**MCQS from recent quiz file mostly
Learn Death and Birth date of different philosopher
Focus on Kant specially**

Q: What is meaning of philosophy?

Philosophy is a combination of two Greek words ‘Philo’ meaning love and ‘Sophia’ meaning wisdom. So, love for wisdom is the meaning of philosophy.

Q: Write 3 points of Plato curriculum?

Curriculum that Plato suggested has three aspects:

- Depth
- Holistic learning
- Self-directed

Q: What are 5 characteristics on Plato dialectic method?

The dialectic method is also called the Socratic method.

- The method originates from Socrates’ teaching style.
- His ideas were only transferred orally, Plato was the one who wrote them down and refined the method.
- All thinking begins with a thesis or a point of view.
- An opposing point of view or antithesis is needed to re-examine and defend our beliefs.
- Question-and-answer approach.
- After Socrates’ death, Plato opened up his own school, the Academy, where the dialectic was used as a teaching methodology, where students and professors engaged in a dialectic approach to problems.

Q: Criticism on Plato?

Little education for productive classes:

- Productive classes are only granted primary education, while higher education is reserved for soldiers & governing classes, imply that the labour class has no need for education.

No individual differences:

- Plato suggested a uniform curriculum which would lead to the creation of only one kind of citizen leading to lack of variety and static monotony. Neglect of literary education: - Plato’s curriculum neglects training in literature by stressing the importance in mathematics.

Stress on Philosophy:

- Some critics feel that Plato's instance on philosophy is exaggerated which can lead to an increase in the number of contemplative individuals at the expense of more practical members.

Q: What is Inductive and deductive reasoning ?

Aspect	Inductive Reasoning	Deductive Reasoning
Definition	Deriving general principles from specific observations	Deriving specific conclusions from general principles
Approach	Bottom-up	Top-down
Starting Point	Specific observations or data	General statements or hypotheses
Conclusion	Probable and general	Certain and specific
Example	Observing that the sun rises every day and concluding that it will rise tomorrow	Knowing that all humans are mortal and concluding that a specific person is mortal
Usage	Often used in scientific research to formulate hypotheses	Often used in logical arguments and mathematical proofs

Q: Teacher training according to Alder?

How Teachers should be trained?

- Same basic schooling as proposed in the Paideia Proposal.
- Acquire additional schooling at college or university level.
- Advanced levels of learning must be carried out in university for the same kind of general & liberal curriculum.
- They must engage in practice-teaching under supervision.
- Must learn to teach well by being exposed to the performances of those who are masters in the art of teaching.

Q: Improving moral self

Building a Moral Self:

- Truthfulness is a means of building the moral self within a person.
- The essential element of human education.
- Kant argued that truth telling is a perfect duty, one so basic that it cannot be overridden by other values.

Q: Importance of society according to Socrates?

According to Socrates, society is crucial for the development and well-being of individuals. He believed that humans are inherently social beings who achieve their highest potential

through interaction and cooperation with others. Socrates emphasized the role of society in cultivating virtues, such as justice, courage, and wisdom, which are essential for personal and communal harmony. He also argued that a well-ordered society provides the structure and opportunities necessary for individuals to engage in philosophical inquiry and self-improvement. Ultimately, Socrates viewed society as fundamental to achieving a good and meaningful life.

Q: Educational aim by Dewey?

- The key assumption regarding educational aims is that it is to enable individuals to continue their education
 - or that the object and reward of learning is continued capacity for growth.
- However, according to Dewey, aims of education can be multiple since all members of the society do not possess similar natures and therefore require different aims, as aims relate always to results.

Q: Idealism

Those who are the followers of idealism philosophy, believed that:

- Ideas are the only true reality.
- Focus on conscious reasoning in mind.
- Mind vs. the material world (When you travel from the world which is material towards the world which is spiritual, and when you reach the spiritual world, you in fact find the ultimate truth.)

Q: What is Primary source of education according to Rousseau?

Primary Sources of Education:

- Education from nature
- Education given by men
- Education from things or circumstances

Q: Emergence of reason in your own words.

- The most important characteristic of the Age of Reason
- Rise of self-consciousness
- Self-preservation Behaviour is focused toward individual well-being
- The excessive power beyond the satisfaction of needs is what causes reason to emerge.
- is the fundamental urge of life - First impulses are usually self-ward

Q: Five points of platonic idealism

Plato believed that:

- The search for absolute (universal) truth in all fields of life.

- Truth is perfect and eternal.
- Dialectic (Means a two sided conversation. In dialectic, two persons will talk from their perspectives and when they bring up their knowledge, they create a new knowledge by the end of the time.)
- Humans have lost the knowledge that souls possess. - It is the responsibility of humans to search for that knowledge and truth in order to lead a good and virtuous life.

Q: Types of obedience?

Types of Obedience:

There are two types of obedience according to Emmanuel Kant:

- Absolute Obedience:
- Voluntary Obedience

Absolute Obedience:

- Obedience without question
- Necessary to prepare the child for the fulfilment of laws that he will have to obey later, as a citizen, even though he may not like them.

Voluntary Obedience:

- Obeying what feels good and reasonable and moral

Q: Role of teaching according to Jesper?

Guiding Hand: - Children must be educated according to their own inclinations & abilities under the guiding hand of the educator.

Lifelong Education: - Jaspers was in no doubt about the fact that the value of school is directly bound with the quality of its teachers who can only perform their task of educating young people through life-long self-education & training.

Need for Substance: - Good teachers must recognize the need for substance in their teaching, which only research can provide.

Q: Why democracy is necessary for education

Karl Jaspers believed that democracy is really important for education. He thought this because in a democratic place, people can talk freely and share ideas. This helps them think better and grow as individuals. Also, democracy makes sure that everyone has a chance to learn, no matter who they are. It teaches people to be good citizens and understand how things work in their society. Jaspers said that all these things are really important for a good education and a fair society.

Q: Branches of philosophy?

Branches of Philosophy:

There are three main branches of philosophy,

1. **Metaphysics:** is the study of ultimate nature of reality. For instance, God exists or not? What is truth? What is permanent?
2. **Epistemology:** is the study of knowledge. For instance, what should be taught? Why it should be taught? Who should teach?
3. **Axiology:** is the study of values. Values in terms of society, politics and aesthetics

Q: Principle of golden mean in education by Aristotle?

The Golden Mean

- The moral mean or the golden mean is the desirable middle between two extremes.
- The two extremes are of: □

Deficiency □

Excess

Golden Mean (Courage) - In excess it would become recklessness.

- In deficiency it would become cowardice. - Should be in moderation.

Q: How to apply democratic rules in schools?

To apply democratic rules in schools, let students have a say in decisions through groups like student councils. Encourage open talks between students, teachers, and staff so everyone can share thoughts and solve problems together. When big choices need making, like new rules or activities, let everyone vote or find a way everyone agrees on. Teachers should also feel listened to and have a part in planning lessons. Lastly, make sure everyone feels respected no matter their differences, and teach how to solve problems peacefully when they come up.
