

ENG502

Final-Term (☆☆☆☆☆☆)

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Maha Malik

Introduction to Linguistics

1. Syntax (Topic 123)

Syntax means the arrangement of words in a sentence. It studies how sentences are formed and the rules used to generate correct sentences.

2. Tree Diagram (Topic 133)

Tree diagrams visually show sentence structure. A sentence (S) is divided into NP (noun phrase) and VP (verb phrase). NP may contain article + noun, and VP contains verb + NP.

3. Phrase Structure Rules (Topic 134)

These rules show how phrases are formed.

- $S \rightarrow NP VP$
- $NP \rightarrow \text{Art (Adj) N / Pronoun / Proper noun}$
- $VP \rightarrow V NP (PP) (Adv)$
- $PP \rightarrow \text{Prep NP}$

They help generate many sentences using few rules.

4. Types of Meaning / Semantics (Topic 141)

Semantics studies meaning in language.

- Lexical meaning: dictionary meaning
- Grammatical meaning: meaning from grammar
- Referential (denotative): basic meaning
- Connotative: associated meaning
- Social meaning: social information
- Affective meaning: feelings
- Reflected & collocative meaning: word associations
- Thematic meaning: message organization

5. Denotative Meaning (Topic 142)

It is the literal, dictionary meaning of a word. Example: *needle* = thin, sharp steel object.

6. Connotative Meaning (Topic 143)

It is the emotional or personal meaning of a word. Example: *bookworm* suggests a person who reads a lot (often negative).

7. Prosody (Topic 145)

Prosody studies rhythm, stress, tone, and intonation in speech. It shows emotion, emphasis, attitude, and sentence type.

8. Instrument Role in Semantics (Topic 150)

An instrument is the object used by an agent to perform an action.
Example: *He cut the rope with a razor.*

9. Homonymy vs Polysemy (Topic 156)

- Homonymy: same word, unrelated meanings (bank: river / money)
- Polysemy: same word, related meanings (head: body, leader)

10. Metonymy (Topic 157)

Using one word to refer to something closely related.
Examples: *The White House announced...*, *boiling the kettle*

11. Pragmatics (Topic 159)

Pragmatics studies implied or invisible meaning based on context and speaker intention.

12. Physical Context (Topic 160)

Some words depend on situation for meaning (here, now, she, tomorrow).
Example sentence cannot be understood without knowing who, where, and when.

13. Socio-Cultural Context (Topic 163)

Language is shaped by culture, society, education, and traditions.

14. Deixis (Topic 164–165)

Words that need context to be understood.

- Person deixis: I, you, he
- Spatial deixis: here, there
- Temporal deixis: now, then

15. Inference (Topic 169)

Inference is understanding meaning beyond words using background knowledge.

Example: *Can I see your Chomsky?* → book by Chomsky

16. Direct Speech Act (Topic 174)

When sentence structure matches its function.

Example: *Can you ride a bicycle?*

17. Discourse Analysis (Topic 177)

Study of language beyond sentences, in texts and conversations.

18. Origin of Discourse Analysis (Topic 177)

Introduced by Zellig Harris. It studies connected language and meaning in real communication.

19. Critical Discourse Analysis (CDA) Principles (Topic 178)

- Discourse reflects power and ideology
- Language shapes society

20. Coherence (Topic 181)

Coherence means ideas fit together logically using shared knowledge, not just words.

21. Discourse Types (Topic 182)

- Spoken (less planned)
- Written (more structured)

22. Discourse as Dialogue (Topic 185)

Dialogue comes before monologue. Conversation skills develop early in life.

23. Understanding Discourse (Topic 187)

Understanding needs background knowledge (schemata) along with language.

24. Politeness Rules (Topic 193)

- Don't impose
- Give options
- Make listener feel good

25. Applied Linguistics Branches (Topic 202)

Bilingualism, multilingualism, pragmatics, conversation analysis, language policy, contrastive linguistics.

26. Types of Aphasia (Topic 213)

- Broca's: slow, broken speech
- Wernicke's: fluent but meaningless
- Conduction: repetition problems

27. Critical Period (Topic 215)

Language must be learned before puberty for native-like ability.

28. Standard Varieties of English (Topic 217)

British, American, Australian, Indian English.

29. Accent vs Dialect (Topic 218)

- Accent: pronunciation
- Dialect: pronunciation + grammar + vocabulary

30. Child Language Stages (Topic 222)

Babbling → One-word → Two-word → Telegraphic → Multiword

31. Holophrastic Stage (Topic 224)

One word acts as a full sentence.

32. One-Word Stage (Topic 224)

Child uses single words for objects and needs.

33. Telegraphic Stage (Topic 226)

Short sentences without grammar words.
Example: *Daddy go work*

34. How Children Learn Language (Topic 228)

Children are not taught directly; they learn by interaction and trial.

35. Overextension (Topic 233)

Child uses one word for many similar objects.
Example: *ball* for moon, lamp

36. Language Barriers & L2 Learning (Topic 235)

Adults find pronunciation difficult in second language learning.

37. Wave Model (Topic 244)

Language changes spread like waves across regions.

38. Morphological Processing (Topic 248)

Computer breaks words into root and affixes.
Example: *reads* = read + s

39. Syntactic Processing (Topic 249)

Parser analyzes sentence grammar using context-free grammar.

40. Word Sense Disambiguation (Topic 250)

Computer selects correct meaning of a word using context.

41. Prototypical Dictionary (Topic 252)

Dictionary gives spelling, meaning, usage, and grammar.

42. Dictionary Sources (Topic 253)

Corpus, archives, fieldwork, loanwords, compounding.

43. Corpus in Lexicography (Topic 255)

Corpus is a large electronic text collection used for dictionary making.

44. E-Dictionary (Topic 255)

Digital dictionaries with search, grammar, audio, and apps.

45. Neurolinguistics (Topic 259)

Study of brain and language relationship.

46. Chinese Linguistic Research (Topic 261)

Focus on language policy, teaching, translation, ideology.

47. Discourse vs Sentence

Discourse is longer, meaningful communication; a sentence is a single unit.
