SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

THE PARTS OF THE TABLE

1. Give each table a number.
2. Give each table a title, which names variables and provides background information
3. Label the row and columns variables and give name to each of the variable categories.
4. Include the totals of the columns and rows. These are called *marginal*. They equal t univariate frequency distribution for the variable.
5. Each number or place that corresponds to the intersection of a category for each variable i *cell of a table.*
6. The numbers with the labeled variable categories and the totals are called the *body of table.*
7. If there is missing information, report the number of missing cases near the table to accou for all original cases.

searchers convert raw count tables into percentages to see bivariate relationship. There are th ys to percentage a table: by row, by column, and for the total. The first two are often used a ow relationship.

t best to percentage by row or column? Either could be appropriate. A researcher's hypothe y imply looking at row percentages or the column percentages. Here, the hypothesis is that a

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Results with one variable

Frequency Distribution

Several useful techniques for displaying data are in use. The easiest way to describe the numerical data of one variable is with a frequency distribution. It can be used with nominal, ordinal, interval, or ratio-level data and takes many forms. For example we have data of 400 students. We can summarize the data on the gender of the students at a glance with raw count or a *frequency distribution*

Table 1: Frequency distribution of students

Gender	Frequency	Percent
Male	300	75
Female	100	25

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Random assignment is random in statistical/mathematical sense, not in everyday sense. In everyday speech, random means unplanned, haphazard, or accidental, but it has a special meaning in mathematics. In probability theory, random describes a process in which each case has a known chance of being selected. Random selection allows the researcher calculate the odds that a specific case will be sorted into one group or the other. A random process is the one in which all cases have an exactly equal chance of ending up in one or the other group.

Random assignment or randomization is unbiased because a researcher's desire to confirm a hypothesis or a research subject's personal interests does not enter into the selection process. It also assures the researcher that repetitions of an experiment – under the controlled conditions – will show true effects, if they exist. Random assignment of subjects allows the researcher to assume that the groups are identical with respect to all variables except for experimental treatment.

A **scale** is a measure in which the researcher captures the intensity, direction, level, or potency of a variable construct. It arranges responses or observation on a continuum. A scale can use single indicator or multiple indicators. Most are at the ordinal level of measurement.

An **index** is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score. This composite score is often a simple sum of multiple indicators. It is used for content or convergent validity. Indexes are often measured at the interval or ratio level.

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

SHAHID 0306 7069313 (STA630) Quiz #3 (2021,2020)

4. Instrumentation Effects: Instrumentation effects are yet another source of threat to internal validity. These might arise because of a change in the measuring instrument between pretest and posttest, and not because of the instrument's differential impact at the end. For example, in a weight-loss experiment, the springs on the scale weaken during the experiment, giving lower readings in the posttest.

A change in the wording of questions (may be done to avoid testing effects), change in interviewers, or change in other procedures to measure the dependent variable can cause instrumentation effect.

Performance of the subjects measured by the units of output in the pretest, but when measuring the output in posttest the researcher measures it by the number of units rejected, and the amount of resources expended to produce the units.

Ethical Issues in Lab Experiments

We have already discussed the ethical issues in research. Just for the sake of emphasis, it may be appropriate to very briefly repeat some of those which are specifically relevant to experimental designs. The following actions may be unethical:

- Putting pressure on individuals to participate in experiments through coercion, or apply social pressure.
- Asking demeaning questions from the subjects that hurt their self-respect or giving menial task to subjects that diminish their self-respect.
- Deceiving subjects by deliberately misleading them as to the true purpose of research.
- Exposing participants to physical or mental stress.
- Not allowing subjects to withdraw from the experiment when they want to.
- Using research results to disadvantage the participants, or for purposes not to their liking.
- Not explaining the procedures to be followed in the experiment.
- Exposing subjects to hazardous and unsafe environments.
- Not debriefing the participants fully and accurately after the experiment is over.
- Not preserving the privacy and confidentiality of the information given by the participants.
- Withholding benefits from the control group.

Human Subjects Committee

SHAHID 0366-7099312 (S1A63) Quiz +3 (2021-2020)

SHAHID 0306709313 STA630 Quiz # 3 (2021,2020)

Second, the coding categories should also be ***mutually exclusive*** and ***independent***. This me there should be no overlap between the categories, to ensure that a subject or response can b in only one category. This frequently requires that an "other" code category be included, so categories are all inclusive and mutually exclusive. For example, managerial span of control r coded 1, 2, 3, 4, and "5 or more." The "5 or more" category ensures everyone a place in a c When a questionnaire is highly structured, pre-coding of the categories typically occurs be data are collected. In many cases, such as when researchers are using open-ended response qu a framework for classifying responses to questions cannot be established before data collecti situation requires some careful thought concerning the determination of categories after process has been completed. This is called post-coding or simply *coding*. The purpose o **open-ended response questions** is to reduce the large number of individual responses t general categories of answers that can be assigned numerical scores. Code construction situations necessarily must reflect the judgment of the researcher. A major objective in code- process is to accurately transfer the meaning from written answers to numeric codes.

Code Book

EXPERIMENTAL RESEARCH

SHAHID 0306-7099213 (STA630) Quiz # 3 (2021,2020)

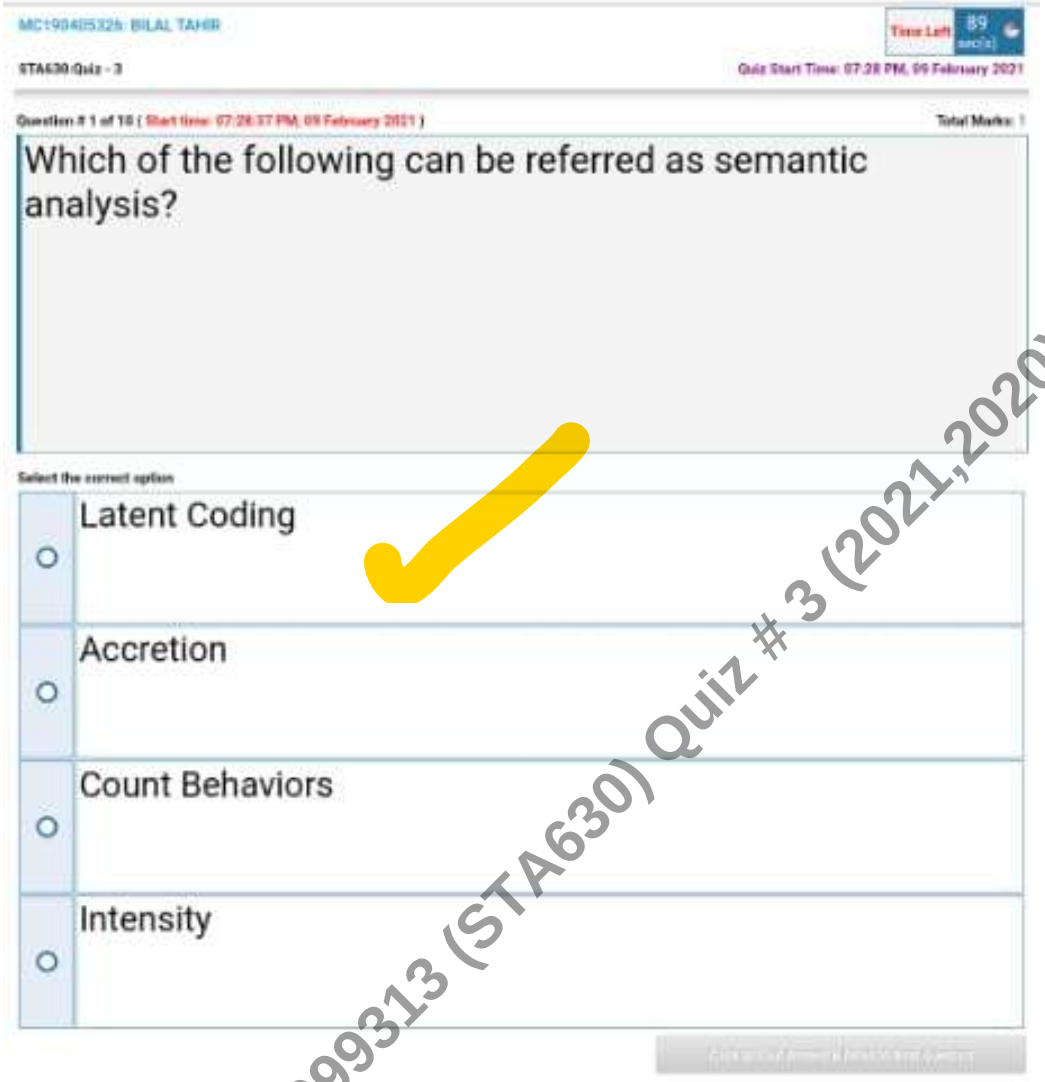

Experimental research builds on the principles of positivist approach more directly than do the other research techniques. Researchers in the natural sciences (e.g. chemistry and physics), related applied fields (e.g. engineering, agriculture, and medicines) and the social sciences conduct experiments. The logic that guides an experiment on plant growth in biology or testing a metal in engineering is applied in experiments on human social behavior. Although it is most widely used in psychology, the experiment is found in education, criminal justice, journalism, marketing, nursing, political science, social work, and sociology.

The purpose of experimental research is to allow the researcher to *control* the research situation so that *causal* relationships among variables may be evaluated. The experimenter, therefore, manipulates a single variable in an investigation and holds constant all other, extraneous variables. (Events may be controlled in an experiment in a way that is not possible in a survey). The goal of the experimental design is the confidence that it gives the researcher that his experimental treatment is the cause of the effect he measures.

Experiment is a research design in which conditions are controlled so that one or more variables can be manipulated in order to test a hypothesis. Experimentation is a research design that allo

MCQ's for QUIZ#3 ---BY ABU SULTAN---STA630---Lecture # 27 to 37		
S#	**Statement**	**Answer**
1.	If groups of participants are selected to represent sub-groups in the population (e.g. such as selecting an entire class of management students to be compared to a group of economics students), this is knows as…	Cluster sampling
2.	Which of the following term refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?	Analysis of covariance
3.	Which of the following is NOT a major method of data collection?	Correlation method
4.	Which type of observer is likely to get a reasonable insight into the participant's views and develop a good rapport with him?	Participant
5.	The group that receives the experimental treatment condition is called as ___	Experimental group
6.	The final stage in the coding process is	Data clearing
7.	An expectant pause is a part of:	Probing tactics
8.	Which of the following is an example of an issue that would be checked in a pilot testing?	Logical answers between questions
9.	Asking neutral questions is a part of	Probing tactics
10.	Which of the following best defines the population of study?	The total collection of elements about which….
11.	A researcher wants to study the impact of average hour of study in a week on CGPA of MBA students in virtual university of Pakistan. He focused on specifically the students specialized in finance. The total of number of MBA students in VU is an example of which of the following?	Target population
12.	Assigning numbers or other symbols to the responses, to group them into limited number of categories is called _____	Coding
13.	Which is most likely to yield qualitative data?	Focus group
14.	Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with woman?	How to overcome…
15.	Which of the following is not true about stratified random sampling?	Proportions of groups in the sample…..
16.	Which one of the following aspect needs to be evaluated during "Pilot Testing"?	All of the given options
17.	A census taker often collects data through which of the following?	Secondary data
18.	Mr. Raheel is concerned about potential problems with the reliability of his observers, which strategy would you suggests he should follow?	Specification, training and monitoring
19.	In frequency tables total of columns and rows are called	Marginal
20.	Which of the following elements are not required for structuring Observation in Non reactive research	Accretion
21.	Which of the following experimental designs has only one group, a pretest, a treatment and a posttest.	One Group pretest-posttest Design
22.	A form of the nonequivalent comparison-group design is recommend when:	All of the above

ABUSULTAN SHAHID0906709913(STA630) Quiz #3 (2021,2020)

23.	Frequency distribution technique can be used for which of the following scales?	All of the given options
24.	Which of the following issues should NOT be mentioned in an introductory statement of questionnaire?	What the findings of the research are?
25.	In qusai-experimental research design, causal interpretations can be made __	Only when the participants have been randomly selected
26.	All of the following are the instruction to record answers to open ended questions EXCEPT:	Use the interviewer's own words
27.	A numerical value calculated from population is called	Parameter
28.	Coding categories should be:	Mutually exclusive and independent
29.	Which of the following give a more "accurate" representation of the population from which a sample has been taken?	A large sample based on simple random sampling
30.	The process of changing data from their original form to a format that is more suitable to perform data analysis is called as ____	Data transformation
31.	Pilot testing can be beneficial in:	Analysis of data
32.	Bar charts or graphs are used for:	Discrete variables
33.	Which of the following is not example of historical comparative research?	Turnover
34.	Which of the following is a measure in which a researcher adds or combines several distinct indicators of a construct into a single score?	Index
35.	Which of the following is not something a researcher will have to consider when thinking about their sample size?	Length of questionnaire
36.	In random sampling, the probability of selecting an item from the population is:	Known
37.	Historians organize evidence usually in which of the following form?	Narrative form
38.	All of the given options are factors affecting internal validity of an experiment EXCEPT;	Recency effect
39.	A collection of related records is called _____	File
40.	Which is most likely to yield qualitative data?	Focus group
41.	When constructing a questionnaire, it is imperative to do each of the following EXCEPT ____	Use "leading" or "loaded" question
42.	Non probability sampling is used when which of the following condition fulfills	Researcher's is least concerned about …
43.	In experimental research, a specific event in the external environment occurring between the first and second measurement that is beyond the control of the experimenter and that affects the validity of an experiment, is termed as;	History Effect
44.	Which of the following can be referred as a Reputational sampling?	Snowball sampling
45.	The posttest-only design with nonequivalent groups is likely to control for which of the following threats to internal validity	Differential attribution

ABU SULTAN

64.	Sample is subset of	Population
65.	An expectant pause is a part of:	Probing tactics
66.	How do you find comfort at your work place? Very good, good, fair, poor This question is poorly structured. In your opinion what is the problem in its design?	Ambiguity and vagueness
67.	Which of the following best defines the population element/unit of study?	The subject on which measurement is being taken
68.	What is the main purpose of pilot testing?	To identify potential problems
69.	___ is not an example of non-probability sampling technique	cluster
70.	Have you ever had or been treated for skin allergy? Yes, No. Which type of question is it?	Loaded question
71.	The difference between parameter and statistics is called	Sampling error
72.	The list of all units in a population is called	Sampling frame
73.	___ is the list of elements from which the sample is drawn	Sampling frame
74.	___ is that unit about which information is collected and which provides the basis of analysis	Element
75.	Which of the following can be referred as a Reputational sampling?	Snowball Sampling
76.	Which of the following is a measure of inflation?	Consumer Price Index
77.	An important issue in index construction is to __ items	Weight
78.	Which of the following elements of observation is/are included in Non-reactive research?	All of the given options
79.	All of the following are stages in the selection of a sample EXCEPT;	Analyze data
80.	A stratified sample in which the number of sampling units drawn from each stratum is in proportion to the population size of the stratum is called a:	Proportional stratified sample
81.	Assigning males the value of zero and female the value of one in a database to record the gender of the respondent is an example of:	Coding
82.	Arranging data in a table is called:	Tabulation
83.	When initial subjects are selected randomly and additional subjects are obtained from recommendations of names from the initial subjects, this sampling technique is called:	Snowball
84.	When different interviewers are used in a pretest from those use in the posttest and this produces different results in the study, this is an example of:	Instrumentation effect
85.	Which of the following is a threat to the internal validity of experiment using a repeated measure design?	Instrumentation effect
86.	Many researcher beginner researchers believe that research involves testing, treating and testing again. This is an example of:	Pre-experimental research
87.	Which of the following sampling is least reliable but normally the cheapest and easiest to conduct:	Convenience sampling
88.	Which of the following is a form of non-random sampling?	All of the given

ABU SULTAN
SHAHID0306 7099313 (STA630) Quiz # 3 (2021,2020)

		options
89.	Which of the following has greatly facilitated the researcher to conduct tabulation and statistical analysis?	All of the given options
90.	Sampling in qualitative research is similar to which type of sampling in quantitative research?	Purposive sampling
91.	Which of the following is least likely to occur as an ethical problem with electronic research?	People are not likely to be able to stop once…
92.	All of the following are unethical issues, EXCEPT;	Seeking permission for entry
93.	The extent to which a test provides scores that are meaningful, appropriate, or useful is referred to as;	Accuracy
94.	Which of the following functions is performed by the Ordinal scale?	Order
95.	What is the difference between interval/ratio and ordinal variables?	Ordinal variables have a fixed zero point…
96.	Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?	Intensity
97.	Which of the following steps begins the analysis of qualitative data?	Describing the content and participants
98.	Which of the following represents the most general conceptualization in qualitative data analysis?	Topic
99.	Which of the following best describes qualitative data coding?	Numerically representing the concepts identified…
100.	The bivariate tables derived from trivariate table are called;	Correlational tables
101.	Quasi-experimental research is used because:	Random assignment is…
102.	Which of the following can be referred as Haphazard Sampling?	Convenience Sampling
103.	Most threats to _____ are taken care of by the experiment's design, while most threats to _____ need to be taken care of by the designer of the experiment.	External validity, internal validity
104.	Which of the following is a disadvantage of focus groups?	Requires objective, sensitive and ….
105.	Mr. Ali is concerned about potential problems with the reliability of his observers. Which strategy would you suggest, he should follow? • Train his observers carefully • Monitor his observers in the field • Specify the observational variables	All of the given options

ABU SULTAN
SHAHID 0306-7009313 (STA630) Quiz #3 (2021,2020)

	• All of the given options	
106.	Control in experimental research is best described as an attempt to:	Limits threat to internal validity
107.	Which of the following groups does not receive the experimental treatment condition:	Control group
108.	Experimental research builds on the principles of _____ approach more directly than do the other research techniques;	Positivist
109.	Which of the following terms best describes data that were originally collected at an earlier time by a different person for a different purpose?	Secondary data
110.	Easiest way to describe the numerical data of one variable is with a:	Frequency distribution
111.	We compare across rows if percentage down by____	Column
112.	We compare up and down in columns if percentage across ____	Rows
113.	Moderate size of table is ____	9 to 16
114.	The largest percentage forms a pattern across cells is called ____ relationship	Curvilinear
115.	If there is no relationship in table the cells percentage look approximately ___ across rows and columns.	Equal
116.	A ____ relationship looks like larger percentage in the diagonal cells.	Linear
117.	Researchers read percentage table to make ____	Comparisons
118.	In non-experimental research, a researcher controls for alternative explanations with _____	Statistics
119.	Alternative explanations are operationalized as a third variable called ____	Control variable
120.	Random assignment or randomization is ___	Unbiased

STA630 Solved Quiz

SHAHID 0306-4099313 (STA630) Quiz # 3 (2021,2020)

STA630:Quiz - 3

Quiz Start Time: 12:17 PM, 10 February 2021

Question # 2 of 10 (Start time: 12:18:09 PM, 10 February 2021)

Total Marks: 1

To establish that variable X cause's variable Y, all of the following conditions should be met, EXCEPT;

Select the correct option

- Both X and Y should co-vary
- X (the presumed causal factor) should precede Y
- Other factors should possibly cause the change in the dependent variable Y
- None of the given options

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Click to Save Answer & Move to Next Question

Which ONE is the most damaging problem for the researcher with secondary data?

Your answer:

d) It may only provide part of the answer.

Correct answer:

c) It may not address the aims.

Feedback:

The objectives (or purpose) must be central to any research project, otherwise irrelevant data will be generated.

Page reference: 70

SHAHID 0306-7099313 (STA630) Quiz # 2(2021,2020)

Question # 7 of 10 (Start time: 11:51:46 AM, 10 February 2021) Total Marks: 1

Which of the following is the most damaging problem for the researcher with secondary data?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- It may not be accurate
- It may be biased
- It may not address the aims
- It may only provide part of the answer

Question # 5 of 10 (Start time: 11:50:24 AM, 10 February 2021) Total Marks: 1

_____ is a measure in which a researcher adds or combines several distinct indicators

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Scale
- Index
- Collapsing
- Combining

Question # 9 of 10 (Start time: 12:12:58 PM, 10 February 2021) Total Marks: 1

Which of the following is true?

SHAHID 0306-7099313 (GTA630) Quiz # 3 (2021, 2020)

Select the correct option

- A study is internally valid but may not be externally valid
- A study must be both internally and externally valid
- The internal and external validity of studies are not related in any way
- None of the given options

Question # 7 of 10 (Start time: 12:25:33 PM, 10 February 2021) Total Marks: 1

Control in experimental research is BEST described as an attempt to:

SHAHID 0306-7099312 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Limit threats to external validity
- Increase the generalize ability of findings
- Equate the subjects on the treatment variable
- Limit threats to internal validity

 Total Marks: 1

‘Making inferences pertinent to the meaning and implications of the research investigation and drawing conclusions’ is definition of;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Interpretation
- Graphical explanation
- Summary statistics
- Visual representation

Question # 8 of 10 (Start time: 12:27:01 PM, 10 February 2021) Total Marks: 1

A process of changing data from their original form to a format that is more suitable to perform a data analysis is called as_____

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Data creation
- Information transformation
- Information creation
- Data transformation

Question # 6 of 10 (Start time: 12:24:12 PM, 10 February 2021) Total Marks: 1

Which of the following measures of central tendency is referred as 'the most common or frequently occurring number'?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Mean
- Median
- Mode
- None of the given options

Question # 10 of 10 (Start time: 12:14:27 PM, 10 February 2021) Total Marks: 1

The group that does not receive the treatment is called;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Experimental group
- Control group
- Independent group
- None of the given options

Question # 7 of 10 (Start time: 12:11:40 PM, 10 February 2021) Total Marks: 1

All of the given options are parts of experiment EXCEPT;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Treatment variable
- Dependent variable
- Experimental group
- Statistical control

Question # 5 of 10 (Start time: 12:10:16 PM, 10 February 2021) Total Marks: 1

Which of the following experimental designs has two groups, both the groups are exposed to pretest and posttest, the experimental group is exposed to treatment while the control group is not?

SHAHID 0306-7099313(STA630) Quiz # 3 (2021,2020)

Select the correct option

- Pretest and Posttest Experimental and Control Group Design
- Solomon's Four Group Design
- Classical Experimental Design
- Two Groups Posttest-only Design

Question # 3 of 10 (Start time: 12:08:55 PM, 10 February 2021) Total Marks: 1

Which of the following is/are the element/s of Observation in Non Reactive research?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- ○ External Appearance
- ○ Count Behaviors
- ○ Time Duration
- ○ All of the given options ✓

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 1 of 10 (Start time: 11:46:32 AM, 10 February 2021)

Which of the following experimental designs has two groups, both the groups are exposed to pretest and posttest, the experimental group is exposed to treatment while the control group is not?

Select the correct option

- Pretest and Posttest Experimental and Control Group Design
- Solomon's Four Group Design
- Classical Experimental Design
- Two Groups Posttest-only Design

Question # 2 of 10 (Start time: 11:47:41 AM, 10 February 2021)

Which of the following control techniques that is available to researcher, controls for both known and unknown variables?

SHAHID 0306-7099323 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- ○ Building the extraneous variable into the design
- ○ Matching
- ✓ Random assignment
- ○ Analysis of covariance

(Start time: 11:48:33 AM, 10 February 2021)

'Making inferences pertinent to the meaning and implications of the research investigation and drawing conclusions' is definition of;

Select the correct option

- Interpretation
- Graphical explanation
- Summary statistics
- Visual representation

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 2 of 10 (Start time: 11:48:36 AM, 10 February 2021) Total Marks: 1

In an experimental research study, the primary goal is to isolate and identify the effect produced by which of the following?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Dependent variable
- Extraneous variable
- Independent variable
- Confounding variable

Question # 3 of 10 (Start time: 11:49:12 AM, 10 February 2021) Total Marks: 1

Which of the following describes the situation in which the control variable intervenes between the original independent variable and the dependent variables?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Replication pattern
- Suppressor variable pattern
- Negative linear relationship
- Interpretation pattern

SHAHID0306-7099313 (STA630) Quiz # 3 (2021,2020)

rimental research, a specific event in the external environment occurring between the first and second measurement that is beyond the control of the experimenter and that affects the validity of an experiment, is term

t the correct option

- History Effect
- Maturation Effect
- Testing Effect
- Instrumentation Effect

Question # 4 of 10 (Start time: 11:49:49 AM, 10 February 2021) Total Marks: 1

The purpose of experimental research is to allow the researcher to control the research situation to evaluate which type of relationship?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Causal relationship
- Correlationship
- Linear relationship
- Multivariate relationship

In quasi-experimental research designs, causal interpretations can be made _____.

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

○	Only when rival explanations have been shown to be plausible
○	Only when rival explanations have been shown to be implausible
○	Only when the participants have been randomly selected
○	Only when there is a single participant in the experiment

Question # 6 of 10 (Start time: 11:50:59 AM, 10 February 2021)

Which of the following issues should NOT be mentioned in an introductory statement of questionnaire?

SHAHID 0306-7099613 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- The information will be kept confidential
- What the findings of the research are?
- Who is funding the research?
- Why the respondent has been chosen?

Question # 7 of 10 (Start time: 11:51:35 AM, 10 February 2021)

The group that receives the experimental treatment condition is called as _____

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- ○ Experimental group
- ○ Control group
- ○ Participant group
- ○ Independent group

Question # 8 of 10 (Start time: 11:52:20 AM, 10 February 2021)

Control for a third variable makes a:

Select the correct option

- One variable table.
- Bivariate table.
- Trivariate table
- None of the above

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 8 of 10 (Start time: 11:52:26 AM, 10 February 2021) Total Marks: 1

Which of the tables is based on cross-tabulation and the cases are organized in the table on the basis of two variables at the same time?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Bivariate Tables
- Frequency Distribution Table
- SPSS Table
- MINITAB Table

Question # 9 of 10 (Start time: 11:52:48 AM, 10 February 2021)

Threat to internal validity of an experiment arises when some subjects do not continue throughout the experiment, is referred as;

Select the correct option

- Selection Bias Effect
- Maturation Effect
- Testing Effect
- Mortality

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 9 of 10 (Start time: 11:52:52 AM, 10 February 2021) Total Marks: 1

Bar charts or graphs are used for:

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Categorical variables
- Ordered variables
- Discrete variables
- Continuous variables

Question # 10 of 10 (Start time: 11:53:15 AM, 10 February 2021)

Researchers read percentaged tables to make:

Select the correct option

- Differences
- Relationships
- Comparison
- None of the above

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 10 of 10 (Start time: 11:53:24 AM, 10 February 2021) Total Marks: 1

In order to read a table, students should first look at;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Variable labels
- Direction
- Percentages
- Summation

Question # 4 of 10 (Start time: 10:46:57 AM, 10 February 2021) Total Marks: 1

All of the following options are ethical issues in lab experiment EXCEPT;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Exposing participants to physical or mental stress
- Deceiving subjects by deliberately misleading them
- Debriefing the participants accurately after the experiment is over
- Using research results to disadvantage the participants

Question # 8 of 10 (Start time: 11:02:50 AM, 10 February 2021)

Total Marks: 1

When you are confident that the experimental manipulation produced the changes you measured in the dependent variable, your study probably has good _____ validity.

Select the correct option

- Construct
- Internal
- External
- Causal

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 3 of 10 (Start time: 11:02:55 AM, 10 February 2021)

Coding categories should be:

Select the correct option

- Mutually inclusive and dependent
- Mutually exclusive and independent
- Mutually exclusive and dependent
- Mutually inclusive and independent

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

STA630:Quiz - 3

Quiz Start Time: 10:58 AM, 10 February 2021

Question # 9 of 10 (Start time: 11:03:20 AM, 10 February 2021)

Total Marks: 1

Experimental research builds on the principles of _____ approach more directly than do the other research techniques.

Select the correct option

- Interpretivist
- Positivist
- Subjectivist
- None of the given options

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

STA630:Quiz - 3

Quiz Start Time: 10:58 AM, 10 February 2021

Question # 9 of 10 (Start time: 11:03:20 AM, 10 February 2021)

Total Marks: 1

Experimental research builds on the principles of _____ approach more directly than do the other research techniques.

Select the correct option

- Interpretivist
- Positivist
- Subjectivist
- None of the given options

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

STA630:Quiz - 3

Quiz Start Time: 10:58 AM, 10 February 2021

Question # 10 of 10 (Start time: 11:03:50 AM, 10 February 2021)

Total Marks: 1

A census taker often collects data through which of the following?

Select the correct option

- Standardized tests
- Interviews
- Secondary data
- Observations

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Question # 4 of 10 (Start time: 11:03:48 AM, 10 February 2021)

_____ variable(s) should be changed at a time when conducting a single-case design.

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- 4
- 3
- 2
- 1 ✓

Question # 5 of 10 (Start time: 11:04:28 AM, 10 February 2021)

Total Marks: 1

Which of the following is more operational with the help of coding system?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- External Appearance
- Count Behaviors
- Time Duration
- Content analysis

Question # 6 of 10 (Start time: 11:05:01 AM, 10 February 2021)

Which of the following is the process of marking segments of data with symbols, descriptive words or category?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Concurring
- Coding
- Coloring
- Segmenting

Question # 7 of 10 (Start time: 11:05:29 AM, 10 February 2021)

Total Marks: 1

In bivariate relationship, if an alternative explanation explains a relationship, then relationship is;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Spurious
- Factual
- Controlled
- None of the given options

Question # 8 of 10 (Start time: 11:05:54 AM, 10 February 2021)

Total Marks: 1

Which of the following term refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- ○ Experimental control
- ○ Differential influence
- ○ Matching
- ○ Analysis of covariance

Question # 9 of 10 (Start time: 11:08:41 AM, 10 February 2021)

Threat to internal validity of an experiment arises when some subjects do not continue throughout the experiment, is referred as;

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Selection Bias Effect
- Maturation Effect
- Testing Effect
- Mortality ✓

Question # 10 of 10 (Start time: 11:07:11 AM, 10 February 2021)

Total Marks:

What is the purpose of a control group?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Make the experiment easier to analyze
- Show the value of the dependent variable when the independent variable is not being manipulated
- To be able to better evaluate the effect of the independent variable
- To control all variables

Question # 1 of 10 (Start time: 10:45:04 AM, 10 February 2021) Total Marks: 1

Which of the following can be referred as semantic analysis?

SHAHID 0306-7099313 (STA630) Quiz # 3 (2021,2020)

Select the correct option

- Latent Coding
- Accretion
- Count Behaviors
- Intensity
