QUESTION 1

The _____ level of any leaf in a binary tree is called the depth of the tree.

Minimum

Maximum

Zero

Mid

QUESTION 2

If there is a complete binary tree of depth 4, the total number of nodes in it will be:

30

32

33

31

QUESTION 3

The following method `getLeft()` of `TreeNode` class returns the _____ to the left sub-tree:

```
TreeNode * getLeft(){ return left; }
```

Object

None of the given options

Integer value

Pointer

QUESTION 4

The depth of a complete binary tree is 6, the number of its non-leaf nodes will be:

61

64

63

6

QUESTION 5

Which of the following is true about binary trees?

Parent node of two sibling nodes must be same

A binary tree should have only one leaf node

A binary tree should have two root nodes

A node can have multiple parent nodes

BONUS QUESTION

The pre-order traversal of a binary tree involves visiting the nodes in the order:

Left, Root, Right

Left, Right, Root

Root, Left, Right

Right, Left, Root
