Explain budgeting with example?5 marks

Budgeting

A budget is a numerical plan for allocating resources to specific activities. Budgets are popular because they're applicable to a wide variety of organizations and units within an organization. There are four different types of budgets.

a) A revenue budget is a budget that projects future sales.

b) An expense budget is a budget that lists the primary activities undertaken by a unit and allocates a dollar amount to each.

c) A profit budget is a budget used by separate units of an organization that combines revenue and expense budgets to determine the unit's profit contribution.

d) A cash budget is a budget that forecasts how much cash an organization will have on hand and how much it will need to meet expenses.

These budgets are based on the assumption of a single specified volume—fixed budgets.

However, volume can't be predicted exactly. Therefore, a variable budget is a budget that takes into account the costs that vary with volume.

Maslow's need hierarchy? 5 marks

Answer:

Maslow's Need Theory

One of the most widely mentioned theories of motivation is the hierarchy of need theory put forth by Abraham Maslow, one of the most widely known theories of motivation. Maslow saw human needs in the form of hierarchy ascending from the lowest to the highest and concluded that, when one set of need is satisfied this kind of need ceases to be a motivator.

1 Maslow's hierarchy of needs from the most basic to the highest.

a. Physiological needs are basic and include needs for food, water, and shelter. Maslow took the position that until these needs are satisfied to the degree necessary to maintain life, other needs will not motivate people.

b. Safety needs pertain to the desire to be safe, secure and free from threats to our existence. These needs can be satisfied in the workplace by job continuity, or retirement benefits.

c. Belongingness needs involve the desire to affiliate with and be accepted by others. These needs are satisfied for most people by family and community relationship outside of work and friendship on the job.

d. Esteem needs are related to the two-pronged desire to have a positive self-image and to have our contributions valued and appreciated by others. According to Maslow, once people begin to satisfy their need to belong, they tend to want to be held in esteem both by themselves and by others this kind of need produces such satisfactions as power, prestige, status and self confidence.

e. Self-actualization needs pertain to the requirement of developing our capabilities and reaching our full potential. Maslow regards this as the highest need in his hierarchy. It is the desire to become what one is capable of becoming- to maximize one's potential and to accomplish something.
