We also provide Past papers for Mids. and Finals

Cross Check your answers befo re submitting directly from the file. We are not responsible for 100% correction as human error exists

1. Control for a third variable makes a:

a) Bivariate table

b) Trivariate table

c) None of the above

d) One variable table

Correct answer: None of the above

2. A collection of related records is called:

a) Data

b) Information

c) Knowledge

d) File

Correct answer: File

3. When a variable is so closely associated with the independent variable that we do not know which one is producing the experimental effect, the variable is:

a) Unspecified

b) Uncontrolled

c) Manipulated

d) Confounded

Correct answer: Confounded

4. Which of the following is a measure in which the researcher captures the intensity, direction, level, or potency of a variable construct?

a) Scale

b) Index

c) Weighting

d) Weighting

Correct answer: Scale

5. To establish that variable X causes variable Y, all of the following conditions should be met, EXCEPT:

File by MAM MEHWISH 03184148783
Paid LMS Handling Available

a) Both X and Y should co-vary

b) None of the given options

c) X (the presumed causal factor) should precede Y

d) Other factors should possibly cause the change in the dependent variable Y

Correct answer: None of the given options

6. In which of the following sampling methods, people are available such as volunteers or can be easily recruited?

a) Simple random sampling

b) Convenience sampling

c) Cluster sampling

d) Systematic sampling

Correct answer: Convenience sampling

7. The group that does not receive the treatment is called:

a) Independent group

b) Experimental group

c) Control group

d) None of the given options

Correct answer: Control group

8. Which of the following measures of central tendency is referred to as 'the most common or frequently occurring number'?

a) Mean

b) Mode

c) None of the given options

d) Median

Correct answer: Mode

9. The easiest way to describe the numerical data of one variable is with a:

a) Bar chart

b) Frequency distribution

c) Pie chart

d) Cumulative percentage distribution table

Correct answer: Frequency distribution

10. A researcher has taken a random sample from the population divided on the basis of the level of education, age, and salary package. Which of the following sampling design is he using?

a) Stratified random sampling

b) Cluster sampling

c) Systematic sampling

d) Simple random sample

Correct answer: Stratified random sampling
