condition to be

mcq A research problem is a statement about an area of concern, a condition to be improved upon, a difficulty to be eliminated, or a troubling question that exists in scholarly literature, in theory, or in practice that points to the need for meaningful understanding and deliberate investigation. A research problem does not state how to do something, offer a vague or broad proposition, or present a value question.

16

The purpose of a problem statement is to:

- Introduce the reader to the importance of the topic being studied. The reader is oriented to the significance of the study and the research questions or hypotheses to follow.
- Place the problem into a particular context that defines the parameters of what is to be investigated.
- Provide the framework for reporting the results and indicates what is probably necessary to conduct the study and explain how the findings will present this information.
