

EDU501

Midterm 2026

By Nimma Malik

Subjective

Explain 'consecutive' and 'concurrent' model?

Consecutive Model:

In the consecutive model, a student first completes a bachelor's degree in one or more subjects. After finishing the degree, the student studies teaching in a separate course or program. This additional study helps the student become a qualified teacher.

Example:

A student first completes a Bachelor's degree in Mathematics. After graduation, the student takes a teaching diploma or B.Ed. program to become a Mathematics teacher.

Concurrent Model:

In the concurrent model, a student studies academic subjects and teaching methods at the same time. Both types of studies are completed together in one program. At the end of the program, the student receives a degree and a teaching qualification and can become a teacher.

Example:

A student enrolls in a B.Ed. (Hons) Elementary Education program where they study subjects like Mathematics, English, and Science along with teaching methods at the same time. After completing the program, the student becomes a qualified teacher.

How values of home different from school?

The values and teachings of the home and the school may be different, and when they are quite different, serious conflicts can result. This gap should be reduced through dialogue between the school administration, teachers, and parents. Students should not be forced to respect the values of one teacher and reject the values of another. The values from home, school, and teachers should be unified, with a focus on good common values.

Give example of community in a society?

Community is a group of people who live in the same area or share common interests, values, culture, or goals and support one another. Community size may be small, medium or large.

Examples

- ❖ **Religious community** – People who share the same religious thoughts and practices.
- ❖ **Occupational community** – People with the same occupation, such as:
 - ✚ Iron smiths
 - ✚ Gold smiths
 - ✚ Business community
 - ✚ Garment business community

What is meant by social class difference?

Social class difference means the difference in social status between people that affects education and communication. Because of these differences, many parents do not meet school administrators or teachers. They may feel they are not well dressed, not rich, behave differently, or cannot speak the same language, so they develop an inferiority complex and avoid visiting the school. Unfortunately, social class differences have effects on education.

Causes of Social Class Differences:

- ❖ Different income levels
- ❖ Education opportunities
- ❖ Type of jobs people do
- ❖ Access to resources

Explain collaboration?

Collaboration means bringing harmony among different stakeholders by working together. In learning, it is a situation in which two or more people learn or attempt to learn something together. Learners share experiences, help one another, and work toward a common task, where each individual depends on and is accountable to the others. Group learning should be encouraged.

Benefits of Collaboration:

- Generates more ideas and creativity.
- Combines different skills and expertise.
- Improves problem-solving.
- Increases efficiency and productivity.
- Helps people learn from one another.

Example:

Imagine a group of students creating a science project:

- ✚ One student researches the topic.

EDU501 Mids

- ✚ Another designs the presentation.
- ✚ A third prepares the demonstration.
- ✚ Together, they combine their work into a complete project.

This is collaboration because they are working jointly toward a shared goal.

Define authoritative in masculine approach?

Authoritative is the **gender sign** of authority and power in men. So, the male teachers they tend to have authoritative approach in teaching. But at the same time, we see that male teachers are not very authoritative rather they lack discipline in the students. Sometimes they become too friendly, especially with the boys 'student. In one way, it is helpful for the students because they share everything with their male friends as teacher. They can share those things with them which cannot be shared with the parents and their families because adolescents find it very embracing sometime to share the problems with their families and to their colleagues. So, it is better to them to friendly to the male teachers and discuss about it.

Three Major Social Institutions?

- 1)** Educational
- 2)** Academic
- 3)** Informative
- 4)** Creative
- 5)** Collaborative
- 6)** Religious
- 7)** Family (the first and most important social institution)

Difference between diversity, harmony, and tolerance?

Diversity:

Diversity is the first thing of acceptance. It refers to the existence and acceptance of different people, cultures, and backgrounds.

Example:

A classroom with students from different cities and cultures.

Harmony:

Harmony means creating unity and cooperation among people. A teacher generates unity and harmony in the class through peer work and teamwork. Harmony in the classroom is improved through six steps: **1)** Collaboration, **2)** Open Communication, **3)** Interaction, **4)** Encouragement, **5)** Review, and **6)** Feedback.

Example:

EDU501 Mids

Neighbors of different religions celebrating community events together.

Tolerance:

It means respect, acceptance, and appreciation of diversity. It is accepting and embracing other races, religions, and ideas without prejudice or judgment and respecting differences.

Example:

Listening politely to someone whose opinion is different from yours.

Collaboration effect on community education?

Collaboration creates **a climate of cooperation** among the school, teachers, parents, and community. It helps community members participate in school education, share knowledge and experience, provide information and documentaries about community work, and support learners. It also expands community education through self-help groups and voluntary efforts, while teachers guide the community in forming such groups.
