MCQS

1. What is the main focus of clinical psychology?

- a) The study of human behavior**
- b) The treatment of mental health disorders**
- c) The development of psychological theories**
- d) The analysis of social behavior**

Answer: b) The treatment of mental health disorders

2. Which of the following is a common method used in clinical assessment?

- a) Observation**
- b) Brain imaging**
- c) Genetic testing**
- d) Neurofeedback**

Answer: a) Observation

3. In cognitive-behavioral therapy (CBT), the goal is to:

- a) Uncover unconscious conflicts**
- b) Change maladaptive thinking patterns**
- c) Explore early childhood memories**
- d) Analyze dream content**

Answer: b) Change maladaptive thinking patterns

4. What does the DSM-5 stand for?

- a) Diagnostic and Statistical Manual of Mental Disorders**
- b) Diagnostic and Statistical Methods of Psychology**
- c) Diagnostic System for Mental Health Disorders**
- d) Diagnostic and Statistical Model of Psychology**

Answer: a) Diagnostic and Statistical Manual of Mental Disorders

5. Which psychological approach focuses on the individual's perception and subjective experience?

- a) Behaviorism
- b) Psychoanalysis
- c) Humanistic psychology
- d) Cognitive psychology

Answer: c) Humanistic psychology

6. The term 'neuroplasticity' refers to:

- a) The ability of the brain to change throughout life
- b) The fixed nature of brain structures
- c) The development of mental disorders
- d) The ability to suppress memories

Answer: a) The ability of the brain to change throughout life

7. Which of the following is a defense mechanism in psychoanalytic theory?

- a) Regression
- b) Empathy
- c) Rationalization
- d) Both a and c

Answer: d) Both a and c

8. A therapist using psychodynamic therapy is most likely to focus on:

- a) The present issues without exploring the past
- b) Changing automatic thoughts
- c) Exploring unconscious conflicts
- d) Training in new behaviors

Answer: c) Exploring unconscious conflicts

9. The main goal of existential therapy is to:

- a) Increase self-awareness and personal responsibility
- b) Address biological causes of mental illness
- c) Teach coping strategies for anxiety
- d) Reframe negative thoughts

Answer: a) Increase self-awareness and personal responsibility

10. In psychological research, the term 'validity' refers to:

- a) The accuracy of a measurement
- b) The consistency of a measurement
- c) The generalizability of results
- d) The reliability of a measurement

Answer: a) The accuracy of a measurement

11. A researcher wants to examine the relationship between two variables without manipulating them. What type of research design is most appropriate?

- a) Experimental design
- b) Correlational design
- c) Longitudinal design
- d) Case study

Answer: b) Correlational design

12. Which is the primary difference between experimental and correlational research?

- a) Experimental research looks at the cause-and-effect relationship
- b) Experimental research involves participants' behavior
- c) Correlational research controls variables
- d) Experimental research never uses statistics

Answer: a) Experimental research looks at the cause-and-effect relationship

13. Which neurotransmitter is most commonly associated with mood regulation?

- a) Serotonin
- b) Dopamine
- c) Acetylcholine
- d) Norepinephrine

Answer: a) Serotonin

14. The cognitive triad in depression refers to negative thoughts about:

- a) The self, the world, and the future
- b) The past, present, and future
- c) One's identity, self-esteem, and worth
- d) Past mistakes, present emotions, and future failures

Answer: a) The self, the world, and the future

15. A person diagnosed with schizophrenia may experience:

- a) Hallucinations
- b) Mania
- c) Memory loss
- d) Compulsive behaviors

Answer: a) Hallucinations

16. In the context of stress, 'eustress' refers to:

- a) Negative stress that causes harm
- b) Stress that can motivate and enhance performance
- c) A physiological reaction to extreme pressure
- d) Chronic stress without relief

Answer: b) Stress that can motivate and enhance performance

17. The 'fight or flight' response is associated with the activation of the:

- a) Parasympathetic nervous system
- b) Autonomic nervous system
- c) Central nervous system
- d) Sympathetic nervous system

Answer: d) Sympathetic nervous system

18. Which of the following is a common symptom of post-traumatic stress disorder (PTSD)?

- a) Nightmares
- b) Increased energy
- c) Weight gain
- d) Hyperactivity

Answer: a) Nightmares

19. According to Maslow's hierarchy of needs, the most basic human needs are:

- a) Self-actualization
- b) Esteem needs
- c) Physiological needs
- d) Safety needs

Answer: c) Physiological needs

20. Which therapy emphasizes the importance of unconditional positive regard and empathy?

- a) Cognitive-behavioral therapy
- b) Humanistic therapy
- c) Psychoanalytic therapy
- d) Dialectical behavior therapy

Answer: b) Humanistic therapy

21. The placebo effect occurs when:

- a) A patient's symptoms improve due to their belief in a treatment
- b) A drug has harmful side effects
- c) The treatment is proven to have no impact
- d) No treatment is provided, but symptoms still worsen

Answer: a) A patient's symptoms improve due to their belief in a treatment

22. What is the main function of the frontal lobe in the brain?

- a) Processing sensory information
- b) Memory storage
- c) Decision-making and problem-solving
- d) Language comprehension

Answer: c) Decision-making and problem-solving

23. What is the primary goal of group therapy?

- a) To provide a one-on-one therapeutic experience
- b) To promote interpersonal relationships and group support
- c) To focus on individual cognitive changes
- d) To analyze dreams in a group setting

Answer: b) To promote interpersonal relationships and group support

24. In operant conditioning, reinforcement increases the likelihood of a behavior, while punishment:

- a) Increases the likelihood of a behavior
- b) Has no effect on behavior
- c) Decreases the likelihood of a behavior
- d) Causes extinction

Answer: c) Decreases the likelihood of a behavior

Midterm preparation file

25. Which of the following is considered a mood disorder?

- a) Bipolar disorder
- b) Schizophrenia
- c) Obsessive-compulsive disorder
- d) Borderline personality disorder

Answer: a) Bipolar disorder

26. The concept of self-efficacy is most closely associated with which theorist?

- a) Albert Bandura
- b) Sigmund Freud
- c) Carl Rogers
- d) Erik Erikson

Answer: a) Albert Bandura

27. Which type of research involves observing participants in their natural environment without intervention?

- a) Experimental research
- b) Naturalistic observation
- c) Longitudinal study
- d) Case study

Answer: b) Naturalistic observation

28. The 'fight or flight' response is triggered by the:

- a) Prefrontal cortex
- b) Hypothalamus
- c) Hippocampus
- d) Thalamus

Answer: b) Hypothalamus

Midterm preparation file

29. What is the key feature of borderline personality disorder?

- a) Extreme mood swings and fear of abandonment
- b) Obsessive-compulsive behaviors
- c) Lack of empathy and social detachment
- d) Persistent patterns of grandiosity

Answer: a) Extreme mood swings and fear of abandonment

30. What is the purpose of a control group in an experimental study?

- a) To receive the experimental treatment
- b) To be manipulated in a different way
- c) To provide a baseline for comparison
- d) To change the variables being tested

Answer: c) To provide a baseline for comparison

31. Which of the following is true about classical conditioning?

- a) It involves associating a neutral stimulus with an unconditioned stimulus
- b) It is based on reinforcement and punishment
- c) It involves voluntary behaviors
- d) It is a form of operant conditioning

Answer: a) It involves associating a neutral stimulus with an unconditioned stimulus

Midterm preparation file

33. According to Erikson, the psychosocial stage of adolescence is called:

- a) Trust vs. Mistrust**
- b) Autonomy vs. Shame**
- c) Identity vs. Role Confusion**
- d) Intimacy vs. Isolation**

Answer: c) Identity vs. Role Confusion

34. Which of the following is a characteristic of antisocial personality disorder?

- a) Over-sensitivity to criticism**
- b) Lack of remorse for wrongdoing**
- c) Chronic feelings of emptiness**
- d) Fear of rejection**

Answer: b) Lack of remorse for wrongdoing

35. In which type of research is the goal to explore cause-and-effect relationships between variables?

- a) Correlational research**
- b) Case study**
- c) Experimental research**
- d) Naturalistic observation**

Answer: c) Experimental research

36. Which part of the brain is most involved in regulating emotional responses?

- a) Occipital lobe**
- b) Temporal lobe**
- c) Amygdala**
- d) Cerebellum**

Answer: c) Amygdala

Midterm preparation file

37. In cognitive therapy, automatic thoughts are:

- a) Deliberate, reasoned conclusions
- b) Fast, involuntary, and often negative thoughts
- c) Associated with unconscious conflicts
- d) The result of classical conditioning

Answer: b) Fast, involuntary, and often negative thoughts

38. The 'halo effect' refers to:

- a) Judging a person based on one positive trait
- b) The tendency to overestimate the frequency of negative events
- c) Attributing success to internal factors and failure to external ones
- d) The influence of past experiences on current perceptions

Answer: a) Judging a person based on one positive trait

39. Which of the following is a symptom of a manic episode in bipolar disorder?

- a) Excessive sleep
- b) Decreased energy
- c) Elevated or irritable mood
- d) Increased appetite

Answer: c) Elevated or irritable mood

40. The placebo effect demonstrates the importance of which psychological concept?

- a) Classical conditioning
- b) Cognitive dissonance
- c) The power of expectation
- d) Operant conditioning

Answer: c) The power of expectation

MCQS

Midterm preparation file

41. Which of the following is true about learned helplessness?

- a) It involves a belief in one's ability to change situations
- b) It is associated with depressive symptoms
- c) It encourages active problem-solving
- d) It occurs only in animals

Answer: b) It is associated with depressive symptoms

42. According to Maslow's hierarchy of needs, self-actualization refers to:

- a) The desire for financial security
- b) Fulfilling one's potential and becoming the best version of oneself
- c) The need for safety and protection
- d) Seeking social approval and acceptance

Answer: b) Fulfilling one's potential and becoming the best version of oneself

43. Which psychological model emphasizes the role of unconscious conflicts in behavior?

- a) Humanistic
- b) Behavioral
- c) Psychodynamic
- d) Cognitive

Answer: c) Psychodynamic

44. The term 'semantic memory' refers to:

- a) Memory for specific events or episodes
- b) General knowledge and facts
- c) Memory of emotions and feelings
- d) Procedural memory for tasks

Answer: b) General knowledge and facts

45. Which of the following is true of the autonomic nervous system?

- a) It is responsible for voluntary movements
- b) It controls breathing and heart rate
- c) It regulates sensory input
- d) It processes complex cognitive tasks

Answer: b) It controls breathing and heart rate

46. A major disadvantage of naturalistic observation is that:

- a) It requires extensive manipulation of variables
- b) It lacks ecological validity
- c) Researchers have no control over variables
- d) It is always unethical

Answer: c) Researchers have no control over variables

Passing criteria of this course

Letter Grade	Grade Points	Equivalent Percentage
A+	4.00	90-100
A	4.00	85-89
A-	3.66 - 3.99	80-84
B+	3.33 - 3.65	75-79
B	3.00 - 3.32	71-74
B-	2.66 - 2.99	68-70
C	2.00 - 2.65	61-67
D	1.00 - 1.99	50-60
F	0.00	00-49

Passing Criteria for a Course:

The passing criteria is defined in such a way that it ensures the student shall be consistent in his studies throughout the semester.

Therefore, for passing a course/subject, student shall fulfill the following:

- Secure minimum **20%** score in Formative Assessments/Mid terms
- Secure minimum **20%** score in Final Term Examinations.
- Secure at least **40%** marks in aggregate while fulfilling the above requirements

Course Selection and Credit Hours

Q: How do I select courses when the course selection is open?

A: Follow these steps:

- 1. Check the credit hours allowed by your university (e.g., 21, 18, or 15 credit hours).**
- 2. Each subject typically has 3 credit hours.**
- 3. Divide the total allowed credit hours by 3 to determine how many subjects you can select.**

Examples:

21 credit hours = 7 subjects

15 credit hours = 5 subjects

Remember, the university may allow different credit hours for each student, so check your specific allowance.

By following these steps, you can make informed decisions during course selection and manage your credit hours effectively.
