BT301 current paper

10.30 am Sunday 18-12-16

20 mcqs

5*2=10 q

2*2=4 q

3*2=6 q

MCQS:-

It is concerned with the discovery and development of innovative drugs and treatments. ? Red biotechnology

It is used in lyses (protease K)

Nuclien discovered??

LTR consists of …. Bp?

Benefits of genomic research???

Nucleotide differ due to change in??? bases

The hydrophilic backbones of alternating deoxyribose and phosphate groups are on the outside of the double helix, facing the surrounding water.

How many bases DNA and RNA have???

mRNA transcribe the template into Protein

How many functional groups attach to alpha carbon including alcohol R group.

Capsid protects the Nucleic acid in virus.

The bacterial chromosome is avery long (up to 1mm).

Genomics, in contrast, is the stud of the entirety of an organism's genes –called the genome.

PCR amplification is used to amplify?

Yeast genome was completely sequenced by 1996

LINES • 1-5 kb

Koi restriction enzyme wala mcq tha baki 3 yd nai ☹

2*2

1- **Major technique use for genome characterization**
2- **Reverse transcriptase**

3*2

1- **Nomenclature for restriction enzyme**
2- **Benefits of genomic research?**

5*2

1- **What is biotechnology? Write its field name**
2- **Function of retrotransposons in human genome.**
