PAPER No. 1

MCQ

1-Both input are 1, output is 0 which logic gate is

Answer: XOR

2-..... retrieve data from CD.?

Answer: Retrieval using a Laser that detects the irregularities on the reflective surface of the CD as it spins

3- The condition in which two or more processes are blocked from progressing because each is waiting for a resource that is allocated to another.

Answer: Deadlock

4-Pop 3 stand for

Answer: Post Office Protocol Version 3 (POP3)

5-DNS stand.....

Answer: domain name system (DNS)

M ZAMAN

6- Real time processing

Answer:

Computer performs the tasks in accordance with the deadlines in its external real-world environment. Example of Cruise Missile, Radar etc

7- Example of Software Failure

Fatal Therac-25 X-ray Radiation fatal trace 25 X-ray

Answer:

Fatal Therac-25 X-ray Radiation fatal trace 25 X-ray

8- CPU and main memory are connected by a collection of wires called a

Answer: bus

9- In contrast to an operating system's user interface, the internal part of an operating system is called the

Answer: kernel

10-Secure version of HTTPS is known as

Answer: HTTP

11-protecting login password information technique

Answer: Encryption, decrypt

12-repetation of the iterative structure is known as

Answer: Loop

M SAMAN

Short questions

1-Algorithm informal review in company make a tea (module 85)

Answer:

Making a Cup of Tea

1. Put water in kettle

2. Boil water

3. Put Tea in water

4. Add Milk

5. Stir

6. Add Sugar

7. Put tea in cup

8. Fetch cup

2- Explain DNS and DNS stands for

Answer: The name servers are used as an Internet-wide directory system known as the **domain name system (DNS).** The process of using DNS to perform a translation is called a **DNS lookup.**

3- CPU contain important parts explain...

Answer:

A CPU consists of three parts: The **arithmetic/logic unit,** which contains the circuitry that performs operations on data (such as addition and subtraction); the **control unit,** which contains the circuitry for coordinating the machine's activities; and the **register unit,** which contains data storage cells (similar to main memory cells), called **registers,** that are used for temporary storage of information within the CPU.

4-

(i) Multi-tasking

M SAMAN

Answer:

- ✓ One user executing several tasks simultaneously.
- ✓ Today Multiprogramming is used in single user and multiple users.

(ii) Batch processing

Answer:

The execution of jobs by collecting them in a single batch, then executing them without further interaction with the user.

In batch processing systems, the jobs residing in mass storage wait for execution in a **job queue**

(iii) User interface

Answer:

In order to perform the actions requested by the computer's users, an operating system must be able to communicate with those users. The portion of an operating system that handles this communication is often called the **user interface.** Older user interfaces, called **shells,** communicated with users through textual messages using a keyboard and monitor screen.

(iv) Access-time

Answer: The sum of seek time and rotation delay
