Bt301
Timing: 12:30
12_12_2017

Subjective
1)Primary secondary and tertiary
2) structure of proteins? (5)
3) Polindromic sequence (2)
4) Psedue genes (2)
5) Restriction modification (5)
6) What proposed by cliffered tablin in
7) hardwared collage (3)
8) Name any five amino acids (3)

Mcqs

1) Ti plasmid is found ?
2) Ans was cDNA
3) Human genome size
3000mb
4) Primary structure of protein is
5) Ribonucrotides have types?
3
6) In clonning.....high low
7) Jams whatsan in
1953
8) Theoder schewdn 1869
9) Ans was p32
10) Ans was NaCl
11) Ans was chromatin
12)Pentose suger+nitrogenous bases = ?
13) Ans was duplication
14) Human mitochondrial genome.....37genes

VU Biologists www.facebook.com/groups/vubiologists
Bt301 13/6/17 Mcq 20.
Total marks. 40 Human genom and bacterial genome are..... Size of human gene is.... RM nomenclature given by.... Westren blotting technique used for.... Short question 1. Define protemic. 2 marks. 2. Define natural plasmid. 2 marks 3. Define green biotecnology with example. 3 marks 4. Define palindromic sequence. 3 marks Long questions 5. Electroporation technique. 5 marks 6. Fredrick Grifth experiment. 5 marks.
Bio 301, 10:30, 10 June 17,
1) difference between spermatogenesis and oogenesis? 2) law of independent assortment 3) drosophila linkage mapping 4) incomplete dominance 5) sickle cell anemia 6) chromosome scaffold
Bio(301)...paper. ..
1)DOminant and recessive define?
2)define locus?'
3)define prophase of mitosis?
4)what is the bleanding and particular hypothesis?
5)define..lagging starnd Leading starnd Okazaki fragnment Sister chromatid.....
6)what is CEN.DNA..and write its domain name.....
BT301

1) Define Multimer? 2) Autoradiography? 3) Importance of origin region in Plasmid? 4) Role of primase in antibiotics? 5) Restriction Modification phenomenon? 6) Define Biotechnology and its branches?

Bt 301

mid Types of RNA.
two functions of nucleic acid.
chargaff rule.restriction modification.
Biotechnology defination and uses.

BT301:- 12 pm

Q:1 what is autoradiography?
Q:2 what is the role of electrophoration?
Q:3 What is the role of Ori in plasmids?
Q:4 Differentiate between multimer,ologimer and protomer
Q:5 Explain Chargaff rule
Q:6 what is nuclein?

BT301

1 charff rule (5) 2: R-M system mechanism (5) 3: major and minor groove , number of nucleotide in them (3) 4:Euchromatic & hetrchromatin (2) 5:Ntural plasmid (2) 6:Principle of wetern blotting

bt301

1:define protiemics (2) 2: defind genome (2) 3:palindromic sequence (3) 4:name of any five amino acids (3) 5: work of frinklins and wilkins (5) 6: R-M system mechanism (5) Structure of protein 5 no Electroporation 5 no Pregnancy test 3 no

Today paper of #bt301 4:30pm Which type of restriction modification is most important? (2) Different forms of viral genome(2) Differentiate b/w Promotor, oligomer, and multimer (3) Define Type III of restrictions modifications (3) Franklin and Wilkins work(5) Define restrictions modification briefly (5)

Bt 301

Name of 3 bonding parts which make complete nucleotide.2 marks Natural plasmids. 2 marks Green biotechnology 1 example.3 marks Name some factors which help in the mobility of dNA.3 marks Chargaff rule.5 marks Electroporation technique .5 marks

Bt 301

1: define nucleotides 2: define isopynic centrifuge 3: how plasmids play important role in microbial resistance against antibiotics? 4: what is the length of major and minor groove, also write the number of nucleotides in major groove? 5: Franklin and Wilkins work 6: describe electroporation technique.

bt301 paper

1.Define autoradiography? 2 marks 2. 3 domains of protein?2mrks 3. Plasmid as a cloning vector using high & low molecular weight?3mrks 4. Ancient pregnancy test?3mrks 5. primary secondary tertiary & quaternary structure of a protein? 5 marks 6.electrophoration techniques? 5mrks MCQ's from ppts lessons

Mid Past Papers:-

Questions:-

1. 1. Define the term biotechnology and name its major branches 2.waht is restriction modification phenomenon 3. What is the length of SINES and LINES 4.what are the benefits of genomic research in molecular medicine 5. What is western blotting

VU Biologists www.facebook.com/groups/vubiologists

6. Write two significant functions of Nucleic acids 7. Justify influence virus in one line? 8. RNA types? 9. Explain Chargaff rule?? 10. Explain restriction modification?? 11. Northern blotting??
12. What was pregnancy test performed to test gender in ancient period?
13. What is the role of transposons in human genome?
14. What was the Frederick grifth experiment about genetic material?
15. What is the role of electroporation technique?
16. What are the general consideration for nomenclature for restricted enzyme? Give example
17. What is the main components consisting the RNA molecule?

BT301 8:30 am Mid trim Paper Spring 2018
Q: Would you please describe the structure of influenza virus in one sentence only? 2 marks
Q: What is isopycnic centrifugation? 2 marks
Q: What is Plinderomic sequence? 3 marks
Q: What are advantages of using low molecular weight plasmids for cloning? 3 marks
Q: Describe chargaff rule? 5 marks
Q: What is electroporation technique? 5 marks
Over all paper was easy

Bt301
Xray difrction 5mrks
Electroporation 5
Minor and major groove length and nucleotides 3
Gene 2
Mcq
1...tranfers phosphate from atp
2..... Has single chromosome with protein core
3Dna has one oh removed at .... Carbon
4 Pcr is used for ....
Dna rna dna$rna protein
5 .... Amplifies the number in vitro
Pcr hybridization clonning
6 Hae 3 is identifies .... Nucleotides
7 Ti is found in .....
8 Claudia wala aya tha k new ka nam kya tha
9 Making of rna from dna is called .....
10 Yeast genome was sequenced till.....
11 Nomenclature was presented by.....
12 Dna is lysed by..... Enzymes
13 Psi angle of a helix is.....

Bt301 12:00 Manga ch
Waht is RM phenomenon 5marks
What are branches of bio technology 5marks
What is ori region 3 marks
Why psc101 not effective 2 marks
Amino acids names 2 marks
Mcq's were mostly easy ,all form ppts

Restrictions and modifications model
Fredrick Griffith model
Effect of ethedium bromide on body
Effect of retrotransposons on human genome
Components of rna
Green biotechnology
