

All of the followings are included in skin senses EXCEPT:

Select correct option:

Pressure

Temperature

Pain

Taste

Which branch of psychology deals with the relationship between brain, sensations and physical stimuli and their subjective correlates?

Select correct option:

Neuroanatomy

Psychophysics

Environmental psychology

Ecology

Identify the part of ear which contains the organs that allow us to locate our position and determine how we are moving through space.

Select correct option:

The outer ear

Middle ear

Inner ear

Oval window

According to the results of "sniff tests", which sense is generally better in women than men?

Select correct option:

Sense of Vision

Sense of Taste

Sense of Smell

Sense of Hearing

Psychophysics uses three methods for testing subjects' perception in stimulus detection and difference detection experiments. Which of the following is NOT included in them?

Select correct option:

The method of limits

The method of constant stimuli

The method of adjustment

The method of varying stimuli

Suppose a subject is presented with pairs of stimuli, one member of the pair being fixed and the other member varying from trial to trial, sometimes being equal to the first stimulus, sometimes larger sometimes smaller. The subject is required to make a judgment of same or different in response to each pair. This is an example of _____.

Select correct option:

Just Noticeable Difference

Differential threshold

Point of Subjective Equality

Absolute sensitivity

Ahmed has a fear of cat. He started shivering on watching cat. Later on he started to demonstrate the same symptoms of his fear on watching any furry stimuli. This is an example of which of the following concept?

Select correct option:

Extinction

Discrimination

Shaping

Generalization

Many viewpoints have been proposed about learning. Each perspective is having its different notions. The locus of learning in behaviorism is on:

Select correct option:

Internal cognitive structuring

Stimuli in external environment

Affective and cognitive needs

Learning is in relationship between people and environment

Animals release pheromones chemicals that produce a reaction in other members of the species permitting them to send messages of which kind?

Select correct option:

Sexual availability

Social approval

Aggression

Attachment

How a psychologist belongs to humanistic school of thought would view the learning process?

Select correct option:

Change in behavior

Internal mental process

A personal act to fulfill potential

Interaction /observation in social contexts

Which of the following memory type refers to the memory for skills and habits such as riding a bike or hitting a baseball?

Select correct option:

Procedural memory

Semantic memory

Episodic memory

Declarative memory

Which of the following learning does not occur as a function of observing others' behavior?

Select correct option:

Vicarious learning

Modeling

Social learning

Associative learning

Which of the following is a disorder characterized by memory loss that occurs without other mental difficulties.

Select correct option:

Amnesia

Alzheimer's

Aphasia

Dyslexia

Which of the following is the correct sequence through which information passes as it is processed by the human memory system?

Select correct option:

Sensory memory ? working memory ? long-term memory

Working memory ? sensory memory ? long-term memory

Sensory memory ? long-term memory ? working memory

Working memory ? long-term memory ? sensory memory

In 1920's who started the research on memory by conducting experiments on rats and found that cortex is involved in the retention of material.

Select correct option:

Alkon

Lashley

Squire

Cooper

Research has revealed a number of strategies that can be used to develop better memories and retain the information for longer time. Which of the following is/are included in those techniques?

Select correct option:

The keyword technique

Method of Loci

Practice and rehearsal

All of the given techniques

If Usama goes out for a day of fishing, he cannot predict how long he will have to wait until a fish bites. This is an example of _____.

Select correct option:

Fixed ratio schedule

Variable ratio schedule

Fixed interval schedule

Variable interval schedule

Which of the following is the memory for general knowledge and facts about the world as well as rules of logic that are used to deduce facts?

Select correct option:

Episodic memory

Nondeclarative memory

Procedural memory

Semantic memory

Which of the following memory stores information coming from the ears?

Select correct option:

Iconic memory

Corresponding memory

Echoic memory

Sensory memory

Which of the following disease occur almost over the age of 65 and is characterized as severe memory loss even the victims forget their own names and their family member's faces?

Select correct option:

Alzheimer's

Aphasia

Dyslexia

Amnesia

Which of the following learning does not occur as a function of observing others' behavior?

Select correct option:

Vicarious learning

Modeling

Social learning

Associative learning

The reflex consists of two parts:

Select correct option:

An organism and a response

A stimulus and an organism

A stimulus and a response

The perception and response of an organism

Which of the following can be defined as a process that depends on experience and leads to long term changes in behavior?

Select correct option:

Learning

Development

Perception

Sensation

Which of the following is not a primary reinforcer?

Select correct option:

Sleep

Food

Oxygen

Money

What is the locus of learning for cognitive psychologists?

Select correct option:

Stimuli in external environment

Internal cognitive structuring

Affective and cognitive needs

Learning is in relationship between people and environment

Which of the following memory type refers to the memory for skills and habits such as riding a bike or hitting a baseball?

Select correct option:

Procedural memory

Semantic memory

Episodic memory

Declarative memory

Which of the following is the memory for general knowledge and facts about the world as well as rules of logic that are used to deduce facts?

Select correct option:

Episodic memory

Nondeclarative memory

Procedural memory

Semantic memory

Classical conditioning is also named as:

Select correct option:

Learning by imitation

Learning by doing

Associative learning

Latent Learning

Children who watch television violence are more likely to indulge in aggressive play. This is an example of _____.

Select correct option:

Associative learning

Observational learning

Instrumental learning

Learning by trial & error

Which of the following is the memory for biographical details of one's individual life as what he has done and the kinds of experiences he had constitute?

Select correct option:

Procedural memory

Semantic memory

Episodic memory

Declarative memory
