Bif 501at 8:30am

Human genome project5

Exon prediction5

EST2

GENSCAN2

define following3

Genome repeats

Tandem repeats

Interspersed repeats

Diff b/w coding and noncoding sequences3

Mcqs past main sy thy.

ORfs 2 marks

Dna mutation.2

GCG is the obrivation.

Structural annostation.3

function of start and stop codon

what you know about nucleotide collinear sequence

advantages of biological databases

drawback of brute force

between proteome comparison difination and explanation

AB initio annotation in the next generation

Bif 501

Pheudogene 2

Gene Order 2

KMP

Contact Us:	**0322-8877744**	

Ways of sequence submission 3

Synteny wly mn sa question tha statement sahi yad nhi

Write down step of dynamic programing 3 marks

Pilot project 5 marks

Logos 5 marks

today bif 501 paper msqs from past paper

what are exons

describe sequencing logos

genomic repeats tandem repeats and interspersed repeat

define readseq

long common sequence

Difference between prokaryotes genome and eukaryotes genome

Transcripction

Records of GEO

Computational in bio

What are position of genomes

LINES AND SINES 2

Detail distance 2

Dynamics programming 3

Tasks for genome analysis 5

Brute forces approach in detail 5

BIF PAPER AT 12:00PM

What is PAM and PAM 1

What are six organisms

Draw Binary fission of the following figures 5 marks

What is KAM ..?

What is multiple alogrithm .?

Dif artholog and paralog

Define genome

Similarity based on gene pridiction?

Define match, mismatch, alignment 5marks ka

Brute force algorithm 5 marks

Dif artholog and paralog

Define genome

Similarity based on gene pridiction?

Define match, mismatch, alignment 5marks ka

Brute force algorithm 5 marks

Today my BIF 501 pepar. How microbes are useful in climate change studies (2) write down the steps of brute force algorithm (5) Difine synteny ,its importance & how gene order can be changed (5) How edit distance is computed in algorithm for LCS .(3) Differentiate prokaryotes and Eukaryotes genome.3 , List down edit distance 2

BIF PAPER AT 12:00PM What is PAM and PAM 1 What are six organisms Draw Binary fission of the following figures 5 marks What is KAM ..? What is multiple alogrithm .?

Dif artholog and paralog Define genome Similarity based on gene pridiction? Define match, mismatch, alignment 5marks ka Brute force algorithm 5 marks

Bif501 Difference between prokaryotes genome and eukaryotes genome Transcripction Records of GEO Computational in bio What are position of genomes

what are exons describe sequencing logos genomic repeats tandem repeats and interspersed repeat define readseq long common seuence 501 paper

Bif 501. Enzymes involves in process of transcription and translation

What ard long common sequence purposes

What are 6 moels of organism

What algotherim are used used for exact matches and mismatch , enlist the steps

What steps are involved in genome sequencing of organism

What are 4 cases of pattern finding.

Bif 501 15.12.2019 04:00
Detail on sequence logos (5)
Gene expression omnibus (5)
Why we use KMP matching (3)
Applications of bioinformatics (3)
how mutations occur in DNA (2)
note on MS2 sequencing (2)
10 or 12 mcqs from M.IMRAN's file

Today my BIF 501 pepar. How microbes are useful in climate change studies (2) write down the steps of brute force algorithm (5) Difine synteny ,its importance & how gene order can be changed (5) How edit distance is computed in algorithm for LCS .(3) Differentiate prokaryotes and Eukaryotes genome.3 , List down edit distance 2

BIF...501,,,,,,mcqs thk thy conceptual thy.

Question.

1. Ms2 sequence

2. Define LDA

3. Heterochromatin nd euchromatin

4.ORF

5. Clustal analysis of protein

6. Binary tree search with example,,, something like that..

Today Paper Of Bif501 :

Note on centromere and Telomere?

Short note on NF-KB sites?

Define Exons?

How restriction mapping is a part of physical mapping and write its uses and and benefit of restriction mapping?5 mark

Write the two component of KmP algorithm and explain it?5 mark
