Question No: 31 (Marks: 2)

Write down the equation of tangent vector (should be in the form of parametric functions)?

Question No: 32 (Marks: 2)

What is meant by spotlight?

A light containing a minimum of the following parameters: light location, target location and penumbra.

Theater lights or bulbs enclosed in a lamp shade are good examples of spotlights. A spot light is like a point light, but its light rays are restricted to a well defined cone. It is often used to direct the viewers eye to certain parts of the scene.

Question No: 33 (Marks: 2)

Describe polygon clipping briefly.

An algorithm that clips a polygon is rather complex. Each edge of the polygon must be tested against each edge of the clipping window, usually a rectangle. As a result, new edges may be added, and existing edges may be discarded, retained, or divided. Multiple polygons may result from clipping a single polygon. We need an organized way to deal with all of these cases.

Question No: 34 (Marks: 2)

How the world look like in following situations?

1. Without ambient light
2. With too much ambient light

Ambient light means the light that is already present in a scene, before any additional lighting is added. It usually refers to natural light, either outdoors or coming through windows etc. It can also mean artificial lights such as normal room lights.
Photography and video work rely largely or wholly on ambient lighting.
Ambient light can be a real trouble if it conflicts with what the photographer wants to achieve. For example, ambient light may be the wrong color temperature, intensity or direction for the desired effect. In this case the photographer may choose to block out the ambient light completely and replace it with artificial light.

Question No: 38 (Marks: 3)

Which OpenGL command is used to define material properties of the object, also name two of these properties?

predefine the material properties which will be consequently assigned to objects when you define them with the glColor command. This is done by making the following call:

glColorMaterial(GL_FRONT, GL_AMBIENT_AND_DIFFUSE);

Question No: 39 (Marks: 5)

What is difference between glLoadIdentity function and glLoadMatrix function ?

The **glLoadIdentity** function replaces the current matrix with the identity matrix. It is semantically equivalent to calling **glLoadMatrix** with the identity matrix

$$\begin{pmatrix} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \end{pmatrix}$$

but in some cases it is more efficient.

Error Codes

The following is the error code and its condition.

GL_INVALID_OPERATION: **glLoadIdentity** was called between a call to **glBegin** and the corresponding call to **glEnd**.

glLoadMatrix replaces the current matrix with the one whose elements are specified by m . The current matrix is the projection matrix, modelview matrix, or texture matrix, depending on the current matrix mode (see glMatrixMode).

Question: What is meant by inappropriate shift in paragraph? (Marks 2) page 133

Question: What is meant by comma splice and correct the given sentence? (Marks 3)

Answer:

Never link two independent clauses with just a comma; this is known as a comma splice error.

Examples:

The sun is high, put on some sun block.

This computer doesn't make sense to me, it came without a manual.

You can correct a comma splice in four ways:

- Separate the independent clauses into two separate sentences. Punctuate both sentences with periods.
- Replace the comma with a semicolon or with a semicolon and a conjunctive adverb such as however or furthermore. (The conjunctive adverb is then normally followed by a comma.)
- Replace the comma with a comma and a coordinating conjunction.

Question: Write general purposes of business message? (Marks 3)

2. Persuade
3. Collaborate

Question: Write a note on Gunning's Fog Index? (Marks 5)

Answer:

- Select a part of the text which is approximately 100 words long, to the nearest period. Introductions, leads, and conclusions usually exhibit slightly different communication techniques which will skew the accuracy of this test.
- Count the number of sentences in the selected text.
- Determine the average length of sentences by dividing the number of words in the text by the number of sentences.
- Count the number of words which have three or more syllables. But *do not* count words which are capitalized, words which have three syllables because prefixes or suffixes have been added, or words which are combinations of one- or two-syllable words.
- Add the number for the average sentence length to the number of three-syllable words in the text.
- Multiply this sum by 0.04.

Question: Which features are included in "Planning Oral Reports"? Briefly explain each step? (Marks 5) Page 81

Planning an oral message is similar to planning a written message.

- You develop the main idea
- Construct an outline
- Estimate the appropriate length

- Decide on the most effective style

Establishing the main idea:

Start by focusing on the "big picture". What is the main idea (or theme) that you want to convey to the audience? Look for a one-sentence generalization that links your subject and the purpose to the audience's frame of reference, much as an advertising slogan points out how a product can benefit consumers. Demand for your low-calorie, high-quality frozen foods will increase because of basic social and economic trends.

Organizing an outline:

With a well-crafted main idea to guide you, you can begin to outline the speech or presentation.

Gear the structure:

- The subject
- The purpose
- The audience
- Time allotted for your speech or presentation

Estimated length:

Time for speeches and presentations is often strictly regulated, so you'll need to tailor your material to the available time. You can use your outline to estimate how long your speech or presentation will take.

Deciding on the style:

Another important element in your planning is the style most suitable to the occasion. Is this is formal speech or presentation in an impressive setting, with professionally devoted visual aids? Or is it a casual, roll-up-your-sleeves working session? The size of the audience, the subject, your purpose, your budget and the time available for preparation, all determine the style.

Question: Highlight differences between business letter and memorandum?(Marks 5)

Answer:

Business letters are formal letters used for business-to-business, business-to-client, or client-to-business correspondence. There are a number of elements to a business letter. Letters are used to communicate outside your organization. The indirect plan consists of four parts:

Answer: 49

The table is one of the most versatile and widely used visual aids. Tables are used so often because they can help writers achieve several common objectives. For example, they are an excellent tool for groups of detailed facts in a concise and readable form.

How to construct a table

:

To create a table, you systematically arrange information in rows and columns. You should adjust the basic structure as needed to create an attractive visual aid that your readers will find easy to use. For example, if your table is crowded you can separate columns (or groups of columns) with vertical lines, and to help them read across rows, you can place horizontal or leave a blank row after every five lines or so.

Note that fancier variations of the basic design may be used where attractiveness is especially important, as in advertising brochures and annual reports to stockholders.

When deciding how to display your information within the framework of your table, you have several basic decisions to make:

- How to order the rows and columns
- Which labels to use for the columns and which for the rows
- How to align entries in the columns
- Where to place special notes

11. Narrate difference purpose of conducing interview on a job?

12. Explain

· Open ended question?

Answer: Page 154

To obtain both factual information and underlying feelings, you'll probably use various types of questions.
Open-ended questions invite the interviewee to offer an opinion, not just a yes, no, or one- word answer
You can learn some interesting and unexpected things from open-ended questions, but they may diminish your control of the interview.
The other person's idea of what's relevant may not coincide with yours, and you may waste some time getting the interview back on track.
Use open-ended questions to warm up the interviewee and look for information when you have plenty of time to conduct the conversation.

· **Close ended question?**

Answer: Page 155

Closed-ended questions require yes or no answers or call for short responses. For example
"Did you make a reservation for the flight?"
Questions like these produce specific information, save time, require less effort to answer, and eliminate bias and prejudice in answers.
The disadvantage of such questions is that they limit the respondent's initiative and may prevent important information from being revealed.

They're better for gathering information than for prompting an exchange of feelings
