**MCQS**

**1. Which of the following best defines psychology?**

- A) The study of mental health disorders**
- B) The scientific study of behavior and mental processes**
- C) The study of animal behavior only**
- D) The study of human genetics**

**Answer: B) The scientific study of behavior and mental processes**

**2. What is the primary focus of developmental psychology?**

- A) The study of how people learn new information**
- B) The study of psychological disorders**
- C) The study of how individuals change over the course of their life**
- D) The study of the brain and its functions**

**Answer: C) The study of how individuals change over the course of their life**

**3. Which research method involves observing behavior in its natural environment?**

- A) Laboratory experiment**
- B) Naturalistic observation**
- C) Case study**
- D) Survey**

**Answer: B) Naturalistic observation**

**4. What does the term "cognitive" refer to in psychology?**

- A) The study of physical traits**
- B) The study of mental processes such as perception, memory, and problem-solving**
- C) The study of emotion and mood**
- D) The study of social interactions**

**Answer: B) The study of mental processes such as perception, memory, and problem-solving**

5. In classical conditioning, what is the unconditioned stimulus (UCS)?

- A) A neutral stimulus
- B) A learned response
- C) A stimulus that naturally triggers a response
- D) A stimulus that eventually triggers a response through association

Answer: C) A stimulus that naturally triggers a response

6. Which psychologist is associated with the theory of operant conditioning?

- A) Sigmund Freud
- B) Carl Rogers
- C) B.F. Skinner
- D) John Watson

Answer: C) B.F. Skinner

7. Which of the following is an example of a fixed-ratio schedule of reinforcement?

- A) Getting a reward after a variable amount of time
- B) Getting a reward after a specific number of responses
- C) Getting a reward after an unpredictable amount of time
- D) Getting a reward after the first correct response

Answer: B) Getting a reward after a specific number of responses

8. In the context of memory, which of the following best describes "short-term memory"?

- A) The ability to recall information over long periods
- B) The memory store for facts and events
- C) The temporary storage of information for a few seconds to minutes
- D) The memory system responsible for unconscious processing

Answer: C) The temporary storage of information for a few seconds to minutes

9. What is the main function of the amygdala?

- A) Regulating heart rate
- B) Processing emotions, especially fear
- C) Controlling motor skills
- D) Storing memories

Answer: B) Processing emotions, especially fear

10. Which part of the brain is primarily responsible for higher-order cognitive functions such as thinking, planning, and problem-solving?

- A) Medulla
- B) Cerebellum
- C) Limbic system
- D) Prefrontal cortex

Answer: D) Prefrontal cortex

11. Which of the following neurotransmitters is most closely linked to mood regulation?

- A) Dopamine
- B) Serotonin
- C) Acetylcholine
- D) Glutamate

Answer: B) Serotonin

12. Which of the following best describes a "fixed mindset"?

- A) The belief that abilities can be developed with effort
- B) The belief that intelligence is static and cannot be changed
- C) The belief that failure is a sign of a lack of effort
- D) The belief that people should be praised for effort, not results

Answer: B) The belief that intelligence is static and cannot be changed

13. Which psychological approach focuses on understanding behavior by examining unconscious thoughts and early childhood experiences?

- A) Behaviorism
- B) Cognitive psychology
- C) Humanistic psychology
- D) Psychoanalysis

Answer: D) Psychoanalysis

14. What is a key principle of humanistic psychology?

- A) People act based on learned responses
- B) People are motivated by unconscious drives
- C) People have an inherent tendency toward growth and self-actualization
- D) People's behaviors are shaped by environmental stimuli

Answer: C) People have an inherent tendency toward growth and self-actualization

15. Which of the following is a primary focus of social psychology?

- A) Individual differences in personality
- B) How people perceive and interact with each other
- C) Brain structures and their functions
- D) Memory processes and encoding

Answer: B) How people perceive and interact with each other

16. According to Abraham Maslow, what is the highest level of the hierarchy of needs?

- A) Safety needs
- B) Love and belonging
- C) Self-actualization
- D) Esteem needs

Answer: C) Self-actualization

17. What is the placebo effect?

- A) When people act in a certain way due to peer pressure
- B) A condition where participants show improvement because they believe they are receiving treatment
- C) The effect of stress on physical health
- D) A psychological disorder characterized by feelings of fear

Answer: B) A condition where participants show improvement because they believe they are receiving treatment

18. Which of the following best describes the "bystander effect"?

- A) People are more likely to help when they are alone than in a group
- B) People feel less responsible to help when others are present
- C) People are more likely to help when they have time
- D) People are always more likely to help if they know the person in need

Answer: B) People feel less responsible to help when others are present

19. Which of the following is an example of a primary reinforcer?

- A) Money
- B) Praise
- C) Food
- D) A sticker

Answer: C) Food

20. In Piaget's stages of cognitive development, which stage occurs between the ages of 2 and 7?

- A) Sensorimotor stage
- B) Preoperational stage
- C) Concrete operational stage
- D) Formal operational stage

Answer: B) Preoperational stage

21. What is the difference between intrinsic and extrinsic motivation?

- A) Intrinsic motivation is driven by external rewards, while extrinsic motivation comes from within
- B) Intrinsic motivation is driven by internal rewards, while extrinsic motivation comes from external sources
- C) Intrinsic motivation is related to physical needs, while extrinsic motivation is psychological
- D) There is no difference between intrinsic and extrinsic motivation

Answer: B) Intrinsic motivation is driven by internal rewards, while extrinsic motivation comes from external sources

22. Which of the following is a characteristic of Type A personality?

- A) Relaxed and easy-going
- B) Competitive, driven, and often impatient
- C) Detached and uninvolved
- D) Calm and passive

Answer: B) Competitive, driven, and often impatient

23. Which of the following is the best definition of stress?

- A) A feeling of extreme happiness or excitement
- B) A physiological and psychological response to perceived challenges or threats
- C) A long-term state of relaxation
- D) A state of happiness or calmness

Answer: B) A physiological and psychological response to perceived challenges or threats

24. What does the concept of "cognitive dissonance" refer to?

- A) A state of mental stability and coherence
- B) The discomfort felt when one's beliefs and behaviors are in conflict
- C) The process of learning through observation
- D) The ability to think critically

Answer: B) The discomfort felt when one's beliefs and behaviors are in conflict

## Midterm preparation file

25. What is a key feature of a longitudinal research design?

- A) Studying participants at one point in time
- B) Comparing different groups of people at a single time
- C) Tracking the same participants over a long period of time
- D) Using random sampling techniques

Answer: C) Tracking the same participants over a long period of time

26. Which theory of personality emphasizes unconscious drives and the role of early childhood experiences?

- A) Trait theory
- B) Humanistic theory
- C) Psychodynamic theory
- D) Social-cognitive theory

Answer: C) Psychodynamic theory

27. Which of the following is a major difference between negative reinforcement and punishment?

- A) Negative reinforcement decreases behavior, while punishment increases behavior
- B) Negative reinforcement involves adding an unpleasant stimulus, while punishment involves removing an unpleasant stimulus
- C) Negative reinforcement increases behavior by removing an unpleasant stimulus, while punishment decreases behavior by adding an unpleasant stimulus
- D) Negative reinforcement and punishment are the same thing

Answer: C) Negative reinforcement increases behavior by removing an unpleasant stimulus, while punishment decreases behavior by adding an unpleasant stimulus

28. Which of the following is true about the relationship between sleep and memory?

- A) Sleep has no impact on memory consolidation
- B) Sleep helps consolidate and strengthen memories
- C) Sleep interferes with the ability to remember new information
- D) Sleep only affects long-term memory, not short-term memory

Answer: B) Sleep helps consolidate and strengthen memories

## Midterm preparation file

33. In Freud's model of the mind, which part of the personality is responsible for the "pleasure principle"?

- A) Superego
- B) Ego
- C) Id
- D) Conscious

Answer: C) Id

34. Which type of memory is responsible for holding information briefly while it is being used?

- A) Sensory memory
- B) Short-term memory
- C) Long-term memory
- D) Working memory

Answer: D) Working memory

35. Which type of intelligence, according to Howard Gardner, involves understanding and interacting with others?

- A) Linguistic intelligence
- B) Logical-mathematical intelligence
- C) Interpersonal intelligence
- D) Intrapersonal intelligence

Answer: C) Interpersonal intelligence

36. According to Erik Erikson, the psychosocial conflict faced during adolescence is: A) Autonomy vs. shame

- B) Integrity vs. despair
- C) Industry vs. inferiority
- D) Identity vs. role confusion

## Midterm preparation file

**37. Which of the following best describes the "self-serving bias"?**

- A) The tendency to accept blame for failures but not for successes**
- B) The tendency to take credit for successes but blame failures on external factors**
- C) The tendency to view oneself more negatively than others do**
- D) The tendency to consistently underestimate one's abilities**

**Answer: B) The tendency to take credit for successes but blame failures on external factors**

**38. What is the main focus of cognitive-behavioral therapy (CBT)?**

- A) Understanding unconscious motivations**
- B) Challenging negative thought patterns and behaviors**
- C) Promoting self-actualization**
- D) Exploring past trauma**

**Answer: B) Challenging negative thought patterns and behaviors**

**39. Which of the following is a key characteristic of an authoritarian parenting style?**

- A) High warmth and high control**
- B) Low warmth and high control**
- C) High warmth and low control**
- D) Low warmth and low control**

**Answer: B) Low warmth and high control**

**40. In Piaget's theory, which stage is characterized by the development of logical thinking and conservation?**

- A) Sensorimotor stage**
- B) Preoperational stage**
- C) Concrete operational stage**
- D) Formal operational stage**

**Answer: C) Concrete operational stage**

## Midterm preparation file

41. What is the main characteristic of a "secure attachment" in infants?

- A) Infants ignore the caregiver's presence
- B) Infants feel distress when separated and are easily soothed upon reunion
- C) Infants avoid eye contact with caregivers
- D) Infants refuse to interact with caregivers

Answer: B) Infants feel distress when separated and are easily soothed upon reunion

42. Which term refers to the inability to recognize that the amount of an object remains the same despite changes in its appearance?

- A) Egocentrism
- B) Object permanence
- C) Conservation
- D) Accommodation

Answer: C) Conservation

43. Which psychological disorder is characterized by persistent feelings of sadness, hopelessness, and a loss of interest in daily activities?

- A) Bipolar disorder
- B) Generalized anxiety disorder
- C) Major depressive disorder
- D) Obsessive-compulsive disorder

Answer: C) Major depressive disorder

44. Which of the following is an example of a secondary reinforcer?

- A) Food
- B) Praise
- C) Water
- D) Money

Answer: D) Money

## MCQS

## Midterm preparation file

45. In which stage of sleep do vivid dreams usually occur?

- A) Stage 1
- B) Stage 2
- C) Stage 3
- D) REM sleep

Answer: D) REM sleep

46. Which of the following is an example of observational learning?

- A) Learning to ride a bike by trial and error
- B) Learning by reading a textbook
- C) Learning how to cook by watching a cooking show
- D) Learning by listening to a lecture

Answer: C) Learning how to cook by watching a cooking show

47. Which of the following best describes "confirmation bias"?

- A) The tendency to reject new information that conflicts with existing beliefs
- B) The tendency to search for information that supports pre-existing beliefs
- C) The tendency to change beliefs to fit new information
- D) The tendency to trust experts without question

Answer: B) The tendency to search for information that supports pre-existing beliefs

48. Which of the following theories suggests that emotions are the result of physiological responses to external stimuli?

- A) James-Lange theory
- B) Cannon-Bard theory
- C) Schachter-Singer theory
- D) Lazarus theory

Answer: A) James-Lange theory

49. Which of the following is the primary function of the myelin sheath?

- A) Protects the neuron from damage
- B) Speeds up the transmission of neural signals
- C) Produces neurotransmitters
- D) Recycles old neurotransmitters

Answer: B) Speeds up the transmission of neural signals

50. Which of the following is the best example of a negative reinforcement?

- A) Giving a child a treat for completing homework
- B) Turning off a loud alarm when a person gets out of bed
- C) Scolding a child for misbehaving
- D) Praising a student for good behavior

Answer: B) Turning off a loud alarm when a person gets out of bed

**Passing criteria of this course**

| Letter Grade | Grade Points | Equivalent Percentage |
|--------------|--------------|-----------------------|
| A+           | 4.00         | 90-100                |
| A            | 4.00         | 85-89                 |
| A-           | 3.66 - 3.99  | 80-84                 |
| B+           | 3.33 - 3.65  | 75-79                 |
| B            | 3.00 - 3.32  | 71-74                 |
| B-           | 2.66 - 2.99  | 68-70                 |
| C            | 2.00 - 2.65  | 61-67                 |
| D            | 1.00 - 1.99  | 50-60                 |
| F            | 0.00         | 00-49                 |

**Passing Criteria for a Course:**

The passing criteria is defined in such a way that it ensures the student shall be consistent in his studies throughout the semester.

Therefore, for passing a course/subject, student shall fulfill the following:

- Secure minimum **20%** score in Formative Assessments/Mid terms
- Secure minimum **20%** score in Final Term Examinations.
- Secure at least **40%** marks in aggregate while fulfilling the above requirements

### Course Selection and Credit Hours

**Q: How do I select courses when the course selection is open?**

**A: Follow these steps:**

1. Check the credit hours allowed by your university (e.g., 21, 18, or 15 credit hours).
2. Each subject typically has 3 credit hours.
3. Divide the total allowed credit hours by 3 to determine how many subjects you can select.

**Examples:**

21 credit hours = 7 subjects  
18 credit hours = 6 subjects

15 credit hours = 5 subjects

Remember, the university may allow different credit hours for each student, so check your specific allowance.

By following these steps, you can make informed decisions during course selection and manage your credit hours effectively.
