

Q.1 Which of the following is one of the main categories of community mining algorithms?

A. Optimization-based algorithms

B. Regression-based algorithms

C. Sorting-based algorithms

D. Encryption-based algorithms

Q.2 Which of the following is NOT one of the six generic stages of the SNA process?

A. Advertising and brand promotion

B. Data gathering and preparation

C. Knowledge extraction

D. Social network modelling

Q.3 Meta Platforms (formerly Facebook) is the parent company of:

A. Twitter and Telegram

B. LinkedIn and Pinterest

C. Instagram and WhatsApp

D. Snapchat and TikTok

Q.4 In SNA, nodes typically represent:

A. Data transfer rates

B. Websites

C. Individual actors or entities

D. Computer devices only

Q.5 What is the primary source of Facebook's revenue?

A. Selling hardware devices

B. Advertising

C. Subscription fees

D. Cloud storage services

Q.6 Heuristic-based algorithms rely on the concept of:

A. Increasing the number of clusters randomly

B. Maximizing message propagation

C. Reducing memory usage

D. Identifying network bottlenecks using Min-Cut sets

Q.7 Which of the following is NOT listed as an advantage of using Facebook in the content?

A. Built-in video editing software

B. Finding like-minded people

C. Low-cost marketing tool

D. Targeted marketing

Q.8 Twitter is primarily known as a:

A. Microblogging and social networking service

B. Video-only streaming platform

C. Professional networking service

D. Photo-sharing platform

Q.9 Which of the following is mentioned as a feature or advantage of using Twitter?

A. Mandatory real-name identity

B. Native GIF search

C. Unlimited message size

D. Paid account requirement

Q.10 What is the primary purpose of Social Network Analysis (SNA)?

A. To increase the number of social media followers

B. To understand relationships and structures among entities in a network

C. To measure website performance

D. To analyze financial transactions in a company
