# CS101 Important Topic BY Uzair Ali Awan

1. Search Engines
2. Advantages Search of operation
3. Boolean
4. Hexadecimal Notation
5. Flash Drives and Optical System
6. Binary Addition
7. 2s Complement Notation
8. Floating Point Notation
9. CPU Basic
10. Compressing audio and video
11. Program Execution and Logic Operation
12. Arithmetic operator
13. Deadlock
14. Software Classification
15. Os basic concepts
16. Power of Self Test (POST)
17. Security attacks from inside and outside
18. Method of Process Communication
19. Direct Memory access and Handshaking
20. Recursive Structure
21. Layered approach to internet Software
22. HTML
23. XML
24. TCP/IP pro
25. Algorithm Efficiency
26. Software Verification
27. Protocols

UZAIR ALI

28. Internets
29. Discovery
30. World Wide Web
31. Insertion Sort Algorithm
32. Representation
33. Encryption
