CS615 Quiz-2 File By Vu Topper RM

Question No: 1 (Marks: 1) - Please choose one

_____ identifying which quality standards are relevant to the project and determining how to satisfy them.

► **Quality Planning (page 139)**
►Communications Planning

►Organization Planning

►Staff Acquisition

Question No: 2 (Marks: 1) - Please choose one

These all are outputs of Initiating Process except

►Project Manager Assignments

►Constraints

► **Selection Criteria (page 134)**
►Assumptions

Question No: 3 (Marks: 1) - Please choose one

Project management processes can be organized into _____ groups

►Four

► **Five (page 131)**
►Six

►Seven

Question No: 4 (Marks: 1) - Please choose one

Product quality depends on its conformance to _____

▶Software requirements

▶Development standards

▶Implicit requirements

► **All of given (page 119)**

Question No: 5 (Marks: 1) - Please choose one

_____is the technical kernel of software engineering

► **Design (page 107)**

▶Implementation

▶Requirements analysis

▶Testing

Question No: 6 (Marks: 1) - Please choose one

Mode of specification has a great impact on quality of solution. Forcing SWE to work with incomplete, inconsistence, or misleading specifications result in frustration and confusion affecting:

▶Quality

▶Timeliness and

▶Completeness of SW product

► **All of given (page 103)**

Question No: 7 (Marks: 1) - Please choose one

Finally, the specification includes a _____

► **Bibliography (page 103)**

▶Appendix

►Both Bibliography and Appendix

►Reference

Question No: 8 (Marks: 1) - Please choose one

Cognitive model describes a system as perceived by its _____

► User community (page 103)

►Developer

►Top level management

►Manager

Question No: 9 (Marks: 1) - Please choose one

A review of the *Software Requirements Specification* is conducted by _____

►Software developer

►Customer

► Both the software developer and the customer (page 103)

►Top level management

Question No: 10 (Marks: 1) - Please choose one

A meeting is conducted at a _____ and attended by both software engineers and customers.

►Software engineer site

► Neutral site (page 100)

►Customer site

►Company site

Question No: 11 (Marks: 1) - Please choose one

The model serves as the basis for the creation of _____ for the Software.

▶Design

▶Maintenance

▶Testing

► **Specifications (page 95)**

Question No: 12 (Marks: 1) - Please choose one

Throughout evaluation and solution synthesis, the analyst's primary focus is on

► **"What, not "how." (page 95)**

▶Model

▶Evaluation and Synthesis

▶Specification

Question No: 13 (Marks: 1) - Please choose one

In problem evaluation area of effort, once problems have been identified, the _____determines what information is to be produced by the new system and what data will be provided to the system.

► **Analyst (page 95)**

▶Designer

▶Coder

▶Manager

Question No: 14 (Marks: 1) - Please choose one

Requirements are refined and analyzed to assess their clarity, completeness, and_____

▶Correctness

► **Consistency (page 93)**

►Concurrency

►None of given

Question No: 15 (Marks: 1) - Please choose one

A software project that meets all the stated objectives is a success of _____

►Project quality

►Project fundamental purpose

► Project management myth (page 82)

►Project requirement

Question No: 16 (Marks: 1) - Please choose one

All of the following describe the activity list except:

►It's an extension of the WBS

►It include all activities of the project

► It describe the WBS update

►It include a description of project activities

Question No: 17 (Marks: 1) - Please choose one

Software project are carried out sequentially and that each phase is completed before the next is taken up.

►The Prototyping Model

►The Incremental Model

► The Waterfall model (page 82)

►The Spiral model

Question No: 18 (Marks: 1) - Please choose one

Project management is a _____of constant communication and negotiation.

► **Process**

▶Concept

▶Practice

▶None of given

-

Question No: 19 (Marks: 1) Please choose one

These all are design phase activities except

▶Output Design

▶Input Design

► **The software test plan (page 16)**

▶Software Selection

Question No: 20 (Marks: 1) - Please choose one

Which organization has set the de facto standards for project management techniques?

▶PMBOK

▶PMI **(page 154)**

▶PMA

▶PMO

Question No: 21 (Marks: 1) - Please choose one

McCall (MCC77) and his colleagues proposed some software quality factors based on three most important aspects of a software product: Which organization has set the de facto standards for project management techniques?

▶4

► **3 (page 120)**

▶6

▶5

Question No: (Marks: 1) -

Question No: 22 (Marks: 1) - Please choose one

The model serves as a foundation for software design and as the basis for the creation of _____ for the Software.

▶Design

▶Maintenance

▶Testing

► Specifications (page 95)

23 (Marks: 1) A 'facilitator' controls the meeting can be _____.

▶Customer

▶A developer

▶An outsider

► All of the given (page100)

Question No: 24 (Marks: 1) - Please choose one

Cognitive model describes a system as perceived by its _____.

► User Community (page103)

▶Developer

▶Top level Management

▶Manager

Question No: (Marks: 1) -

Question No: 25 (Marks: 1) - Please choose one

Upon evaluating current problems and desired information (input and output), the analyst begins to _____.

► **Synthesize solutions (page 94)**

►Model

►Specification

►All of the Given

Question No: 26 (Marks: 1) - Please choose one

These all are Product Revision Factors except.

► **Usability (page 121)**

►Maintainability

►Flexibility

►Testability

Question No: 27 (Marks: 1) - Please choose one

Foundational design concepts are.

►Information Hiding

►Abstraction

►Inheritance

► **All of the given (page 107)**

28 Please choose one

The US DOD (1988) defines software quality rather simply as:

Question No: (Marks: 1) -

► **The ability of a software product to satisfy its specified requirements. (Page 118)**

►"An inherent or distinguishing characteristic or a property"

►"Quality is in the eye of the beholder, a matter, of the client's judgment."

►All of the given

Question No: 29 (Marks: 1) - Please choose one

—defining and refining objectives and selecting the best of the alternative courses of action to attain the objectives that the project was undertaken to address

►Initial Process

► **Planning Process (page 131)**

►Executing Process

►Controlling Process

Question No: 30 (Marks: 1) - Please choose one

When you build a product or system, it's important to go through a series of predictable steps – a road map that helps you create a timely, high-quality result, The road map that you follow is called —

►Software Design

► **Software Process (page 10)**

►Software schedule

►Framework

Question No: **(Marks: 1)** **-**

Question No: 31 (Marks: 1) - Please choose one

Each process is described by:

- ▶Inputs
- ▶Outputs
- ▶Tools & Techniques
- **► All of the given (page 131)**

Question No: (Marks: 1) - Please choose one

32

McCall (MCC77) and his colleagues proposed some software quality factors based on three most important aspects of a software product: Which organization has set the de facto standards for project management techniques?

▶4

► 3 (page 120)

▶6

▶5

Question No: 33 (Marks: 1) - Please choose one

— ensures that appropriate steps to follow the product development procedures are carried out

▶Quality Management

▶Design

► Process monitoring (page 123)

▶Quality control

Question No: 34 (Marks: 1) - Please choose one

Cognitive model describes a system as perceived by its _____

► User community (page 103)

▶Developer

▶Top level management

▶Manager

Question No: (Marks: 1) -

Question No: 35 (Marks: 1) - Please choose one

Synchronization control helps to ensure that parallel changes performed by two different people do_____.

► **Not overwrite one another (page 114)**

►Overwrite one another

►May overwrite one another

► **None of given**

36 Please choose one

These all are Product Transition Factors except.

►Interoperability

►Configurability

►Expandability

► **Testability (page 121)**

Question No: 37 (Marks: 1) - Please choose one

To control versions, you can use _____.

►Version Control File

► **Version Control Register (page 111)**

►Version Control Authority

►All of the given

Question No: (Marks: 1) -

Question No: 38 (Marks: 1) - Please choose one

The Introduction of the software requirements specification states the

▶Goals

▶Objective

▶Design

► Goals and objectives of the software (page 104)

Question No: 39 (Marks: 1) - Please choose one

The British Standards Institution (1986) has stated the quality as

▶The ability of a software product to satisfy its specified requirements

▶"An inherent or distinguishing characteristic or a property"

► "Quality is in the eye of the beholder, a matter, of the client's judgment." (Page 104) ▶
All of the given

Question No: 40 (Marks: 1) - Please choose one

The check-in and checkout facilities provide_____

▶Best control

▶FTR control

▶SCI control

► Synchronization control (page 114)

Question No: (Marks: 1) -

Question No: 41

A baseline version _____

►Have a short life

►Can be assigned version numbers 3.2

► Tested and certified version of a system (page 115)

► Survive only during bug fixing

Question No: 42 (Marks: 1) - Please choose one

You can use the Item Traceability Matrix to identify _____ at the end of each phase

► SCIs (page 110)

►SCM

►Design

► Construction

Question No: 43 (Marks: 1) - Please choose one

Defined scope is a

►Technology-related problems

► Product-related problems (page 87)

►Process-related problems

► People-related problems

Question No: (Marks: 1) -

Question No: 44 (Marks: 1) - Please choose one

Software requirements engineering is a process of all except

►Discovery

►Refinement

► **Design (page 92)**

► Specification

Question No: 45

The model serves as the basis for the creation of _____ for the Software.

▶Design

▶ Maintenance

▶Testing

▶ Specifications (page 92)

Question No: 46 (Marks: 1) - Please choose one

Most software project manager's practice a lot of management techniques that are of doubtful authenticity are called

▶Project management tools

▶ Project management myths (page 92)

▶Project management thumb rules

▶ Project management fundamentals

Question No: 47 (Marks: 1) - Please choose one

The Introduction of the software requirements specification states the

▶Goals

▶Objective

▶Design

▶ Goals and objectives of the software (page 104)

Question No: 48 (Marks: 1) - Please choose one

The quality of software is said to be high if it meets the

►Standards, defined for the product

► Procedures, defined for the product

► **Standards and procedures, defined for the product (page 118)** ►
Design defined for product

Question No: 49 (Marks: 1) - Please choose one

Both the software engineer and customer take an active role in software requirements engineering-a set of activities that is often referred to as Requirement:

►Managing

► Recognition

► **Analysis (page 92)**
► Modeling

Question No: 50
The Efficiency with which a program runs on different platforms or operating systems is called :

►**Portability (page 121)**
► Reusability

► Configurability

► Interoperability

Question No: 51 (Marks: 1) - Please choose one

Efficiency with which a program runs on different platforms or operating systems is Reusability

►True

► **False**

Question No: 52 (Marks: 1) - Please choose one

_____ is a software engineering task that bridges the gap between system level requirements engineering and software design.

►Cost Analysis

► Design analysis

► Risk analysis

► **Requirements analysis (page 93)**

Question No: 53 (Marks: 1) - Please choose one

_____ is path finding_____, is path following

► **Leadership, Management (page 45)**

► Leader, Leadership

► Management, Leadership

► Manager, Management

Question No: 54

_____ theory when the deliverables of a project are more important than its phases. This normally happens when the deliverables are decided before the project begins. Select correct option

►Project life-cycle-based

► Scheduled

► **Deliverable-based (page 277)**
► None of given

Question No: 55 (Marks: 1) - Please choose one

Predecessor activities need to _____ before the next can begin. After a predecessor activity is completed, the successor activity becomes the predecessor for another activity. Select correct option:

►Start

► Scheduled
► **End page (page 297)**
► None of given

Question No: 56 (Marks: 1) - Please choose one

Each _____ can be subdivided into sub tasks.

►Program

► **Task (page 297)**
►Project

► None of given

Question No: 57 (Marks: 1) - Please choose one

Using PERT and CPM, _____ , helps you complete a project on time. By using these techniques, you can determine the latest time by when an activity should start to be completed on time.

▶Individually

▶Combination

► **Individual and Combine (page 296)**
► None of given

Question No: 58 Please choose one

Over the course of the project, a comparison of the due date and the date delivered provides a metric for how well deliverable dates are _____ by the project team. Select correct option:

► **Met (page 274)**
►Scheduled

►Changed

► None of given

Question No: 59 (Marks: 1) - Please choose one

Risk analysis and management are a series of steps that help a software team to understand and manage _____.

► **Uncertainty (page 305)**
►Crises

►Problem

► None of given

Question No: 60 (Marks: 1) - Please choose one

A node on a network schedule is that point in time at which an activity _____.

►Begins

►Ends

► **Begins or Ends (page 297)**
► None of given

Question No: 61 (Marks: 1) - Please choose one

To _____risks from occurring, the project team prepares the risk plan before the commencement of the project.

► **Avoid (page 312)**
►Deal

►End Manage

► None of given

Question No: 62 (Marks: 1) - Please choose one

The first activity in risk analysis is risk management.

►True

► **False**

Question No: 63 (Marks: 1) - Please choose one

During the Implementation phase the software modules are coded and initial unit tests are performed.

►True

► **False**

Requirements are refined and analyzed to assess their clarity, completeness, and

A. Consistency
B. Correctness
C. Concurrency
D. None of these

which of the following task is not part of project Initiation Phase?

Control mechanism

Inefficient project management style is a.....

Process

Unstructured and hurried software development is a?cs615

Technology-related problem

Product-related problem

Process-related problem PG # 87

People-related problem

The primary focus of _____ is to ensure that the final software product offers all the functionality and performance that the customer wanted.

user acceptance test

The final activity for a project manager is_____

Project closedown

Project implementation

Project execution

Project Quality

Implementation of software quality often associated with

Software developer

The overall role of Software in a larger system is identified during
Requirements engineering
Process engineering
System engineering
All of given

The British Standards Institution (1986) has stated the quality as
The ability of a software product to satisfy its specified requirements
"An inherent or distinguishing characteristic or a property"

"Quality is in the eye of the beholder, a matter, of the client's judgment."

All of the given
www.vuzs.info
McCall (MCC77) and his colleagues proposed some software quality factors based on _____ most important aspects of a software product:
4
3
6
5

Inefficient project management style is a
Product-related problems
Technology-related problems
Process-related problems
People-related problems

Upon evaluating current problems and desired information (input and output), the analyst begins to _____
Synthesize solutions
Model
Specification
All of given

These all are Product Revision Factors except
Usability
Maintainability
Flexibility
Testability

We can classify the problems that affect software projects into _____ categories
3
4
5
6

The check-in and checkout facilities provide_____
Best control
Component control
SCI control
Synchronization control

The code generation step performs the task
Translated specification into a machine-readable form
Translated design into a machine-readable form
Translated requirements into a machine-readable form
Translated user data into a machine-readable form

Research-oriented software development is a
Technology-related problems

Process-related problems
People-related problems
Product-related problems

A meeting is conducted at a _____ and attended by both software engineers and customers.
Software engineer site
Neutral site
Customer site
Company site

Reviews conducted at each of this phase/s_____
Analysis
Design
Coding
All of given

All given below are the problems that affect software projects except:

Product-related problems
Technology-related problems
Procedure-related problems
People-related problems

_____is the technical kernel of software engineering

Design
Implementation
Testing
Requirement Analysis

Both the software engineer and customer take an active role in software requirements engineering-a set of activities that is often referred to as
Analysis
Design
Specification
System acceptance

The model serves as the basis for the creation of _____ for the Software.
Design
Maintenance
Testing
Specifications

Before requirements can be analyzed, modeled, or specified they must be gathered through a/an _____
Elicitation process
Interviewing
Meeting

None of given

Technology-related problems include _____
Overestimated savings from reusable components and new tools and methods
Switching tools in mid way
Integrating different software products in cross-platform implementation
All of given

Insufficient identification is a
Technology-related problems
Process-related problems
People-related problems
Product-related problems

Throughout evaluation and solution synthesis, the analyst's primary focus is on _____
"Not what, not "how"
"What, also "how"
"What, not "how"
None of given

The overall role of Software in a larger system is identified during
Requirements engineering
Process engineering
System engineering
All of given

In problem evaluation area of effort, once problems have been identified, the _____determines what information is to be produced by the new system and what data will be provided to the system.
Analyst
Designer
Coder
Manager

A 'facilitator' controls the meeting can be _____

Customer
A developer
An outsider
All of given

Version control combines _____ to manage different versions of configuration objects that are created during software product development.
Procedure
Tools
Procedure and Tools
None of given

Many software projects digress from the original scope because of the nature of the software product or

technology used, it's happen in _____
Product scope changed toward the end of the project life cycle
Research-oriented software development
Defined scope
Fuzzy users

When you build a product or system, it's important to go through a series of predictable steps – a road map that helps you create a timely, high-quality result, The road map that you follow is called a _____
Software design
Software process
Software schedule
Framework

Before requirements can be analyzed, modeled, or specified they must be gathered through a/an _____
Elicitation process
Interviewing
Meeting
None of given

Defined scope is a
Technology-related problems
Product-related problems
Process-related problems
People-related problems

1. **_____is the technical kernel of software engineering**
   Design
   Implementation
   Requirements analysis
   Testing
   Design is the technical kernel of software engineering. During design, progressive refinements of data structure, architecture, interfaces, and procedural detail of software components are developed, reviewed, and documented.

   2. These all are outputs of Initiating Process except
   Project Manager Assignments
   Constraints
   Selection Criteria
   Assumptions

   3. Project management processes can be organized into _____ groups
   Four
   Five
   Six

Seven

4. Product quality depends on its conformance to _____
Software requirements
Development standards
Implicit requirements
All of given

5. Finally, the specification includes a _____
Bibliography
Appendix
Both Bibliography and Appendix
Reference

6. Cognitive model describes a system as perceived by its _____
User community
Developer
Top level management
Manager

7. **The model serves as the basis for the creation of _____ for the Software.**
Design
Maintenance
Testing
Specifications

8. **Throughout evaluation and solution synthesis, the analyst's primary focus is on**
"What, not "how."
Model
Evaluation and Synthesis
Specification

9. **A software project that meets all the stated objectives is a success is _____**
Project quality
Project fundamental purpose
Project management myth
Project requirement

All of the following describe the activity list except
It's an extension of the WBS
It include all activities of the project
It describe the WBS update
It include a description of project activities

1. _____ ensures that the standards laid down for a project are followed.
A. Quality assurance
B. Quality control
C. Product evaluation
D. Process control
Product evaluation.

2. _____ ensures that appropriate steps to follow the product development procedures are carried out
A. Quality Management
B. Design
C. Process monitoring
D. Quality control
Process monitoring.

3. These all are Product Revision Factors except
A. Usability
B. Maintainability
C. Flexibility
D. Testability
Usability.

4. To control versions, you can use_____
A. Version Control File
B. Version Control Register
C. Version Control authority
D. All of given
Version Control Register.

5. These all are Product Operation Factors except
A. Reliability
B. Efficiency
C. Testability
D. Integrity
Testability.

6. _____is an umbrella activity that ensures conformance to standards and procedures throughout the SDLC of a software product.
A. SQA
B. Design
C. Testing
D. All of given
SQA.

7. All of the following are benefits of meeting quality requirements
A. An increase in stakeholder satisfaction
B. Less rework
C. Low turnover
D. Higher productivity
Higher productivity.

8. The Preliminary Users Manual presents the software as a black box: That is, heavy emphasis is placed on
A. User input

B. User output
C. User input and the resultant output
D. None of given
User input and the resultant output.

9. Which of the following might require re-baselining of the cost baseline?
A. Corrective action
B. Revised cost estimates
C. Updates to the cost management plan
D. Budget updates
Budget updates.

10. _____ identify which quality standards are relevant to the project and determines how to satisfy them
A. Quality planning
B. Quality assurance
C. Quality control
D. Process control
Quality planning.

The distinguishing characteristics of a software product are _____

Cyclomatic complexity and cohesion
Function points and lines of code
all of the given (above)
None of given

The distinguishing characteristics of a software product are the cyclomatic complexity, cohesion, function points, and lines of

CS615 - Software Project Management - Q.No. 3
Insufficient identification is a
Technology-related problems
Process-related problems
People-related problems
Product-related problems
Insufficient identification: Unidentified, partially identified, and unplanned risks pose a threat to the success of a software project. You need to intensively identify risks and evolve a risk management plan such that the project is completed successfully, on time.

CS615 - Software Project Management - Q.No. 4
_____**of the system is an effort to better understand data and control flow, functional processing, operational behavior, and information content**

Specifications
Design
Model
Evaluation and Synthesis

During the evaluation and solution synthesis activity, the analyst creates models of the system in an effort to better understand data and control flow, functional processing, operational behavior, and information content. The model serves as a foundation for software design and as the basis for the creation of specifications for the Software. The customer may be unsure of precisely what is required. The developer

CS615 - Software Project Management - Q.No. 5
These all are Product Transition Factors except

Interoperability
Configurability
Expandability
Testability

CS615 - Software Project Management - Q.No. 6
Inefficient project management style is a

Product-related problems
Technology-related problems
Process-related problems
People-related problems
Inefficient project management style: the project manager needs to lead by example. The team members absorb the work culture, work ethic, and attitude of the project manager and implement it in their work style. If you display a lack of leadership qualities and weak ideals, the motivation levels decrease across software team.

CS615 - Software Project Management - Q.No. 7
Finally, the specification includes a _____

Bibliography
Appendix
Both Bibliography and Appendix
Reference
Finally, the specification includes a Bibliography and Appendix.

CS615 - Software Project Management - Q.No. 8
Software design is actually a multi step process that focuses on distinct attributes of a program, these are
Data structure, and Software architecture
Interface representations, and procedural detail
Both of given
None of given
Software design is actually a multi step process that focuses on four distinct attributes of a program:

– Data structure,
– Software architecture,
– Interface representations, and procedural (algorithmic) detail.

CS615 - Software Project Management - Q.No. 9
Software requirements analysis may be divided into_____ areas of effort
4
5
6
7
Software requirements analysis may be divided into five areas of effort:
(1) Problem recognition,
(2) Evaluation and synthesis,
(3) Modeling
(4) Specification, and
(5) Review
http://www.vuzs.info/

CS615 - Software Project Management - Q.No. 10
McCall (MCC77) and his colleagues proposed some software quality factors based on _____ most important aspects of a software product:
4
3
6
5

There are a number of factors that determine the quality of a software product. These factors can be measured either directly or indirectly. McCall (MCC77) and his colleagues proposed some software quality factors based on three most important aspects of a software product:
1. Product operation
2. Product revision and
3. Product transition

CS615 - Software Project Management - Q.No. 1 of _____contains an analysis of what went wrong, what went right, and what you could have done better in the software project.
Prepare closedown report
Identify learning
Identify reusable software components
Create reference material:
Prepare closedown report: The project closedown report contains the results of the causal analysis that you do for the project. This contains an analysis of what went wrong, what went right, and what you could have done better in the software project. contains an analysis of what went wrong, what went right, and what

CS615 - Software Project Management - Q.No. 2
Project Quality Management includes the ---------- required to ensure that the project will satisfy the needs for which it was undertaken

Time
Cost
Processes
None of the given
Project Quality Management includes the processes required to ensure that the project will satisfy the needs for which it was undertaken. It includes "all activities of the overall management function that determine the quality policy, objectives, and responsibilities and implements them by means such as quality planning, quality assurance, quality control, and quality improvement, within the quality system.

CS615 - Software Project Management - Q.No. 3
----------completion and settlement of the contract, including resolution of any open items.

Contract Administration
Source Selection
None of the given
Contract Closeout

Contract Closeout—completion and settlement of the contract, including resolution of any open items

CS615 - Software Project Management - Q.No. 4
----------managing the relationship with the seller.

Source Selection
None of the given
Contract Closeout
Contract Administration
Contract Administration—managing the relationship with the seller.

CS615 - Software Project Management - Q.No. 5
Decisions also have a ---------- element to them—the "right" decision may not be the "best" decision if it is made too early or too late.

Cost
Quality
Time
None of the given
Decisions also have a time element to them—the "right" decision may not be the "best" decision if it is made too early or too late.

CS615 - Software Project Management - Q.No. 6
----------is the ability to encourage by "push or pull" technical people to produce to their best ability.

Evaluating
Motivation

None of the given
Monitoring
Motivation: The ability to encourage (by "push or pull") technical people to produce to their best ability.

CS615 - Software Project Management - Q.No. 7
Unproductive work environment is a
Technology-related problems
Process-related problems
People-related problems
Product-related problems
Unproductive work environment:
The work environment is a major factor that affects the productivity of the development team. For example, a noisy or cramped workspace decreases the motivation levels of the employees. Similarly, unfriendly organizational policies also lower the motivation of the team members. As the project manager, you need to ensure that the team is protected from harmful external make the workspace friendly to work in.

CS615 - Software Project Management - Q.No. 8
Most software project manager's practice a lot of management techniques that are of doubtful authenticity are called
Project management tools
Project management myths
Project management thumb rules
Project management fundamentals
Project Management Myths
In most cases, you learn the skills required to manage a software project while on the job. As a result, most software project managers practice a lot of management techniques that are of doubtful authenticity. Many software project managers learn about the so-called management skills and concepts that are actually myths.

CS615 - Software Project Management - Q.No. 9
Strong leadership motivation may sound an obvious trait for a ----------.

Leader
Manager
Specialist
None of the given
Strong leadership motivation may sound an obvious trait for a leader. After all, only those who want the weighty responsibilities and grueling pressures of leadership are likely to strive for it.

CS615 - Software Project Management - Q.No. 10
We can classify the problems that affect software projects into _____ categories

3
4
5

6

You can classify the problems that affect software projects into the following four categories:

- People-related problems
- Process-related problems
- Product-related problems
- Technology-related problems

CS615 - Software Project Management - Q.No. 1
Insufficient identification is a

Technology-related problems
Process-related problems
People-related problems
Product-related problems

CS615 - Software Project Management - Q.No. 2
Technology-related problems include _____

Overestimated savings from reusable components and new tools and methods
Switching tools in mid way
Integrating different software products in cross-platform implementation
All of given

CS615 - Software Project Management - Q.No. 3
What is one of the problems with project management software?

The project manager manages the software instead of the project
Project duration calculations are sometimes approximate
You can not override the project management software decisions regarding schedules
It's expensive and difficult to use

CS615 - Software Project Management - Q.No. 4
The check-in and checkout facilities provide_____

Best control
Component control
SCI control
Synchronization control

CS615 - Software Project Management - Q.No. 5
McCall (MCC77) and his colleagues proposed some software quality factors based on most important aspects of a software product:

Product operation
Product revision and
Product transition
All of the given

Synchronization control helps to ensure that parallel changes performed by two different people do _____.

http://www.vuzs.info/

Not overwrite one another

Overwrite one another

May overwrite one another

None of given

The code generation step performs the task

Translated specification into a machine-readable form

Translated design into a machine-readable form

Translated requirements into a machine-readable form

Translated user data into a machine-readable form

CS615 - Software Project Management - Q.No. 8

Before requirements can be analyzed, modeled, or specified they must be gathered through a/an _____

Elicitation process

Interviewing

Meeting

None of given

http://www.vuzs.info/

CS615 - Software Project Management - Q.No. 9

The quality of software is said to be high if it meets the

Standards, defined for the product

Procedures, defined for the product

Standards and procedures, defined for the product

Design defined for product

CS615 - Software Project Management - Q.No. 10

A review of the Software Requirements Specification is conducted by _____

Software developer

Customer

Both the software developer and the customer

Top level management

CS615 - Software Project Management - Q.No. 1

The British Standards Institution (1986) has stated the quality as

- The ability of a software product to satisfy its specified requirements

- "An inherent or distinguishing characteristic or a property"
- **"Quality is in the eye of the beholder, a matter, of the client's judgment."**
- All of the given

The distinguishing characteristics of a software product are the cyclomatic **complexity, cohesion, function points, and lines of code. These characteristics of** a software product define the quality of the product.
• The US DOD (1988) defines software quality rather simply as:
– The ability of a software product to satisfy its specified requirements.
• The British Standards Institution (1986) has stated that:
– "Quality is in the eye of the beholder, a matter, of the client's judgment."

CS615 - Software Project Management - Q.No. 2
The check-in and checkout facilities provide_____

- Best control
- Best control
- SCI control

Synchronization control
The check-in and checkout facilities provide synchronization control. Synchronization control helps to ensure that parallel changes

CS615 - Software Project Management - Q.No. 3
A baseline version _____

- Have a short life
- Can be assigned version numbers 3.2
- **Tested and certified version of a system**
- Survive only during bug fixing

CS615 - Software Project Management - Q.No. 4
You can use the Item Traceability Matrix to identify _____ at the end of each phase

- **SCIs**
- SCM
- Design
- Construction

You can use the Item Traceability Matrix to identify SCIs at the end of each phase

CS615 - Software Project Management - Q.No. 5
Defined scope is a

- Technology-related problems
- **Product-related problems**
- Process-related problems
- People-related problems

CS615 - Software Project Management - Q.No. 6
Software requirements engineering is a process of all except

- Discovery
- Refinement

- **Design**
- Specification

Software requirements engineering is a process of discovery, refinement, modeling and specification.

CS615 - Software Project Management - Q.No. 7

The model serves as the basis for the creation of _____ for the Software.

- Design
- Maintenance
- Testing
- **Specifications**

The model serves as a foundation for software design and as the basis for the creation of specifications for the Software.

CS615 - Software Project Management - Q.No. 8

Most software project manager's practice a lot of management techniques that are of doubtful authenticity are called

- Project management tools
- **Project management myths**
- Project management thumb rules
- Project management fundamentals

CS615 - Software Project Management - Q.No. 9

The Introduction of the software requirements specification states the

- Goals
- Objective
- Design
- **Goals and objectives of the software**

Q1: Software requirements engineering is a process of all except:
A) Discovery

B) Refinement

C) Design (page 92) (100% Sure)

D) Specification

Q2: The quality of software is said to be high if it meets the:
A) Standards, defined for the product

B) Procedures, defined for the product

C) Standards and Procedures, defined for the product (page 118) (100% Sure)

D) Design, defined for the product

Q3: The check-in and checkout facilities provide _____.
A) Best control

B) Component control

C) SCI control

D) Synchronization control (page 114) (100% Sure)

Q4: These all are Product Operation Factors except:
A) Reliability

B) Efficeincy

C) Testability (page 120) (100% Sure)

D) Usability

Q5: Ineffective project sponsorship by management is a :
A) Technology-related problems

B) Process-related problems

C) People related problems (page 86) (100% Sure)

D) Product-related problems

Q6: A meeting is conducted at a _____ and attended by both software engineers and customers.
A) Software engineer site

B) Neutral site (page 100) (100% Sure)

C) Customer site

D) Company site

Q7: All of the following are included in 4P's of Software Project Management EXCEPT_____.

A) Product

B) People

C) Project

D) Price (page 07) (100% Sure)

Q8: Each process is described by:
A) Input

B) Output

C) Tools and Techniques

D) All of the given options (page 131) (100% Sure)

Q9: Version control combines _____ to manage different versions of configuration objects that are created during software product management.
A) Procedure

B) Tools

C) Procedure and Tools (page 111) (100% Sure)

D) None of given

Q10: Reviews conducted at each of this phase/s _____.
A) Analysis

B) Design

C) Coding

D) All of given (page 124) (100% Sure)

Q11: Path following is the characteristic of _____.
A) Leadership

B) Management (page 45) (100% Sure)

C) Assistant manager

D) Librarian

Q12: _____ identify which quality standards are relevant to the project and determine how to satisfy them.

A) Quality planning (page 139) (100% Sure)

B) Quality assurance

C) Quality control

D) Process control

Q13: Upon evaluating current problems and desired information(input and output), the analysit begins to _____.

A) Synthesize solutions (page 94) (100% Sure)

B) Model

C) Specification

D) All of the given

Q14: These are all Product Transition Factors except:

A) Interoperability

B) Configuration

C) Expandibility

D) Maintainability (page 121) (100% Sure)

Q15: Path finding is the characteristic of _____.

A) Leadership (page 45) (100% Sure)

B) Management

C) Assistant Manager

D) Librarian

Q16: Analyze, document, validate and manage software or system requirement. Choose the best relevant phase for the mentioned tasks.
A) Software concept

B) Coding and debugging

C) Deployment

D) Requirement analysis (page67) (100% Sure)

Q17: Once the review is complete, the Software Requirement Specification is "signed-off by _____".
A) Developer

B) Customer

C) Top level Management

D) Both Customer and Developer (page 106) (100% Sure)

Q18: _____ defining that project objectives are met by monitoring and measuring progress regularly to identify variances from plan so that corrective action can be taken when necessary.
A) Initail Process

B) Planning Process

C) Executing Process

D) Controlling Process (page 131) (100% Sure)

Q19: Who energize(s) the team(s) towards goal attainment?
A) Project Manger

B) Customer care officer

C) Team Leader (page 31) (100% Sure)

D) None of the given

Q20: The Project Planning, Controlling and Tracking includes Task.
A) Detailed Project Plan (page 78) (100% Sure)

B) Scope determination

C) initial project plan

D) Requirement Gathering

Q21: _____ means developing a vision of the future and strategies for achieving that vision.
A) Management

B) Leadership (page 32) (100% Sure)

C) Stakeholders

D) Supporting staff

Q22: Evaluating overall project performance on a regular basis to provide confidence that the project will satisfy the relevant quality standards. Choose suitable name of this activity.
A) Project Plan Execution

B) Quality Assurance (page 139) (100% Sure)

C) Team Development

D) Information Distribution

Q23: Deployment and Maintenance will be the _____ phase of core software project life cycle.
A) First

B) Second

C) Seven

D) Last (confirm) (100% Sure)

Q24: Sofware project coding is completed in the _____ phase.
A) Coding and debugging (page 16) (100% Sure)

B) Software Concept

C) Detail Design

D) Software Requirement

Q25: These all are Product Operation Facotrs except:
A) Reliability

B) Efficiency

C) Testability (page 120) (100% Sure)

D) Integrity

Q26: _____ is the technical kernel of software engineering.
A) Design (page 107) (100% Sure)

B) Implementation

C) Testing

D) Maintenance

Q27: The final activity for a project manager is _____.
A) Project closedown (page 80) (100% Sure)

B) Project implementation

C) Project execution

D) Project quality

Q28: The overall roll of Software in a larger system is identified during:
A) Requirement Engineering

B) Process Engineering

C) System Enginnering (page 92) (100% Sure)

D) All of given

Q29: Cost & Efforts are _____ to begin with but grows _____ towards end of project.

A) Small, Larger (page 67) (100% Sure)

B) larger, small

C) small, small

D) Larger, larger

Q30: _____ is to synchronize the project activities to make the project development a success.
A) The stackholder

B) The security officer

C) The project manager (page 67) (100% Sure)

D) The Programmer

Q 2. The primary focus of _____ is to ensure that the final software product offers all the functionality and performance that the customer wanted
Training test
User acceptance test
Implementation test
Support test

The primary focus of user acceptance test is to ensure that the final software product offers all the functionality and performance that the customer wanted. Therefore, the customer tests the software product for issues such as aesthetics, user friendless, and scalability.

Q 3. Technology-related problems include _____
Overestimated savings from reusable components and new tools and methods
Switching tools in mid way
Integrating different software products in cross-platform implementation
All of given

Technology-related problems
1. Overestimated savings from reusable components and new tools and methods:
2. Switching tools in mid way
3. Integrating different software products in cross-platform implementation

Q 4. Most software project manager's practice a lot of management techniques that are of doubtful authenticity are called

Project management tools
Project management myths
Project management thumb rules
Project management fundamentals

Project Management Myths

In most cases, you learn the skills required to manage a software project while on the job. As a result, most software project managers practice a lot of management techniques that are of doubtful authenticity. Many software project managers learn about the so-called management skills and concepts that are actually myths.

Q 5. Ineffective project sponsorship by management is a
Technology-related problems
Process-related problems
People-related problems
Product-related problems

People-related problems are
• Low motivation
• Problem employees
• Unproductive work environment
• Inefficient project management style:
• Lack of stakeholder interest
Ineffective project sponsorship by management

Q 6. Unproductive work environment is a

Technology-related problems
Process-related problems
People-related problems
Product-related problems

People-related problems are
• Low motivation
• Problem employees
• Unproductive work environment
• Inefficient project management style:
• Lack of stakeholder interest
Ineffective project sponsorship by management

Q 7. Before requirements can be analyzed, modeled, or specified they must be gathered through a/an _____

Elicitation process
Interviewing
Meeting
None of given

Requirements Elicitation for Software

Before requirements can be analyzed, modeled, or specified they must be gathered through an elicitation process. A customer has a problem that may be amenable to a computer-based solution. A developer responds to the customer's request for help.

Q 8 . _____of the system is an effort to better understand data and control flow, functional processing, operational behavior, and information content
Specifications
Design
Model
Evaluation and Synthesis
During the evaluation and solution synthesis activity, the analyst creates models of the system in an effort to better understand data and control flow, functional processing, operational behavior, and information content.

Q 9 Both the software engineer and customer take an active role in software requirements engineering-a set of activities that is often referred to as
Analysis
Specification
Design
System acceptance
Both the software engineer and customer take an active role in software requirements engineering-a set of activities that is often referred to as *analysis.*

Q 10. A review of the Software Requirements Specification is conducted by _____

Software developer
Customer
Both the software developer and the customer

Like all engineering disciplines, requirements engineering is not conducted in a
Sporadic random
Otherwise haphazard fashion
But instead is the systematic use of proven approaches?
All of given

_____ includes consideration such as the post-implementation support activities provided to the customer.

Training plan creation
User acceptance plan
Implementation plan creation
Support plan creation

Requirements are refined and analyzed to assess their clarity, completeness, and_____
Correctness
Consistency
Concurrency
None of given
_____ defines the duration of implementation and the hard and software perquisites for implementing the software product.
Training plan creation
User acceptance plan
Implementation plan creation
Support plan creation

Implementation of software quality often associated with

Project Manager - unconfirmed
Software developer
Customer
User

A software project that meets all the stated objectives is a success of _____
Project quality
Project fundamental purpose
Project management myth
Project requirement
