6 of 15 (Start time: 08:26:40 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 7 of 15 (Start time: 08:27:09 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 8 of 15 (Start time: 08:27:49 PM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 9 of 15 (Start time: 08:28:14 PM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 10 of 15 (Start time: 08:28:44 PM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 11 of 15 (Start time: 08:29:01 PM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 12 of 15 (Start time: 08:29:48 PM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 13 of 15 (Start time: 08:30:19 PM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 14 of 15 (Start time: 08:31:05 PM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Definition
Construct
Variable
Operationalized variable

Question # 15 of 15 (Start time: 08:31:51 PM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 1 of 15 (Start time: 09:02:12 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 2 of 15 (Start time: 09:02:38 PM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 3 of 15 (Start time: 09:03:58 PM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 4 of 15 (Start time: 09:04:20 PM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 5 of 15 (Start time: 09:04:50 PM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 6 of 15 (Start time: 09:05:12 PM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 7 of 15 (Start time: 09:05:41 PM) Total Marks: 1
Which of the following is false with regard to the benefits of multiple-choice questions over open-ended questions?
Select correct option:

Multiple-choice questions are easier to design
Multiple-choice questions are less costly for coding and data processing
Multiple-choice questions are quicker to administer
The use of multiple-choice questions results in higher cooperation for self-administered surveys

Question # 8 of 15 (Start time: 09:06:58 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 9 of 15 (Start time: 09:07:37 PM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 10 of 15 (Start time: 09:08:13 PM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 11 of 15 (Start time: 09:08:52 PM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 12 of 15 (Start time: 09:09:27 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Question # 13 of 15 (Start time: 09:09:51 PM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 14 of 15 (Start time: 09:10:24 PM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 15 of 15 (Start time: 09:11:52 PM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 1 of 15 (Start time: 11:59:22 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 2 of 15 (Start time: 12:03:22 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 3 of 15 (Start time: 12:04:18 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 4 of 15 (Start time: 12:04:33 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 5 of 15 (Start time: 12:05:03 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 6 of 15 (Start time: 12:05:20 AM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 7 of 15 (Start time: 12:06:05 AM) Total Marks: 1
What is the basis of the Scientific Method?

Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 8 of 15 (Start time: 12:06:19 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 9 of 15 (Start time: 12:07:07 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 10 of 15 (Start time: 12:08:20 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 11 of 15 (Start time: 12:09:47 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 12 of 15 (Start time: 12:09:59 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 13 of 15 (Start time: 12:10:28 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 14 of 15 (Start time: 12:11:05 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 15 of 15 (Start time: 12:11:36 AM) Total Marks: 1
Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Select correct option:

Definition
Construct
Variable
Operationalized variable

Question # 1 of 15 (Start time: 12:20:27 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 2 of 15 (Start time: 12:20:42 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 3 of 15 (Start time: 12:21:29 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 4 of 15 (Start time: 12:21:58 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 5 of 15 (Start time: 12:22:12 AM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 6 of 15 (Start time: 12:23:14 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 12:23:31 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 8 of 15 (Start time: 12:24:05 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 12:24:21 AM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 10 of 15 (Start time: 12:25:46 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Question # 11 of 15 (Start time: 12:26:01 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 12 of 15 (Start time: 12:26:23 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 13 of 15 (Start time: 12:26:42 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 14 of 15 (Start time: 12:26:54 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 15 of 15 (Start time: 12:27:10 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 1 of 15 (Start time: 12:31:21 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 2 of 15 (Start time: 12:32:05 AM) Total Marks: 1
Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?
Select correct option:

What role to adopt when interviewing male managers?
How many female employees should be interviewed for a representative sample?
How to overcome the issue of false consciousness?
What data to use when publishing findings?

Question # 3 of 15 (Start time: 12:33:29 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 4 of 15 (Start time: 12:34:06 AM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 5 of 15 (Start time: 12:35:05 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 6 of 15 (Start time: 12:35:58 AM) Total Marks: 1
An advantage of computer-assisted telephone interviewing is:
Select correct option:

Interviewing time is reduced
Data quality is enhanced
Questionnaires do not have to be coded
There is little opportunity for interviewer bias

Question # 7 of 15 (Start time: 12:36:21 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 8 of 15 (Start time: 12:36:35 AM) Total Marks: 1
A researcher developed a measure of shyness and is now asking whether this measure does in fact measure a person's true state of shyness. This is a question of:
Select correct option:

Reactivity
Construct validity
Reliability
Content validity

Question # 9 of 15 (Start time: 12:38:07 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Evaluation
Experimental

Question # 10 of 15 (Start time: 12:38:49 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 11 of 15 (Start time: 12:39:32 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 12 of 15 (Start time: 12:39:47 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 13 of 15 (Start time: 12:40:48 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 14 of 15 (Start time: 12:42:09 AM) Total Marks: 1
Measurement reliability refers to the:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 15 of 15 (Start time: 12:43:26 AM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 1 of 15 (Start time: 12:51:15 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 2 of 15 (Start time: 12:51:32 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 3 of 15 (Start time: 12:52:12 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

The new advertising campaign will increase Brand B's market penetration.

Question # 4 of 15 (Start time: 12:52:57 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 5 of 15 (Start time: 12:53:34 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 6 of 15 (Start time: 12:54:04 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 7 of 15 (Start time: 12:54:31 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 8 of 15 (Start time: 12:55:04 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 9 of 15 (Start time: 12:56:24 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 10 of 15 (Start time: 12:56:37 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 12:56:50 AM) Total Marks: 1
The small scale trial run of a particular item is called _____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 12 of 15 (Start time: 12:57:04 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

None of the given questions

Question # 13 of 15 (Start time: 12:57:14 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 15 of 15 (Start time: 12:58:52 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 1 of 15 (Start time: 01:08:33 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 2 of 15 (Start time: 01:08:48 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 3 of 15 (Start time: 01:10:03 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 01:11:32 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 01:12:07 AM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 6 of 15 (Start time: 01:12:23 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 7 of 15 (Start time: 01:12:48 AM) Total Marks: 1
Which type of questions should be first in a questionnaire or interview?
Select correct option:

Questions about demographics such as age and gender
Questions about attitudes and behaviors
Most easy question
Difficult questions

Question # 8 of 15 (Start time: 01:13:01 AM) Total Marks: 1
A measure has high internal consistency reliability when:

www.vuaskari.com

Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 9 of 15 (Start time: 01:13:25 AM) Total Marks: 1
Mr. Haris is interested in studying the shared beliefs and practices of the teachers in a small rural school. He is likely to use which research design?
Select correct option:

Action research
Historical research
Ethnography
Grounded theory

Question # 10 of 15 (Start time: 01:14:34 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 11 of 15 (Start time: 01:14:48 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 12 of 15 (Start time: 01:16:12 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 13 of 15 (Start time: 01:16:29 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 14 of 15 (Start time: 01:16:42 AM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 15 of 15 (Start time: 01:16:56 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 1 of 15 (Start time: 01:35:05 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 2 of 15 (Start time: 01:35:26 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 3 of 15 (Start time: 01:35:38 AM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 01:35:51 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 5 of 15 (Start time: 01:36:23 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 6 of 15 (Start time: 01:36:55 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Applied
Evaluation
Grounded theory

Question # 7 of 15 (Start time: 01:37:09 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 8 of 15 (Start time: 01:37:41 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 9 of 15 (Start time: 01:37:56 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 10 of 15 (Start time: 01:38:13 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?

What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 11 of 15 (Start time: 01:38:38 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 12 of 15 (Start time: 01:39:01 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 13 of 15 (Start time: 01:39:14 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 14 of 15 (Start time: 01:39:34 AM) Total Marks: 1
Which of the following questions might invade the privacy of a research participant?
Select correct option:

How long have you worked for this organisation?
What is your home address?
What do you think about your direct line manager?
What happened during your last performance appraisal?

Question # 15 of 15 (Start time: 01:40:16 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 1 of 15 (Start time: 01:44:11 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 2 of 15 (Start time: 01:44:37 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 3 of 15 (Start time: 01:45:21 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 4 of 15 (Start time: 01:45:38 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 5 of 15 (Start time: 01:46:23 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 6 of 15 (Start time: 01:46:41 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 8 of 15 (Start time: 01:48:40 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 9 of 15 (Start time: 01:49:06 AM) Total Marks: 1
How can we determine if a test has good validity?
Select correct option:

It produces the same result when it is given at different times to the same group of people
It produces the same result no matter which version of the test is used It
measures what it is supposed to measure
All of the questions on it can be answered accurately by the subject

Question # 10 of 15 (Start time: 01:49:59 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 11 of 15 (Start time: 01:50:12 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 12 of 15 (Start time: 01:50:34 AM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 01:50:59 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 14 of 15 (Start time: 01:51:14 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 15 of 15 (Start time: 01:51:26 AM) Total Marks: 1
Which of the following is false with regard to the benefits of multiple-choice questions over open-ended questions?
Select correct option:

Multiple-choice questions are easier to design
Multiple-choice questions are less costly for coding and data processing
Multiple-choice questions are quicker to administer
The use of multiple-choice questions results in higher cooperation for self-administered surveys

Question # 1 of 15 (Start time: 02:19:40 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension. It
implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 2 of 15 (Start time: 02:21:06 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 3 of 15 (Start time: 02:21:22 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 4 of 15 (Start time: 02:21:33 AM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 5 of 15 (Start time: 02:22:17 AM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 6 of 15 (Start time: 02:22:39 AM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 7 of 15 (Start time: 02:23:05 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 8 of 15 (Start time: 02:23:18 AM) Total Marks: 1
Which of the following questions might invade the privacy of a research participant?
Select correct option:

How long have you worked for this organisation?
What is your home address?
What do you think about your direct line manager?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

What happened during your last performance appraisal?

Question # 9 of 15 (Start time: 02:23:29 AM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 10 of 15 (Start time: 02:24:03 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 11 of 15 (Start time: 02:24:17 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 12 of 15 (Start time: 02:24:35 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 13 of 15 (Start time: 02:24:47 AM) Total Marks: 1
Quantitative data is?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Expressed in numerical form
Concerned with how things are expressed
Big data
Small data

Question # 14 of 15 (Start time: 02:25:45 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 15 of 15 (Start time: 02:25:59 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 02:30:30 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 2 of 15 (Start time: 02:31:05 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 3 of 15 (Start time: 02:31:37 AM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 4 of 15 (Start time: 02:31:52 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 5 of 15 (Start time: 02:32:04 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 6 of 15 (Start time: 02:32:28 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 7 of 15 (Start time: 02:32:39 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 8 of 15 (Start time: 02:32:51 AM) Total Marks: 1
Theoretical framework is trying to develop a _____ model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 9 of 15 (Start time: 02:33:17 AM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 10 of 15 (Start time: 02:33:56 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 11 of 15 (Start time: 02:34:12 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 12 of 15 (Start time: 02:34:24 AM) Total Marks: 1
In which way does a ratio scale measurement differ from an interval measurement?
Select correct option:

It measures larger or smaller scores on some underlying dimension. It
implies the existence of an absolute zero value.
It requires the mutual exclusivity of all cases.
It requires that exhaustiveness is applied to all observations.

Question # 13 of 15 (Start time: 02:34:35 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 14 of 15 (Start time: 02:36:04 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 15 of 15 (Start time: 02:36:18 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 1 of 15 (Start time: 02:51:21 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ----------.
Select correct option:

Descriptive research
Explananory research
Exploratory research

Note: Solve these papers by yourself

All of the given options

Question # 2 of 15 (Start time: 02:51:41 AM) Total Marks: 1
Which of the following is an example of an issue that would be checked in a pilot testing?
Select correct option:

Completion of all questions on a questionnaire
Legible writing
Single responses to all multiple choice questions
Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

Question # 3 of 15 (Start time: 02:51:49 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 4 of 15 (Start time: 02:51:58 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 5 of 15 (Start time: 02:52:06 AM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 6 of 15 (Start time: 02:52:15 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 7 of 15 (Start time: 02:52:21 AM) Total Marks: 1
Why does qualitative interviewing have an advantage over participant observation when it comes to longitudinal research?
Select correct option:

Repeat interviews are easier to organise.
It allows for a better exploration of key issues.
It is a more focused research method.
Participant observers are prone to 'go native' during longitudinal research.

Question # 8 of 15 (Start time: 02:53:16 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 9 of 15 (Start time: 02:53:23 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 10 of 15 (Start time: 02:53:30 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 02:53:38 AM) Total Marks: 1
Quantitative research has been criticised because:
Select correct option:

The measurement process suggests a spurious and artificial sense of accuracy.
The reliance on instruments and procedures makes it high in ecological validity.
It underestimates the similarities between objects in the natural and social worlds.
It has no validity.

Question # 12 of 15 (Start time: 02:53:58 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 02:54:06 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others All of
the given options

Question # 14 of 15 (Start time: 02:54:24 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 15 of 15 (Start time: 02:54:41 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?

Self-study reviews
Historical reviews

Question # 1 of 15 (Start time: 08:01:46 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 2 of 15 (Start time: 08:01:53 PM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 3 of 15 (Start time: 08:01:59 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 4 of 15 (Start time: 08:02:51 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Note: Solve these papers by yourself

Question # 5 of 15 (Start time: 08:03:11 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 6 of 15 (Start time: 08:03:18 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 7 of 15 (Start time: 08:04:43 PM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 8 of 15 (Start time: 08:05:10 PM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 9 of 15 (Start time: 08:05:17 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

www.vuaskari.com

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 10 of 15 (Start time: 08:05:23 PM) Total Marks: 1
Detailed and unambiguous instructions are particularly important for:
Select correct option:

Computer-assisted telephone surveys
Mail surveys
Computer-assisted personal interviews
Internet surveys

Question # 11 of 15 (Start time: 08:05:30 PM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 12 of 15 (Start time: 08:05:37 PM) Total Marks: 1
The small scale trial run of a particular item is called _____.
Select correct option:

Test run
Pilot test
Post hoc test
t-test

Question # 13 of 15 (Start time: 08:05:45 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 15 of 15 (Start time: 08:05:59 PM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 1 of 15 (Start time: 08:14:44 PM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 2 of 15 (Start time: 08:16:07 PM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 3 of 15 (Start time: 08:17:16 PM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship

Question # 4 of 15 (Start time: 08:17:36 PM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 5 of 15 (Start time: 08:17:53 PM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Question # 6 of 15 (Start time: 08:18:00 PM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 7 of 15 (Start time: 08:18:18 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 08:18:37 PM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 08:18:55 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 10 of 15 (Start time: 08:19:02 PM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 11 of 15 (Start time: 08:19:19 PM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 12 of 15 (Start time: 08:19:36 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 13 of 15 (Start time: 08:19:43 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 14 of 15 (Start time: 08:19:50 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 15 of 15 (Start time: 08:21:01 PM) Total Marks: 1
What does Ordinal scale NOT imply?
Select correct option:

Characteristics of nominal scale
Rank the object
Does not provide magnitude of object
Provide rate

Question # 1 of 15 (Start time: 08:41:52 PM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 2 of 15 (Start time: 08:42:33 PM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 08:42:46 PM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 4 of 15 (Start time: 08:43:08 PM) Total Marks: 1
When doing research involving deception with human subjects, researchers have an obligation to do which of the following?
Select correct option:

Tell subjects the truth about the study's purpose and methods after the study is completed
Prevent mental and physical harm to subjects
Let subjects withdraw from the study at any time if they don't want to keep participating
All of the given options

Question # 5 of 15 (Start time: 08:44:30 PM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 6 of 15 (Start time: 08:44:53 PM) Total Marks: 1
Which of the following is an advantage of open questions?
Select correct option:

They allow respondents to answer in their own terms.
They prevent respondents from giving unusual answers.
They allow respondents to put less effort into their answer.
They allow respondents to code their answers in advance.

Question # 7 of 15 (Start time: 08:45:09 PM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 8 of 15 (Start time: 08:45:21 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 9 of 15 (Start time: 08:45:53 PM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 10 of 15 (Start time: 08:46:09 PM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 11 of 15 (Start time: 08:46:41 PM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 12 of 15 (Start time: 08:47:03 PM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 13 of 15 (Start time: 08:47:26 PM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 14 of 15 (Start time: 08:47:59 PM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 15 of 15 (Start time: 08:49:25 PM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 1 of 15 (Start time: 08:57:01 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 2 of 15 (Start time: 08:57:15 PM) Total Marks: 1
What is required if there is a chance that data could harm the respondents?
Select correct option:

Change of results
A signed form detailing the types of limits
Free consent of respondents
All of the given options

Question # 3 of 15 (Start time: 08:57:28 PM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 4 of 15 (Start time: 08:58:03 PM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 5 of 15 (Start time: 08:58:28 PM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic

Stupid

Question # 6 of 15 (Start time: 08:58:44 PM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 7 of 15 (Start time: 08:58:59 PM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 8 of 15 (Start time: 08:59:13 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 9 of 15 (Start time: 08:59:42 PM) Total Marks: 1
Which one of the following aspect to be evaluated during "Pilot Testing"?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 10 of 15 (Start time: 09:00:24 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 11 of 15 (Start time: 09:00:36 PM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 12 of 15 (Start time: 09:00:51 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 13 of 15 (Start time: 09:01:16 PM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 14 of 15 (Start time: 09:01:54 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 15 of 15 (Start time: 09:02:22 PM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 1 of 15 (Start time: 09:06:55 PM) Total Marks: 1
Which of the following is an excellent way to enhance the validity of interview data collection?
Select correct option:

Spend an extended period of time in the field.
Obtain participant trust.
Recognize your own biases
Spend time in field,obtain participant trust, recognize biases.

Question # 2 of 15 (Start time: 09:08:22 PM) Total Marks: 1
In which of the following Tests, we give extra training to the interviewer in case of big research funded by an organization?
Select correct option:

Test Run
Pilot Test
Post Hoc Test
T- Test

Question # 3 of 15 (Start time: 09:08:34 PM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 4 of 15 (Start time: 09:08:58 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 5 of 15 (Start time: 09:09:12 PM) Total Marks: 1
Which of the following is not an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
None of the given options

Question # 6 of 15 (Start time: 09:10:16 PM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 09:10:29 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 09:10:45 PM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

None of the given questions

Question # 9 of 15 (Start time: 09:10:57 PM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 10 of 15 (Start time: 09:11:43 PM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 11 of 15 (Start time: 09:12:14 PM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.
Select correct option:

Construct
Internal
External
Causal

Question # 12 of 15 (Start time: 09:13:39 PM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 13 of 15 (Start time: 09:14:09 PM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 14 of 15 (Start time: 09:14:27 PM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 15 of 15 (Start time: 09:14:50 PM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 1 of 15 (Start time: 09:25:20 PM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 2 of 15 (Start time: 09:26:42 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied

Evaluation
Grounded theory

Question # 3 of 15 (Start time: 09:26:56 PM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 4 of 15 (Start time: 09:27:28 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 09:27:42 PM) Total Marks: 1
The validity of a measure refers to the:
Select correct option:

Particular type of construct specification
Comprehensiveness with which it measures the construct
Accuracy with which it measures the construct
Consistency of the measurement

Question # 6 of 15 (Start time: 09:28:03 PM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 8 of 15 (Start time: 09:28:37 PM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 9 of 15 (Start time: 09:29:02 PM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Question # 10 of 15 (Start time: 09:30:18 PM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 11 of 15 (Start time: 09:30:41 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations

Note: Solve these papers by yourself

All of the gven options

Question # 12 of 15 (Start time: 09:31:15 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 13 of 15 (Start time: 09:31:25 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 14 of 15 (Start time: 09:31:41 PM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 15 of 15 (Start time: 09:31:54 PM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Income

Question # 2 of 15 (Start time: 09:39:35 PM) Total Marks: 1
All of these are characteristics of scientific methods of research except, it is;
Select correct option:

Cumulative
Deterministic
Unethical
Rationalism

Question # 3 of 15 (Start time: 09:39:58 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 4 of 15 (Start time: 09:40:13 PM) Total Marks: 1
If a measure is consistent over multiple occasions, it has:
Select correct option:

Inter-rater reliability
Construct validity
Internal validity
Test-retest reliability

Question # 5 of 15 (Start time: 09:40:39 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience

Logics and arguments

Question # 6 of 15 (Start time: 09:40:57 PM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 7 of 15 (Start time: 09:41:11 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 8 of 15 (Start time: 09:41:23 PM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 9 of 15 (Start time: 09:41:54 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 10 of 15 (Start time: 09:42:24 PM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 11 of 15 (Start time: 09:42:43 PM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 12 of 15 (Start time: 09:42:59 PM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 13 of 15 (Start time: 09:43:12 PM) Total Marks: 1
What type of the interview that is in which questions are already prepared?
Select correct option:

Telephonic interview
Personal interview
Unstructured interview
Structured interview

Question # 14 of 15 (Start time: 09:43:29 PM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 15 of 15 (Start time: 09:44:01 PM) Total Marks: 1
A telephone company is interested in obtaining customers' reactions to a new service package. Which of the following primary research methods would be most effective in reaching this audience to obtain their feedback?
Select correct option:

An Internet survey
Telephone interviews
A mail survey
Focus groups

Question # 1 of 15 (Start time: 09:53:55 PM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 2 of 15 (Start time: 09:54:08 PM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 09:54:20 PM) Total Marks: 1
Which of the following is Not a source of Literature review?
Select correct option:

Scholarly journals
Experiment
Dissertations
Bibliographical indexes

Question # 4 of 15 (Start time: 09:54:32 PM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 5 of 15 (Start time: 09:54:46 PM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:
Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 6 of 15 (Start time: 09:54:59 PM) Total Marks: 1
What is the main purpose of pilot testing?
Select correct option:

To accumulate responses
To identify respondent
To identify potential problems
To evaluate the research

Question # 7 of 15 (Start time: 09:56:20 PM) Total Marks: 1
Measurement reliability refers to the:
Select correct option:

Accuracy of the scores
Consistency of the scores
Dependency of the scores
Comprehensiveness of the scores

Question # 8 of 15 (Start time: 09:56:52 PM) Total Marks: 1
Which of the following is an excellent way to enhance the validity of interview data collection?
Select correct option:

Spend an extended period of time in the field.
Obtain participant trust.
Recognize your own biases
Spend time in field,obtain participant trust, recognize biases.

Note: Solve these papers by yourself

www.vuaskari.com

www.vuaskari.com

Question # 9 of 15 (Start time: 09:57:07 PM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 10 of 15 (Start time: 09:57:21 PM) Total Marks: 1
If a nominal scale is used, it is permissible to calculate which of the following statistics?
Select correct option:

Mean
Range
Percentile
Mode

Question # 11 of 15 (Start time: 09:57:33 PM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 12 of 15 (Start time: 09:57:43 PM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 13 of 15 (Start time: 09:58:06 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 14 of 15 (Start time: 09:58:31 PM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 15 of 15 (Start time: 09:58:43 PM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 1 of 15 (Start time: 11:18:44 PM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 2 of 15 (Start time: 11:19:16 PM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 3 of 15 (Start time: 11:19:34 PM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

www.vuaskari.com

It is ethical.
It can be investigated through the collection and analysis of data. It
focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 4 of 15 (Start time: 11:20:02 PM) Total Marks: 1
Which one of the following aspect to be evaluated during "Pilot Testing"?
Select correct option:

Reactions of Respondents
Discovering errors in the instrument
Sampling procedure can be checked
All of the given options

Question # 5 of 15 (Start time: 11:20:21 PM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 6 of 15 (Start time: 11:20:38 PM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 7 of 15 (Start time: 11:20:52 PM) Total Marks: 1
All the persons involved in the collection of data and supervision of data collection process are called;
Select correct option:

Fieldworkers
Researchers
Research assistants
None of the given options

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Question # 8 of 15 (Start time: 11:21:06 PM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 9 of 15 (Start time: 11:21:19 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 10 of 15 (Start time: 11:21:36 PM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 11 of 15 (Start time: 11:21:48 PM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 11:22:07 PM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 13 of 15 (Start time: 11:22:29 PM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 14 of 15 (Start time: 11:22:42 PM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 15 of 15 (Start time: 11:22:55 PM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 1 of 15 (Start time: 01:04:59 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 2 of 15 (Start time: 01:05:06 AM) Total Marks: 1
What is ordinal data?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 3 of 15 (Start time: 01:05:12 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others All of
the given options

Question # 4 of 15 (Start time: 01:05:29 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 5 of 15 (Start time: 01:05:45 AM) Total Marks: 1
Quantitative social researchers rarely claim to have established causality because:
Select correct option:

They are more concerned with publishing the results of their reliability tests.
They do not believe that this is an appropriate goal to be striving for.
They keep forgetting which of the variables they have manipulated.
They tend to use cross-sectional designs, which produce only correlations.

Question # 6 of 15 (Start time: 01:05:55 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Question # 7 of 15 (Start time: 01:06:03 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 8 of 15 (Start time: 01:06:10 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 9 of 15 (Start time: 01:06:17 AM) Total Marks: 1
Research may differ along a series of dimensions. Which of the following may be applied to this statement?
Select correct option:

The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection.
All of the given options

Question # 10 of 15 (Start time: 01:06:23 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 11 of 15 (Start time: 01:06:42 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Inductive logic
Deductive logic
The scientific method

Question # 12 of 15 (Start time: 01:06:50 AM) Total Marks: 1
Which of the the following is not included in Objects?
Select correct option:

Tables
People
Books
Weight

Question # 13 of 15 (Start time: 01:07:00 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 14 of 15 (Start time: 01:07:06 AM) Total Marks: 1
----------surveys are more impersonal than face-to-face interviews.
Select correct option:

Mail
Recorded Interview
Focus group
Telephone

Question # 15 of 15 (Start time: 01:07:23 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 1 of 15 (Start time: 02:14:11 AM) Total Marks: 1
A literature review requires;

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

planning
clear writing
good writing
All of the given option

Question # 2 of 15 (Start time: 02:14:18 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 3 of 15 (Start time: 02:14:24 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 4 of 15 (Start time: 02:14:44 AM) Total Marks: 1
Which of the following is an example of deception in business research?
Select correct option:

The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic.
The researcher failing to ask permission to interview someone.

Question # 5 of 15 (Start time: 02:14:51 AM) Total Marks: 1
Which of the following provides insight into the complexity of using interviews?
Select correct option:

Potential influence of gender or cultural differences between interviewer and interviewee
The accuracy of the interviewee's responses
The different semantic meanings of the language being used
Accuracy, influences and language used

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Question # 6 of 15 (Start time: 02:14:57 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 7 of 15 (Start time: 02:15:03 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 8 of 15 (Start time: 02:15:10 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 9 of 15 (Start time: 02:15:25 AM) Total Marks: 1
What is ordinal data?
Select correct option:

Ordinary data
Well behaved data
Ranked data
Numbers

Question # 10 of 15 (Start time: 02:15:31 AM) Total Marks: 1
The key objective of data analysis is to:
Select correct option:

Calculate statistics
Understand relationships between variables

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Obtain the distribution of responses for each question
Create tables which display the survey results

Question # 11 of 15 (Start time: 02:15:52 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 12 of 15 (Start time: 02:16:07 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 13 of 15 (Start time: 02:16:22 AM) Total Marks: 1
Time consumed in mall intercept interview is----------.
Select correct option:

High
Moderate
Low
Nil

Question # 14 of 15 (Start time: 02:16:45 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 02:16:51 AM) Total Marks: 1
Which of the following is least likely to occur as an ethical problem with e-research?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored.
Debriefing could be avoided.
Privacy could be invaded.

Question # 1 of 15 (Start time: 02:18:36 AM) Total Marks: 1
Which of the following is likely to reduce the validity of a test?
Select correct option:

Unclear test directions
Ambiguous test items
Untaught items
All of the given options

Question # 2 of 15 (Start time: 02:19:21 AM) Total Marks: 1
A measure has high internal consistency reliability when:
Select correct option:

Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.
Each of the items correlates with other items on the measure.

Question # 3 of 15 (Start time: 02:19:40 AM) Total Marks: 1
One of the preoccupations of quantitative researchers is with generalization, which is a sign of:
Select correct option:

External validity
Internal reliability
External reliability
Internal validity

Question # 4 of 15 (Start time: 02:19:55 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Question # 5 of 15 (Start time: 02:20:01 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 6 of 15 (Start time: 02:20:07 AM) Total Marks: 1
Which of the following is not an unethical issue?
Select correct option:

Invoicing irregularities
Avoiding legal liability
Misrepresenting results
None of the given options

Question # 7 of 15 (Start time: 02:20:13 AM) Total Marks: 1
If an interview is conducted with a respondent who does not meet the qualifications for a study, what kind of bias has occurred?
Select correct option:

Respondent bias
Position bias
Non-response bias
Instrument bias

Question # 8 of 15 (Start time: 02:20:20 AM) Total Marks: 1
The researcher protects the confidentiality in following ways, Except;
Select correct option:

Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified.
Disclosure of data subsets.
Restricting access to respondent identification.

Question # 9 of 15 (Start time: 02:20:27 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 10 of 15 (Start time: 02:20:42 AM) Total Marks: 1
How can we determine if a test has good validity?
Select correct option:

It produces the same result when it is given at different times to the same group of people
It produces the same result no matter which version of the test is used It
measures what it is supposed to measure
All of the questions on it can be answered accurately by the subject

Question # 11 of 15 (Start time: 02:20:57 AM) Total Marks: 1
When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.
Select correct option:

Construct
Internal
External
Causal

Question # 12 of 15 (Start time: 02:21:13 AM) Total Marks: 1
Critical decision area in questionnaire construction is_____ .
Select correct option:

Question content
Question wording
Response strategy
All of the given options

Question # 13 of 15 (Start time: 02:21:39 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Vu Askari Team
www.vuaskari.com

The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 15 of 15 (Start time: 02:22:01 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 1 of 15 (Start time: 04:11:02 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 2 of 15 (Start time: 04:11:15 AM) Total Marks: 1
What is one way that distortions can be produced in self report data?
Select correct option:

Lying
Social desirability bias
Faulty memory
All of the given options

Question # 3 of 15 (Start time: 04:12:18 AM) Total Marks: 1
An indicator of reliability based on the correlations of each item in a measure with every other item is called:
Select correct option:

Test-retest reliability
Cronbach's alpha
Split-half reliability

Inter item ratio

Question # 4 of 15 (Start time: 04:12:53 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 5 of 15 (Start time: 04:13:22 AM) Total Marks: 1
Which type of question is most likely to be used when the researcher is just starting to explore what people think about a particular topic?
Select correct option:

Closed-ended
Open-ended
Structured
Semi structured

Question # 6 of 15 (Start time: 04:13:47 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 04:14:07 AM) Total Marks: 1
How is nominal data presented?
Select correct option:

In order
In discrete categories
Units of equal distance
Data where there is a true zero

Question # 8 of 15 (Start time: 04:14:20 AM) Total Marks: 1
The number of people who complete a survey in relation to the number of people contacted to participate is called the:

Note: Solve these papers by yourself

www.vuaskari.com

Select correct option:

Response set
Response rate
Response bias
Respondents

Question # 9 of 15 (Start time: 04:14:33 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 10 of 15 (Start time: 04:14:47 AM) Total Marks: 1
When accessing the internet, which of these steps is the most essential?
Select correct option:

Recording the full URL
Noting the access dates
Downloading material to be referenced
They are all equally important

Question # 11 of 15 (Start time: 04:15:50 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 12 of 15 (Start time: 04:16:21 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Note: Solve these papers by yourself

Question # 13 of 15 (Start time: 04:16:47 AM) Total Marks: 1
Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Select correct option:

Note taking
Videotaping
Audiotaping
Writing notes after the interview

Question # 14 of 15 (Start time: 04:16:58 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 15 of 15 (Start time: 04:17:13 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 01:38:42 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:
Perceptions
Theory
Sensory experience
Logics and arguments

Question # 2 of 15 (Start time: 01:40:02 PM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 3 of 15 (Start time: 01:41:06 PM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:
Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 4 of 15 (Start time: 01:42:22 PM) Total Marks: 1
Which of the following is not a concept?
Select correct option:
Leadership
Total Quality Management
Human Resource Management
IQ

Question # 5 of 15 (Start time: 01:43:28 PM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:
There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 6 of 15 (Start time: 01:44:39 PM) Total Marks: 1
What research is?
Select correct option:
A lab experiment
A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 01:45:22 PM) Total Marks: 1
The independent variable is;
Select correct option:
The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

A confounding variable

Question # 8 of 15 (Start time: 01:46:07 PM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:
Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 9 of 15 (Start time: 01:47:26 PM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:
Tradition
Inductive logic
Deductive logic
The scientific method

Question # 10 of 15 (Start time: 01:48:21 PM) Total Marks: 1
A variable is:
Select correct option:
Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 11 of 15 (Start time: 01:49:48 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:
Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 12 of 15 (Start time: 01:50:45 PM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:
Basic
Applied
Evaluation

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Experimental

Question # 13 of 15 (Start time: 01:51:32 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:
It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 14 of 15 (Start time: 01:52:05 PM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:
Applied
Interview
Basic
Stupid

Question # 15 of 15 (Start time: 01:53:29 PM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:
They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 1 of 15 (Start time: 04:21:02 PM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 2 of 15 (Start time: 04:22:32 PM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 3 of 15 (Start time: 04:23:17 PM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 4 of 15 (Start time: 04:24:39 PM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 5 of 15 (Start time: 04:25:21 PM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 7 of 15 (Start time: 04:27:21 PM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Question # 8 of 15 (Start time: 04:28:33 PM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 9 of 15 (Start time: 04:29:32 PM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 10 of 15 (Start time: 04:30:17 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 11 of 15 (Start time: 04:31:03 PM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

www.vuaskari.com

Question # 12 of 15 (Start time: 04:31:40 PM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 13 of 15 (Start time: 04:32:07 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 14 of 15 (Start time: 04:32:43 PM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 15 of 15 (Start time: 04:33:21 PM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 1 of 15 (Start time: 08:51:23 PM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Applied
Evaluation
Grounded theory

Question # 2 of 15 (Start time: 08:51:59 PM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 3 of 15 (Start time: 08:52:49 PM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 4 of 15 (Start time: 08:53:26 PM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 5 of 15 (Start time: 08:53:46 PM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

A procedure

Question # 6 of 15 (Start time: 08:54:40 PM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 7 of 15 (Start time: 08:55:15 PM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 8 of 15 (Start time: 08:56:29 PM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 08:57:12 PM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 10 of 15 (Start time: 08:58:03 PM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 11 of 15 (Start time: 08:59:18 PM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 12 of 15 (Start time: 09:00:05 PM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 13 of 15 (Start time: 09:00:55 PM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 14 of 15 (Start time: 09:01:44 PM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 15 of 15 (Start time: 09:02:58 PM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.
Question # 1 of 15 (Start time: 01:38:28 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Experimental

Question # 2 of 15 (Start time: 01:39:40 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 3 of 15 (Start time: 01:40:30 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 4 of 15 (Start time: 01:41:50 AM) Total Marks: 1

www.vuaskari.com

Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 5 of 15 (Start time: 01:42:35 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 6 of 15 (Start time: 01:44:02 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 7 of 15 (Start time: 01:45:06 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 8 of 15 (Start time: 01:45:35 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count

To help in your general studying

Question # 9 of 15 (Start time: 01:46:10 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 10 of 15 (Start time: 01:47:19 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 11 of 15 (Start time: 01:48:49 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 12 of 15 (Start time: 01:50:18 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 13 of 15 (Start time: 01:51:43 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 14 of 15 (Start time: 01:52:48 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 15 of 15 (Start time: 01:54:06 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 1 of 15 (Start time: 02:13:44 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 2 of 15 (Start time: 02:14:08 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 3 of 15 (Start time: 02:14:23 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 4 of 15 (Start time: 02:14:54 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 5 of 15 (Start time: 02:15:13 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 6 of 15 (Start time: 02:16:37 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 7 of 15 (Start time: 02:17:35 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Theoretical framework
Define broad problem area

Question # 8 of 15 (Start time: 02:18:33 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 02:18:46 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 10 of 15 (Start time: 02:19:13 AM) Total Marks: 1
Which of the following is an example of value-free research?
Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 11 of 15 (Start time: 02:20:01 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 12 of 15 (Start time: 02:21:25 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 13 of 15 (Start time: 02:22:45 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 14 of 15 (Start time: 02:23:54 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 15 of 15 (Start time: 02:25:23 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data. It
focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 1 of 15 (Start time: 03:03:37 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Time dimension
Techniques used
Purpose of the research

Question # 2 of 15 (Start time: 03:04:12 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 3 of 15 (Start time: 03:05:18 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 4 of 15 (Start time: 03:06:27 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 5 of 15 (Start time: 03:07:01 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 6 of 15 (Start time: 03:07:30 AM) Total Marks: 1
Which of the following is an example of value-free research?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Conscious favor
Sympathy for the loser
Unstructured interviewing
None of the given options

Question # 7 of 15 (Start time: 03:08:53 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 8 of 15 (Start time: 03:10:16 AM) Total Marks: 1
The following journal article would be an example of _____ research; "The benefits of florescent lighting on production in a factory setting."
Select correct option:

Applied
Interview
Basic
Stupid

Question # 9 of 15 (Start time: 03:10:53 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others All of
the given options

Question # 10 of 15 (Start time: 03:12:07 AM) Total Marks: 1
Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

When a hypothesis is not supported, virtually nothing has been learned about the theory. A good theory will be inclusive enough to explain every possible research outcome.

Question # 11 of 15 (Start time: 03:13:34 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 12 of 15 (Start time: 03:14:41 AM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 03:15:29 AM) Total Marks: 1
A concept is a generalized idea about------.
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 14 of 15 (Start time: 03:16:26 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 15 of 15 (Start time: 03:17:54 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Question # 10 of 15 (Start time: 03:53:53 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 11 of 15 (Start time: 03:55:16 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 12 of 15 (Start time: 03:56:41 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 13 of 15 (Start time: 03:58:05 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 14 of 15 (Start time: 03:59:33 AM) Total Marks: 1

Note: Solve these papers by yourself

www.vuaskari.com

To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 15 of 15 (Start time: 04:00:46 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 1 of 15 (Start time: 04:12:05 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 2 of 15 (Start time: 04:13:32 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 3 of 15 (Start time: 04:14:55 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be

www.vuaskari.com

located.
Find what is already known, identify gaps demonstrate awareness.

Question # 4 of 15 (Start time: 04:16:04 AM) Total Marks: 1
Theoretical framework is trying to develop a _____ model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 5 of 15 (Start time: 04:17:11 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 04:18:28 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 7 of 15 (Start time: 04:19:45 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 8 of 15 (Start time: 04:21:13 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 9 of 15 (Start time: 04:21:35 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 10 of 15 (Start time: 04:22:58 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 11 of 15 (Start time: 04:23:26 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 12 of 15 (Start time: 04:24:54 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 13 of 15 (Start time: 04:26:16 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 14 of 15 (Start time: 04:27:15 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 15 of 15 (Start time: 04:28:41 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 1 of 15 (Start time: 01:41:55 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 2 of 15 (Start time: 01:42:31 AM) Total Marks: 1
Research questions are crucial because they will:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 3 of 15 (Start time: 01:43:47 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 4 of 15 (Start time: 01:44:45 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 01:46:16 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 6 of 15 (Start time: 01:46:50 AM) Total Marks: 1
Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 01:47:44 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 8 of 15 (Start time: 01:48:16 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review
Conclusions section

Question # 9 of 15 (Start time: 01:48:49 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 10 of 15 (Start time: 01:49:38 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 11 of 15 (Start time: 01:51:00 AM) Total Marks: 1
Rationalism is the application of:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 12 of 15 (Start time: 01:52:19 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 13 of 15 (Start time: 01:52:56 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 14 of 15 (Start time: 01:53:51 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 15 of 15 (Start time: 01:54:27 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

A process to create theories

Question # 1 of 15 (Start time: 02:13:07 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 2 of 15 (Start time: 02:13:36 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 3 of 15 (Start time: 02:15:04 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 4 of 15 (Start time: 02:15:44 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 5 of 15 (Start time: 02:16:49 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 6 of 15 (Start time: 02:17:38 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 7 of 15 (Start time: 02:18:11 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 8 of 15 (Start time: 02:19:04 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 9 of 15 (Start time: 02:19:50 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 10 of 15 (Start time: 02:20:24 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 11 of 15 (Start time: 02:20:48 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 12 of 15 (Start time: 02:21:43 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 13 of 15 (Start time: 02:22:48 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 14 of 15 (Start time: 02:24:15 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 15 of 15 (Start time: 02:25:40 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 1 of 15 (Start time: 02:44:40 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 2 of 15 (Start time: 02:45:32 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 3 of 15 (Start time: 02:47:01 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 4 of 15 (Start time: 02:48:03 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

www.vuaskari.com

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 5 of 15 (Start time: 02:48:30 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 6 of 15 (Start time: 02:49:33 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 02:50:47 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 8 of 15 (Start time: 02:51:04 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 9 of 15 (Start time: 02:51:21 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 10 of 15 (Start time: 02:52:21 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 11 of 15 (Start time: 02:52:39 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 12 of 15 (Start time: 02:53:25 AM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 02:54:12 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ----------.
Select correct option:

Descriptive research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Explananory research
Exploratory research
All of the given options

Question # 14 of 15 (Start time: 02:55:25 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 15 of 15 (Start time: 02:56:01 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 1 of 15 (Start time: 03:03:28 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 2 of 15 (Start time: 03:03:55 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 3 of 15 (Start time: 03:05:26 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 4 of 15 (Start time: 03:06:16 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 5 of 15 (Start time: 03:06:51 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 6 of 15 (Start time: 03:07:16 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 7 of 15 (Start time: 03:08:03 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Question # 8 of 15 (Start time: 03:09:30 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 9 of 15 (Start time: 03:10:03 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 03:10:20 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 11 of 15 (Start time: 03:10:40 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 12 of 15 (Start time: 03:10:55 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 13 of 15 (Start time: 03:12:22 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 14 of 15 (Start time: 03:13:48 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 15 of 15 (Start time: 03:14:21 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 1 of 15 (Start time: 03:38:54 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Note: Solve these papers by yourself

Question # 2 of 15 (Start time: 03:39:12 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 3 of 15 (Start time: 03:39:24 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 4 of 15 (Start time: 03:40:25 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 5 of 15 (Start time: 03:40:39 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 6 of 15 (Start time: 03:42:04 AM) Total Marks: 1
Theoretical framework is trying to develop a _____ model of our study.
Select correct option:

Functional
Conceptual

Note: Solve these papers by yourself

Operational
Practical

Question # 7 of 15 (Start time: 03:42:28 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 8 of 15 (Start time: 03:42:53 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 9 of 15 (Start time: 03:43:25 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 10 of 15 (Start time: 03:43:51 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes

Question # 11 of 15 (Start time: 03:45:05 AM) Total Marks: 1
If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of research?
Select correct option:

www.vuaskari.com

Basic
Applied
Evaluation
Experimental

Question # 12 of 15 (Start time: 03:46:28 AM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 13 of 15 (Start time: 03:46:46 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 03:47:50 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 1 of 15 (Start time: 03:54:59 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?

Note: Solve these papers by yourself

www.vuaskari.com

www.vuaskari.com

What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 2 of 15 (Start time: 03:55:58 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 3 of 15 (Start time: 03:56:06 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 4 of 15 (Start time: 03:57:31 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 5 of 15 (Start time: 03:58:25 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 03:59:52 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data. It focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 7 of 15 (Start time: 04:00:35 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 8 of 15 (Start time: 04:00:56 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 9 of 15 (Start time: 04:01:20 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 10 of 15 (Start time: 04:01:41 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 11 of 15 (Start time: 04:01:55 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 12 of 15 (Start time: 04:02:05 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 13 of 15 (Start time: 04:02:28 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 14 of 15 (Start time: 04:03:39 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 15 of 15 (Start time: 04:03:59 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 1 of 15 (Start time: 04:21:03 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 2 of 15 (Start time: 04:21:53 AM) Total Marks: 1
The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 3 of 15 (Start time: 04:22:15 AM) Total Marks: 1
A theory is a coherent set of _____ used as principles of explanations of the apparent relationship of certain observed phenomena.
Select correct option:

Disciplines
Propositions
Empirical Realities
None of the given options

Question # 4 of 15 (Start time: 04:22:41 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 5 of 15 (Start time: 04:22:56 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 6 of 15 (Start time: 04:23:47 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 04:24:35 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 8 of 15 (Start time: 04:26:02 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification the gap in knowledge
Theory predicts facts
None of the given options

Question # 9 of 15 (Start time: 04:26:13 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Evaluation
Grounded theory

Question # 10 of 15 (Start time: 04:26:29 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 11 of 15 (Start time: 04:26:49 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 04:27:09 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 13 of 15 (Start time: 04:27:23 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 14 of 15 (Start time: 04:27:49 AM) Total Marks: 1
The independent variable is;
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 04:28:08 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 1 of 15 (Start time: 04:37:09 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 2 of 15 (Start time: 04:38:33 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 3 of 15 (Start time: 04:39:08 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 5 of 15 (Start time: 04:41:04 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 6 of 15 (Start time: 04:41:50 AM) Total Marks: 1
Qualitative and Quantitative Research are the classifications of research on the basis of
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 7 of 15 (Start time: 04:42:09 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 8 of 15 (Start time: 04:42:23 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 9 of 15 (Start time: 04:43:01 AM) Total Marks: 1
Which of the following statements is false?
Select correct option:

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

Question # 10 of 15 (Start time: 04:43:17 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 11 of 15 (Start time: 04:43:29 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 12 of 15 (Start time: 04:43:43 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 13 of 15 (Start time: 04:43:55 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 04:44:07 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 15 of 15 (Start time: 04:44:18 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 1 of 15 (Start time: 04:55:00 AM) Total Marks: 1
In _____ we collect same type of information from different respondents in different times.
Select correct option:

Cohort study
Time series Research
Panel study
Case studies

Question # 2 of 15 (Start time: 04:55:27 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 3 of 15 (Start time: 04:55:42 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Question # 4 of 15 (Start time: 04:55:57 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 5 of 15 (Start time: 04:56:07 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 6 of 15 (Start time: 04:57:14 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 7 of 15 (Start time: 04:57:30 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 8 of 15 (Start time: 04:57:54 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

The lottery result
The frequency of the effect
The direction of the effect

Question # 9 of 15 (Start time: 04:58:05 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 10 of 15 (Start time: 04:59:31 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 11 of 15 (Start time: 05:00:03 AM) Total Marks: 1
Which of the following is NOT a legitimate research problem as stated?
Select correct option:

What is the relationship between the number of books children read and their reading scores?
Should competitive games be banned from elementary schools?
What does it mean to be a special needs child "included" in Ms. Amara's fourth grade class?
What are the major legal principles applied to educational cases decided by the Supreme Court?

Question # 12 of 15 (Start time: 05:00:30 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 13 of 15 (Start time: 05:00:44 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 14 of 15 (Start time: 05:00:56 AM) Total Marks: 1
To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 15 of 15 (Start time: 05:01:41 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 1 of 15 (Start time: 05:08:52 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 2 of 15 (Start time: 05:09:06 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be

Note: Solve these papers by yourself

www.vuaskari.com

located.
Find what is already known, identify gaps demonstrate awareness.

Question # 3 of 15 (Start time: 05:09:59 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 4 of 15 (Start time: 05:10:17 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 5 of 15 (Start time: 05:10:43 AM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 6 of 15 (Start time: 05:11:23 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 7 of 15 (Start time: 05:11:36 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 8 of 15 (Start time: 05:11:55 AM) Total Marks: 1
Theoretical framework is trying to develop a _____ model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 9 of 15 (Start time: 05:12:07 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 10 of 15 (Start time: 05:12:19 AM) Total Marks: 1
To say that a theory is falsifiable is to say that;
Select correct option:

It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory.
We can imagine results that would contradict it.
It is so vague that it fits any and all possible results.

Question # 11 of 15 (Start time: 05:12:33 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study

Question # 12 of 15 (Start time: 05:12:52 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 13 of 15 (Start time: 05:13:06 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 14 of 15 (Start time: 05:13:20 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 15 of 15 (Start time: 05:13:32 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 1 of 15 (Start time: 05:21:43 AM) Total Marks: 1

Question # 2 of 15 (Start time: 05:21:54 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 3 of 15 (Start time: 05:22:05 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 4 of 15 (Start time: 05:22:55 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 5 of 15 (Start time: 05:23:09 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Question # 6 of 15 (Start time: 05:23:21 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 7 of 15 (Start time: 05:23:49 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 8 of 15 (Start time: 05:24:04 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 9 of 15 (Start time: 05:24:29 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 10 of 15 (Start time: 05:24:50 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Note: Solve these papers by yourself

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 11 of 15 (Start time: 05:25:03 AM) Total Marks: 1
What is the first step in the research process?
Select correct option:

Preliminary data collection
Problem definition
Theoretical framework
Define broad problem area

Question # 12 of 15 (Start time: 05:25:23 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 13 of 15 (Start time: 05:25:35 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 14 of 15 (Start time: 05:26:02 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 05:26:12 AM) Total Marks: 1
Before a researcher specified the relationship among variables, he must have a (an):
Select correct option:

Inventory of variables
Inventory of propositions
Arrangement of propositions
Schematic diagram

Question # 1 of 15 (Start time: 05:29:10 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 2 of 15 (Start time: 05:29:20 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 3 of 15 (Start time: 05:29:33 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 4 of 15 (Start time: 05:29:46 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest

Note: Solve these papers by yourself

www.vuaskari.com

To help in your general studying

Question # 5 of 15 (Start time: 05:30:04 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Question # 6 of 15 (Start time: 05:30:14 AM) Total Marks: 1
After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):
Select correct option:

Theory
Conclusion
Hypothesis
Summary of the data

Question # 7 of 15 (Start time: 05:30:26 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 8 of 15 (Start time: 05:30:38 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 9 of 15 (Start time: 05:30:58 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ----------.
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Descriptive research
Explananory research
Exploratory research
All of the given options

Question # 10 of 15 (Start time: 05:31:18 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 11 of 15 (Start time: 05:31:35 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 12 of 15 (Start time: 05:31:44 AM) Total Marks: 1
What is the variable called that a researcher manipulates in an experiment?
Select correct option:

Dependent variable
Independent variable
Extraneous variable
None of the given options

Question # 13 of 15 (Start time: 05:32:11 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 14 of 15 (Start time: 05:32:22 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

To explain, predict, and/or control phenomena are the goal of----------
Select correct option:

Tradition
Inductive logic
Deductive logic
The scientific method

Question # 15 of 15 (Start time: 05:32:37 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 1 of 15 (Start time: 05:36:36 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 2 of 15 (Start time: 05:37:00 AM) Total Marks: 1
Which of the following provides a solid basis foundation for the theoretical framework?
Select correct option:

Survey
Literature Review
Experiment
Referencing

Question # 3 of 15 (Start time: 05:37:14 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Expert opinion

Question # 4 of 15 (Start time: 05:37:25 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 5 of 15 (Start time: 05:37:47 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 6 of 15 (Start time: 05:38:20 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 7 of 15 (Start time: 05:38:35 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 8 of 15 (Start time: 05:38:47 AM) Total Marks: 1
Why do you need to review the existing literature?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 9 of 15 (Start time: 05:39:04 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 10 of 15 (Start time: 05:39:22 AM) Total Marks: 1
The _____ is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable.
Select correct option:

Independent Variable
Dependent Variable
Experimental Method
Scientific Method

Question # 11 of 15 (Start time: 05:39:40 AM) Total Marks: 1
What is a cross-sectional research?
Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 12 of 15 (Start time: 05:39:53 AM) Total Marks: 1
Preliminary Data Collection may be considered as part of ----------.
Select correct option:

Descriptive research
Explananory research
Exploratory research

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

All of the given options

Question # 13 of 15 (Start time: 05:40:10 AM) Total Marks: 1
What is the final step of a scientific investigation?
Select correct option:

Analyze data
Collect data
Report the findings
Determine whether the hypothesis was supported

Question # 14 of 15 (Start time: 05:40:24 AM) Total Marks: 1
The study of research methods provides you with the knowledge and skills you need
Select correct option:

To solve the problem
To improve the decision-making process
To understand the research of others All of
the given options

Question # 15 of 15 (Start time: 05:40:47 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 1 of 15 (Start time: 05:44:23 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 2 of 15 (Start time: 05:44:36 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 3 of 15 (Start time: 05:45:02 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 4 of 15 (Start time: 05:45:25 AM) Total Marks: 1
An operational definition is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 5 of 15 (Start time: 05:45:42 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 6 of 15 (Start time: 05:45:55 AM) Total Marks: 1
A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?
Select correct option:

Integrative reviews
Theoretical reviews
Self-study reviews
Historical reviews

Question # 7 of 15 (Start time: 05:46:24 AM) Total Marks: 1
Ms. Roshi has been coordinating the Annual Festival at her school for the last several

Note: Solve these papers by yourself

www.vuaskari.com

years. She wants to be sure the students and parents enjoy the festival again this year. On which source is she LEAST likely to rely when making decisions about what to do?
Select correct option:

Tradition
Personal experience
Research
Expert opinion

Question # 8 of 15 (Start time: 05:46:37 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 9 of 15 (Start time: 05:46:51 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 10 of 15 (Start time: 05:47:15 AM) Total Marks: 1
Which of the following is NOT a characteristic of a good research topic?
Select correct option:

It is ethical.
It can be investigated through the collection and analysis of data. It
focuses on a philosophical or ethical issue.
It is theoretically or practically significant.

Question # 11 of 15 (Start time: 05:47:30 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Co-relational hypothesis

Question # 12 of 15 (Start time: 05:47:52 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 13 of 15 (Start time: 05:48:05 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 14 of 15 (Start time: 05:48:26 AM) Total Marks: 1
According to scientific method, which of the following is Not an empirical reality?
Select correct option:

Emotions
God's reward for good deeds
Satisfaction
None of the given options

Question # 15 of 15 (Start time: 05:48:59 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 1 of 15 (Start time: 05:52:17 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Health care
Business
Government offices
Imaginary worlds

Question # 2 of 15 (Start time: 05:52:37 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 3 of 15 (Start time: 05:53:19 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 4 of 15 (Start time: 05:53:30 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 5 of 15 (Start time: 05:54:03 AM) Total Marks: 1
Which of the following is most beneficial to read in an article?
Select correct option:

Methods
Introduction
Figures
References

Question # 6 of 15 (Start time: 05:54:17 AM) Total Marks: 1

Note: Solve these papers by yourself

www.vuaskari.com

The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 7 of 15 (Start time: 05:54:31 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 8 of 15 (Start time: 05:54:42 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.
Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 9 of 15 (Start time: 05:54:53 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 10 of 15 (Start time: 05:55:07 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition

Note: Solve these papers by yourself

www.vuaskari.com

All of the above

Question # 11 of 15 (Start time: 05:55:26 AM) Total Marks: 1
Which of the following is not a function of clearly identified research questions?
Select correct option:

They guide your literature search.
They keep you focused throughout the data collection period.
They make the scope of your research as wide as possible.
They are linked together to help you construct a coherent argument.

Question # 12 of 15 (Start time: 05:55:39 AM) Total Marks: 1
Which of the following is not a feature of theoretical framework?
Select correct option:

Making an inventory of variables
Specify the direction of relationship
Presenting findings
Making an inventory of propositions

Question # 13 of 15 (Start time: 05:55:54 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 14 of 15 (Start time: 05:56:12 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 15 of 15 (Start time: 05:56:33 AM) Total Marks: 1
What type of process research is?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 1 of 15 (Start time: 06:00:41 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 2 of 15 (Start time: 06:00:56 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 3 of 15 (Start time: 06:01:10 AM) Total Marks: 1
Theoretical framework is trying to develop a _____ model of our study.
Select correct option:

Functional
Conceptual
Operational
Practical

Question # 4 of 15 (Start time: 06:01:23 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 5 of 15 (Start time: 06:02:15 AM) Total Marks: 1
Under which of the following research method is not applicable?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 6 of 15 (Start time: 06:02:27 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 7 of 15 (Start time: 06:02:55 AM) Total Marks: 1
Why do you need to review the existing literature?
Select correct option:

To give your dissertation a proper academic appearance, with lots of references
Because without it, you could never reach the required word-count
To find out what is already known about your area of interest
To help in your general studying

Question # 8 of 15 (Start time: 06:03:07 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 9 of 15 (Start time: 06:03:23 AM) Total Marks: 1
Which of the following is included in research proposal?
Select correct option:

Data analysis
Results
Literature review

Note: Solve these papers by yourself

www.vuaskari.com

Conclusions section

Question # 10 of 15 (Start time: 06:03:49 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 11 of 15 (Start time: 06:04:04 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 12 of 15 (Start time: 06:04:21 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 13 of 15 (Start time: 06:04:33 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 14 of 15 (Start time: 06:04:46 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions
None of the given questions

Question # 15 of 15 (Start time: 06:04:59 AM) Total Marks: 1
"Skepticism" is a norm of science. It is better explained by which of the following statement?
Select correct option:

Combining the previous knowledge
Critical reading of the previous researches
Providing the proper references of qouted text
Locating research reports in libraries

Question # 1 of 15 (Start time: 06:14:33 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 2 of 15 (Start time: 06:14:42 AM) Total Marks: 1
In _____ definition, a concept is explained in terms of other concepts.
Select correct option:

Operational definition
Working definition
Theoretical definition
None of the given options

Question # 3 of 15 (Start time: 06:15:01 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Note: Solve these papers by yourself

Question # 4 of 15 (Start time: 06:15:19 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 5 of 15 (Start time: 06:15:29 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 6 of 15 (Start time: 06:15:43 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 7 of 15 (Start time: 06:15:59 AM) Total Marks: 1
A one tailed hypothesis predicts----------
Select correct option:

The future
The lottery result
The frequency of the effect
The direction of the effect

Question # 8 of 15 (Start time: 06:16:10 AM) Total Marks: 1
Research questions are crucial because they will:
Select correct option:

Guide your decisions about what data to collect and from where.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Help you decide which research area interests you.
Ensure that your findings have external validity.
Prevent you from thinking about research strategies.

Question # 9 of 15 (Start time: 06:16:23 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 06:16:34 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 11 of 15 (Start time: 06:16:47 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 12 of 15 (Start time: 06:16:57 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 13 of 15 (Start time: 06:17:08 AM) Total Marks: 1
Which one of the following is not an assumption of science?

www.vuaskari.com

Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 14 of 15 (Start time: 06:17:29 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 15 of 15 (Start time: 06:17:42 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 1 of 15 (Start time: 06:24:39 AM) Total Marks: 1
Null hypothesis states:
Select correct option:

Absence of relationship
Existence of relationship
The direction of relationship
Casual relationship

Question # 2 of 15 (Start time: 06:25:03 AM) Total Marks: 1
The purpose of a literature review is to:
Select correct option:

Help you find out what is already known about this area.
Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located.
Find what is already known, identify gaps demonstrate awareness.

Question # 3 of 15 (Start time: 06:25:24 AM) Total Marks: 1
Which of the following is the least appropriate research problem?
Select correct option:

Does studying Latin improve the standardized vocabulary test scores of seventh grade students?
Does drilling fifth grade students with multiplication facts improve their standardized test scores?
What is the relationship between students' math attitudes and math achievement?
Should students have access to controversial novels in school?

Question # 4 of 15 (Start time: 06:25:45 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 5 of 15 (Start time: 06:26:13 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 6 of 15 (Start time: 06:26:31 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 7 of 15 (Start time: 06:26:48 AM) Total Marks: 1
Rationalism is the application of:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 8 of 15 (Start time: 06:27:08 AM) Total Marks: 1
Basic and Applied Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 9 of 15 (Start time: 06:27:24 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 10 of 15 (Start time: 06:27:39 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 11 of 15 (Start time: 06:27:56 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 12 of 15 (Start time: 06:28:13 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 13 of 15 (Start time: 06:28:26 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 14 of 15 (Start time: 06:28:40 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 15 of 15 (Start time: 06:29:15 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 1 of 15 (Start time: 06:36:44 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Integrative review
Historical review

Question # 2 of 15 (Start time: 06:37:19 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 3 of 15 (Start time: 06:37:30 AM) Total Marks: 1
What is an hypothesis?
Select correct option:

A prediction of a relationship between certain variables.
An experiment that tests certain predictions.
An independent variable.
A dependent variable.

Question # 4 of 15 (Start time: 06:37:40 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 5 of 15 (Start time: 06:37:50 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 6 of 15 (Start time: 06:37:59 AM) Total Marks: 1
An operational definition is:
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
A definition of a concept in terms of specific, empirical measures.
One that refers to opera singers and their work.

Question # 7 of 15 (Start time: 06:38:17 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 8 of 15 (Start time: 06:38:28 AM) Total Marks: 1
What is the reason for consulting handbooks, yearbooks, encyclopedias, or reviews in the initial stages of identifying a research topic?
Select correct option:

They are readily available.
They provide an overview of the issues related to a topic.
They are primary sources.
They avoid reporting statistical data so one can interpret the results more easily.

Question # 9 of 15 (Start time: 06:38:38 AM) Total Marks: 1
Descriptive and Explanatory Research are the classifications of research on the basis of:
Select correct option:

Use of the research
Time dimension
Techniques used
Purpose of the research

Question # 10 of 15 (Start time: 06:39:02 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 11 of 15 (Start time: 06:39:14 AM) Total Marks: 1

www.vuaskari.com

The application of the scientific method to the study of business problems is called;
Select correct option:

Inductive reasoning
Deductive reasoning
Business research
Grounded theory

Question # 12 of 15 (Start time: 06:39:24 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 13 of 15 (Start time: 06:39:34 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 14 of 15 (Start time: 06:40:09 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 15 of 15 (Start time: 06:40:26 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

good writing
All of the given option

Question # 1 of 15 (Start time: 06:42:06 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 2 of 15 (Start time: 06:42:17 AM) Total Marks: 1
_____ meanings attached to a concept create problems of measurements.
Select correct option:

Unambiguous
Vague
Clear
Dictionary

Question # 3 of 15 (Start time: 06:42:28 AM) Total Marks: 1
Which of the following is the best hypothesis statement to address the research question, "What impact will the new advertising campaign have on use of Brand B?"
Select correct option:

The new advertising campaign will impact Brand B usage.
The new advertising campaign will increase Brand B trial.
The new advertising campaign will cause increased Brand B usage at the expense of Brand C.
The new advertising campaign will increase Brand B's market penetration.

Question # 4 of 15 (Start time: 06:42:37 AM) Total Marks: 1
What is a relationship between the literature survey and the theoretical framework?
Select correct option:

Provides a solid foundation for developing the latter
Literature survey helps in the identification of the relevant variables
The theoretical framework explains the theory underlying these relations
All of the gven options

Question # 5 of 15 (Start time: 06:42:49 AM) Total Marks: 1
What is a cross-sectional research?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

A study of one particular section of society
A comparison of two or more variables over a long period of time
The collection of data from more than one case at one moment in time
One that is conducted when environment is uncertain

Question # 6 of 15 (Start time: 06:43:06 AM) Total Marks: 1
A literature review requires;
Select correct option:

planning
clear writing
good writing
All of the given option

Question # 7 of 15 (Start time: 06:43:14 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition
All of the above

Question # 8 of 15 (Start time: 06:43:25 AM) Total Marks: 1
Which of the following can Not be a part of preliminary data collection?
Select correct option:

Review of literature
Focus group discussion
Making research question
Seek out the informants

Question # 9 of 15 (Start time: 06:43:40 AM) Total Marks: 1
The scientific method is preferred over other ways of knowing because it is more;
Select correct option:

Reliable
Systematic
Accurate
All of the given options

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Question # 10 of 15 (Start time: 06:43:55 AM) Total Marks: 1
A concept is a generalized idea about------ .
Select correct option:

A class of objects
Attributes
Occurrences
All of the given options

Question # 11 of 15 (Start time: 06:44:05 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 12 of 15 (Start time: 06:44:27 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 13 of 15 (Start time: 06:44:37 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 14 of 15 (Start time: 06:44:47 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

The free spirited variable
A confounding variable

Question # 15 of 15 (Start time: 06:44:59 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 1 of 15 (Start time: 06:24:20 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.
Analyze the collected information.
State the results of the data analysis.

Question # 2 of 15 (Start time: 06:24:37 AM) Total Marks: 1
Which one of the following is not an assumption of science?
Select correct option:

There are reoccurring patterns in the world.
Events happen because of preceding causes.
We can discover solutions to problems of interest.
Theoretical explanations must agree with common sense.

Question # 3 of 15 (Start time: 06:24:53 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 4 of 15 (Start time: 06:25:02 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Health care
Business
Government offices
Imaginary worlds

Question # 5 of 15 (Start time: 06:25:09 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 6 of 15 (Start time: 06:25:18 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 7 of 15 (Start time: 06:25:26 AM) Total Marks: 1
What is opposite of a variable?
Select correct option:

A constant
An extraneous variable
A dependent variable
A data set

Question # 8 of 15 (Start time: 06:25:33 AM) Total Marks: 1
Which of the following is a concept?
Select correct option:

Leadership.
Total Quality Management.
Human Resource Management.
All of the given options

Question # 9 of 15 (Start time: 06:25:39 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 10 of 15 (Start time: 06:25:46 AM) Total Marks: 1
In the statement 'an examination of the effects of discretionary behaviour on employee performance' employee performance is the:
Select correct option:

Independent variable
Dependent variable
Extraneous variable
Causal variable

Question # 11 of 15 (Start time: 06:26:03 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?
Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 12 of 15 (Start time: 06:26:10 AM) Total Marks: 1
What type of process research is?
Select correct option:

A process to discover the truth
A process to invent the machines
A process to make new medicines
A process to create theories

Question # 13 of 15 (Start time: 06:26:16 AM) Total Marks: 1
The facts that should be collected to measure a variable, depend upon the
Select correct option:

Conceptual understanding
Dictionary meaning
Operational definition

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

All of the above

Question # 14 of 15 (Start time: 06:26:33 AM) Total Marks: 1
According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
Select correct option:

Perceptions
Theory
Sensory experience
Logics and arguments

Question # 15 of 15 (Start time: 06:26:40 AM) Total Marks: 1
12. Which of the following true about the relationship between theory building and data collection?
Select correct option:

When studies come out as expected, inductive support for the theory is gained.
If an experiment fails, discarding the experiment is an example of affirming the consequent.
When a hypothesis is not supported, virtually nothing has been learned about the theory.
A good theory will be inclusive enough to explain every possible research outcome.

Question # 1 of 15 (Start time: 06:28:51 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 2 of 15 (Start time: 06:28:58 AM) Total Marks: 1
Which of following statement is true?
Select correct option:

Theory and Research are dichotomous
Theory and Research are interrelated
There is no difference between Theory and Research
None of the given statements is true

Question # 3 of 15 (Start time: 06:29:07 AM) Total Marks: 1
Which one of the following tasks is NOT accomplished by theoretical framework?

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Select correct option:

Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables.
Describe the nature, and direction of the relationships among the variables.
Relates the previous studies.

Question # 4 of 15 (Start time: 06:29:14 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age
Nationality
Test score
Income

Question # 5 of 15 (Start time: 06:29:21 AM) Total Marks: 1
The term "Extrapolation" is better explained by the statement:
Select correct option:

Facts lead to the rejection of theory
Identification of the gap in knowledge
Theory predicts facts
None of the given options

Question # 6 of 15 (Start time: 06:29:30 AM) Total Marks: 1
The operational definition is also known as
Select correct option:

Working definition
Nominal definition
Conceptual definition
Dictionary definition

Question # 7 of 15 (Start time: 06:29:36 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 8 of 15 (Start time: 06:29:43 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 9 of 15 (Start time: 06:29:59 AM) Total Marks: 1
Which of the following statements is true?
Select correct option:

All concepts are variables and all variables are concepts
All variables are concepts but all concepts are not variable
All concepts are variable but all variables are not concepts
None of the above

Question # 10 of 15 (Start time: 06:30:06 AM) Total Marks: 1
After you locate a source, you should write down all details of the reference, except;
Select correct option:

Full names of the authors
Titles
Volumes
Price

Question # 11 of 15 (Start time: 06:30:15 AM) Total Marks: 1
"The extensive use of chocolate causes pimples". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 12 of 15 (Start time: 06:30:22 AM) Total Marks: 1
Which of the following steps of the scientific method is exemplified by the researcher reviewing the literature and focusing on a specific problem that has yet to be resolved?
Select correct option:

Identify a topic.
Describe the procedures to collect information.

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Analyze the collected information.
State the results of the data analysis.

Question # 13 of 15 (Start time: 06:30:38 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 14 of 15 (Start time: 06:30:46 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 15 of 15 (Start time: 06:31:07 AM) Total Marks: 1
What is the basis of the Scientific Method?
Select correct option:

To test hypotheses in conditions that are condusive to its success.
To formulate a research problem and disprove the hypothesis.
To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis.
To test hypotheses and if they are disproved, they should be abandoned completely.

Question # 1 of 15 (Start time: 06:32:01 AM) Total Marks: 1
Which of the following should not be a consideration in writing a proposal?
Select correct option:

Understanding the problem situation
The appearance/form of the proposal
Responding to every element exactly as specified by the client
Knowing as much as possible about the proposal recipients

Question # 2 of 15 (Start time: 06:32:24 AM) Total Marks: 1
A literature review requires;

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

planning
clear writing
good writing
All of the given option

Question # 3 of 15 (Start time: 06:32:30 AM) Total Marks: 1
The independent variable is;
Select correct option:

The variable manipulated in order to observe its effects
The variable that is measured
The free spirited variable
A confounding variable

Question # 4 of 15 (Start time: 06:32:37 AM) Total Marks: 1
All of the following are true about theories, except;
Select correct option:

They organize and summarize existing knowledge about a topic.
They are tentative until the facts prove them true.
They provide possible explanations for the phenomenon under study.
They lead to testable hypotheses through the process of deduction.

Question # 5 of 15 (Start time: 06:32:44 AM) Total Marks: 1
A variable is:
Select correct option:

Any characteristic of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complete set of scores we use in statistical analysis
Completely specified only in observational research

Question # 6 of 15 (Start time: 06:32:50 AM) Total Marks: 1
Under which of the following research method is not applicable?
Select correct option:

Health care
Business
Government offices
Imaginary worlds

Question # 7 of 15 (Start time: 06:32:56 AM) Total Marks: 1

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 8 of 15 (Start time: 06:33:13 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 9 of 15 (Start time: 06:33:21 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 10 of 15 (Start time: 06:33:28 AM) Total Marks: 1
Which of the following is the BEST hypothesis?
Select correct option:

Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in a traditional class.
Students using laptops will do well.

Question # 11 of 15 (Start time: 06:33:34 AM) Total Marks: 1
Which of the following is a discrete variable?
Select correct option:

Age

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

Nationality
Test score
Income

Question # 12 of 15 (Start time: 06:33:41 AM) Total Marks: 1
The most difficult sources to locate are;
Select correct option:

Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

Question # 13 of 15 (Start time: 06:33:47 AM) Total Marks: 1
The most critical areas of an article to read is;
Select correct option:

Results section
Introduction
Abstract
Limitations

Question # 14 of 15 (Start time: 06:33:55 AM) Total Marks: 1
When we say that science is parsimonious, we mean that:
Select correct option:

Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law.
Science accurately describes a wide range of behavior.

Question # 15 of 15 (Start time: 06:34:02 AM) Total Marks: 1
Which one of the following creates problems of measurements of a concept?
Select correct option:

Unambiguous meanings
Vague meanings
Clear meanings
Dictionary meanings

Question # 1 of 15 (Start time: 06:40:44 AM) Total Marks: 1
A good qualitative problem statement:
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Defines the independent and dependent variables
Conveys a sense of emerging design
Specifies a research hypothesis to be tested
Specifies the relationship between variables that the researcher expects to find.

Question # 2 of 15 (Start time: 06:40:54 AM) Total Marks: 1
A Literature review that summarizes what is known at a point in time is known as:
Select correct option:

Narrative literature review
Systematic literature review
Integrative review
Historical review

Question # 3 of 15 (Start time: 06:41:01 AM) Total Marks: 1
If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?
Select correct option:

Basic
Applied
Evaluation
Grounded theory

Question # 4 of 15 (Start time: 06:41:11 AM) Total Marks: 1
The organization of concepts in sequence from the most concrete and individual to the most general indicates is:
Select correct option:

One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept.
The degree of abstraction
An operational definition

Question # 5 of 15 (Start time: 06:41:17 AM) Total Marks: 1
The elaboration of the variables in the theoretical framework addresses which type of qestions?
Select correct option:

Why we expect certain relationships to exist
How we expect certain relationships to exist
Both of the given questions

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content

None of the given questions

Question # 6 of 15 (Start time: 06:41:24 AM) Total Marks: 1
What research is?
Select correct option:

A lab experiment
A report
A systematic Enquiry
A procedure

Question # 7 of 15 (Start time: 06:41:30 AM) Total Marks: 1
Which of the following is Not included in the Introduction section of a Research proposal?
Select correct option:

Background of the study
Objectives
Sampling technique
Significance

Question # 8 of 15 (Start time: 06:41:38 AM) Total Marks: 1
"High productivity is positively associated with Job commitment". The given hypothesis is a (an):
Select correct option:

Descriptive hypothesis
Explanatory hypothesis
Non-Directional hypothesis
Co-relational hypothesis

Question # 9 of 15 (Start time: 06:41:44 AM) Total Marks: 1
Hypothesis refers to _____:
Select correct option:

The outcome of an experiment
A conclusion drawn from an experiment
A form of bias in which the subject tries to outguess the experimenter
A tentative statement about the relationship

Question # 10 of 15 (Start time: 06:41:50 AM) Total Marks: 1
Which of the following is Not a part of research design?
Select correct option:

Note: Solve these papers by yourself
This VU Group is not responsible for any solved content
www.vuaskari.com

www.vuaskari.com

Data collection technique
Tool of data collection
Objectives of the study
Data processing and analysis

Question # 11 of 15 (Start time: 06:41:57 AM) Total Marks: 1
Quantitative researcher's preoccupation with generalization is an attempt to:
Select correct option:

Develop the law like findings of the natural sciences.
Boost their chances of publication.
Enhance the internal validity of their research.
Demonstrate the complex techniques of statistical analysis.

Question # 12 of 15 (Start time: 06:42:04 AM) Total Marks: 1
Which of the following is not a concept?
Select correct option:

Leadership
Total Quality Management
Human Resource Management
IQ

Question # 13 of 15 (Start time: 06:42:11 AM) Total Marks: 1
Why, as scientists, do we not want to rely on authority for explanations?
Select correct option:

Those in authority are often wrong.
Those in authority cannot be challenged.
Those in authority rely too much on objective information.
Those in authority often have no common sense.

Question # 14 of 15 (Start time: 06:42:18 AM) Total Marks: 1
Rationalism is the application of:
Select correct option:

Research solution
Logic and arguments
Reasoning
Previous findings

Question # 15 of 15 (Start time: 06:42:25 AM) Total Marks: 1

STA 630 RESEARCH METHODS QUIZ NO 1

Which of the following is not a data collection method?_____
In stratified sampling, strata are:_____ Internally homogenous
All of the following are the instruction to record answers to open ended questions EXCEPT:_____
In cluster sampling, subgroups are:_____

A collection of related records is called _____.___ File
A researcher has taken random sample from the population divided on the basis of level of education, age and salary package. Which of the following sampling design he is using?_____
In random sampling, the probability of selecting an item from the population is_____
Which of the following can not be done through pilot testing?_____
Pilot study is_____.___ A small scale study
Sample is subset of_____ Population
Quantitative data is_____._____ Expressed in numerical form
If groups of participants are selected to represent sub-groups in the population (e.g. such as selecting an entire class of management students to be compared to a group of economics students), this is known as…_____
In which of the following sampling methods People are available such as volunteer or can be easily recruited?_____ Convenience sampling

A key objective of the search for literature is that the researcher:_____

1. All of the following options are the characteristics of good hypothesis, EXCEPT:____
2. The main purpose of _____ is to link theoretical and empirical elements of a research project._____ **Conceptual framework**
3. Job satisfaction, job performance, decision making, turnover and personal characteristics. All these variables are used to develop which of the following options?_ **Theoretical Framework**
4. Before a researcher specified the relationship among variables, he must have a (an):_____ _____**Arrangement of propositions**
5. _____ are simple statements that explain relationships among concepts. e.g., "Good students study hard" is a _____. Here word 'student' is a _____ that explain relationship with the concept of 'studying'.____
6. The value of research is equally important for which of the following options?_____
7. Which of the following databases are more relevant for management sciences research?_____
8. The “deterministic” characteristic of scientific research deals with ____ **The identification of causes**
9. It is important to plan and structure the literature review before_____ **Writing the literature review**
10. **_____ allows researchers to reach a large audience digitally.___ Electronic interactive media**
11. **If there are multiple pizza trucks in the area and each one has a different jingle, we would memorize it all and relate the jingle to its pizza truck. This is what _____ research precisely is, establishing an association between two variables, “jingle” and “distance of the truck” in this example.**
12. **If the problem statement is focused on how to augment knowledge sharing behavior of knowledge workers, the unit of analysis would be:_____**
13. **Studies conducted to establish cause-and-effect relationship using the samenatural environment are called:_____ Field experiments**
14. Number of questionnaires returned, divided by the total number of eligible people who were contacted in a survey refers to:_____ Response rate
15. **The purpose of _____ is to convince reviewers that the researcher is capable of conducting the proposed research project successfully.**
16. **Nestle launched a new product which may not be paying off as anticipated._____ will help managers to understand, predict and control an environment.**
17. **A reminder sent to respondents to send back the filled questionnaire is known as_____**
18. **A variable other than a predictor variable that could have an influence on the outcome variable is called:**

19. **A research study analyzing the impact of emotional intelligence on the problem solving skills of employees working in McDonald's Pakistan is a type of:**

20. **In Surveys researcher may choose to contact the respondents by____ All of the above**

21. **Which of the following is a research method for descriptive and causal research?_____**

22. **Unethical activities include_____ All of the above**

23.

24. Which of the following tasks are not accomplished by theoretical framework? **Relates the previous studies (Lesson10 page30)**

25. Debriefing involves **All of the given options** (Lesson14-page43)

26. All of the following are the purposes of descriptive research except: **The desire to know "why" (Lesson 3-page7)**

27. Which of the following is most helpful in defining research problem? **Theoretical framework**

28. A clear, precise, and succinct statement of the question or issue that is to be investigated with the goal of finding an answer or solution is called a **Problem statement (Lesson11-page34)**

29. How different theories address an issue comes under: **Theoretical review (Lesson8-page27)**

30. If one variable depends upon another variable is termed as: _____Dependent

31. Which of the following can be a reason to prefer research over making random decisions?

32. **Research helps to make informed decisions (Lesson1-page2)**

9. Which of the following best describe a concept?

a) **A key idea/ a key word**

Which of the following is the type of research that helps to find the magnitude of the issue as well as its solutions? a) Basic research _____ Applied research

10. Which of the following is NOT an unethical issue?

a) **Seek approval for research (Lesson13-page41)**

11. The application of the scientific method to the study of business problems is called

a) **Business research (Lesson11-page34)**

12. After you locate a source, you should write down all details of the reference, except;

a) **Price (Lesson9-page29)**

13. Descriptive and Explanatory Research are the classifications of research on the basis of:

a) **Purpose of the research (Lesson3-page6)**

14. Literature review helps the researchers to--------- the findings of the other people's research **All of the above (Lesson8-page26)**

15. Which of the following is/are the objectives of the literature review

a) **All of the above (Lesson8-page26)**

16. If a researcher is trying to explain the emerging phenomenon by identifying its causes, it is referred to as which of the following characteristics of scientific research? **Deterministic (Lesson2-page4)**

17. Which of the following is an example of abstract concept? **Racism (Lesson5-page16)**

18. A Literature review that summarizes what is known at a point in time; is known as: _____**Integrative review**

Which of the following is included in research proposal?

a) **Literature review (Lesson11-page34)**

19. Which of the following is not included in the introduction section of a research proposal?

a) **Sampling techniques (Lesson11-page35)**

20. Which of the following are the basic research methods of data collection except **Descriptive analysis (Lesson12-page37)**

21. Scientific research focuses on which of the following Objectivity

22. The introduction section of a research proposal contains information about **All of the above (Lesson11-page35)**

23. Which of the following is not an assumption of science? Events happen of preceding causes

24. Hypothesis refers to---------- **A tentative statement about the relationship**

25. The independent variable is; **The variable manipulated in order to observe its effects**

26. Abstract is ---------- **A short summary of a scholarly journal article**

27. ---------- allows the largest number of statistical techniques to be conducted Interval/ ratio

28. Theory is full of all of the following options, except: Guess (Lesson16-p50)

29. All of the following options describes the research except: A casual inquiry to seek required information to resolve problems

30. The process of converting abstract concept into measurable factors is called Operationalization (Lesson15-p48)

31. What does a good literature review look like? All of the given options (Lesson9-p29)

32. Which of the following variables may have some effects upon a dependent variable but yet is not an independent variable? Independent variable

33. Data collection techniques includes all excepts Observation (Lesson11-p35)

34. Descriptive research can be either Both Qualitative and Quantitative

35. While conducting a literature review, the researcher engages in An evaluation of the literature

36. Which of the following are considered the steps of the research process except Derivative analysis (Lesson12-p36)

37. Integrative review helps to Summarizes what is known at a point in time (Lesson8-p27)

38. The following journal article would be an example of. research; "The benefits of florescent lighting on production in a factory setting" a) Applied

39. Stipulation of logical relationship between any two variables means elect the correct option Formulation of a proposition (Lesson10-p31)

40. The scientific researcher operates at two levels: one is at the abstract level of concepts and other one is the--------- of variables. Empirical level (Lesson4-p12)

41. Every research project should begin with: select the correct option A statement of the research

42. Which of the following options can be a reason to conduct research? To generate theories

43. The "Verifiable" characteristic of scientific research deals with: The results' replication (Lessson2-p4)

44. A physiological reaction test was given to 100 participants. Instead of recording reaction time of every participant, the researcher choose to record their position as compare to other participants, i.e. the fastest participant was coded as 1 and the slowest as 100. This is an example of a/an---------- variable. Ordinal

45. Which of the following often focuses on generating new theories? Hypothesis method

46. Which of the following is not a source of Literature review? Experiment (Lesson9-p27)

47. A statement concerned with the logical relationship among |the concepts is called--------- Proposition (Lesson4-p13)

48. If a measure is consistent over multiple occasions, it has: Test-retest reliability

A literature review requires a/an; _____All of the given options

49. A study conducted by Nestle to find out the impact of organizational citizenship behavior on the performance of its employees is a study of which level Micro level

50. Identify the option that can be a disadvantage of cross-sectional research. It cannot capture the change process (Lesson3-p9)

51. Adoption of codes of behavior by a group of people is called Societal norms (Lesson13-p41)

52. An elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as: Exploratory Study (Lesson3-p6)

53. A good review of the literature increases a readers confidence in the researchers All of the above (Lesson8-p26)

54. Which of the following is a concept? All of the given options (Lesson4-p11)

55. Which of the following is not helpful in problem definition? **Hypothesis**

56. Methodological review helps to Point out how methodology varies by study (Lesson8-p27)

57. O Which of the following variables is undesirable because it adds error to an experiment? None of these

58. Which of the following is not included in research proposal? Results (Lesson11-p34)

59. What research is? A systematic Enquiry (Lesson1-p1)

60. A Research methods are applicable in all of the following domains EXCEPT Imaginary worlds (Lesson1-p1)

61. The split-half method is used as a test of Internal consistency of measures (Lesson58-p18)

62. Why do you need to review the existing literature? To find out what is already known about our area of interest

63. The selection of a method for data collection depends on which of the following factors All of the above (Lesson12-p37)

64. What is a hypothesis? A prediction of a relationship between certain variables (Lesson7-p22)

65. identify the option that explains a logical relationship among the concepts Propositions (Lesson4-p13)

66. O A research proposal is a document that presents a----------to the reviewers for evaluation Plan for a project (Lesson11-p34)

67. Which of the following activities is not included in debriefing? Obtaining informed consent (Lesson14-p43)

68. Which of the following is a type of applied research? Impact assessment research (Lesson3-p9)

69. Reviewers have more confidence about the successful completion of a project if the proposal is All of the above (Lesson11-p34)

70. Research process is usually treated as which involve several clearly defined steps Sequential (Lesson12-p36)

71. Self-study review helps to Increase the reader's confidence (Lesson8-p26)

72. The scientific method is preferred over other ways of knowing because t is more All of the given options

73. A researcher should practice which of the following guideline while conducting a research project? All of the given option (Lesson13-p42)

74. A research participant might get suffered from which of the following forms of herm during the research study? All of the above

75. A research study, in which the unit of analysis remains same at specific interval over a longer period of time s known Time series Study (Lesson3-p10)

76. The least powerful scale is ------- scale.Nominal (Lesson17-p53)

77. Research questions are crucial because they will Guide your decisions about what data to collect and from where

78. A framework that plans the action of research project is known as Research design (Lesson12-p37)

79. The details of a reference should include All of the above

80. A variable that modifies the original relationship between independent and dependent variable is known as Moderating variable (Lesson6-p20)

81. The total number of basic features that should be incorporated in a theoretical framework are_____6

82. A logical relationship between two or more variable, expresses in the form of a testable statement is known as Hypothesis (lesson7-p22)

83. In which way, a ratio scale measurement differs from an interval measurement? It implies the existence of an absolute zero value (Lesson17-p54)

84. A study conducted by Lever brothers to find out 'impact of job satisfaction on employees' performance Macro level

85. A researcher can develop a theoretical framework on the basis of ---------- More than one theory

86. Basic and applied research are the classifications of research on the basis of Use of research (Lesson3-p8)

87. What is ordinal data? Ranked data

88. Bias is defined as; The distortion of responses based on gender, ethnicity, race, or language

89. All of the following options describe the research EXCEPT: A casual inquiry to seek required information to resolve problems

90. All of the given options are helpful to develop conceptual definition, EXCEPT Look into the review of literature

91. Another name of dimensions is Theoretical framework

92. Problem statement is a ---------- statement of the question or issue that is to be investigated with the goal of finding an answer or solution All of the above (Lesson11-p34)

93. What can we determine if a test has good validity? It measures what it is supposed to measure (Lesson18-p55)

94. -------- scale only assigns numbers to objects to classify the objects according to the characteristic of interval Nominal (Lesson17-p53)

95. The most difficult sources to locate are Policy reports and presented papers (Lesson9-p28)

96. Citation is --------- A detail of a scholarly publication

97. Which of the following is not a technique to narrow down the broad problem area?

98. Which of the following research approaches is least concerned with the generalizability of finding? Qualitative approach

99. An interval scale contains---------- A fixed amount of difference categories

100. Which of the following approaches is usually used in quantitative research? Historical approach

101. A step-by-step process by which the research project is conducted and completed is known as The research process (Lesson12-p36)

102. Which of the following is likely to reduce the validity of a test? All of the given options

103. Which of the following is continuous variable? All of the given options

104. A literature review is built on the assumptions that Both A and B (Lesson8-p26)

105. Which of the following is at the highest level of abstraction? _____Theory

106. Scientific research is a collective effort of many researchers who Both A and B (Lesson8-p26)

107. Which of the following is not a feature of theoretical framework? Presenting finding (Lesson10-p31)

108. The first step in development of theoretical framework is To make an inventory of variables (Lesson10-p31)

109. A research that seeks to determines the answers to who, what and how comes under the domain of---------- research a) Descriptive (Lesson3-p7)

110. Identify the option that explains the idea that knowledge is verifiable by experience or observation a) Rationalism Empiricism (Lesson2-p3)

111. Which of following considered as a data collection technique? Experiment (Lesson11-p35)

112. ---------- is the example of concrete concept. Age (Lesson5-p6)

113. Rationalism is the application of: Logic and arguments (Lesson2-p5)

114. In conducting a literature review; the researcher: Find and read the relevant literature, then the writes a view of the literature

115. ---------- is a measure in which researcher combines several distinct indicator of a variable into a single score. Index (Lesson17-p53)

116. The research design section of the research proposal contain information about All of above (Lesson11-p35)

117. A researcher can organize a computerized search by All of above

118. ---------- is not a form of measurement validity Conductive validity

119. "Higher level of job satisfaction higher will be the employees, performance" which type of relationship the movement of variable determines? Positive relationship

120. Which of the following is the search strategy for locating literature review for a research project? All of the given option (Lesson9-p28)

121. One of the major hallmarks of scientific research is: Objectivity

122. Which of the following must be considered while considered while conducting a literature review for a research study? a) All of the given option

123. What is the basis of the scientific method? To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis

124. Set parameters to conduct literature review includes All of the above (Lesson9-p28)

125. --------- Variable takes infinite numbers of values. Continuous (Lesson6-p19)

126. Theoretical framework provides the logical base for developing Hypothesis (Lesson10-30)

127. Which of the following are considered as data collection techniques All of the above

128. Which of the following is the reason for deception? To protect the confidentiality of the sponsor

129. --------- is an example of concrete concept. Age (Lesson5-p16)

130. A reader can easily see and comprehend the theorized relationships through Schematic Diagram (Lesson10-p31)

131. There is no relationship between advertising and sales of product A given hypothesis is Null hypothesis (Lesson7-p23)

132. Another name of conceptual definition is Theoretical definition (Lesson15-p48)

133. Which of the following is true about a concept? All of the given options (Lesson4-p11)

134. The organization of concepts in sequence from the most concrete and individual to the most general The degree of abstraction (Lesson5-p16)

135. Which of the following types of processes, research falls in? Ans: A process to discover the truth

136. Which of the following best describes the ethics A process of reasoning that guides moral choices

137. It is the process of linking the conceptual definition to a specific set of measurement techniques or procedures Operationalization

138. is the purpose of explanatory research. Ans : The desire to know "why"

139. A statement concerned with the logical relationships among concepts is called _____. Ans : Proposition

140. The scientific researcher operates at two levels: on the abstract level of concepts and on the other one is the_____of variables Ans : Empirical level

141. The Research that is done to examine the findings of someone else by using the "same variables but with different respondents" comes under which of following _____. Ans : Replication

142. meanings attached to a concept create problems of measurement. Ans : Vague

143. Concepts represent various degree of _____ . Ans : Abstraction 7. What research is?

Ans : Systematic inquiry

8. Realities that are observable through sensory experiences are said to be: Ans : Empirical
9. What is Cross-Sectional research_____.

Ans: The collection of data from more than one case at one moment in time

10. An operational definition is _____.
Ans : A definition of a concept in terms of specific, empirical measures.
11. In _____we collect same type of information from different respondents in different times. Ans: Time series Research
12. In_____definition, a concept is explained in terms of other concepts. Ans: Theoretical
13. Research improves the decision-making process by following all important stages EXCEPT: _____.
Ans: Only relying on personal assumptions
14. Concepts, created and developed for conducting any research study, are:_____. Ans: The building blocks of theory
15. Logical Process in which we arrive at a reasoned conclusion by logical generalization of known facts is called.

Ans: Deduction

16. Which of following is a type of applied research? Ans: Impact Assessment Research
17. A research study, in which the unit of analysis remains same at specific intervals, over a longer period of time, is known as . Ans: Panel study
18. If a researcher was studying the use of various instructional approaches to the ……. Which type of research And: Applied
19. An Elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as
Ans: Exploratory study
20. Social research helps.

Ans: Improve Public health

21. Which of following best describes an Operational definition ? Ans: all of the give above
22. Which of following best describes a Concept? Ans: A key idea/ a key word
23. Which of following is true about a concept ? Ans: All of the given options
24. Every Research Project Should Begin with:
Ans: A Statement of the Research?
25. All of the following are the type of Applied Research EXCEPT: Ans: Formulative Research
26. The "Deterministic" Characteristic of Scientific research deals with: Ans: All of the given options
27. Operational definition is also Known as Ans: working definition
28. Which of following is a concept? Ans: All of the given options
29. A study conducted by Lever brothers to find out impact of job satisfaction on employees' performance is studied at: Ans: Micro Level
30. Which of the following is a procedure agreed upon for translation of a concept into measurement of some kind? Ans: Operational definition

31. The "Verifiable" characteristic of scientific research deals with: Ans: All of the given options
32. Which of the following statement is true? Ans: Theory and research are interrelated
33. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?
    Ans: Sensory experience
34. One of the major hallmarks of scientific research is Ans: Objectivity
35. All of the following are true about theories, except.
    Ans: They are tentative until the fact prove them true
37. Rationalism is the application of Ans: Logic and arguments
38. Which of following refers to abstract concept? Ans: Racism
39. The "Verifiable" characteristic of scientific research deals with all of the following EXCEPT Ans: The result interpretation
40. If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth; he is likely conducting.....type of research Ans: Evaluation Research
41. If a researcher is going to explore a new topic, he is conducting which of following research? Ans: Formulative
42. Which of following is at the highest level of abstraction? Ans: Theory
43. Descriptive Research can be either
    Ans : Both Quantitative and Qualitative
    44. The Organization of concept in sequence from the most concrete and individual to the most general indicates:
    Ans: the degree of abstraction
45. A Researcher is conducting study to find out the reasons why students are not cooperating with teacher is an example of Ans: Explanatory Study
46. What is the Basis of the Scientific Method?
    Ans: To formulate a Research Problem, test the hypotheses in carefully controlled conditions
47. Which of the following statement does best represent the purpose of research? Ans: All of the Given Options
48. To explain, predict and control phenomena are the goals of Ans: The Scientific Method
49. a theory is a coherent set of_____ used as principles of explanation of the apparent relationship of the certain observed phenomena Ans: propositions
50. The Scientific method is preferred over other ways of knowing it is more. Ans: All of the given options
51. Descriptive and Explanatory Are the classifications of research on the basis of Ans: Purpose of Research
52. Concept is
    Ans: Key idea about any object
53. Qualitative and Quantitative Research are the classification of the research on the basis of Ans: Techniques Used
54. The term "Extrapolation" is better explained by the statement Ans: Theory Predicts Facts
55. Which of the following is not a function of clearly identified research Questions? Ans: They make scope of your research as wide as possible?????
56. A study conducted by Pepsi To find out impact of salary On employees turnover is studied at what level? Ans: micro
57. Basic research can also be called as------- Ans: Fundamental Research
58. Research methods Are applicable to all of following domains Except
    Ans: Imaginary world

59. Which of the following statement is not true?
    Ans: A research proposal is an unorganized and unplanned project
60. A Concept is generalized idea about_____. Ans: All of the given options
61. According to scientific method, which of the following is Not an empirical reality? _____None of the given options
62. All of the following are the purposes of descriptive research EXCEPT Ans: The desire to know "why"

Team Tayyab
B.ed 2nd sem
Sta630 quiz 1

- After you locate a source ,you should write down all details of reference except price .
- The total number of basic features that should be incorporated in a theoretical framework are 6.
- Which of the following is the highest level of abstraction? Theory
- The research that refers to scientific study and helps to seek out solutions to practical problems is called Basic research.
- A study conducted when no information is available on how similar problems have been solved in the past is known as Exploratory research.
- A literature review requires ....All of these
- Which of the following focusses on generating new theories ? Hypothesis method
- Which of the following represents a good qualitative problem statement? Conveys a sense of emerging design
- Which of the following is not an assumption of science ? Events happen of preceding causes
- A study accessing whether men or women are more likely to be diagnosed with depression is example of
- ..... variable takes infinite number of values . Continuous
- The most critical areas of article to read are Abstract
- The study of research methods provides you with the knowledge and skills you need All of given
- Qualitative and Quantitative Research are classification of research on basis of Techniques used.
- The first step in development of theoretical framework is To make an inventory of variables
- What is the most basic skill required by any researcher?
- Job satisfaction , job performance , decision making , turnover and personal characteristics. These variables are used to develop which of the following option ? Theoretical framework
- A variable is Any characteristics of interest that can take on more than one value
- The purpose of ..... Review is concretely examined the corpus of theory that has accumulated regarding an issue , concept , theory and phenomenon. Historical Review
- If one variable causes change in value of another variable is termed as: dependent variable
- A bundle of meaning or characteristics associated with certain events .object and situation is called: Concept
-
-
- “There is no relationship between advertising and sales of products A” the given hypothesis is a (an):null hypothises
-
- ---------- represents abstraction of concepts along with explaining relationships among different concepts so that a particular phenomenon can be explained logically.
-
- All of the following are the purposes of Descriptive research Except:the desire to know why
-

----------reviews are focused on examining research throughout a period, often starting with the first time an issue, concept, theory, phenomenon emerged in the literature ,then tracing its evolution within the scholarship of a discipline.historical

-
- The most critical area of an article to read are:method of result sections
-
- ---------is abstract idea, underlying theme, or subject matter that one wishes to measure using survey questions. the context of survey research, a construct is
-
- --------is a statement about an excepted relationship between variables, or explanation of occurrence, that is clear, specific, testable and falsifiable. A research hypothesis (or scientific hypothesis)
- The research design section of a research proposal contains information about:all of above
-
- If one variable depends upon another variable is termed as:dependent variable

- --------is an example of concrete concept.age
- In the statement ‘an examination of the effects of discretionary behavior on employee performance’ employee performance is the:dependent variable
- Which of the following is observing at the empirical level?reality
- The total number of basics features should be incorporated in a theoretical framework are:6(lesson6-p20)
- A variable that modifies the original relationship between independent and dependent variable is known as :moderating variable
- The organization of concept is sequence from the most concrete and individual to most general indicate :the degree of abstraction
- ----------is a statement about an excepted relationship between variable, or explanation of an occurrence, that is clear, specific, testable and falsifiable.prediction
- The purpose of research in education field is which of the following option?
- The primary source of communication’s means among researchers is: scholarly journals
- .Every research project should begin with: select the correct optionA statement of the research
- If a researcher is going to explore a new topic, he is conducting which of following research?Formulative
- A variable that modifies the original relationship between independent and Dependent variable is known as: Moderating variable
- The research which is conducted at societal level is the type of _____research? Micro

The organization of concepts in sequence from the most concrete and individual to the Most general indicates is:An operational definition

The most difficult sources to locate are;Policy Reports and Presented Papers

- The facts that should be collected to measure a variable, depend upon the:all of above
- Identify the option that explains the idea that knowledge is verifiable by experience or observation.Empiricism
- .What is the most basic skill required by any researcher?
- If the researchers use findings to generate theories and models to understand human Behavior at Societal level which of the following levels as it related : micro level
- . The application of scientific method to the study of business problems is called:Businesses Research
- Is the purpose of Explanatory research. The desire to know “why,”
- The higher the motivation the higher the efficiency is an example of……..hypothesis:explanatory hypothesis
- The best method to narrow down a topic is to:Review literature
- Logical process in which we arrive at a reasoned conclusion by logical Generalization of known facts is called :Deduction
- A study conducted by Nestle to find out the impact of organizational Citizenship behavior on the performance of its employees is a study of Which level:Micro level
- Which of the following is a concept?All of the given options
- To explain, predict and control phenomena are the goals of: The Scientific Method
- A study conducted when no information is available on how similar problems have been solved in the past is known as Exploratory research.
- ____ is the abstract idea, underlying theme or subject matter that one wishes to measure using survey questions. Variable
- Methodological review helps to_____ point out how methodology varies by study
- ____ meanings attached to a concept create problems of measurements. Vague
- The “verifiable” characteristic of scientific research deals with all of the following except. The results' interpretation
- A ____ hypothesis is a statement that describes a relationship between two variables in which one variable leads to a specified effect on the other variable. Casual

- The unemployment among arts students is high is an example of which type of hypothesis.
- _____compares how different theories address an issue and ____ points out how methodology varies by study. Theoretical review, Methodological review
- How the researcher decides to measure the study variables is called. Operational definition
- _____ variables (or operationalizing definitions) refer to how you will define and measure a specific variable as it is used in your duty. Operational
- Which of the following is also referred to as working definition. Operational definition
- Integrative review helps to Summarizes what is known at a point on time
- The process of reasoning from one or more statements to reach a logical conclusion is called. Deductive logic
- If one variable depends upon another variable is termed as dependent
- The introduction section of a research proposal contains information about all of the following except Design of the study
- Which of the following options is used to find out the literature All
- ____ explain the logical relationship among the concepts preposition

A variable is any characteristic of interest that can take on more than one value

Which of the following is an example of abstract concept Racism

A researcher conducting study to find out the reasons why students are not cooperating with teacher is an example of EXPLANATORY STUDY

- Which one of the following is not an assumption of science. EVENTS HAPPEN BECAUSE OF PRECEDING CAUSES
- Unilever launched a new product line but the revenues are not increasing the company will undergo _____ that help managers to understand, predict and control an environment.

A Scientific process. B) Solution to a problem. C) Research. D)scientific evaluation

- An operational definition is_____. A DEFINITION OF CONCEPTS IN TERMS OF SPECIFIC, EMPIRICAL MEASURES
- All of the following options are the part of research proposal, EXCEPT: A) introduction. B) Methodology. c) discussion d) research design
- If the findings of research conducted by Samsung in Pakistan holds true in India also, the concepts come under which of the following option? A) Statistical generalizability. B) Rationalism concept. C) Ethical concept. D) statistical concept
- Which of the following is NOT a purpose of a literature review? HELP YOU IN DEVELOPING THEORETICAL FRAMEWORK
- According to scientific method, which of the following is not an empirical reality? GOD'S REWARD FOR GOOD DEEDS
- To measure the impact of customer satisfaction on customer loyalty is an example of which of the following option? A) Exploratory research. B) Descriptive research c) explanatory research. D) none
- The group of people with same characteristics is called? A) sample b)people c) respondent d) individual
- All of the following options describe the research EXCEPT: A CASUAL INQUIRY TO SEEK REQUIRED INFORMATION TO RESOLVE PROBLEMS
- To explain, predict, and control phenomena are the goals of: THE SCIENTIFIC METHOD
- Which of the following is not a technique to narrow down the broad problem area? DECIDE ABOUT THE SAMPLE
- _____ Reviews may also combine data from the theoretical as well as empirical literature to summarize to what is known at a point in time. A) Historical b) theoretical. C) Methodological. D) integrative
- If there is no theory yet, you cannot conduct _____ research. DEDUCTIVE RESEARCH
- Level of job commitment of the officers is positively associated with their level of efficiency is an example of which type of hypothesis? CO_RELATIONAL HYPOTHESIS
- Descriptive research can be either : BOTH QUALITATIVE AND QUANTITATIVE
- Concepts, created and developed for conducting any research study, are: BUILDING BLOCKS OF THEORY
- 1.Alternative hypothesis of research is also called. Null hypothesis.
-
- 2. Raising gas prices causes an increase in the number of people who carpool to work is an example of which type of hypothesis. Rational hypothesis
-

- 3._____ is the theory that all knowledge is based on experience derived from the senses. Empiricism.
-

4. An increase in student intelligence causes an increase in their academic activities is an example of. Concept

- 5. Which of the following databases are more relevant for management sciences research:
-
- 6. A literature review that summarizes what is known at a point in time ; is known as.integrative review
-
- 7. An operational definition is: definition of a concept in terms of specific,empirical measures.
-
-
- 8. The research design section of a research proposal contains information about:All of above
-
- 9. Age income, and number of siblings are an example of:facts.
-
- 10.Which of the following is included in research proposal?literature review
-
- 11. Conceptual framework helps to postulate which of the following options?hypothesis
-
- 12. All of the following are abstract concepts EXCEPT:age
-
- 13. A research proposal is a document that presents a ---------- viewers for evaluation:plan for a project
-
- 14. Which of the following is NOT a method of narrowing a topic?pilot testing
-
- 15. _____ explain the logical relationship among the concepts?proposition
-
- 16. When a researcher locate a source of literature than he / she must:add author name and year in text and full information in references.
-
- 17. This is no relationship between job satisfaction and the employees turnover rate is an example of which of the following hypothesis:Null hypothesis.
-
- 18. The higher the motivation, the higher the efficiency is example of -------- hypothesis. Explanatory hypothesis
-
- 19. Reviewers have more confidence about the successful completion of a project if the proposal is:All of above.
-
- 20. A theory is a coherent set of ---------- used as principals of the apparent relationship of certain. Proposition
- Those who try to test the theory in an attempt to be definite and positive their findings refer to which of the following option.

ositivists

Citation is……..

- A detail of scholarly publication's location
- The value of research is equally important for which of the following option.
- All of given otion
- The term extrapolation is better explained by the statement.
- Theory of predicts facts
- Variable with two possible values is called.
- Continuous variable
- A researcher can organized a computerized search by.
- Article
- Realities observed through sensory experience are said to be

- Empirical
- When the researcher is concerned with findings out how what why when then the study is called
- all of the given option
- The prose of ……is to convince reviewers that the researcher is cable of conducting the rosed research project successfully.
- Literature review
- Which of the following is considered while conducting while a literature review for a research study
- ALL of the given option
- Which of the following is not a technique to narrow down the board problem
- All of the given option
- Which of the following is an example of concept?
-
-
- Moderating variables can either be.
- None of the given option
- A study conduct by Nestles to find out the imect of organization citizenship behavior on performances of its employees is a study which of the following levels.
-
- All of the following types of alied research EXCET
-
- Formulative research
- The search design section of research proposal contains information about all of following except.
- Result and discussion
- Descriptive and explanatory research are the classification of research on the basses of
- Urose of the research
- Conduct, created and developed for conducting any research are
- The bulding blocks of theory
- Scientific research focuses on which of the following
-

An increase in student intelligence causes an increase in the are academic achievement is an example CONCET

-----Variables can take on almost any numeric value and can be meaningfully divided into smaller increments, including fraction and decimal values. You often measure a continuous variable on a scale. For example, when you measure height, weight and temperature, you have continuous data.

- Continuous
- 2.What does a good literature review look like?
- All of the given option
- 3.If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth, he is likely conducting which type of applied research?
- Impact Assessment Research
- Evaluation research
- 4. Which of the following is not a function of clearly identified research questions?
- They make the scope of your research as wide as possible
- 5.A logical relationship between two or more variables, expressed in the form of a testable statement is known as:
- Hypothesis
- 6. The ‘verifiable’ characteristic of scientific research deals with all of the following EXCEPT:
- The results’ interpretation
- 7. A variable with two possible values is called:
- Discontinuous variables
- 8. The purpose of reviewing existing literature is:
- To find out what is already known about your area of interest
- 9.What is cross-sectional research?
- The collection of data from more than one case at one moment in time
- 10. A-------hypothesis is a statement about the existence, size, form or distribution of a variable.
- Descriptive

- 11.The purpose of reviewing existing literature is:
- To find out what is already known about your area of interest
- 12. Which of the following options is the most efficient method to find relevant journals?
- Searching using tertiary sources
- 13. The research which is conducted at societal level is the type of------research.
- Macro
- 14. A bundle of meaning or characteristics associated with certain events, objects and situations is called:
- Concept
- 15. What does a researcher mean by the term 'empirical'?
- Knowledge which is verifiable by experience or observation
- 16. The research that refers to scientific study and helps to seek out solutions to a practical problem is called:
- Applied research
- 17. Identify the term which is referred to as the 'scope of applicability of the research findings in one organizational setting to other settings with the help of statistics?
- Statistical generalization

18. according to scientific method, which of the following is not an empirical reality?
God's reward for good deeds
19. Literature review helps the researchers to--------- the findings of the other people's research All of the above
1)The research which is conducted at societal level is the type of ---------- research.●Macro
· 2)A literature review requires a/an;●All of the given options
· 3)The "Verifiable characteristic of scientific research deals with all of the following EXCEPT:● The results' confirmation/refutation · 4)The primary objective of research proposal is to:
· ●Discuss research effort of others
· ●Present management few questions to be research
· ●Generate monetory sources for the organization
· ●All of the given options
- 5)Alternate hypothesis of research is also called:
· ●Null hypothesis
· 6)Basic and applied research are the classification of research on the basis:●Use of the research
- 7)It is a methodology used to specific, practical issue affecting an individual or a group:
· ●Basic Resarch
· ●Applied Resarch
· ●Informal Resarch
· ●Instrumental Resarch
- 8)The independent variable is:
· ●The variable manipulated in order to observe its effects
- 9)A ---------- ia an important term that is likely to be found in title;Keyword
· 10)The details of a reference should include●All of the above
- 11)It is a variable that has distinct, dicrete values but no precise numericals flow. For example gender can be thought of as a discontinous variable with two possible values. male or female.What is it?
· ●Discrete variable
· ●Normal variable
· ●Continous variable
· ●None of the above
- 12)----------variables takes infinite number of values. Continous
· 13)The reserach design section of a reserach proposal contains the information of all following EXCEPT;●Results and discussion
- 14)Research proposal is also known as ;
· ●Research plan
· ●Work plan
· ●Outline

· ●All of the given options

· 15)Which of the following is NOT a source of literature review?●Experiment

· 16)Citation is;●A detail of scholarly publication's of location

· 17)The value of reserach is equally important for which of the following options;●All of the given options

1_ Theories are supposed to be ____ and they could be applicable to different situations. (Generic)

2_ Which of the following is NOT a purpose of a literature review. (Helps you in getting response from the respondents)

3_ Literature review must be searched with the help of (sample)

• 4_ Which of the following is a continuous variable (all)

• 5_ How the researcher decides to measure the study variables is called (operational definition)

• 6_ _____ traces the development of an issue over time. (Historical review)

• 7_ A good review of the literature increases a reader's confidence in the researcher's (All)

• 8_ Which of the following refers to the abstract concept (racism)

• 9_ A literature review that summarizes what is known at a point in time; is known as: (Integrative review)

• 10_ Methodological reviews helps to: (point out how Methodology varies by study)

• 11_ A research study in which the unit of analysis remains same at specific interval, over a longer period of time is known as: (none of above)

• 12_ An increase in student intelligence causes an increase in their academic achievement is an example of

• 13_ A one tailed hypothesis predicts (the direction of the effect)

• 14_ All of the following options are the characteristics of good hypothesis, EXCEPT (indistinct)

• 15_ A variable that modifies the original relationship between Independent and dependent variable (intervening variable)

• 16_ A research study will be considered original if it is:

• 17_ Which type of review tells the reader how a project fits into the big picture and its implications for a Field of knowledge: (context review)

• 18_ Concepts created and developed for conducting any research study are: (relevant through the Methodological framework)

• 19_ Scientific research focuses on which of the following: (objectivity)

• The research that refers to scientific study and helps to seek out solutions to a practical problem is called? applied research,

• _____ is the philosophical stance according to which the senses are the ultimate source of human knowledge. Empiricism.

• _____ refers to an idea that concepts experienced are measurable. empiricism

• Moderating variables can either be: both categorical and Continuous

• The literature review that the researcher writes becomes the: theoretical framework for research project

• How different theories address an issue comes under: theoretical review

• Hypothesis are also called : testable proposition

• A _____ hypothesis is a statement that describes a relationship between two variables in which one variable leads to specified effect on the other variable. causal

• What does a good literature review look like? : all the given option

• The purpose of reviewing existing literature is : to find out what is already known about your area of interest

• Which of the following is not included in research proposal? results

• The independent variable is: the variable manipulated in order to observe its effects

Which of the following is the type of research that helps to find the magnitude of the issue as well as its solution? Applied research

An elementary or basic form of research in which little is known about the situation and previous theories or ideas do not apply is known as: exploratory study

Population and sample of the study is the part of which of following option? Research design

• Identify the term which is reffered as the scope of applicability of the research finding in one organized setting to other setting with the help of statics? statistical generalization

• MCQS

• 1• The higher the motivation, the higher the efficiency is an example of Explanatory hypothesis.

- 2• which of the following options is the most efficient method to find relevant journals browsing the internet.
- 3• Abstract is A short summery of a scholarly journal article.
- 4• The group of people with the same characteristics is called sample.
- 5• If one variable depends upon another variable is termed as dependent.
- 6• Which of the following can be a reason to prefer research over making random decisions Research helps to make informed decisions .
- 7• The problem definition/ statement could pertain to which of the following current problems of organization.
- 8• A key objective of the research for literature is that the researchers develop an awareness of all of the Literature relevant to the study.
- 9• Research questions are crucial because they will Guide your decisions about what data to collect and from where
- 10• The independent variable is the variable manipulated in order to observe its fact
- 11• The introduction section of a research proposal contains information about all of the following except design of the study.
- 12• The main purpose of…… … … .. is to link theoretical and empirical elements of a research project literature review.
- 13• Which of the following is/are the objectives of the literature review all of the above.
- 14• Theories are supposed to be … … … … … … and they could be applicable to different situations generic.
- 15• Which of the following is not a purpose of a literature review help you in getting response from respondents.
- 16• Literature review must be searched with the help of articles.
- 17• Which of the following is a continuous variable all of the above options
- 1..... Represent abstraction of concepts along with explaining relationships among different concepts so that a particular phenomena can be explained logically.
- 2.The primary objective of research purposal is to .....discuss research efforts to others
- 3.The purpose of research in education field is which of the following option.....help to become a distinct educationist
- 4. ..... is a statement about an excepted relationship between variables or explanation of an occurnace that is clear , specifical, testable and verifiable hypothesis
- 5. ..... is the philosophical stance according to which the senses are the ultimate source of human knowledge Empiricism
- 6. To measure the impact of customer satisfaction on customer loyalty is an example of which of the following option?

7. The "deterministic" characteristics of scientific deals with: the identification of causes

- 8. If one variable causes change in another variable is termed as independent variable
- 9. The operational definition is known as ....working definition
- 10.the education system of Pakistan is not oriented to the human resource need of the country is a example of which type of hypothesis.
- 11. What does a researcher mean by empirical? Observation through sensory experiences
- 12. A literature review that summarizes what is known at a point in a time ..... Integrative review
- 13. Is is important to plan and structure the literature review before:
- 14. The value of research is equally important for which of the following option:
- Policy makers , business managers, stakeholders , all of above options
- 15. A ..... hypothesis is a statement describes relationship between two variables in which one variable leads to a specified effect on the other variable .....
- 16. The research which is conducted at a societal level is a type of macro research
- 17. Image and concepts used to illustrate how language and reasoning evolves from concrete to abstract is known as
- 18. If a research is going to explore a new topic, he is conducting which of the following Research? Expolrarty research
- 19. ..... stands in contrast to rationalism and does consider the reasons as the ultimate source of knowledge based on senses. Empiricism
- 20. Logical process in which we arrive at a reasoned conclusion by logically generalization is known as facts is called ....

1. What is opposite of a variable?

c. A constant

2. What does a researcher mean by the term “empirical”?
   d. Knowledge which is verifiable by experience or observation

3. _____ explain the logical relationship among the concepts:

   b. Propositions (Lesson no 4 Page no 26 Handouts)

4. The literature review that the researcher writes becomes the:

   a. Theoretical framework for the research project. (Lesson no 10 Page no 43 Handouts)

5. Why do you need to review the existing literature?
   (Lesson no 8 Page no 39 Handouts)

   a. To find out what is already known about our area of interest

7. The primary source of communication's means among researchers is
   (Lesson no 9 Page no 41 Handouts)

   a. Scholarly Journals

8. Rationalism is the application of: **(Lesson no 2 Page no 17 Handouts)**

   b. Logic and arguments

9. The scientific method is preferred over other ways of knowing because it is more; **(Lesson no 2 Page no 15 Handouts)**

   a. All of the given options

10. An operational definition is:

    a. A definition of a concept in terms of specific, empirical measures.

10. The "Verifiable" characteristic of scientific research deals with:

    a. The results' replication (Lesson no 2 Page no 15 Handouts)

12. Which of following statement is true?

    a. Theory and Research are interrelated

13. The independent variable is;

    a. The variable manipulated in order to observe its effects

14. Which of the following best describes an operational definition?

    a. All of the given options (Lesson no 5 Page no 31 Handouts)

15. A study conducted by Pepsi to find out “Impact of salary on employees’ turnover” is studied at what level

    a. Micro level (Google)

16. What is the most basic skill required by any researcher? **(Doubtful)**

b. The ability to generate ideas for research projects

17. Concepts represents various degree of _____
(Lesson no 4 Page no 25 Handouts)

b. Abstraction (Google)

18. Identify the option that explains the idea that knowledge is verifiable by experience or observation.

d. Empiricism (Lesson no 2 Page no 20 Handouts)

19. _____ is an abstraction formed by generalizations about a class of objects, attributes, or occurrences.

b. Concept (Lesson no 4 Page no 25 Handouts)

20. Which of the following is a procedure agreed upon for translation of a concept into measurement of some kind?
(Lesson no 5 Page no 31 Handouts)

a. Operational definition (Google)

21. A _____ is an important term that is likely to be found in the title.

b. Keyword (Lesson no 9 Page no 45 Handouts)

22. Concept is:

a. Key idea about any object

23. Which of the following is the search strategy for locating literature review for a research project?

a. All of the given option (Lesson no 9 Page no 30)

24. Which of the following is a concept?

d. All of the given options

25. Plagiarism can be best described as: **Lesson 9 PPT**
a. Crediting the other person's work as your own

26. Literature review helps the researchers to--------- the findings of the other people's research

d. All of the above (Lesson no 8 Page no 39)

The operational definition is also known as _____**Working definition**

28. While conducting a literature review, the researcher engages in

c. An evaluation of the literature

29. In conducting a literature review; the researcher:

a. Find and read the relevant literature, then the writes a review of the literature

31. To explain, predict and control phenomena are the goals of

d. The scientific method

33. Historical review helps to

a. Traces the development of an issue over time (Lesson no 8 Page no 44 Handouts)

34. A variable that modifies the original relationship between independent and dependent variable is known as:

c. Moderating variable (Lesson no 6 Page no 33 Handouts)

35. A concept is a generalized idea about _____.

a. All of the given options. (Lesson no 5 Page no 29 Handouts)

36. A logical relationship between two or more variable, expressed in the form of a testable statement is known as

a. Hypothesis (Lesson no 7 Page no 35 Handouts)

37. If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth; he is likely conducting which type of applied research?

b. Impact Assessment Research

38. _____ is the purpose of Explanatory research.

a. The desire to know "Why" (Lesson no 3 Page no 22 Handouts)

39. Identify the option that explains that scientific research operates at the abstract level. **(Lesson no 4, page 24)**

d. Construct

40. The following journal article would be an example of_____ research; "The benefits of florescent lighting on production in a factory setting."

a. Applied

41. If one variable causes change in value of another variable is termed as:

d. Independent

43. “Skepticism” is a norm of science. It is better explained by which of the following statement?

b. Critical reading of the previous researches

44. Which of the following provides a solid basis foundation for the theoretical framework?

b. Literature Review

46. What is a cross-sectional research?

c. The collection of data from more than one case at one moment in time.

47. “High productivity is positively associated with Job commitment”. The given hypothesis is a (an):

d. Co-relational hypothesis

48. In _____ definition, a concept is explained in terms of other concepts. **(Doubtful)**

a. Theoretical

49. Which of the following statements does best represent the purpose of Research?

d. An application of scientific methods to information collection and analysis

50. All of the following are true about theories, except;

b. They are tentative until the facts prove them true.

51. Research that is done to examine the findings of someone else using the "same variables but different respondents" is which of the following?

b. Replication

52. _____ meanings attached to a concept create problems of measurements.

a. Vague (Lesson no 5 Page no 34 Handouts)

53. A study conducted by Lever brothers to find out ‘impact of job satisfaction on employees’ performance is studied at:

a. Micro level

54. A statement concerned with the logical relationship among |the

concepts is called----------

c. Proposition (Lesson no 4 Page no 26)

55. All of the following are the type of Applied Research EXCEPT: **(Lesson no 3 Page no 21)**

a. Formulative Research

56. What is the basis of the Scientific Method?

c. **To formulate a research problem, test the hypothesis in carefully controlled conditions that challenge the hypothesis**.

57. A research study, in which the unit of analysis remains same at specific interval over a longer period of time s known

a. Time series Study (Lesson no 3 Page no 22)
b

58. Which of following best describes a Concept?

a. A key idea/ a key word

59. According to scientific method, which of the following is Not an empirical reality?

b. God's reward for good deeds

60. In _____ we collect same type of information from different respondents in different times. **(Lesson no 3 Page no 22)**

b. Time series Research

61. Dichotomous variables are also known as _____. **(Google)**

a. Nominal variables

62**.** The study of research methods provides you with the knowledge and skills you need:

d. All of the given options (Lesson no 1 Page no 14 Handouts)

63. In the statement 'an examination of the effects of discretionary behavior on employee performance' employee performance is the: **(Doubtful)**

b. Dependent variable

64. Relational hypothesis can be; **(Lesson no 7 Page no 35 Handouts)**

a. All of the given (Lesson no 7 Page no 39 Handouts)

65. Abstract is _____ **(Lesson no 9 Page no 41 Handouts)**

c. A short summary of a scholarly journal article

66. In which of the given research design, same people or group are observed across various time periods? **(Lesson no 3 Page no 22)**

a. Panel study

67. Which of the following is a type of applied research?

b. Impact assessment research (Lesson no 3 Page no 21)

68. One of the major hallmarks of scientific research is:
(Lesson no 2 Page no 5)

a. Objectivity

69. Which of the following refers to the abstract concept?

d. Racism (Lesson no 5 Page no 33 Handouts)

71. Logical process in which we arrive at a reasoned conclusion by logical generalization of known facts is called

a. Inductive (Lesson no 2 Page no 17 Handouts)

72. Concepts, created and developed for conducting any research study, are: **(Lesson no 4Page no 25 Handouts)**

a. The building blocks of theory

73. Research methods are applicable in all of the following domains EXCEPT

d. Imaginary worlds (Lesson no 1 Page no 1)

74. What research is?

c. A systematic Enquiry (Lesson no 1 Page no 1)

75. The organization of concepts in sequence from the most concrete and individual to the most general indicates is:

c. The degree of abstraction (Lesson no 5 Page no 29 Handouts)

76. A theory is a coherent set of used _____ as principles of explanation of the apparent relationship of the certain observed phenomena.

b. Propositions (Lesson no 4 Page no 27 Handouts)

77. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

c. Sensory experience

78. A literature review is built on the assumptions that

c. Both a and b (Lesson no 8 Page no 26)

79. A good review of the literature increases a readers confidence in the researchers

d. All of the above (Lesson no 8 Page no 43 Handouts)

80. Which of the following must be considered while conducting a literature review for a research study?

a. All of the given option

81. If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research?

b. Applied

82. Which of the following can be the best possible reason for using a scientific method to make a decision? **Page 13**

a. It provides systematic inquiry into the matter

83. The facts that should be collected to measure a variable, depend upon the **(Doubtful)**

c. Operational definition

84. What is a hypothesis?

a. A prediction of a relationship between certain variables

(Lesson7 Page no 22)

85. Which of the following is the type of research that helps to find the magnitude of the issue as well as its solutions?

d. Applied research (Lesson no 1 Page no 2)

86. How different theories address an issue comes under:
d. Theoretical review (Lesson no 8 Page no 44 Handouts)

87. A _____ hypothesis is a statement about the existence, size, form, or distribution of a variable.

a. Descriptive (Lesson no 7 Page no 39 Handouts)

88. The purpose of reviewing existing literature is:
(Lesson no 8 Page no 39 Handouts)
a. To find out what is already known about your area of interest

A _____ hypothesis is a statement that describes a relationship between two variables in which one varia leads to a specified effect on the other variable. _____**Causal**

90. Moderating variables can either be: **(Google)**
c. Both categorical and continuous

91. _____ refers to an idea that concepts experienced are measurable.

d. Empiricism

92. What does a good literature review look like?

d. All of the given options (Lesson no 9 Page no 29)

93. Hypothesis is also called:

a. Testable proposition

94. A variable with two possible values is called:
(Lesson no 6 Page no 32 Handouts)

b. Discontinuous variable

95. Which of the following options is the most efficient method to find relevant journals?

a. Searching using tertiary sources (Google)

96. Which of the following is not a function of clearly identified research questions?

a. They make the scope of your research as wide as possible.

97. _____ variables can take on almost any numeric value and can be meaningfully divided into smaller increments, including fractional and decimal values. You often measure a continuous variable on a scale. For example, when you measure height, weight, and temperature, you have continuous data.
(Lesson no 6 Page no 32 Handouts)

b. Continuous

98. An elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as:

c. Exploratory Study (Lesson no 3 Page 18)

99. A bundle or characteristic associated with certain events, objects and situations is called: **(Lesson no 4 Page no 25 Handouts)**

a. Concept

100. _____ is the philosophical stance according to which the senses are the ultimate source of human knowledge.

a. Empiricism

101. Population and sample of the study is the part of which of the following options?

a. Research Design

102. Which of the following is Not included in research proposal?

c. Results

103. Identify the term which is referred to as the ‘scope of applicability of the research findings in one organized setting to other settings with the help of statistic’?

d. Statistical generalization

104. The research which is conducted at societal level is the type _____ research.

b. Macro

105. The research that refers to scientific study and helps to seek out solutions to a practical problem is called:
(Lesson no 3 Page no 20 Handouts)

c. Applied research

106. The more successful new product in the market the higher will be the stock market price. Here success of new product is _____ and stock market price is _____.

a. Independent, dependent (Lesson on 6 Page no 37 Handouts)

107. Hypothesis refers to **(Lesson on 11 Page no 46 Handouts)**

d. A tentative statement about the relationship

108. Which of the following options is an example of concept?
(Lesson on 4 Page no 25 Handouts)
d. All of the given options

109. A clear, precise, and succinct statement of the question or issue that is to be investigated with the goal of finding an answer or solution is called

b. Problem statement (Lesson no 11 Page no 47)

110. The scientific researcher operates at two levels: one is at the abstract level of concepts and other one is the--------- of variables.

d. Empirical level (Lesson no 4 Page no 12)

111 Which of the following is NOT a purpose of a literature review?
a) Helps you in getting response from the respondents

112 A research study in which the unit of analysis remains same at specific interval, over a longer period of time, is known as
a) Time series Study – page 22

113 Which of the following is an example of abstract concept?
a) Racism pg 29

114 One of the major hallmarks of scientific research is:
a) Objectivity pg 16

115 Which is the following is a procedure agreed upon for translation of a concept into measurement of some kind.
a) Operational definition pg 31

116 Every research project should begin with:
a) A statement of the research

117 _____is an example of concrete concept.
a) Age pg 29

118 A variable that appears between independent and dependent variable and shows the link or mechanism between them is known as:
a) Intervening variable pg 33

119 The 'Verifiable"" characteristic of scientific research deals with all of the following EXCEPT:
a) The results' interpretation

120 _____ research studies generally use data at the national level.

a) **Panel**

122 Data collection techniques include all EXCEPT

a) **Observation pg 22**

123 _____ is the theory that all knowledge is based on experience derived from the senses.

a) **Empiricism pg 15**

124 Research improves the decision making process by following all important stages EXCEPT:

a) **Only relying on personal assumptions**

125 The preliminary research to clarify the exact nature of problem to be solved is called:

a) **Exploratory research pg 18**

126 Literature review provides a solid foundation for developing

Theoretical Framework pg 39

127 A reader can easily see and comprehend the theorized relationships through

a) **Schematic c Diagram pg 45**

128 Raising gas prices causes an increase in the number of people who carpool to work is an example of which type of hypothesis?

a) **Relational hypothesis pg 35**

129 Which of the following options provide the logical relationship between the variables?

a) **Hypothesis**

130 If there 1s no theory yet you cannot conduct _____research

Objective

131 ____ represents a world of hard empirical facts that have been verified through empirical study

a) **Research**

132 Age, height, and number of siblings are an example of which of the following options:

a) **Continuous variable**

133 The increase in sales promotion is positively associated with the customer satisfaction is an example of which type of hypothesis?

a) **Relational hypothesis pg 35**

134 Khaadi, a clothing brand of Pakistan wants to understand the fashion trend among European buyers will conduct which type of research

a) **Exploratory research pg 18**

Level of job commitment of the officers is positively associated with their level of efficiency is an example of which type of hypothesis?_____ Co-relational hypothesis

1. All of the following options describe the research except:
   A casual inquiry to seek required information to resolve problem
2. Descriptive hypothesis contains One variable only
3. A system of systematically interrelated concepts definitions and propositions that are advanced to explain and predict phenomena is known as

theory

4. Which of the following is also referred to as working definition?

Operational definition

5. Which of the following is observe at the empirical level? Reality
6. Which type of review tells the reader how a project fits into the big picture and its implications for a field of knowledge? Context review
7. Which of the following variables is undesirable because it adds error to an experiment? None of these
8. The scientific research operates at two level one is at the abstract level of concepts and other one is the ------- of variable. Empirical level
9. What does a good literature review look like? All of the given option
10. is the purpose of explanatory research. Ans : The desire to know "why"
11. A statement concerned with the logical relationships among concepts is called_. Ans : Proposition
12. The scientific researcher operates at two levels: on the abstract level of concepts and on the other one is the _____ of variables

Ans : Empirical level

13. The Research that is done to examine the findings of someone else by using the "same variables but with different respondents" comes under which of following _____.

Ans : Replication

14. meanings attached to a concept create problems of measurement. Ans : Vague
15. Concepts represent various degree of___. Ans : Abstraction 16. What research is?

Ans : Systematic inquiry

17. Realities that are observable through sensory experiences are said to be: Ans : Empirical
18. What is Cross-Sectional research ____ .

Ans: The collection of data from more than one case at one moment in time

19. An operational definition is_.

Ans : A definition of a concept in terms of specific, empirical measures.

20. In_we collect same type of information from different respondents in different times. Ans: Time series Research
21. In_definition, a concept is explained in terms of other concepts. Ans: Theoretical
22. Research improves the decision-making process by following all important stages EXCEPT: . Ans: Only relying on personal assumptions
23. Concepts, created and developed for conducting any research study, are:_____ Ans: The building blocks of theory
24. Logical Process in which we arrive at a reasoned conclusion by logical generalization of known facts is called.

Ans: Deduction

25. Which of following is a type of applied research? Ans: Impact Assessment Research
26. If a researcher was studying the use of various instructional approaches to the..... Which type

of research And:

Applied

27. An Elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as

Ans: Exploratory study

28. Social research helps.
Ans: Improve Public health
29. Which of following best describes an Operational definition ? Ans: all of the give above
30. Which of following best describes a Concept? Ans: A key idea/ a key word
31. Which of following is true about a concept ? Ans: All of the given options
32. Every Research Project Should Begin with: Ans: A Statement of the Research?
33. All of the following are the type of Applied Research EXCEPT: Ans: Formulative Research
34.
35. Operational definition is also Known as Ans: working definition
36. Which of following is a concept? Ans: All of the given options
37. A study conducted by Lever brothers to find out impact of job satisfaction on employees' performance is studied at:

Ans: Macro Level

38. Which of the following is a procedure agreed upon for translation of a concept into measurement of some kind? Ans: Operational definition
39. The "Verifiable" characteristic of scientific research deals with:

Ans: All of the given options

40. Which of the following statement is true? Ans: Theory and research are interrelated
41. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

Ans: Sensory experience

42. One of the major hallmarks of scientific research is Ans: Objectivity
43. All of the following are true about theories, except. Ans: They are tentative until the fact prove them true
44. Rationalism is the application of Ans: Logic and arguments
45. Which of following refers to abstract concept? Ans: Racism
46. The "Verifiable" characteristic of scientific research deals with all of the following EXCEPT Ans: The result interpretation
47. If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth; he is likely conducting ..... type of research

Ans: Evaluation Research

48. Which of following is at the highest level of abstraction? Ans: Theory
49. Descriptive Research can be either

Ans : Both Quantitative and Qualitative

50. The Organization of concept in sequence from the most concrete and individual to the most general indicates:

Ans: the degree of abstraction

51. A Researcher is conducting study to find out the reasons why students are not cooperating with teacher is an example of

Ans: Explanatory Study

52. What is the Basis of the Scientific Method?

Ans: To formulate a Research Problem, test the hypotheses in carefully controlled conditions

54. Which of the following statement does best represent the purpose of research?
Ans: All of the Given Options
55. To explain, predict and control phenomena are the goals of Ans: The Scientific Method
56. a theory is a coherent set of_used as principles of explanation of the apparent relationship of the certain observed phenomena

Ans: propositions

57. The Scientific method is preferred over other ways of knowing it is more. Ans: All of the given options
58. Descriptive and Explanatory Are the classifications of research on the basis of Ans: Purpose of Research
59. Concept is

Ans: Key idea about any object

60. Qualitative and Quantitative Research are the classification of the research on the basis of Ans: Techniques Used
61. The term "Extrapolation" is better explained by the statement

Ans: Theory Predicts Facts

62. Which of the following is not a function of clearly identified research Questions? Ans: They make scope of your research as wide as possible?????

63. A study conducted by Pepsi To find out impact of salary On employees turnover is studied at what level?

Ans: micro

64. Basic research can also be called as------- Ans: Fundamental Research
65. Research methods Are applicable to all of following domains Except Ans: Imaginary world
66. Which of the following statement is not true?

Ans: A research proposal is an unorganized and unplanned project

67. A Concept is generalized idea about ————. Ans: All of the given options

1. One of the major hallmarks of scientific research is:

Objectivity
Intuition
Subjectivity
Instinct

2. If a researcher was studying the use of various instructional approaches to the ‘‘ multiple intelligences’’ of his students, he is likely to be conducting which type of research?

Basic
Applied
Evaluation
Grounded theory

3. ‘‘ research methods’’ helps in all of the following ways EXCEPT:

To avoid biasness
To develop analytical skills
To analyze the revelations and intuitions
To convert research concerns into research situations.

4. Self-study review helps to

Increase the readers confidence
Place a specific project in the big picture
Traces the development of an issue over time
Summarizes what is known at a point in time

5. The details of a reference should include

Full name of Author’s
Title
Volume, issue & page number
All of the above

6. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

Perceptions
Theory
Sensory experience
Logics and arguments

7. Which one of the following is not an assumption of science?

There are reoccurring patterns in the world
Events happen because of preceding causes
We can discover solutions to problems of interest
Theoretical explanations must agree with common sense.

8. A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program is which type of review?

Integrative review
Theoretical review
Self-study review
Historical review

9. While conducting a literature review, the researcher engages in:

An evaluation of the library's location
An evaluation of the library's electronic sources
An evaluation of the literature
An evaluation of the library

10. Which of the following can be the best possible reason for using a scientific method to make a decision?

It provides systematic inquiry into the matter
It helps to make decision randomly
It starts each research study from the scratch
It helps researchers to make decisions based on common sense

11. What is the most basic skill required by any researcher?

The ability to source data
The ability to generate ideas for research projects
The ability to understand major philosophical issues and ideas
The ability to calculate statistics

12. Which of the following best describes an operational definition?

All of the given options
It specifies measurement criteria
It specifies testing criteria
It gives meanings to a concept

13. The primary source of communication's means among researchers is Scholarly Journals
Government Documents
Media Reports
None of the above

14. Integrative reviews helps to Increase the readers confidence
Place specific project in the big picture
Traces the development of an issue over time
Summarizes what is known at a point in time

15. In ---------- we collect same type of information from different respondents in different times.

Cohort study
Time series research
Panel study
Case student

16. A logical relationship between two or more variables, expressed in the from of a testable statement is known as:

Hypothesis
Variable

Statement
Statistic

17. The 'Verifiable' characteristic of scientific research deals with all of the following EXCEPT;

The results' interpretation
The results' repetition
The results' confirmation/refutation
The results' replication

18. Hypothesis refers to--------
The outcome of an experiment
A conclusion drawn from an experiment
A forms of basis in which subject tries to outguess the experimenter
A tentative statement about the relationship

20.Theoretical reviews helps to

Increase the reader's confidence
Compare how different theories address an issue
Traces the development of an issue over time
Summarizes what is known at a point in time

21.Which of the following is a concept
Leadership
Total Quality Management
Human Resource Management
All of the given options

22.The most difficult resource to locate are;
Dissertations
Policy Reports and Presented Papers
Government Documents
Scholarly Books

23.'high productivity is positively associated with Job commitment'. The given hypothesis is a (an) Descripted hypothesis

24.Relational hypothesis can be;
All of the given
Causal or simply correlational
Positive or negative
Non-directional or directional

25.A one tailed hypothesis predicts--------
The future
The lottery result
The frequency of the effect
The direction of the effect

26.----------explain the logical relationship among the concepts;
Statements
Propositions
Variables
Events

27. What is cross-sectional research?
A study of a particular section of society
A comparison of two or more variable over a long period
The collection of data from more than one casts at one
One that is conducted when environment is uncertain

28. Abstract is -------
A detail of a scholarly publication's location A details background of the researchers
A short summery of a scholarly journal article
A detailed procedure to conduct a research

29. Which of the following research approachs is least concerned with the generalizability of findings?
Qualitative approach
Quantitative approach

30. Dictionary definition can also be named as all of the following, EXCEPT;
Bookish definition
Nominal definition
Conceptual definition
Theoretical definition

31. How a particular issue or theory has evolved over time is studied in;
Self-study literature
Context literature review
Historical literature
Integrative literature review

32. The 'verifiable' characteristic of scientific research deals with all of the following EXCEPT;
The results' interpretation
The results' repetition
The results' confirmation/refutation
The results' replication

33. Identity the term which is referred to as 'the confirmation or refutation of the observation through the scientific method by using sensory experience?'
Verifiable
Observation
Empirical
Cumulative

34. Identify the term which is referred to as the 'scope of applicability of the research findings in one organized setting to other settings with the help of statistic'?
Empirical
Determinism
Rationalism
Statistical generalization

35. Which of the following often focuses on generating new theories?
Inductive method
Deductive method

Hypothesis method
None of the given

36. The operational definition is also known as
Working definition
Nominal definition
Conceptual definition
Dictionary definition

37. The primary source of communication means among researchers is
Scholarly Journals
Government Documents
Media reports
None of the above

38. An operational definition is;
One that bears no relation to the underlying concept.
An abstract, theoretical definition of a concept
A definition of a concept in terms of specific, empirical measures
One that refers to opera singers and their work

39. In ---------- we collect same type of information from different respondents in different times.
Cohort study
Time series research
Panel study
Case studies

40. If a researcher is going to explore a new topic, he is conducting which of the following research?

- None of the given option
- Explanatory
- Descriptive
- **Formulative**

42. _____ is the purpose of Explanatory research.

- The desire to know "what"
- The desire to know " Where"
- The desire to know " How"
- The desire to know "Why"

43. Citation is_____

- A detail of a scholarly publication's location
- A short summery of a scholarly journal article
- A detailed background of the researcher
- A detailed procedure to conduct a research

44. Dichotomous variables are also known as _____

- Intervening variables
- Nominal variables
- Continuous variables
- Extraneous variables

45. The reviewed literature must be.
- None of the given option
- Relevant to the research project
- Readily available
- Easily accessible

46. In which of the given research design, same people or group are observed across various time periods?
- Panel study
- Cohort analysis
- Action research
- Time series research
-

47. Which of the following is NOT a proper way to write a literature review?
- Organize common findings or arguments together
- List down a series of research reports with a summary of the findings of each
- Logically link statements or findings
- Address the most important ideas first

48. The study of research methods provides with you the knowledge and skills you need.
- To solve the problem
- To improve the decision-making process
- To understand the research of others
- All of the given options

49. After you locate a source, you should write down all details of the reference, except;
- Full name of the authors
- Titles
- Volumes
- Price

50. Which of the following is a continuous variable?
- Height
- Age
- Blood pressure
- All of the given option

51. Plagiarism can be best described as;
- Giving credit to the author
- Revising the original work done by author
- Crediting the other person's work as your own
- Working on ideas presented in an article

52. Which of the following is the basic unit of a theory development?
- Task
- Concept
- Hypothesis
- Speculation

53. Identify the option that explains that scientific research operates at the abstract level.
- Reality
- Theory

- ✞ Variable
- ✞ Construct

54. All of the following are the source of literature review EXCEPT;

- ✞ Story books
- ✞ Dissertations
- ✞ Scholarly articles
- ✞ Scholarly books

57:A good review of the literature increases a reader's confidence in the researcher's Select the correct option

Professional competence
Ability
All of the above

58: ------- variable takes infinite number of values

Continuous
Discontinuous
Independent
Dependent

59: A variable that modifies the original relationship between independent and dependent variable is known as

Dependent variable
Intervening variable
Moderating variable
Independent variable

61: Which of the following often focuses on generating new theories?

Inductive method
Deductive method Hypothesis
method none of the given options

62:Researcher is supposed to develop a ------- after starting the specific problem to be studied in an experiment

Theory
Conclusion
Hypothesis
Summary of the data

63:Plagirism can be best described as

Giving cedit to the author
Revising the original work done by author
Crediting the other persons work as your own
Working on ideas presented in an article

64: There is no relationship btwn job satisfaction and the employess turnover rate ias an example of which of the following

Null hypothesis Alternate
Correlational
Descriptive

65: Which of the following statement does best represent the purpose of research

All of the given

Creating the architecture for data warehousing
The identification of quality information not its computerized processing
An application of scientific methods to information collection and analysis

66: A model variale is one that

All of the given
Modifies the original relationship
Qualifies the application of a relationship
Makes a relationship meaningless

67:A variable is
Any characteristics of interest that can take on more than one value
Defined as the groups manipulated in experimental research
The complte set of scores we ise in statistical analysis
Completely specified only in observational research

68:logical process in which we arrive at a reasoned conclusion by logical generalization of known facts is called
Inductive
Deductive
Duplication
Empiricism

69:Which of the following is true about a concept

All of the given
Ab abstract reality
A key about a process

1. is the purpose of explanatory research.
Ans : The desire to know “why”
2. A statement concerned with the logical relationships among concepts is called . Ans : Proposition
3. The scientific researcher operates at two levels: on the abstract level of concepts and on the other one is the of variables Ans
: Empirical level
4. The Research that is done to examine the findings of someone else by using the “same variables
but with different respondents” comes under which of following . Ans : Replication
5. meanings attached to a concept create problems of measurement.
Ans : Vague
6. Concepts represent various degree of .
Ans : Abstraction 7. What
research is? Ans : Systematic
inquiry
8. Realities that are observable through sensory experiences are said to be: Ans : Empirical
9. What is Cross-Sectional research .
Ans: The collection of data from more than one case at one moment in time 10. An
operational definition is .
Ans : A definition of a concept in terms of specific, empirical measures.
11. In we collect same type of information from different respondents in different times.
Ans: Time series Research
12. In definition, a concept is explained in terms of other concepts.
Ans: Theoretical
13. Research improves the decision-making process by following all important stages

EXCEPT: .

Ans: Only relying on personal assumptions

14. Concepts, created and developed for conducting any research study, are: .

Ans: The building blocks of theory

15. Logical Process in which we arrive at a reasoned conclusion by logical generalization of known facts is called.

Ans: Deduction

16. Which of following is a type of applied research? Ans: Impact Assessment Research

17. If a researcher was studying the use of various instructional approaches to the …….

Which type of research And:

Applied

18. An Elementary or basic form of research, in which little is known about the situation and previous theories or ideas do not apply, is known as

Ans: Exploratory study

B.Ed. 2nd STA 630 Quiz 1 Repeated Questions Solved By Muddasar Abbas

19. Social research helps. Ans: Improve Public health

20. Which of following best describes an Operational definition ?

Ans: all of the give above

21. Which of following best describes a Concept?

Ans: A key idea/ a key word

22. Which of following is true about a concept ? Ans: All of the given options

23. Every Research Project Should Begin with:

Ans: A Statement of the Research?

24. All of the following are the type of Applied Research EXCEPT: Ans: Formulative Research

25. Operational definition is also Known as Ans: working definition 26. Which of following is a concept? Ans: All of the given options

27. A study conducted by Lever brothers to find out impact of job satisfaction on employees'

28. performance is studied at:

Ans: Micro Level

29. Which of the following is a procedure agreed upon for translation of a concept into measurement of some kind?

Ans: Operational definition

30. The "Verifiable" characteristic of scientific research deals with:

Ans: All of the given options

31. Which of the following statement is true?

Ans: Theory and research are interrelated

32. According to Empiricism, which of the following is the ultimate source of all our concepts and knowledge?

Ans: Sensory experience

33. One of the major hallmarks of scientific research is

Ans: Objectivity

34. All of the following are true about theories, except.

Ans: They are tentative until the fact prove them true

35. Rationalism is the application of

Ans: Logic and arguments

36. Which of following refers to abstract concept?

Ans: Racism

37. The "Verifiable" characteristic of scientific research deals with all of the following EXCEPT

Ans: The result interpretation

38. If a researcher is studying the effect of using laptops in his classroom to ascertain their merit and worth; he is likely conducting. ..... type of research

Ans: Evaluation Research

39. Which of following is at the highest level of abstraction?

Ans: Theory

40. Descriptive Research can be either

Ans : Both Quantitative and Qualitative

41. The Organization of concept in sequence from the most concrete and individual to the most general indicates:

Ans: the degree of abstraction

42. A Researcher is conducting study to find out the reasons why students are not cooperating with teacher is an example of Ans: Explanatory Study

43. What is the Basis of the Scientific Method?

Ans: To formulate a Research Problem, test the hypotheses in carefully controlled conditions 46. Which of the following statement does best represent the purpose of research?

Ans: All of the Given Options

47. To explain, predict and control phenomena are the goals of

Ans: The Scientific Method

48. a theory is a coherent set of used as principles of explanation of the apparent relationship of the certain observed phenomena Ans: propositions

49. The Scientific method is preferred over other ways of knowing it is more.

Ans: All of the given options

50. Concept is

Ans: Key idea about any object

51. Qualitative and Quantitative Research are the classification of the research on the basis of

Ans: Techniques Used

52. The term “Extrapolation” is better explained by the statement

Ans: Theory Predicts Facts

53. Which of the following is not a function of clearly identified research Questions? Ans: They make scope of your research as wide as possible?????

54. A study conducted by Pepsi To find out impact of salary On employees turnover is studied at what level? Ans: micro

55. Basic research can also be called as-------

Ans: Fundamental Research

56. Research methods Are applicable to all of following domains Except Ans: Imaginary world

57. Which of the following statement is not true?

Ans: A research proposal is an unorganized and unplanned project 59. A Concept is generalized idea about . Ans: All of the given options

60. All of the following are the purposes of descriptive research EXCEPT Ans: The desire to know “why”

1. Concepts like people subjective feeling

- **Empirical**

2. approaches is usually used in quantitative research

- **detective approach**

3. measurement of Reliability refers to the

- **accuracy of the scores**

4. realities is observed through sensory experience are said to be

- **Empirical**

7. which of the following is the reason for deception

- **All of above**

8. Context review help to

• **summarize what is known at a point in time**

9. Which of the following represents a good qualitative problem stateme 10. nt

• **Conveys a sense of emergent design**

11. If our research was today the use of various instructional approaches to the multiple intelligences of his students he is likely to be conducted in which type of research

• **Applied**

12. which of the following is / are the basic feature of a theoretical framework

• **Make an Inventory of propositions**

13. A Literature review is built on the assumption that

• **Both a and b**

14. Which helps the researcher to capture the intensity of variable is called

• **Scale**

15. Which of the following is also referred to as working definition

• **operational definition**

16. Hypothesis refer to

• **a tentative statement about the relationship**

17. Which of the following is not a method of narrowing a topic

• **Pilot testing**

18. research methods help in all of the following ways except

• **to avoid business**

19. Research that seeks to determine the answer to who, what, where and how comes under the domain of ..... research

• **Descriptive**

20. the definition of a behavioral factor to allow measurement of it is known as

• **an operational definition**

21. The reviewed literature must be

• **relevant to the research project**

22. The introduction section of a research proposal contains information about all of the following except

• **design of the study**

23. A clear, precise, and succinct statement of the question are issued that is to be investigated with the goal of finding and answer our solution is called

• **problem statement**

24. A system of systematically interrelated concepts definition and proposition that are

• **advanced to explain and Predict phenomena is known as**

25. rationalism is the application of

• **logic and arguments**

26. The detail of reference should include all except

• **volume, issue & page number**

27. There is no relationship between advertising and sales of product A given hypothesis is

• **Null hypothesis**

28. an operational definition is

• **A Definition of concept in term of specific empirical measures**

29. There is no relationship between job satisfaction and the employees to Turnover rate in an example of which of the following Hypothesis

- **null hypothesis**

30. operational define a concept involves a series of

- **Steps**

31. All of the following are purposes of descriptive research accept

- **the desire to know why**

32. which among the following is type of applied research

- **impact assessment research**

33. Identify the term which is referred to as the conformation are dissertation of the observation through the scientific method by using sensory experience

- **Empirical**

34. Research study in which the unit of analysis remains same at specific interval over a longer period of time is known as

- **time series study**

35. integrative review helps to

- **Summarizes what is known at a point in time**

36. Which of the following tasks is not accomplished by the theoretical framework

- **Describes the nature and direction of the relationship among the variables**

37. “Higher the level of job satisfaction, higher will be the employees’ performance.” which type of relationship the moment of variable determines?

- **Positive relationship**

38. is the purpose explanatory research

- **the desire to know why**

39. The most critical areas of an article to read are

- **methods and results**

40. Apart from that deception is unethical what is the other important disadvantage of deceiving people

- **all of the given options**

41. logical relationship among the factors identified in the literature review is called

- **Theoretical framework**

42. The higher the motivation the higher the efficiency is an example of ..... hypothesis

- **explanatory hypothesis**

43. scientific research focuses on which of the following

- **Objectives**

44. methodological review helps to

- **Place a scientific project in the big picture**

45. The verifiable characteristics of scientific research deals with

- **the results replication**

46. research in his questionnaire asked nature of business respondents are working in weather trade in one fracturing are servicing nature of business is likely to be measures on which type of following scales

- **nominal scale**

47. which type of the following are considered essential steps of the research process

- **all of the above**

48. the definition of a behavioral factor to allow measurement of it is known as

- **An operational definition**

49. the term extrapolation is better explained by the statement

• **theory predict facts**

50. An interval scale contains

• **a fixed amount of difference between categories**

51. What does a researcher mean by empirical

• **observation through sensory experiences**

52. The validity of a Measure refers to the

• **accuracy with which it measures the construct**

53. Concepts created and developed for conducting any research study are

• **the building blocks of theory**

54. Which of the following is not a technique to narrow down the broad problem area

• **Decide about the sample**

55. which of the following is /are the basic features of our theoretical framework

• **all of above**

56. Research that is done to examine the findings of someone else by using the some variables but with different respondent comes under which of the following

• **Replication**

57. If the researchers use findings to generate theories and models to understand human behavior at societal level which of the following levels as it relates

• **micro level**

58. Unethical activities may involve

• **all of the given options**

59. What is the process of taken construct and refining it be giving conceptual or theoretical definition

• **conceptualization**

60. how different theories address and issue comes under

• **theoretical review**

61. Which of following statement is true

• **theory and Research are interrelated**

62. Study conducted by Pepsi to find out impact of salary on employees turnover is studied at what level

• **Micro level**

63. A researcher can organize a computerized search by

• **all of above**

64. the operational definition is also known as

• **working definition**

65. Which of the following is an example of abstract concept

• **Racism**

66. in situations where respondents are are intentionally deceived they should be….. once the research is completed

• **Debriefed**

67. introduction section of a research proposal contains information about

• **all of above**

68. Which of the following best describes an operational definition

• **all of the given options**

69. The total number of basic features that should be incorporated in theoretical framework

• **6**

70. Companies have the right to dissociate themselves from the sponsorship of a research project This type of confidentially called

• **Sponsorship non-disclosure**

71. which of the following is a research strategy for locating literature review for a research project

• **all of the given options**

72. null hypothesis state:

• **absence of relationship**

73. Research can develop theoretical framework on the basis of

• **both a and b**

74. Which of the following is /are the common sources of literature review

• **all of the above**

75. Theory is full of all of the following options except

• **Guess**

76. scientific research focuses on which of the following

• **Objectivity**

77. While conducting a literature review the researcher engages in

• **an evaluation of the Literature**

78. All of the following are considered the steps of research process except

• **problem definition**

79. which of the following is not a feature of theoretical framework

• **presenting findings**

80. descriptive research can be either

• **Both qualitative and quantitative**

81. which of the following are considered essential step of research process

• **all of the above**

82. While discussing about ethics in research which of the following is not considered as concerned party

• **Government**

83. meanings attached to a concept create problems of measurements

• **vague**

84. Which of the following best describe an operational definition

• **all of the given options**

85. which of the following statement does best represent the purpose of research

• **An application of scientific methods to information collection and analysis**

86. theoretical framework provides the logical base for developing

• **Hypothesis**

87. Which of the following is not a proper way to write a literature review

• **organize common findings are arguments together**

88. The scientific method is preferred over other ways of knowing because it is more

• **all of the given options**

89. An Elementary or basic from of research in which little is known about the situation and previous theories or address do not apply is known as

• **exploratory study**

90. Verifiable characteristic of scientific research deals with all of the following except

• **the result interpretation**

91. Which of the following best describes the concept of operationalizing

• **operationalizing Concepts involves making concepts measurable**

92. Which of the following is not a purpose of literature review

- **help you in developing theoretical framework**

93. Realities observed through sensor experience are said to be

- **Empirical**

94. What is the basis of scientific method

- **To formulate a research problem test hypothesis in carefully controlled condition that challenge the hypothesis**

95. Variable takes infinite number of values

- **continuous**

96. What course of action should be adopted by the researcher and order to safeguard the rights of respondent

- **researcher should obtain informed consent from the respondent**

97. What is ordinal data

98.

- **numbers**

99. All of these are characteristics of scientific method research except

- **Intuitive**

100. To main processes used for measurement of concepts /variables in research are

- **conceptualization and operationalization**

101. Which of the following is the search strategy for locating literature review for research project

- **all of the given option**

102. Descriptive hypothesis contains

- **one or more variables**

103. The primary source of communication among researchers is

- **none of the above**

104. Details of reference should include all except

- **volume issue and page number**

105. Null hypothesis States

- **Absence of relationship**

106. A logical relationship between two or more variables Express in the form of table statement is known as • **Variable**

1. Self-**study reviews** increase the reader's confidence. A review that only demonstrates familiarity with an area is rarely published but it often is part of an educational program.
2. Which of the following is a continuous variable (height age blood pressure all)
3.
4. Which of the are basic features of the theoretical framework(Elaborates the relationship among the variables.• Explains the logic underlying these relationships.• Describes the nature, and direction of the relationship All)
5. Nominal scales are the least powerful of the four scales.
6. **Focus group discussions:** It is a discussion of an issue by 6-12 persons with a moderator for 1-2 hours.
7. Which of the following variable is undesirable because it adds error to an experiment None of these
8. When the research starts from the effects and traces the reason back in time what does it stand for ?case study
9. The first step in development of theoretical framework is to arrange these propositions in a sequential order
10. Dictionary definitions are also called conceptual or theoretical or nominal definitions.

11. Dictionary definitions are also be named except Bookish definition
12. Once the guarantee of confidentiality is given, protecting that confidentiality is essential. B : Essesntial for every participant in a research project or D ; All
13. At the empirical level we “experience” reality – that is we observe the objects or events.
14. In situations where respondents are intentionally or accidentally deceived, they should be debriefed once the research is complete.
15. Two main process used for measurement of concepts/ variables in research are conceptualization and operationalization
16. Which of the following is a procedure agreed upon for the translation of a concept into measurement of some kind.
17. How a researcher intends to measure the variable in a particular study is called proposition.
18. Empirical Concepts like people’s subjective feelings, attitudes, ideology, deviance, and perceptions are difficult to measure in research.
19. Literature review provides a solid foundation for developing Theoretical Framework
20. Unethical activities may involve All of the given Options
21. All of the given options are helpful to develop conceptual definition, EXCEPT;
22. A physiological reaction test was given to 100 participants. Instead of recording reaction time every participant, the researcher choose to record their position as compare to other participants, i.e. the fastest participant was coded 1 and the slowest as 100. This is an example of a/an variable. Nominal
23. In the statement “high motivation results in high efficiency” motivation is the Independent Variable
24. A research that seeks to determine the answers to who, what, where, and how, comes under the domain of descriptive research.
25. A concept is generalized idea about All of the given options
26. Plagiarism can be best described as Crediting the Others person’s work as your own
27. Two main Processes used for measurements of concepts/variables are Science
28. Skepticism is the norm of either Both Qualitative and Quantitative
29. Descriptive research can be
30. Which of the following reasons can be reason to conduct research To generate Theories
31. The total number of basic features that should be incorporated in a theoretical framework are 6
32. Literature review provides a solid foundation for developing the theoretical framework 34. A keyword is an important term that is likely to be found in the title
35. A one tailed hypothesis predicts the direction of the effect.
36. Rights and obligations of researcher are generally dictated by the **Norms. Norms of the society**
37. Which of the following is a concept All of given
38. Concepts represent various degree of abstraction
39. To say that a theory is falsifiable is to say that; It is so vague that it fits any and all possible results.
40. In the statement 'an examination of the effects of discretionary behavior on employee performance' employee performance is the: Dependent variable 41. The following journal article would be an example of ____
    Research; "The benefits of florescent lighting on production in a factory setting." Applied
42. To explain, predict, and/or control phenomena are the goal of The scientific method
43. Vague meanings attached to a concept create problems of measurements.
44. Which one of the following creates problems of measurements of a concept? Vague meanings
45. The purpose of a literature review is to: Identify any inconsistencies or gaps in the literature.
46. Why do you need to review the existing
47. literature? To give your dissertation a proper academic appearance, with lots of reference.
48. Explanatory (causal) hypotheses Hi motivation results in hi efficiency.
49. A Literature review that summarizes what is known at a point in time is known as:Integrative review
50. Which type of review tells the reader how a project fits into the big picture and its implications for a field of knowledge ***Context reviews***
51. how a particular issue or theory has evolved over time is studied in ***Historical review***
52. Research questions are crucial because they will Guide your decisions about what data to collect and from where.
53. What is the final step of a scientific investigation? Report the findings
54. preliminary data collection may be considered as part of the **exploratory** research.
55. the rights and obligations of individuals are generally dictated by the norms of society.

56. Quantitative research studies generally end with a summation of the verification process, which is a confirmation or disconfirmation of the hypotheses tested via deductive reasoning.

57. Conclusively, the aim of qualitative research is discovery, while the aim of quantitative research is verification.

58. Which of the following is not a part of research design? Objective of the study

59. Skepticism is the norm of science indicates that the items that are intended to

60. Face validity measure a concept, do on the face of it look like they measure the concept.

61. The goal of ethics in research is to ensure that no one is harmed or suffers adverse consequences from research activities

62. The variable is independent because its value can be manipulated by the experimenter to whatever he or she wishes it to be.

63. Debriefing involves (((Explanation of any deception.• Description of the hypothesis, goal, or purpose of the study.• Post study sharing of the results.)))) All og the given

64. The__is only useful if the concepts, ideas, questions, etc. to be investigated are both testable and falsifiable Scientific Method

65. Scientific research is a collective efforts of many researchers who share their results with one another and who pursue knowledge as a community both a and b

67. Research task is usually treated as a sequential process involving several clearly defined steps

68. The relationship can be ((((non-directional or directional, positive or negative, causal or simply co-relational)))) All of the given

69. Theories are supposed to be generic whereby they could be applicable

70. **Intervening Variables** to different situations.

A basic causal relationship requires only independent and dependent variable. A third type of variable, the *intervening variable*, appears in more complex causal relationships. It comes between the independent and dependent variables and shows the link or mechanism between them.

71. Any variable that has a limited number of distinct values and which cannot be divided into fractions, is a discontinuous variable

72. Accur when the respodents are told only part of the truth about the study or whn the truth is fully compromised Deception

73. The independent variable is the variable manipulated in order to observe its fact

74. variable is any character of interest that can take on more than one value

75. question might invade the privacy of research participant what is your home addres

76. communication is more effective when it is tailored to specific audience

77. next step is performed by the researcher after developing the inventory of revelent variable all of the given

78. helpful in defining research problem theoretical

79. scope of applicability of the research findings in one organizational setting with help of ftatistics Empirical

80. the order in which participants complete a task is level of measurement ordinal

81. source of literature review except story book

82. one of the technique for narrowing a topic into a research question includes examining the literature

83. if the researcher convets the abstract concept into a tangible one is tangible operationalizm

84. a reader can easily see and comprehend the theorized relationship through schematic diagram

85. Which of the following statements is false?

Discrete variables allow measurement of an infinite number of fractions of units of measurement.
Discrete variables can only have whole number values.
Continuous numbers can only have whole number values.
Continuous measures do not allow for scores that fall between two number values.

86. What is ordinal data? Ordinary data
Well behaved data
Ranked data Numbers

87. Which of the following is not an example of deception?

A part of the truth is not communicated to the respondent To observe code of ethics
To leak out information regarding any confidential matter To create bias between respondents before the survey

88. What is opposite of a variable?
A constant
An extraneous variable A dependent variable A data set

89. Which of the following is the BEST hypothesis?
Students taking formative quizzes will perform better on chapter exams than students not taking these quizzes.
Taller students will have higher test scores than shorter students.
Students taught in a cooperative group setting should do better than students in traditional class. Students using laptops will do well.

90. The independent variable is;
The variable manipulated in order to observe its effects The variable that is measured
The free spirited variable A confounding variable

91. After you locate a source, you should write down all details of the reference, except; Full names of the authors
Titles
Volumes
Price

92. A measure has high internal consistency reliability when:
Multiple observers make the same ratings using the measure.
Participants score at the high end of the scale every time they complete the measure.
Multiple observers obtain the same score every time they use the measure.

93. What is required if there is a chance that data could harm the respondents?
Change of results
A signed form detailing the types of limits Free consent of respondents All of the given options

94. The key objective of data analysis is to:
Calculate statistics
Understand relationships between variables
Obtain the distribution of responses for each question Create tables which display the survey results

95. Which of the following is not a concept? Leadership
Total Quality Management Human Resource Management IQ

96. Which one of the following creates problems of measurements of a concept? Unambiguous meanings
Vague meanings Clear meanings
Dictionary meanings

97. Ms. Laiba has decided to use the test at the end of the textbook to measure the achievement levels of the students in her study. Which of the following BEST describes the chapter test?
Definition
Construct
Variable
Operationalized variable

98. The scientific method is preferred over other ways of knowing because it is more; Reliable
Systematic
Accurate
All of the given options

99. Which of the following is least likely to occur as an ethical problem with e-research?

People are not likely to be able to stop once they have begun participating.
Informed consent cannot be completely monitored. Debriefing could be avoided. Privacy could be invaded.

100. The most difficult sources to locate are; Dissertations
Policy Reports and Presented Papers
Government Documents Scholarly Books

101. Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Note taking
Videotaping
Audiotaping
Writing notes after the interview

102. How can we determine if a test has good validity?
It produces the same result when it is given at different times to the same group of people
It produces the same result no matter which version of the test is used It measures what it is supposed to measure
All of the questions on it can be answered accurately by the subject

103. How is nominal data presented? In order
In discrete categories
Units of equal distance Data where there is a true zero

104. When we say that science is parsimonious, we mean that:
Scientific theories are based on laws.
We must be careful because causes can occur after specific effects.
The best scientific theories are those that offer the simplest explanations for a law. Science accurately describes a wide range of behavior.

105. A concept is a generalized idea about
A class of objects
Attributes Occurrences All of the given options

106. The purpose of a literature review is to:
Help you find out what is already known about this area. Identify any inconsistencies or gaps in the literature.
Demonstrate an awareness of the theoretical context in which the current study can be located. Find what is already known, identify gaps demonstrate awareness.

107. A_scale only assigns numbers to objects to classify the objects according to the characteristic of interest.
Ratio Nominal
Interval
Dichotomous

108. Procedures determining what two issues are rarely used in quantitative research?
Objectivity and subjectivity
Reliability and validity
Accessibility and replicability
Quality and quantity

109. What does Ordinal scale NOT imply?
Characteristics of nominal scale
Rank the object
Does not provide magnitude of object Provide rate

110. A literature review requires;

Planning Clear writing Good writing

All of the given option

111. Quantitative social researchers rarely claim to have established causality because:

They are more concerned with publishing the results of their reliability tests.

They do not believe that this is an appropriate goal to be striving for. They keep forgetting which of the variables they have manipulated. They tend to use cross-sectional designs, which produce only correlations.

112. When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.

Construct

Internal

External

Causal

113. All the persons involved in the collection of data and supervision of data collection process are called;

Fieldworkers Researchers

Research assistants

None of the given options

114. The key objective of data analysis is to: Calculate statistics

Understand relationships between variables

Obtain the distribution of responses for each question Create tables which display the survey results

115. The small scale trial run of a particular item is called _____ . Test run

Pilot test Post hoc test

T-test

116. Hypothesis refers to_____:

The outcome of an experiment

A conclusion drawn from an experiment

A form of bias in which the subject tries to outguess the experimenter A tentative statement about the relationship

117. Detailed and unambiguous instructions are particularly important for: Computer- assisted telephone surveys

Mail surveys

Computer-assisted personal interviews Internet surveys

118. Measurement reliability refers to the:

Accuracy of the scores

Consistency of the scores Dependency of the scores Comprehensiveness of the scores

119. Quantitative research has been criticized because:

The measurement process suggests a spurious and artificial sense of accuracy. The reliance on instruments and procedures makes it high in ecological validity.

It underestimates the similarities between objects in the natural and social worlds. It has no validity.

120. Why does qualitative interviewing have an advantage over participant observation when it comes to longitudinal research?

Repeat interviews are easier to organize.

It allows for a better exploration of key issues. It is a more focused research method. Participant observers are prone to 'go native' during longitudinal research.

121. Cover letter must include the following information, except:
How was the respondent selected?
Data collecting tools Motivation for the respondent
Importance of research topic which is going to be conducted

122. The logic of qualitative data analysis is described as:
Objective
Subjective
Inductive
Deductive

123. The validity of a measure refers to the:
Particular type of construct specification
Comprehensiveness with which it measures the construct Accuracy with which it measures the construct Consistency of the measurement

124. An advantage of computer-assisted telephone interviewing is:
Interviewing time is reduced
Data quality is enhanced Questionnaires do not have to be coded
There is little opportunity for interviewer bias

125. Which of the following is not an example of deception? A part of the truth is not communicated to the respondent
To observe code of ethics
To leak out information regarding any confidential matter To create bias between respondents before the survey

126. What does it mean if two variables have a positive correlation?
As one variable increases, so does the other
As one variable increases, the other decreases The correlation between the two variables is 0
The correlation between the two variables is greater than 1.0

127. The researcher protects the confidentiality in following ways, Except; Obtaining signed nondisclosure documents.
Restricting access to data instruments where the respondent is identified. Disclosure of data subsets. Restricting access to respondent identification.

128. Theoretical framework is trying to develop a_model of our study. Functional
Conceptual
Operational
Practical

129. Which of the following is an example of deception in business research?
The obtaining of company material without permission.
The researcher wearing a disguise during an observation.
The researcher representing their research as being about a different topic. The researcher failing to ask permission to interview someone.

130. To say that a theory is falsifiable is to say that; It is based on results that are not replicable.
Investigators have replaced it with a simpler or more accurate theory. We can imagine results that would contradict it. It is so vague that it fits any and all possible results.

131. Which of the following is an excellent way to enhance the validity of interview data collection?
Spend an extended period of time in the field. Obtain participant trust.
Recognize your own biases Spend time in field, obtain participant trust, recognize biases.

132. When doing research involving deception with human subjects, researchers have an obligation to do which of the following?

Tell subjects the truth about the study's purpose and methods after the study is completed

Prevent mental and physical harm to subjects

Let subjects withdraw from the study at any time if they don't want to keep participating

All of the given options

133. Which of the following is an example of an issue that would be checked in a pilot testing?

Completion of all questions on a questionnaire

Legible writing

Single responses to all multiple choice questions

Logical answers between questions (i.e., attributes should be rated high if purchase interest is high)

134. What is the basis of the Scientific Method?

To test hypotheses in conditions that are condusive to its success. To formulate a research problem and disprove the hypothesis.

To formulate a research problem, test the hypothesis in carefully controlled Conditions that challenge the hypothesis. To test hypotheses and if they are disproved, they should be abandoned completely.

135. Quantitative social researchers rarely claim to have established causality because:

They are more concerned with publishing the results of their reliability tests.

They do not believe that this is an appropriate goal to be striving for. They keep forgetting which of the variables they have manipulated. They tend to use cross-sectional designs, which produce only correlations.

136. Rationalism is the application of: Research solution

Logic and arguments

Reasoning Previous findings

137. After a researcher has stated the specific problem to be studied in an experiment, he must then develop a(n):

Theory

Conclusion

Hypothesis

Summary of the data

138. Which of the following control techniques available to the researcher controls for both known and unknown variables?

Building the extraneous variable into the design

Matching

Random assignment

Analysis of covariance

139. Quantitative research has been criticized because:

The measurement process suggests a spurious and artificial sense of accuracy. The reliance on instruments and procedures makes it high in ecological validity.

It underestimates the similarities between objects in the natural and social worlds. It has no validity.

140. The outcome of an experiment

A conclusion drawn from an experiment

A form of bias in which the subject tries to outguess the experimenter A tentative statement about the relationship

141. What is required if there is a chance that data could harm the respondents? Change of results

A signed form detailing the types of limits Free consent of respondents All of the given options

142. Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?

Scale

Index

Uno-dimensionality

Weighting

143. Which of the following is not an example of deception?

A part of the truth is not communicated to the respondent

To observe code of ethics

To leak out information regarding any confidential matter

To create bias between respondents before the survey

144. What is ordinal data?

Ordinary data

Well behaved data

Ranked data Numbers

145. What research is?

A lab experiment

A report

A systematic Enquiry A procedure

146. Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable? Experimental control

Differential influence Matching

Analysis of covariance

147. You wish to make a precise estimate about the characteristics of a population of individuals. You should use:

Quota sampling Probability sampling

Accidental sampling Snowball sampling

148. A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles, gestures, gaze, and touch. This is an example of;

Blind observation

Quasi-experimentation

Naturalistic observation

Field experimentation

149. Which type of research address major societal change?

Experimental Research

Action Research

Social Research

Historical Comparative Research

150. Rationalism is the application of: Research solution

Logic and arguments

Reasoning Previous findings

151. Which of the following provides insight into the complexity of using interviews? Potential influence of gender or cultural differences between interviewer and interviewee

The accuracy of the interviewee's responses

The different semantic meanings of the language being used

Accuracy, influences and language used

152. Which of the following elements of Observation in Non Reactive research? External Appearance
Count Behaviors
Time Duration All of the given options

153. Research may differ along a series of dimensions. Which of the following may be applied to this statement?
The type of data collected.
The data-collection technique.
The level of manipulation used to elicit data collection. All of the given options

154. Which one of the following tasks is NOT accomplished by theoretical framework? Elaborate the relationship among the variables
Explain the logic underlying the relationship between the variables. Describe the nature, and direction of the relationships among the variables. Relates the previous studies.

155. When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.
Construct
Internal
External
Causal

156. If a researcher was studying the use of various instructional approaches to the "multiple intelligences" of his students, he is likely to be conducting which type of research? Basic
Applied
Evaluation Grounded theory

157. Which of the following control techniques available to the researcher controls for both known and unknown variables?
Building the extraneous variable into the design
Matching
Random assignment
Analysis of covariance

158. Which type of research address major societal change?
Experimental Research
Action Research
Social Research
Historical Comparative Research

159. Which of the following is a measure of inflation? Scale
Consumer price index
Weighting
Uni-dimensionality

160. Which of the following best describes the concept of operationalizing?

161. Why do you need to review the existing literature To find out what is already known about our area of interest

162. A literature review that summarizes what is known at appoint in time, is known as Integrative review

163. What should be done if the respondents are intentionally or accidently deceived they should be debriefed once the research should complete.

164.

165. After you locate a source you should write down all details of reference, except, Price

166.

167. Null hypothesis states, absence of relation

All the given option are helpful to develop conceptual definition except make elements from dimensions.

168. Which of following is observe at the empirical level reality

169. Operationally defining a concept involves a series of steps

170. The scientific researcher operates at two levels: One is the abstract level of concepts and other one is the Empirical level of variables.

171. Which of the following must be considered while conducting a literature review for a research— All of the given option

172. Debriefing involves All of given options

173. There is no relationship between job satisfaction and the employees turnover ratio is an example of which of the following hypothesis NULL Hypothesis

174. Propositions Explains the logical relationships among the concepts.

175. Dichotomous variable are also known as continuous variable

1. A good qualitative problem statement:
a. **Conveys a sense of emerging design**

2. The "tool" function of theory is to:
a. **Suggest new relationships and make new predictions**

3. The statement of purpose in a research study should:
a. **Identify the intent or objective of the study**

4. Why is the statement "What are the effects of extracurricular activities on cognitive development of school age children" not a good statement of a quantitative research question?
a. **Because the statement was not specific enough to provide an understanding of the variables being investigated**

5. A qualitative research question:
a. **both a and b are correct**

6. According to the text, which of the following orders is the recommended in the flowchart of the development of a research idea?
a. Research topic, research problem, research purpose, research question, hypothesis

7. It is essential that you evaluate the quality of internet resources because information obtained via the internet ranges from very poor to very good.
a. True

8. One step that is not included in planning a research study is:
a. **Conducting a meta-analysis of the research**

9. Sources of researchable problems can include:
a. **All of the above**

10. A key characteristic of past research that guides researchers in new research questions is that:
a. Extensive research conclusively and definitively answers research questions
b. **Studies typically generate more research questions than they answer**

11. Which of the following is a function of theory?
a. Integrating and summarizing current knowledge
b. Making predictions
c. Explaining phenomena
d. **All of the above are important functions of theory**

12. A review of the literature prior to formulating research questions allows the researcher to do which of the following?
a. To become familiar with prior research on the phenomenon of interest
b. To identify potential methodological problems in the research area
c. To develop a list of pertinent problems relative to the phenomenon of interest **d. All of the above**

13. Sometimes a comprehensive review of the literature prior to data collection is not recommended by grounded theorists.
a. True
14. What kind of ideas can't be empirically researched?
a. **Issues of values and morality such as the correctness of having prayer in schools**

15. Which of the following is not a database containing information to be used during the literature review? **all of the above are potentially useful data bases**

16. Computer database searches can be done:
a. **All of the above**

17. The feasibility of a research study should be considered in light of:
a. **All of the above**

18. A formal statement of the research question or "purpose of research study" generally_____.
a. **b and c**

19. Is the following qualitative research purpose statement "well stated" or "poorly stated"? "The focus of the present study was to explore distressing and nurturing encounters of patients with caregivers and to ascertain the meanings that are engendered by such encounters. The study was conducted on one of the surgical units and the obstetrical/gynecological unit of a 374-bed community hospital."
a. It is a well stated
20. Which of the following quantitative research questions is superior?
a. **"What effect does playing high school football have on students' overall grade point average during the football season?"**

21. A statement of the quantitative research question should:
a. **All of the above**

22. The research participants are described in detail in which section of the research plan?
a. **Method**

23. Research hypotheses are_____.
a. **b and c**

24. Hypotheses in qualitative research studies usually_____.
a. **Are often generated as the data are collected, interpreted, and analyzed**
25. A research plan _____ .
a. **All of the above**

26. The Method section of the research plan typically specifies
a. **a, c and d**

27. The Introduction section of the research plan
a. **d. All of the above**

28. According to your text, which of the following is not a source of research ideas? a. Everyday life
b. **All of the above ARE sources of research ideas**

On which component of his field notes was Mr. M focused when he expressed in his notes his thoughts and ideas about what he observed?
Reflection

Which of the following is NOT a longitudinal study?
Census study

A census taker often collects data through which of the following?
Secondary data

What is opposite of a variable?
A constant

A literature review requires;
All of the given option

When we say that science is parsimonious, we mean that:

The best scientific theories are those that offer the simplest explanations for a law.

If the control variable has no effect on the bivariate relationship then it is: Spurious relationship.
Not spurious relationship.

Which term technically describes a situation in which an observer's work in a first-grade classroom disrupts the normal routines due to the curiosity of the students?
Observer effect

Testing is most likely to negatively affect internal validity when_____.
The time between pre- and posttest is short

A researcher is interested in nonverbal behavior among young adults. The researcher goes to public gathering places in town and observes smiles,
gestures, gaze, and touch. This is an example of;
Naturalistic observation

Which of the following is included in research proposal?
Literature review

"Skepticism" is a norm of science. It is better explained by which of the following statement?
Critical reading of the previous researches

Which type of research address major societal change?
Historical Comparative Research

Which of the following terms best describes data that were originally collected at an earlier time by a different person for a different purpose?
Secondary data
The person who leads a focus group discussion is called a _____ .
Moderator

Categorical measures are forms of measurement classified as
Measures that reflect qualitative differences

If variables a and b are highly correlated, the there is a strong relationship between a and b

In a study of the relationship between self-concept and resilience for males and for females, the minimal acceptable sample size for the whole study would be

30
Which section of a research report sets the stage for the report and indicates where in the report each component, tables, and figures can be found?
Table of contents

Which of the following is the least obtrusive and most accurate method for recording data in an interview?
Audiotaping
Which of the following is an excellent way to enhance the validity of observational data collection?
All of the above.

Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score
Index

Which type of research address major societal change
Historical comparative research

In which of the following sampling methods People are available such as volunteer or can be easily recruited?
Convenience sampling

Which of the following can be referred as semantic analysis?
Latent coding
Which of the following group that does not receive the experimental treatment condition? Control group
Which of the following is a measure of inflation? Consumer price index

Which of the following is newer method of survey? E-mail survey

The Verifiable characteristic of scientific research deals with all of the following EXCEPT:

The resultsâ€™ interpretation
The results repetition a
The resultsâ€™ confirmation/retutation
The resultsâ€™ replication
How different theories address an issue comes under:

Self-study review
Context review
Historical review
Theoretical

A hypothesis is a statement about the existence, size, form, or distribution of a variable.
Descriptive
Causal
Explanatory
Co-relational

The purpose of reviewing existing literature is:
To get list of references
To complete word count of dissertation / anv
To help in general learning process
To find out what is already known about your area of interest

CURRENTLY QUIZ 1 2021

1. Population and sample of the study is the part of which of the following options? **Research Design**
2. Which of the following must e considered while conducting o literature review for a research study? **All of the given option**
3. Literature review provides a solid foundation for developing **Theoretical framework**
4. A researcher conducting study to find out the reason why students are not cooperating with teachers is an example of **Descriptive study**
5. A research that seeks to determine the answer to who, what, where and how comes under the domain of ------ research. **Descriptive**
6. All of the following options are the part of research proposal except: **Discussion**
7. Identify the option that explains the idea that (2times) knowledge is verifiable by experience or observation. **Empiricism**
8. ------- method use more general information to arrive at a specific conclusion **Deduction**
9. The extensive use of chocolate causes pimples. The given hypothesis is a (an) **Co-relation hypothesis**
10. How different theories address on issue comes under **Theoretical review**
11. The increase in sales promotion is positively associated with the customer satisfaction is an example of which type of hypothesis **Relational hypothesis 2-None of the given option 3-Descriptive hypothesis**

12. Which of the following is included in research proposal L**iterature review**

13. Higher the level of job satisfaction higher will be the employees **Positive relationship**

14. Which of the following is not a part of research design? **Objectives of the study**

15. 15-Which of the following research approaches is least concerned with the generalizability of finding **Qualitative approach**

16. Theories are supposed to be ------ and they could be applicable to different situation

    Generic
17. The reviewed literature must be **Relevant to the research project**
18. What is cross-sectional research **The collection of data from more one case at one moment in time**
19.
