

Glimpse of Bio503 past papers:

1. What is hydrogen bonding
2. What is NMR
3. What is millisievert
4. Name the voltage gated Channels
5. What three spectroscopy techniques
6. How osmosis occurs in plants
7. Biophysical society
8. What is the direct effect of ionizing radiations
9. Use of biophysics in future
10. Explain types of HPLC

BIO503 today's paper;

16-Sep-2020

02:30pm

Define molecule. 2 marks

What is DNA microarray? 2 marks

Chemical shift. 2 marks

Radiation protection. 3 marks

Formation of alpha helix in proteins. 3 marks

Formula of kinetic friction k_f . 3 marks

Applications of microarrays. 5 marks

Types of proteins and their functions. 5 marks

Functions of centrifugation. 5 marks

RNA synthesis in detail. 10 marks
