Q.1 Which of the following methods leads the pupil to discover mathematical facts?

A. Synthetic
B. Analytic
C. Laboratory
D. Problem solving

Q.2 What method involves learning by doing, observation and proceeding from concrete to abstract?

A. Dogmatic method
B. Laboratory method
C. Demonstration method
D. Inductive method

Q.3 Which teaching method is considered solely depending on the skills of the teacher?

A. Inductive method
B. Heuristic method
C. Project method
D. Dogmatic method

Q.4 The method based upon real thinking, experiments and inspection is :

A. Deduction
B. Analysis
C. Laboratory
D. Synthesis

Q.5 The popularization of which teaching method will cause stagnation in teaching?

A. Discussion
B. Dogmatic
C. Heuristic
D. Lecture

Q.6 Area of triangle can be calculated appropriately using

A. Problem solving method
B. Laboratory method
C. Analytic method
D. Synthetic method

Q.7 "Which of the following methods involves a strict adherence to rules?"

A. Lecture method
B. Socratic method
C. Dogmatic method
D. Commutative method

Q.8 All are examples of project methods EXCEPT:

A. Geometrical drawing project
B. Graphic illustration of students' achievement through the test
C. Use of mathematics in business
D. Structuring classroom's lesson plans and objectives

Q.9 A successful experiment is a source of joy and encouragement to the learner. This refers to

A. Deductive method
B. Heuristic method
C. Laboratory method
D. Synthetic method

Q.10 In which teaching method, systematic and continuous teaching is NOT possible?

A. Inductive method
B. Dogmatic method
C. Heuristic method
D. Project method
