

(23) Union of finitely many sets with zero content has zero content.

(24) The circle $\{(x, y) : x^2 + y^2 = a\}$ has zero content.

(25) Differentiable surface in $\mathbb{R}^n$ has zero content.

(26) A point is local extremum point if does not change sign in $S_\delta(x_0) \cap D_f$.

(27) A function may be differentiable at point even if its first derivative (partially) not continuous.

(28) A function of several variable is differentiable if its all partial derivative exist.

(29) Any bounded set E with only finitely many limit points has zero content.

(30) Iterated Integral.

$$I_1 = \int_c^d F(y) dy = \int_c^d \left(\int_a^b f(x, y) dx \right) dy.$$

$$I_2 = \int_a^b G(x) dx = \int_a^b \left(\int_c^d f(x, y) dy \right) dx.$$

$$I_1 = \int_c^d dy \int_a^b f(x, y) dx \quad \text{OR}$$

$$I_2 = \int_a^b dx \int_c^d f(x, y) dy.$$
