Bt_101:
Q: difference b/w hibernation and winter sleep?
Q: importance of water
Q: biological species concept
Q:how we analyze which kind of soil
Q:population dispersion
Q:difference b/w immigration, emigration

Bt 101 dated 04-06-2017

Photosynthesis.... 2 mark
Role of wind action in lentic water bodies...2 marks
Composition of geosphere ...3 marks
Difference between species abundance and species evenness...3 marks
Survival mechanism in hot and cold environment. ..5 marks
Indicator species with 3 example. ..5 marks

BT 101Mid Term 10:30 am
4-06-2017
1. Define Torpor with example 2
2. What are Population dynamics? 2
3. What are the characteristics of Community Ecology 3
4. Differentiate Generalist and Specialist Species which is better? 3
5. Define Cultural Eutrophication and give characteristics of Eutrophic Lakes. 5
6. Define and explain Indicator Species with 3 examples. 5

BT 101
Define trophic level with an example
Define ecological pyramid
Differentiate between the plankton and phytoplankton
Define and explain ecological pyramid types 5 marks
Mcqs were easy and coming from first portion more

Mera BT101 ka tha
Reproductive potential and factors affecting it(5)
Weathering and its types(5)
Soil hotspots(2)
Characterostics of ectotherms(3)
Non-native species(3)
Generalist species(2)

Todays exams of bt101 at 9 am
Photosynthesis?
Torpor + example?
Species abundance and species evenness?
Biotic growth, intrinsic growth rate, environmental resistance ?
Species + primary concept ?
Role of light?..

BT_101
Q: difference b/w hibernation and winter sleep.
Q: the importance of water
Q: biological species concept
Q:how we analyse which kind of soil
Q:population dispersion
Q:difference b/w immigration, emigration

Mera BT101 ka tha
Reproductive potential and factors affecting it(5)
Weathering and its types(5)
Soil hotspots(2)
Characterostics of ectotherms(3)
Non-native species(3)
Generalist species(2)

Bt101 ppr
Short:
How decomposers work?
Give the composition of geosphere?
Define filter feeders and deposit feeders also give example
How we analyze the soil.type?
Long:
Define ecological pyramid also explain the types
human influence on environment and what are da factors

bt101
1: photoautosynthesis & chemoautosynthesis
2:torpor
3:easitivation(3)
4:ecological pyramids (5)
5:specialist and gernelist species (3)

Bt101 Today paper was
Long
1-Define specie and 4 basic factors that determine species
2-define
Primary secession
Pioneers community
Serial stages
Short question
Torpor
Demography
Differentiate Winter sleep and hibernation
What factor that we determine specie

BT101 MID TERM PAPER!!!!!
hotspot species=2, zones of the river, factors of population dispersion, atmosphere=5, growth of population=5

BT101 ppr.
plankton and phytoplankton. tertiary consumer. enlist characteristics of community ecology. examples of teary succession. population regulation
