

Paper#1

Edu 401 15-8-2023

- Enlist three student- Migration strategies

Ans:-

10. What are the student adjustment Mitigation strategies? 15Aug2023

Many environment-friendly schools around the world have incorporated EE into their design, operation and curriculum.

The most common strategies are:

Incorporating EE into the curriculum, with adaptations for the local context. Lessons on key climate

change topics such as global warming, the greenhouse effect and weather-related disasters are not enough.

At-risk communities must develop local adaptation policies and practices, addressing disaster risk

reduction, emergency preparedness and locally relevant sustainable development options.

A nationally significant, child-focused, participatory approach works best. In South Africa, for example, stakeholders including the National Environmental Education Program and the weather service designed curricular material for climate change.

The tools included resource guides, training workshops, a competition among schools and a national media campaign

Strategies to raise awareness: Media campaigns, messaging through youth radio programs, theatre and music, conferences, environment day celebrations, and other events and programs within and outside of school can complement formal curricula and significantly strengthen learning.

These strategies require collaboration with non-governmental organizations and the private sector.

In Albania, for example, the Child-Led Environmental Education Initiative created a partnership with

local companies that introduced schools to recycling, curricular reform, teacher training and a communitywide media campaign.

- Features of formal learning

Ans:-

Q13. Enlist five features of formal learning? 15Aug2023

- ✦ A prescribed learning framework
- ✦ An organized learning event or package
- ✦ The presence of a designated teacher or trainer
- ✦ The award of a qualification or credit
- ✦ The external specification of outcomes

➤ Presents five features of formal learning 15Aug2023

- a prescribed learning framework
- an organized learning event or package
- the presence of a designated teacher or trainer

MUI

-
-
- the award of a qualification or credit
 - the external specification of outcomes

- **The role of ideology and culture of population education**

Ans:-

Ideological theories and culture provide a framework for setting goals and filters for selecting content. People acquire population-related knowledge throughout their lives ---- a process of absorption which is generally part of a larger process of socialization.

When attention is focused on the learner, it is obvious that, in many cases, his world, his macro level may not extend far beyond the boundaries of his village, local area or community. This is particularly true in more isolated rural communities among the learners where literacy level is low but it is an important consideration for school programs as well.

Planners of population education activities must identify the level of aggregation ---- the type and size of social group ---- to which learners are able to relate. To try to widen the learners view beyond a narrowly - defined world is a legitimate aim but will be unsuccessful if the macro or societal level is too far removed from his experience.

Ways must be found to translate family problems into broader terms and to create an awareness today of what the problem might be for others tomorrow.

Family, kin, peers and community play a dominant role in acquisition of a folk demography the knowledge, attitude, values norms, systems of belief that people come to hold about population related matters, such as family and marital relationships, social customs, and status and role of women and children and the choice of residence.

Sometimes this learning is clearly perceived as having population repercussions; most often, however, it is, part of the conventional wisdom of the group or culture.

One of the goals of population education is to assist learners to identify, examine and understand their folk demography and implications it has for population decisions. In this way, the folk demography of learners becomes a significant content area of population education.

Identification of cultural differences and sensitivities is an important part of program planning and development for it raises issues about the relevance of the curricula, the adaptation of content and method to meet specific needs and the administration of decentralized programs.

- **Describe the persuasion and prescription..**

Ans:-

8. Explain the persuasion and prescription in relation to population education? 15Aug2023

No education system, anywhere in world is free from some degree of persuasion and prescription, despite the theoretical commitment to truth telling. Training for citizenship and developing the sense of being part of a nation usually involves elements of conditioning. Furthermore, no educational process can be totally value free, because any selection of facts involves conscious and unconscious value choices. Population education faces these general problems and is also potentially confronted with a more direct conflict between theory and practice: the degree to which the educational system can or should directly support the population policies of the nation. If the government has determined that the small family shall be the norm, or that migration must take place in order to relieve dense population, or that country's population should increase, what is the proper and possible role of the educational system?

- When the school is in landsliding areas what strategies you adopt for preserve the landsliding

Ans:-

At the local level, children-initiated change through specific activities to prevent landslides, removing large rocks hanging above school buildings and planting stabilizing shrubbery on steep hills. One area where the children worked on what's preventing landslides, their schools were in areas where landslides were common. How do you prevent landslides, the first thing they did was they removed the large rocks because when large rocks fall, they create more damage and provide opportunities for greater hurt. 15Aug2023

Once the large rocks were removed the next thing that they did was, planting stabilizing shrubbery, not just any old plants trees and shrubs, but shrubbery that would hold the rock and the soil in place so that landslides would be reduced. This calls for a lot of research for beyond what classrooms and teachers can provide for. That is why young people need to be involved because they are able to and willing to put in the extra time and effort that would be needed to find appropriate solutions.

- Describe migrants trends

Ans:-

12. Explain migratory population trends? 15Aug2023

Migratory population shifts ---- which are seldom anticipated or planned for ---- place an extra burden both on the area receiving inhabitants and on the area from which the migrants have come.

In the typical situation, rural areas in developing countries lose their better education youth ---- the people most capable of future leadership and innovation to the cities. Migration may so seriously cripple a community that it is forced to discontinue its services and cut back employment opportunities.

Mcqs from past papers and also notes

Paper Edu401. 15aug2023 Time:9:30

Mcqs mostly Handouts not easy

Q#1 Systematic Research&Pop studies

Ans:-

Systematic research and population studies. 15Aug2023

MUHAMMAD IMRAN

Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

2:Environmental Education poRa sawal yd nahi

Ans:-

Q: Relationship btw quality education and environment education.

15Aug2023

ANS:

Quality	Environment
Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society.	Knowledge and understanding of the environment and environmental challenges

Implementation of environment education.

Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions

What is Environmental Education----5 15Aug2023

Most simply, environmental education is education in, about, and for the environment. Environmental education is an “approach, a philosophy, a tool, and a profession,” built on the following three goals:

1. to foster clear awareness of, and concern about, economic, social, political, and ecological interdependence in urban and rural areas.
2. To provide every person with opportunities to acquire the knowledge, values, attitudes, commitment, and skills needed to protect and improve the environment.
3. To create new patterns of behavior of individuals, groups and society as a whole toward the environment.

3:What role play environment friendly schools for climate change?

Ans:-

Q: What role environment friendly schools play for climate change? Discuss. 15Aug2023

ANS: With a view to promoting a child friendly environment in schools and to ensure children's rights to learn in their own mother tongue, children's mother tongue should be employed as the medium of instruction.

4;Billets views on informal learning

Ans:-

27. Billet view of informal learning? 15Aug2023

Billet (2001): There is no such thing as informal learning. All learning takes place within social organizations or communities that have formalized structures. Informal Learning is organic or holistic, engaging the whole person, so that intellect, emotions, values and practical activities are blended.

5: Financing in privatization

Ans:-

34- Financing in privatization? 15Aug2023

Answer (i) How much does the private school invest in education annually.

(ii) How much schools cost to children from household in low middle and high income groups.

(iii) How much profits they earn.

Paper#3

[8/15, 1:39 PM] Edu401

1. Environment friendly school Repeat

2. Technology

Ans:-

action are both necessary. Information and communication technology play an important role in facilitating exchanges of experiences and views among children in different countries and regions. Now when something good happens in one area it should not be limited to that area. with the internet and video conferencing and Skype and those kinds of facilities today it is important to interact and exchange ideas with children and individuals from around the world. 15Aug2023

3. Formal learning

Ans:-

EU's Definitions (EC 2001) I

Formal Learning: 15Aug2023

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective.

4. Ideology and culture Repeat

Mcqs almost handouts

Paper#4

My Today Paper: Edu 401

Timing: 4:30 17aug2023

(Mcqs from mostly handouts some from Everblue file)

(50% subjective from Muhammad Imran file)

1) why it is necessary to share ideas with children or individual? 3

Ans:-

Sharing ideas with children or individuals nurtures their growth, enriches their thinking, and empowers them to become well-rounded, engaged, and informed members of society.

Reasons for sharing ideas are following.

- Learning for development
- Communication skill
- Building relationship
- Problem solving
- Decision making
- Empowerment

2) differ b/w immersion model & National language model ? 3

Ans:-

1. Immersion model and national language model. 17Aug2023

Immersion Model: Initial instruction is given in the national language with oral discussion and instruction permitted in the local language

National Language Model: Sole instruction in the national language, with no teaching in the mother tongue

3) Decision making K along Tha bhol gya ? 3

Ans:-

8. Decision making 17Aug2023

Few individuals make population-related decisions outside a group context and in many cases, the decision-making unit is the group itself, such a large family unit in Pakistan or a street committee in the local villages.

Less obvious but equally significant is the impact which the group has upon decisions made by individuals and within families. Clarifying these influences is part of the process of creating informed decision-makers. In all cases, the aim is to increase understanding of the interrelationships between macro and micro units of the society .

However, the range of options that are theoretically open to individuals and groups may, in reality, be quite limited due to lack of equity and social justice and to the presence of cultural norms, traditions and taboos.

4) The role of systematic approach in population studies? 3 Repeat

5) Livingston view on formal ,informal and non formal learning adults ? 5

Ans:-

7. What is Livingstone (2001) view on formal ,Informal and no formal learning of Adults?

Formal, Informal & Non-Formal Learning of Adults: 17Aug2023

Formal education occurs when a teacher has the authority to determine that people

designated as
requiring knowledge effectively learn a curriculum taken from a pre-established body of
knowledge
whether in the form of age-graded and bureaucratic modern school systems or elders
initiating
youths into traditional bodies of knowledge
Non-formal or further education occurs when learners opt to acquire further knowledge
or skill by
studying voluntarily with a teacher who assists their self-determined interests, by using
an
organized curriculum, as is the case in many adult education courses and workshops.

6) Explain General pressure of privatization? 5

Ans:-

Q4. General pressure?

17Aug2023

There are general pressures to privatize education systems.

- One such factor is global economic and social change. Globalization, linked with market liberalization, has both pressured and encouraged governments to seek more efficient, more flexible, and more expansive education systems.
Privatization may be one response to these changes.

MUHAMMAD IMRAN

9

- Another factor that explains some of the growth in privatization is the encouragement of world aid agencies, such as the World Bank. Within the last decade, for example, the World Bank has given assistance to countries like El Salvador, Indonesia, Mali, the Dominican Republic etc.

7) why is there need of population education? 5

Ans:-

Why population education

17Aug2023

The “World Population Plan of Action” urged the need of population education in the following way: “Educational institutions in all countries should be encouraged to expand their curricula to include a study of population dynamics and policies including, where appropriate, family life, responsible parenthood and relation of population dynamics to socio- economic development and to international relations”

Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and self-determination.

Best off luck to all students ☸

Paper#5

Edu401 17aug2023

1. Types of Education

Ans:-

Q46. Learning Types ? 17Aug2023

- Formal
- Informal
- Non-formal

It is difficult to make a clear distinction between formal and informal learning as there is often a crossover between the two (McGivney 1999).

2. Formal informal education

Ans:-

Formal education: Formal education refers to structured learning that occurs in institutions like schools and universities, often following a curriculum and leading to recognized qualifications.

Informal education , on the other hand, involves learning outside of traditional settings, such as through life experiences, self-directed study, or interactions with others. It's less structured and doesn't usually result in formal credentials.

3. Privatization and its types

Ans:-

Definition 17Aug2023

'Privatization' is also thought of as a 'liberalization' --- where agents are freed from government regulations, or as 'marketization' --- where new markets are created as alternatives to government services or state allocation systems.

The trend towards privatization is strong. It is taking place in many countries and within many sectors of the economy. The education sector, because it is a large expenditure item in government budgets, often faces pressure to privatize.

Topic 150

Three forms of Privatization 1

The three most common privatization forms include:

1. Private Provision

Education can be provided by private agencies, such as privately owned and managed schools or universities.

It need not be provided through government-run institutions; instead, private schools could be operated by religious groups, for-profit entrepreneurs, charities, or other interested parties.

Indeed, many families already prefer the private option and choose to forgo the free, public education systems. Internationally, the proportion of students who are educated by private providers varies substantially

2. Private Funding

Education can be funded by private individuals rather than through government subsidies. Privatization may therefore mean that parents pay for schooling rather than the government (via tax revenues).

3. Private Regulation

Education services can be monitored by those who receive the services directly, i.e. the students and their families.

They will make sure that the education is of satisfactory standard --- either by refusing to enroll at poor quality schools or by demanding better services.

4. Technology in education Repeat

5. Population education

Ans:-

17aug2023

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

6. Financial support to private education

Ans:-

Financing private Education in Pakistan

17aug2023

The size of private sector engaged in delivery of education services and its rapid growth in terms of number of institutions, teachers and enrolment draw attention to some fundamental questions pertaining to financing of private education in Pakistan.

Paper#6

Diversity in private institute of Pakistan

Ans:-

Diversity Private Education Pakistan

17Aug2023

Diversity of private education in Pakistan is a characteristic feature and has tremendous implications for policy research but this aspect remains largely under explored in the literature. As a result, private sector as the provider of education has generally been treated as a homogenous category, though to a lesser degree than the public education sector. Ordinarily, differentiation is made between low- and high-fee schools, Urdu- and Englishmedium schools with different syllabi and between boys, girls and mixed schools. However, in reality the private educational institutions can be classified along a much broader range of categories.

Subjective

1. diversity in private school long and short mm tha Repeat
2. Challenges in implementing mother tongue as a instruction medium.

Ans:-

Q45. Challenges Implementing Mother Tongue as Medium of Instruction ?

Challenges 19Aug2023

- ✓ Practical only in homogenous communities.
- ✓ No teacher recruitment and training modalities have been developed yet.
- ✓ As a result of external production, the Textbook Boards have not been able to prepare even
- ✓ basic elementary readers in any of the mother tongues
- ✓ Current political unrest makes it difficult to implement changes in local contexts

3. Student need to know more than how to use technology

Ans:-

We need to unlearn the paper and pencil modes of learning and learn the pushing the buttons modes of learning so to say and we need to learn the technology. Our students learn the technology so much better than many of us do today. So, as teachers we need to make changes if we want to impact students and let them learn in ways that will help them in their real life. If you been around as I have, we have seen the monsters room sized computers.

When you look at that and we see the evolution of the computers to the desktop to the laptops and now the smart phones. Indirectly we carry our world with us in our mobile devices as small as the smart phones today. It is accepted that the well-rounded education is the gateway to the personal success. It sets students on a path to lifelong learning that enables them to succeed in a changing world.

4. Education voucher p note tha

Ans:-

Educational Vouchers 19Aug2023

Vouchers are educational coupons that entitle each student to a prescribed amount of schooling.

A voucher system is very different. Each student is allocated an annual amount of funding that could be used to enroll in any eligible school.

The schools obtain revenues based on the number of students who enroll: if not enough students enroll in a particular school, that school has to cut its costs or close.

Education under a voucher system still involves government funding, but it need not involve government provision of schools.

By giving parents the power of being able to freely use the voucher, private choices are significantly expanded.

Vouchers need not cover all the costs of schooling, but may simply serve as an incremental inducement to enrolment.

In Guatemala, scholarships are targeted at female students, whose enrolment rates are typically low.

5. Write a note on equity in privatisations program

Ans:-

4. Write a note on equity in evaluating privatization programs 19Aug2023

Ans: **Equity**

This criterion refers to a universally accepted goal of schooling: the quest for fairness in access to educational opportunities, resources and outcomes by gender, social class, race, language origins and geographical location of students.

Equity can be assessed in terms of inputs --- do all students receive an appropriate amount of funding and resources from the state, commensurate with their needs? Do students with special needs get appropriate schooling?

school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

The IPCC noted that climate change will manifest itself in various ways, including:

- Rising temperatures, droughts and desertification
- Heavy precipitation, flooding and rising sea levels
- Extreme weather events such as cyclones, floods and droughts

Q50. International Conventions for Free and Quality Education?

Provision of free and quality education has been declared as fundamental rights. They want all children to get basic elementary, secondary education.

Q51. Some Components of a peace education curriculum Peace Education ?

- Emotions and feelings
- Anger and anger management
- Violence in media
- Communication
- Empathy
- Cooperation
- Self esteem
- Tolerance

- Conflict resolution
- Keeping safe
- Emotions and feelings
- How emotions affect behavior
- The effect of violence on the emotions and feelings of children

Q52. Implementing Privatization Programs?

Overall, there are many opportunities to privatize the provision, funding and accountability of educational services. Indeed, international reviews of the demand-side and supply-side policies show that many countries have implemented some form of privatization.

Q53. Strategies for developing accessible curricula?

1. Providing a flexible timeframe for students studying particular subjects.
2. Giving greater freedom to teachers in choosing their working methods.
3. Allotting time for additional assistance for classroom based work
4. Emphasizing aspects of pre-vocational training

Q54. Slow ?

Remember, it takes time to settle a conflict. Go slow at first because conflict resolvers usually encounter some rough roads in the beginning. keep using your I-way map to reach safer roads.

< EDU401 Mega Subj...e August2023.pdf

The functional literacy means that you become functional within the society. In other words, a person is not dependent on reading the letter or writing something. It is an advanced level.

Multiple literacy

Further advanced level of literacy is multiple literacy. When one can become able to distinguish between different words of similar meanings. As there is a very minute difference in the synonyms of the words, if a person can distinguish those words then it is multiple literacy.

Q26: Why is Population Education necessary?

Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and self-determination.

Q27: What are 3 sources from which internal efficiency comes?

Internal efficiency is expected to come from three sources:

1. Greater competition
2. Superior ownership and managerial structures within the enterprises
3. Enhanced accountability / incentive systems

Q28: Why privatization happening? Write dominants of pressure of privatization?

There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

Q29: Madarasa reform 2006

In 2006 when the curricula were revised, the government focused on revising the old curricula of the country to build reforms

Q30: Forms of privatization?

Systematic research and population studies.

Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Q: Form of privatization.

SAHIL

ANS: The three most common privatization forms include:

1. Private Provision
2. Private Funding
3. Private Regulation

Q: Privatization Policies in Education.

ANS: The main policies and programs include:

1. Educational Vouchers
2. Public School Liberalization
3. Private Contracting
4. Tuition Credits and Deductions
5. Subsidies and Assistance Grants
6. Home – Schooling
7. Private Payments
8. Competition among Schools and Education Agencies

What is Madrasa Education---5

The term 'Madrasa' originates from the Arabic word 'Darasa' which means 'To Study'. Madrasa, in general, is referred to a school that imparts Knowledge. But in the context of Pakistan or even in the contemporary South Asia the term 'Madrasa' is often used for Islamic educational institutions along with 'Dar-ul-loom' and 'Jamia'. The main subjects of Madrasa Education include:

1. Qur'an
2. Hadith
3. Fiqh

Q: Discuss demands of Madaris reforms.

ANS: Since 1999, the issue of madaris reforms has been negotiated between the government and the administrations of wafaqs or boards. It is not clear what development has been made so far. Madaris are major societal institutions. They have ardent followers, and thus they can play vital roles for reforms of society, but they do not pay much attention to the society besides influencing religion. It remains to be seen how madaris can play a positive role for promoting peace and harmony in the society.

What is Privatization---2

'Privatization' is also thought of as 'liberalization' --- where agents are freed from government regulations, or as 'marketization' --- where new markets are created as alternatives to government services or state allocation systems.

[8/23, 08:33] EDU401

1) Immersion model and national language model. Repeat

2) population studies.

Ans:-

7. Population studies 23Aug2023

Population studies is broadly defined as the scientific study of human populations. Major areas studied include broad population dynamics; fertility and family dynamics; health, aging, and mortality; and human capital and labor markets.

3) Freedom of choice for parents.

Ans:-

3. Freedom of choice for parents. 23Aug2023

Two possible concerns arise as a result of greater freedom of choice for parents. The most important is the possibility that some choices are socially, culturally, or politically unacceptable. For example, a family may choose to educate its children in a manner intolerant to others in society, or it may choose an education that is segregated from other groups (e.g. by race, religion or income).

The other concern is that, even for those who value freedom of choice, the costs of deciding which school to go to --- or to change to --- may be high.

4) Environment-friendly school. Repeat

5) characteristics of Beckett and Hager informal learning.

Ans:-

characteristics of Beckett and Hager informal learning. 23Aug2023

Characteristics to informal learning:

- Practice-based informal learning is organic / holistic.
- Practice-based informal learning is contextual
- Practice-based informal learning is activity- and experience-based
- Practice-based informal learning arises in situations where learning is not the main aim
- Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- Practice-based informal workplace learning is often collaborative / collegial

6) Innovation and renovation.

Ans:-

7. Innovation and renovation. 23Aug2023

Innovation

The act of innovating; the introduction of something new, in customs, rites, etc.

renovation

The act or process of renovating; the state of being renovated or renewed.

7) Food is issue for education population.

Ans:-

8. Food is issue for education population. 23Aug2023

While developing nations wrestle with agrarian reforms, the industrialized nations either produce enough food or have enough capital to purchase large quantities of foodstuff.

Although population growth is not the sole reason for the world's food problem, it is estimated that this growth accounts for about 70% of the medium-term increase in the total demand for food in developing countries.

Paper#11

Edu 401 paper 23Aug2023

1 _demand side pressure

Ans:-

1. Demand – Side Pressures ? 23Aug2023

- The first factor that can be cited to explain privatization in education is simple: many parents want it. In many countries, education is viewed as an important way to gain social and economic advancement.
- Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers. This type of demand is 'excess demand', over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is 'differentiated demand' and it may encourage privatization across all three sectors.
- Both excess and differentiated demand have increased in recent decades. Excess demand has grown because education has become more important for social and economic betterment: to get high-paying jobs, for example, workers must have a high level of skills and credentials that are only available from universities.

2_ EU non formal learning Repeat 26Aug2023

Ans:-

EU definition about Non formal learning ? 23Aug2023

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support)

3_change climate effect on child

Ans:-

Q49. How our changing climate affects children? 23Aug2023

On any given day, more than a billion children are in primary or secondary school. However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

The IPCC noted that climate change will manifest itself in various ways, including:

- Rising temperatures, droughts and desertification
- Heavy precipitation, flooding and rising sea levels
- Extreme weather events such as cyclones, floods and droughts

4_ aggregation level of population education

Ans:-

may not extend far beyond the boundaries of his village, local area or community. This is particularly true in more isolated rural communities among the learners where literacy level is low but it is an important consideration for school programs as well. Planners of population education activities must identify the level of aggregation ---- the type and size of social group ---- to which learners are able to relate. To try to widen the learners view beyond a narrowly - defined world is a legitimate aim but will be unsuccessful if the macro or societal level is too far removed from his experience.

Ways must be found to translate family problems into broader terms and to create an awareness today of what the problem might be for others tomorrow.

EDU 401 Today paper

1. Names of three learning types

Ans:-

Q46. Learning Types ? 17Aug2023 repeat 23Aug2023

- Formal
- Informal
- Non-formal

It is difficult to make a clear distinction between formal and informal learning as there is often a crossover between the two (McGivney 1999).

2. Common schooling in EE environmental friendly

Ans:-

EE in Environment-Friendly Schools 23Aug2023

Many environment-friendly schools around the world have incorporated EE into their design, operation and curriculum.

The most common strategies are:

Incorporating EE into the curriculum, with adaptations for the local context. Lessons on key climate change topics such as global warming, the greenhouse effect and weather-related disasters are not enough.

3. Describe in your own words EE environment friendly education

Ans:-

Q58. In your own words importance of EE in environmental friendly schools?

23Aug2023
EE encourages students to research, investigate how and why things happen, and make their own decisions about complex environmental issues. By developing and enhancing critical and creative thinking skills, EE helps foster a new generation of informed consumers, workers, as well as policy or decision makers.

4. Immersion method or national language method Repeat

5. Integration part in population education

Ans:-

Some scholars consider that population education programs and particularly school programs -- are an integral part of other "educations", such as developmental education or environmental education.

They argue that the goals and objectives of population education should reflect these "broader frame works" and might be appropriately and meaningfully integrated into them.

Before passing on to the question of integration, it seems necessary to indicate briefly the goals of both population education and other educational programs which are in some way related to population education.

6. Why Population Education is important Repeat

Quality education and environmental education (2)

Ans:-

Q: Relationship btw quality education and environment education. 23Aug2023

ANS:

Quality	Environment
Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society.	Knowledge and understanding of the environment and environmental challenges

Concerns of population education (3)

Ans:-

Contemporary concern of population education? 23Aug2023

It is directed at people ---- as individuals or as members of groups, as decision-makers or potential decision-makers within their families, as citizens within a community, as leaders within a society and as policy makers within a nation. All people are population actors, making population related decisions throughout their lives. The sum of their decisions shapes the nature of population forces (fertility, mortality, migration) which operate within a society and which then affect other social, political and economic forces. In turn, the population, social, political and economic decisions made by the larger mass of people (the society or nation) influence the behavior of the individual, the families and the small communities in which they belong. Population education in essence, is an educational response to contemporary economic, social and political issues.

3. public school (5)

Ans:-

23Aug2023

Another explanation for the perceived decline in quality may be that the public-school system has reached a capacity constraint. With rapid population growth, government schools may be overcrowded; therefore, private school providers are needed. In the Dominican Republic, for instance, private schools are subsidized if they enroll low-income students where the public schools are at excess capacity.

Liberalization (3)

Ans:-

Liberalization? 23Aug2023

‘Privatization’ is also thought of as a ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Paper#17

EDU401 26Aug2023

What is the role of ideological theories and culture in population education?

BY FARIHA SHABBIR

CURRENT FINAL PAPER EDU401 17 August 2023 BY FARIHA SHABBIR

Family, kin, peers and community play a dominant role in acquisition of a folk demography knowledge, attitude, values norms, systems of belief that people come to hold about population related matters, such as family and marital relationships, social customs, and status and role of women and children and the choice of residence. Identification of cultural differences and sensitivities is an important part of program planning and development for it raises issues about the relevance of the curricula, the adaptation of content and method to meet specific needs and the administration of decentralized programs.

Define Formal learning with the relevant example.

Formal Learning:

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective. For example, Attending a university and taking classes to earn a degree is an example of formal learning.

and the administration of any of
or boards. It is not clear what
development has been made
so far. Madaris are major social
institutions. They have ardent followers
so they can play vital roles
for reforms of society.

9- What is privatization?

Answer: Privatization is also
thought of as "liberalization"
where agents are freed from
government regulation

10- Non Formal learning?

Answer. Learning that is not
provided by an education or
training institution and typically
does not lead to certification.

11- Characteristics of informal learning?

Answer.

- ① Practice based informal learning
is Holistic/organic.
- ② is Contextual
- ③ is activity and experience based.
- ④ Arises in situations where
learning is not main aim.
- ⑤ is Activated by individual
learners rather than the by
teachers.

More common, however, is the partial step towards such home-sourced privatization through payments by families for supplementary schooling. In some countries, it is also referred as 'home- tuitions'.

Many households directly contribute a large share of their household income to education through private tutoring or exam preparation. These payments are used to augment the schooling provided by the government.

22.write a note on the voucher.

Educational Vouchers

Vouchers are educational coupons that entitle each student to a prescribed amount of schooling.

A voucher system is very different. Each student is allocated an annual amount of funding that could be used to enroll in any eligible school.

The schools obtain revenues based on the number of students who enroll: if not enough students enroll in a particular school, that school has to cut its costs or close.

Education under a voucher system still involves government funding, but it need not involve government provision of schools.

By giving parents the power of being able to freely use the voucher, private choices are significantly expanded.

Vouchers need not cover all the costs of schooling, but may simply serve as an incremental inducement to enrolment.

In Guatemala, scholarships are targeted at female students, whose enrolment rates are typically low.

23. Relationship btw quality education and environment education.
