Lecture-16

Systemic Functional Linguistics and CDA

Topic-01: Systemic Functional Linguistics (SFL) - Aims and Applications

What is Systemic Functional Linguistics (SFL) considered as?

It is considered a branch of linguistics with specific theoretical principles.

How have SFL linguists applied their analytic tools in studies?

SFL linguists have applied their tools in studies such as education, communication studies, forensic linguistics, and Critical Discourse Analysis (CDA).

What does SFL focus on within specific social and cultural contexts?

SFL focuses on the meaning-making resources of language within specific social and cultural contexts.

What term does SFL use to represent the link between vocabulary and grammatical choices?

SFL uses the term "lexicogrammar" to represent the link between vocabulary and grammatical choices.

What are the three overarching components of the semantic system in SFL?

a) Ideational, b) Interpersonal, c) Textual

According to SFL, how is meaning realized in texts?

Meaning is realized in texts through the unfolding of social and cultural constructs within semantic networks.

What does SFL claim about the study of discourse and grammar?

SFL claims that the study of discourse cannot be separated from the study of the grammar that underlies it.

How do SFL approaches contribute to understanding discourse events?

SFL approaches help explore socio-cultural settings in which discourse events take place and provide a focus for investigation.

Topic-02: Objections to SFL in Critical Discourse Analysis

What objection does Van Dijk have to SFL as a framework for the study of discourse?

Van Dijk objects to SFL due to what he sees as too much linguistic sentence grammar and esoteric vocabulary.

According to Blommaert, what is the problem of "linguistic bias in CD"?

The problem is that linguistic bias restricts the analysis to textually organized and explicitly linguistically encoded discourse.

How does Galasiński combine SFL and ethnography in his investigations?

Galasiński combines SFL and ethnography to provide an empirical basis for his research.

Topic-03: Lexico-grammatical Tools for Text Analysis

What are the three components of the ideational, interpersonal, and textual analysis in SFL?

a) Ideational, b) Interpersonal, c) Textual

How does SFL analyze linguistic elements expressing roles and attitudes?

SFL analyzes linguistic elements expressing roles and attitudes through mood, modality, appraisal, and politeness.

Provide examples of SFL tools for text analysis mentioned in the lesson.

a) Process, Participant, and Circumstances analysis, b) Rhetorical Structure Theory, c) Lexis and Collocation

How does SFL use transitivity analysis in CDA?

SFL uses transitivity analysis in CDA to focus on the critical evaluation of content and ideology.

What is one of the linguistic characteristics pointed out by Fairclough in neo-capitalist discourses?

Processes are presented without accountable human agents, contributing to the pervading linguistic characteristics.

Lecture-17

Metaphor and CDA

Topic-01: Introduction – Metaphor and CDA

What is metaphor analysis in critical discourse studies (CDS)?

Answer: Metaphor analysis in CDS is gaining credence as a profitable tool according to Carl John.

What do cognitive approaches to metaphor assert?

Answer: Cognitive approaches assert that metaphor is not just about how we talk but significantly influences how we think about particular subjects.

How do Lakoff and Johnson argue metaphor's role in reality construction?

Answer: Lakoff and Johnson argue that examining metaphor in text and talk reveals dominant ways people conceive aspects of reality, constructing worldviews and versions for addressees.

Why is metaphor analysis considered appropriate for critical research?

Answer: Metaphor analysis is considered appropriate for critical research due to its ideological potential, shaping and perpetuating particular worldviews in discourse.

Topic-02: Metaphor and Cognition

How is metaphor viewed as a cognitive process?

Answer: Metaphor is viewed as a cognitive process involving conceptualizing one thing in terms of another.

What is a key insight from Conceptual Metaphor Theory (CMT)?

Answer: CMT suggests that conceptual metaphors have origins in embodied experiences, shaping our fundamental conceptual system.

According to Lakoff and Johnson, what is an example of an orientational metaphor?

Answer: An example is the orientational metaphor that sickness and death are down, rooted in the embodied experience of lying down due to illness.

Topic-03: Metaphor, Context and Discourse

Why is the analysis of metaphor choice and use important in CDS?

Answer: The analysis is important to understand how context, including social, cultural, and historical factors, shapes and influences metaphor use in discourse.

What role does contextual dynamics play in metaphor use?

Answer: Contextual dynamics can make metaphor use strategic, with discourse participants deploying metaphors intentionally to frame topics advantageously.

According to Steen's model, what are the three dimensions of metaphor?

Answer: The three dimensions are linguistic, conceptual, and communicative.

Topic-04: Metaphor in Multi-modal Texts

Why is multi-modal analysis considered key in analyzing educational institute advertisements?

Answer: Multi-modal analysis is essential to avoid vague meanings in ads and gain insight into how organizations represent themselves.

How does the SMU annual report use metaphors to represent the organization?

Answer: The report represents the organization as a living organism and as a person, using metaphors to convey growth, development, and success.

What is an example of multi-modal metaphor in the SMU annual report?

Answer: The visual metaphor of an organization as a runner on an ascending path represents the process of fulfilling the organization's vision.

How does anthropomorphic metaphor enhance communication effectiveness?

Answer: Anthropomorphic metaphors allow us to make sense of phenomena in human terms, making communication highly effective.

Lecture-18

Rhetoric and Argumentation

Topic-01: Introduction: Classical Rhetoric and New Rhetoric

Who established rhetoric and argumentation as serious disciplines in Europe?

Aristotle (384–322 BC).

How did Aristotle define rhetoric?

Aristotle defined rhetoric as "an ability to see the available means of persuasion."

What are the three types of proof in classical rhetoric?

Logos (arguments), Ethos (speaker's credibility), Pathos (emotional disposition of the audience).

What is Modus Barbara, and how is it used?

Modus Barbara is a logical proof; for example, "All A are B; all B are C; therefore, all A are C."

How did Aristotle view the use of metaphors in rhetoric?

Aristotle saw metaphors not just as stylistic embellishments but also having a cognitive dimension, creating intellectual pleasure and facilitating understanding.

What are the three styles developed concerning figures of speech?

Grand or magnificent style, middle or moderate style, simple or humble style.

Who revived rhetoric and argued against merely probable reasoning in the 20th century?

Chaim Perelman and Lucie Olbrechts Tyteca with the New Rhetoric in their famous "Traité de 'argumentation" (1983 [1958]).

Topic-02: Contemporary Argumentation Theories

What model of argumentation did Stephen Toulmin present?

Toulmin presented the model of argumentation in "The Uses of Argument" (1958).

How does Douglas Walton redefine traditional fallacies?

Walton views traditional fallacies as weak but not necessarily fallacious arguments, instances of "presumptive reasoning."

What is Pragma Dialectics, and who developed it?

Frans H. van Eemeren and Rob Grootendorst developed Pragma Dialectics, combining pragmatics and normative dialectics.

What are the five "estates" of research in Pragma Dialectics?

Philosophical estate, theoretical estate, analytical estate, empirical estate, practical estate.

Topic-03: Tools for Critical Research

What is a Pragmatic Argument, and how does it evaluate political decisions?

Pragmatic Arguments evaluate political decisions based on their positive or negative effects, focusing on causality.

How do Critical Discourse Studies analyze political argumentation?

They use argument schemes (topoi) to analyze thematic threads in discourse, identifying context-specific topoi like the "topos of threat."

Why are rhetorical figures considered important in political discourse?

Rhetorical figures, including metaphor, are seen as techniques of strategic maneuvering, influencing discourse for ideological hegemony.

According to John Flowerdew, what are important discursive devices in achieving discursive hegemony?

Rhetorical strategies such as the use of indexicals and various figures of speech.
