BT603 LIVE (QUIZ 1) MCQs

Past papers for all subjects are also available 03184148783

1. **What is the percentage of sucrose (% of total w/v) in cane molasses?**
   - A) 33.4 ✅
   - B) 10.6
   - C) 48.5
   - D) 23.5

---

2. **What would be the result if the culture medium designed for griseofulvin production contains insufficient amount of zinc?**
   - A) Griseofulvin will be less effective against bacteria
   - B) Griseofulvin will not be produced at all
   - C) Griseofulvin production will be less ✅
   - D) Griseofulvin molecules will be unstable

---

3. **Which of the following chelators is commonly used in fermentation media to remove excess copper?**
   - A) NaOH
   - B) EDTA ✅

---

4. **What is the approximate sucrose composition of barley malt (expressed as a percentage of dry weight of total)?**
   - A) 6-8 ✅
   - B) 58-60
   - C) 35

---

5. **Which of the following is used as the sole carbon substrate in cephalosporin production?**
   - A) Soybean oil ✅
   - B) Methyl oleate
   - C) Rapeseed oil
   - D) Glycerol trioleate

---

6. **Which of the following statements is true about the energy content of n-alkanes compared to sugar?**
   - A) n-alkanes have approximately one-third the energy content of sugar on a weight basis
   - B) n-alkanes have approximately three times the energy content of sugar on a weight basis ✅
   - C) n-alkanes have approximately half the energy content of sugar on a weight basis
   - D) n-alkanes have approximately the same energy content as sugar on a weight basis

---

7. **What is the approximate energy ratio of oil compared to glucose on a per weight basis?**
   - A) 6.0 times ✅
   - B) 24 times
   - C) 12 times
   - D) 48 times

---

8. **Which trace element is used in the production of bacitracin?**
   - A) Manganese
   - B) Zinc ✅
   - C) Iron
   - D) Copper

---

9. **Which one of the following is a good nitrogen source for the production of Penicillin?**

Miss Mehwish: 03171491481

- A) Pharmamedia
- B) Ammonium salt ✅
- C) Peanut granules
- D) Corn steep liquor

---

10. **Which of the following also possess antifoam properties?**
    - A) Oils ✅
    - B) Hydrocarbons
    - C) Carbohydrates
    - D) Proteins

Which of the following is used for the production of Miso?
Submerged Fermentation
Solid State Fermentation ✔
Surface Culture Fermentation
Anaerobic Fermentation
Which of the following are characteristics of Bacillus anthracis?
Aerobic, spore forming Gram positive bacterium ✔
Aerobic, non-spore forming Gram positive bacterium
Aerobic, spore forming Gram negative bacterium
Anaerobic, spore forming Gram positive bacterium
Which of the following microorganism converts pyruvic acid into lactic acid?
Streptococcus pyogenes ✔
Escherichia coli
Acetobacter aceti
Saccharomyces cerevisiae
What type of process involves continuous addition of substrates and removal of final products?
Batch fermentation
Continuous fermentation ✔
Fed batch fermentation
Continuous and Fed Batch fermentation
Which of the following is included in upstream processing?
Effluent treatment
Product purification
Product recovery

Medium sterilization ✔

Which of the following process is a small-scale equivalent of stirred tank bioreactor?

Anaerobic fermentation

Shake flask fermentation ✔

Solid state fermentation

Jelly fermentation

What is the process through which an organism generates ATP via aerobic respiration, but can switch to anaerobic respiration when oxygen is unavailable?

Semi- Anaerobic Fermentation ✔

Aerobic Fermentation

Koji Fermentation

Anaerobic Fermentation

For what type of fermenters, is ex-situ sterilization typically performed?

Pilot Scale

Industrial

Lab scale and Industrial ✔

What is the chemical nature of enzymes?

Glycan

Protein ✔

Carbohydrate

Lipid

Which of the following remain within the cell and are responsible for catalyzing processes within cells?

Extracellular enzymes

Constitutive enzymes

Intracellular enzymes ✔

Inducive enzymes
