

Technology in Language Teaching (ENG529)

 **Introduction to Technology:** Technology refers to the use of computers, software, and other digital tools to manage, process, and communicate information.

 **Why technology**

Technology enhances language learning and teaching by providing:

- Access to resources and information
- Efficient communication and feedback
- Personalized and interactive learning experiences
- Opportunities for collaboration and connection

 **Benefits of learning technology**

Learning technology enables:

- Instant access to information and resources
- Real-time communication and feedback
- Flexibility and autonomy in learning
- Development of digital literacy and skills

 **Instant Information**

Technology provides immediate access to information, enabling learners to:

- Research and explore topics
- Verify information and sources
- Stay updated on current events and developments

 **Real communication**

Technology facilitates authentic communication, allowing learners to:

- Connect with native speakers and experts
- Engage in discussions and debates
- Practice language skills in real-life scenarios

 **A variety of different tools**

ENG529_Save Me Please

Technology offers a range of tools for language learning, including:

- Language learning apps and software
- Online resources and websites
- Social media and discussion forums
- Multimedia and interactive materials

 **Pedagogy Vs Technology** : Pedagogy focuses on the art of teaching, while technology provides the tools and resources to support and enhance teaching and learning.

Technology in Language Learning

Technology is integrated into language learning to:

- Supplement and enhance instruction
- Provide personalized and interactive experiences
- Develop language skills and cultural awareness

Technology in Education

Technology is used in education to:

- Support and enhance teaching and learning
- Provide access to resources and information
- Develop digital literacy and skills

Technology in the Classroom

Technology is used in the classroom to:

- Enhance instruction and engagement
- Provide real-time feedback and assessment
- Facilitate collaboration and communication

Technology Use in Language Education

Technology is used in language education to:

- Develop language skills and cultural awareness
- Provide access to authentic materials and resources
- Facilitate communication and collaboration

Technology in English Language Classroom

Technology is used in the English language classroom to:

- Develop English language skills and cultural awareness
- Provide access to authentic materials and resources
- Facilitate communication and collaboration

Technology as an Effective Tool for Language Learning

Technology can enhance language learning by providing:

ENG529_Save Me Please

- Interactive and immersive experiences
- Access to authentic materials and resources
- Opportunities for practice and feedback
- Personalized and autonomous learning

Use of Technology & Improvement of Language Teaching & Learner Learning

Effective use of technology can:

- Enhance teaching and learning
- Increase learner engagement and motivation
- Develop language skills and cultural awareness
- Provide opportunities for feedback and assessment

The Outcome Dependent on the Language Teacher's Use of Technology

The effectiveness of technology in language learning depends on:

- The teacher's knowledge and skills in using technology
- The teacher's ability to integrate technology into teaching and learning
- The teacher's willingness to adapt and innovate

Application of Technology & a Changed English Classroom

Technology can transform the English classroom into a:

- Technology-embedded classroom
- Student-centered and autonomous learning environment
- Interactive and collaborative space

Technology-embedded Classroom Develops Learners' Autonomy

Technology can promote learner autonomy by:

- Providing access to resources and materials
- Encouraging self-directed learning
- Developing skills in using technology for language learning

Use of Technology Develops Learners' Higher Order Thinking

Technology can promote higher order thinking skills by:

- Encouraging critical thinking and analysis
- Developing problem-solving and creativity
- Fostering collaboration and communication

Distance Language Teaching with Technology

Technology enables distance language teaching through:

- Online courses and resources
- Virtual classrooms and videoconferencing

ENG529_Save Me Please

- Online communication and collaboration tools

Technologies, tools, and learning environments

Various technologies and tools can be used in language learning, including:

- CMC (Computer-Mediated Communication) tools
- Audiographic and videoconferencing tools
- Learning management systems
- Telecollaboration tools
- Web 2.0 tools (e.g., blogs, wikis, social media)

CMC-based environments

CMC tools enable language learners to communicate and collaborate through

- Email and messaging
- Online discussions and forums
- Video and audio conferencing

Audiographic and videoconferencing environments

- Engage in real-time communication and feedback
- Practice speaking and listening skills
- Participate in virtual language exchange and collaboration

Learning management systems:

- Online course management
- Resource sharing and access
- Communication and feedback

Telecollaboration

Telecollaboration tools enable language learners to:

- Collaborate on projects and tasks
- Engage in peer feedback and review
- Develop teamwork and communication skills

Web 2.0 tools

Web 2.0 tools enable language learners to:

- Create and share content
- Engage in social networking and communication
- Develop digital literacy and skills

 **Enquiry into pedagogical issues:** Investigating effective teaching practices and learning outcomes in language education, including the use of technology.

 **Task design:** Creating learning activities and tasks that incorporate technology to enhance language learning and teaching.

ENG529_Save Me Please

- + **Assessment of learning:** Evaluating language learners' progress and achievement in technology-enhanced learning environments.
- + **Teacher expertise:** Developing teachers' knowledge and skills in using technology for language teaching and learning.
- + **The Continuing Evolution of Virtual Worlds for Language Learning:** Virtual worlds are online, immersive environments that can be used for language learning and teaching.
- + **What are virtual worlds?:** Virtual worlds are online, interactive, and immersive environments that simulate real-world experiences.
- + **A brief history of VWs:** Virtual worlds have evolved from early text-based environments to modern, graphically-rich platforms.
- + **Overview and categorization of virtual worlds today:** Virtual worlds can be categorized based on age level, game level, socialization level, education focus, and technical requirements.
- + **Categories of VWs:**
 - Social virtual worlds (e.g., Second Life)
 - Game-based virtual worlds (e.g., World of Warcraft)
 - Educational virtual worlds (e.g., Minecraft: Education Edition)
- + **The future of VWs:** Virtual worlds will continue to evolve and improve, offering new opportunities for language learning and teaching.
- + **Authoring Language-Learning Courseware:** Software that allows teachers to create language learning materials.
- + **What is language courseware?:** Computer programs used to teach languages.
- + **Personal computers and authoring tools:** PCs and software used to create language learning materials.
- + **Multimedia courseware:** Language learning software that uses images, audio, and video.
- + **Web delivered courseware:** Language learning software accessed through the internet
- + **E-Books:** Electronic versions of printed books, readable on electronic devices.
- + **Commercial E-books on the Web:** E-books available for purchase online.
- + **Google Books:** A search engine for books, offering previews and some free e-books
